TMTB Morning Wrap TMTB 早间总结

TMT BREAKOUT
37 MINUTES AGO · PAID

Listen

Good morning. I leave for three days on a beautiful mini-honeymoon, come back, open TMTB Slack and the first thing I see is Jensen as a bird. Anything else I missed?

早上好。我离开三天去度了个美好的迷你蜜月，回来打开 TMTB Slack，第一眼看到的就是 Jensen 变成了一只鸟。我还错过了什么吗?

QQQs -1.5%, NVDA -8% and **Semis 2.5%** giving back some of yesterday's rally after the NYT report last night about Jensen's 2nd affair and articles overnight saying the board is having a meeting to discuss replacing Jensen. Tech futures took another step lower this morning after **NBIS's -14%** guide cut on 3p capacity push out.

QQQs -1.5%，NVDA -8%，半导体 2.5%，回吐了昨日部分涨幅，此前《纽约时报》昨晚报道称 Jensen 的第二段婚外情，且隔夜有文章称董事会正在开会讨论替换 Jensen。今早科技期货进一步走低，此前 NBIS 将指引下调了 -14%，原因是 3p 产能推迟。

Lots of questions and potential implications of Jensen getting ousted - lets go over a

few.

关于 Jensen 被赶下台，有很多问题和潜在影响——我们来过一遍。

The first is whether NVDA keeps its supply edge when its TSMC capacity rested on Jensen's relationships. Second, does NVDA cut prices to defend share from AMD and ASICs? Then there's the neocloud complex and all the deals Jensen made: NVDA has been the AI ecosystem's lender of last resort. Does a more cautious successor reined in by the board, without Jensen's speed (60 direct reports, no committees), unwind those deals rather than extend them? (**MRVL, LITE, CRWV** the co's who have benefitted most from Jensen's dealmaking). It also seems safe to expect a real crackdown on AI chips reaching unfriendly nations, with TheInfo already reporting this morning export curbs widening to 7 countries including Singapore. Whether Jensen gets ousted or not, it's consensus NVDA now having to be cleaner than clean in how they operate.

首先是，当台积电的产能依赖于 Jensen 的人脉关系时，NVDA 能否保持其供应链优势？其次，NVDA 会为了抵御 AMD 和 ASIC 的竞争而降价吗？还有 neo-cloud 集团以及 Jensen 达成的所有交易：NVDA 一直是 AI 生态系统的最后贷款人。如果一位受董事会约束、缺乏 Jensen 的速度（60 名直属下属，无委员会）的继任者更加谨慎，是会撤销而非延长这些交易吗？（MRVL、LITE、CRWV 是从 Jensen 的交易中获益最多的公司）。此外，似乎可以预期，针对流向不友好国家的 AI 芯片将会有真正的打击行动，TheInfo 今早已报道称出口管制扩大至包括新加坡在内的 7 个国家。 无论 Jensen 是否会被赶下台，目前的共识是，NVDA 现在在运营上必须比以往任何时候都更加清白。

Stock catching 5 downgrades this morning. Our favorite title of the bunch:

今早该股遭遇 5 次下调评级。其中我们最喜欢的标题是：

BERNSTEIN
SOCIETE GENERALE GROUP

12 November 2026

U.S. Semiconductors

NVIDIA (NVDA): Where did he find the time? Downgrading to Market-Perform

AMD +2% / AVGO +1% being seen as winners from this...The glass half full view of all

this is **NVDA** has a huge market cap, and $'s need to be put to work somewhere else...

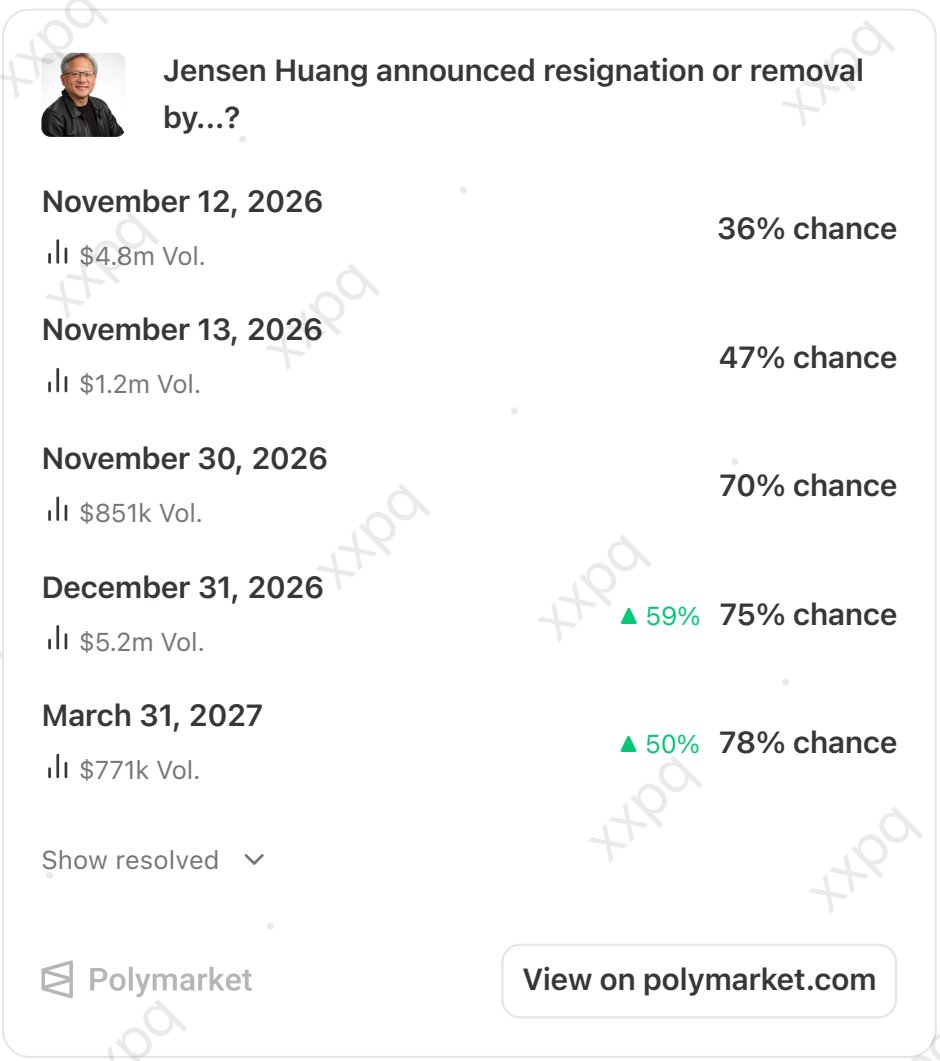

AMD +2% / AVGO +1% 被视为此事的赢家……对此的乐观看法是，NVDA 市值巨大，资金需要投入到其他地方……

Jensen's removal isn't a foregone conclusion however. On X, Elon has backed calls for the board to wait for the investigation's findings before acting, and Gavin Baker has suggested putting Jensen's future to a shareholder vote.

不过，Jensen 被免职并非已成定局。在 X 上，Elon 支持董事会等待调查结果再采取行动的呼声，Gavin Baker 则建议将 Jensen 的去留交由股东投票决定。

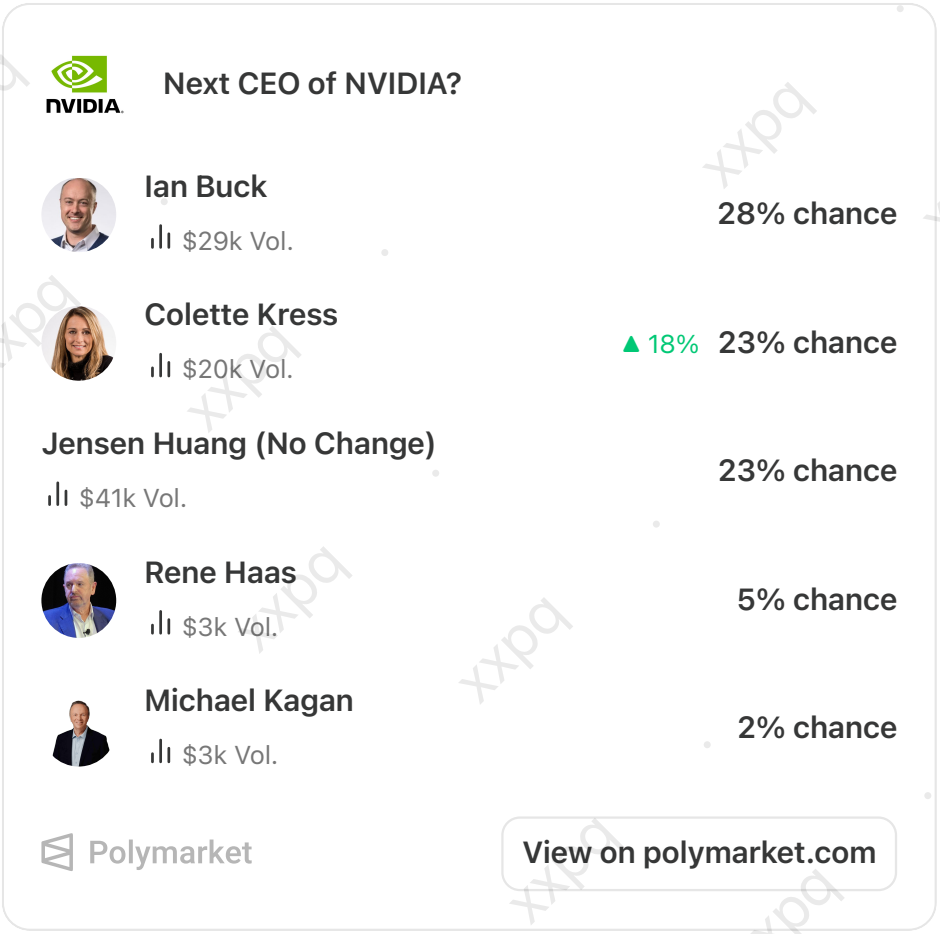

Fwiw, here is how the prediction markets are handicapping things:

顺便提一下，以下是预测市场对局势的评估：

And who is next in line?

接下来轮到谁?

Great discussion all night in TMTB Slack and a good discussion on when to buy NVDA here. A good bull vs. bear take below, with *gbellizzimotta* arguing Jensen's speed was the moat and ~7x CY28 isn't enough to catch the falling knife, and *ALC* saying a derisked, buyback-heavy NVDA after Jensen already has the bad news priced in:

昨晚 TMTB Slack 全程讨论热烈，关于此时买入 NVDA 的时机也有不错的讨论。下面是一份不错的看多与看空观点，其中 gbellizzimotta 认为 Jensen 的速度就是护城河，而 ~7x CY28 不足以接住下落的飞刀，ALC 则表示，在 Jensen 已经将坏消息计入价格之后，一个风险降低且回购力度大的 NVDA 值得关注：

gbellizzimotta Today at 2:28 AM
NVDA has always been very centralized around Jensen—he has 60 direct reports, and that's one of the reasons the company has been so fast and aggressive with capital allocation. That's also a big part of its moat—annual product iterations, new architectures every 2 years, and extreme co-design across the entire stack. Big question is whether new management would move as fast or be willing to take the same risks. There's also Jensen's personal relationship with Morris Chang and C.C. Wei. I don't think NVDA loses meaningful TSMC allocation overnight, but it could get a smaller share of incremental capacity over time or have to give up some gross margin to defend volumes. Nothing obvious here and very little visibility. The only silver lining is valuation—at $160, NVDA trades at ~7x CY28 EPS (low/mid $20s), but confidence in those numbers is low. In theory, less aggressive vendor financing would free up more FCF for buybacks, but would also hurt top-line growth. Even if the roadmap stays intact, hard to see the market wanting to catch this falling knife right now

ALC 8 minutes ago
I have a somewhat different opinion here.. I don't own NVDA but I'm looking to buy, probably in tranches leaving half for when they announce the new CEO. I think NVDA under JH was not working. His chips were being replaced by XPU accross the board. The so called CUDA moat is no more after Opus, Kernel Evolve etc. Plus the NVDA stack from a ROI point of view was a real challenge for most large players that are money good. Reason why all hyperscalers and frontier labs are developing their own sillicon. What Jensen did is to aggressively create an echo system of clients outside the stronger hands with capacity to build their own chips. Most of their 70% growth in 27 was coming from those weaker hands (eg neoclouds) and possibly China via Singapore Malaysia etc. So... if a new guy or gal comes along the first imperative is to derisk. Out with the circular deals. Out with the financial engineering. Possibly, they may lower prices to try to recoup some of the lost inference market share and be more competitive relative to TPU/Trainium. And the money machine will continue which means the company will be able to do a lot of buybacks. It's a more pedestrian company, still competitive but no longer the king. And... given where it's trading, there is a lot of bad news already discounted. My 2cents.

Overnight, **Asia** mixed: TPX +0.2%, NKY -0.7%, Hang Seng -1.26%, HSCEI -1.4%, SHCOMP -0.67%, Shenzhen -1.62%, Taiwan TAIEX -2.63%, Korea KOSPI -0.61%

隔夜，亚洲股市涨跌互现：TPX +0.2%，NKY -0.7%，恒生指数 -1.26%，HSCEI -1.4%，SHCOMP -0.67%，深圳 -1.62%，台湾 TAIEX -2.63%，韩国 KOSPI -0.61%

Yields popping 5-8bps with **Oil -1%**

收益率跳升 5-8 个基点，原油 -1%

Pre-market, NBIS -13% on mixed results after rallying 15% following CRWV's EPS yesterday, with a guide cut on delayed 3p capacity. 2027 guide looks good.

盘前，NBIS -13%，因业绩喜忧参半；此前该股在昨天 CRWV 公布 EPS 后大涨 15%，并因 3p 产能延迟而下调业绩指引。2027 年业绩指引看起来不错。

3Q revenue of $981M (+571% y/y) beat Street ($904M), but it includes ~$325M of non-recurring revenue from the new asset-light model; ex that it's ~$656M, ~$248M below Street. Adj. EBITDA of $466M (47.5% margin) beat Street's $359M (39.7%), with no split of the one-off's contribution. 2026 revenue moves to the low end of the $3.0-3.4B range (Street $3.34B) as some third-party capacity slips into 1H27, implying ~$1.04B of 4Q revenue vs. Street's $1.46B (implied EBTIDA $370M vs $650M); the $7-9B ARR guide for December becomes >$7B in February (my read is its slipped so Dec is lower), and 2026 capex rises to ~$27B (above the $20-25B range). The first 2027 outlook is $12-13B of revenue (Street $11.7B) and pre-tax breakeven by 4Q27, on $40-45B of capex (Street $30.4B). RPO only +3% q/q to $38,7B.

三季度营收 9.81 亿美元（同比+571%）超预期（9.04 亿美元），但其中包含来自新轻资产模式的~$3.25 亿美元非经常性营收；剔除该部分后为~$6.56 亿美元，较预期低~$2.48 亿美元。调整后 EBITDA 为 4.66 亿美元（利润率 47.5%），超预期的 3.59 亿美元（39.7%），但未披露一次性项目的贡献明细。由于部分第三方产能延期至 27 年上半年，2026 年营收移至 30-34 亿美元区间的下限（预期 33.4 亿美元），这意味着四季度营收为~$10.4 亿美元，而预期为 14.6 亿美元（隐含 EBITDA 为 3.7 亿美元，对比 6.5 亿美元）；12 月 70-90 亿美元的 ARR 指引在 2 月变为>70 亿美元（我的解读是该指引已推迟，因此 12 月数值更低），且 2026 年资本支出增至~$270 亿美元（高于 200-250 亿美元区间）。首个 2027 年展望为营收 120-130 亿美元（预期 117 亿美元），并于 27 年四季度实现税前盈亏平衡，资本支出为 400-450 亿美元（预期 304 亿美元）。 RPO 环比仅增长 3%，至 387 亿美元。

Key quote (letter): *"We are updating our 2026 guidance for one change: some third-party capacity we expected to come online this year is now scheduled for the first half of 2027. The contracts behind that capacity remain in place."*

关键引语（信函）："我们正在更新 2026 年指引，仅因一项变化：我们原预期今年投入使用的部分第三方产能，现计划于 2027 年上半年上线。该产能背后的合同依然有效。"

Good to be back. Let's get to it...

很高兴回来。让我们开始吧……

NVDA: Board weighs Huang's removal – Reuters / WSJ

NVDA：董事会考虑罢免黄仁勋——路透社 / 华尔街日报

Nvidia's board met Wednesday to consider removing Jensen Huang, Reuters reports; the WSJ says directors are preparing an ouster. No decision or successor has been announced. The leadership crisis adds uncertainty ahead of November 17 earnings, after the board had publicly backed Huang on Sunday.

据路透社报道，英伟达董事会周三开会考虑罢免黄仁勋；《华尔街日报》称董事们正准备将其解职。目前尚未宣布任何决定或继任者。这场领导层危机为 11 月 17 日的财报发布前夕增添了不确定性，此前董事会曾在周日公开支持黄仁勋。

NVDA: Five downgrades as Huang succession/governance risk overwhelms otherwise intact fundamentals

NVDA：五次下调评级，黄仁勋的继任/治理风险盖过了其他方面完好的基本面

William Blair, Oppenheimer, **Evercore Melius** and **Bernstein** all downgrade NVDA as reports of a potential Jensen Huang departure, expanding allegations and board investigations create a major leadership/sentiment overhang with no obvious successor. Oppenheimer moves to Perform and removes its $315 PT despite unchanged CY26/27/28 EPS of $9.40/$16.84/$23.27, warning Huang's outsized strategic role creates execution and potential "brain drain" risk; Evercore cuts to In Line/$186 from $465 and Bernstein to Market Perform/$200 from $400, both arguing prolonged investigations/succession uncertainty should drive further P/E compression. William Blair similarly cuts to Market Perform, adding slower AI buildout, regulatory scrutiny and competition to the execution risks.

William Blair、Oppenheimer、Evercore Melius 和 Bernstein 均下调 NVDA 评级，因有关 Jensen Huang 可能离职的报道、不断扩大的指控以及董事会调查，造成重大的领导层/情绪压力，且无明显继任者。Oppenheimer 将评级下调至 Perform，并撤销 315 美元的目标价，尽管 2026/27/28 财年每股收益（EPS）仍为 9.40/16.84/23.27 美元不变，但警告称 Huang 的关键战略角色带来执行风险和潜在的"人才流失"风险；Evercore 将评级从 465 美元下调至 In Line/186 美元，Bernstein 从 400 美元下调至 Market Perform/200 美元，两者均认为，长期调查/继任者不确定性应进一步推动市盈率压缩。William Blair 同样下调至 Market Perform，并将 AI 建设放缓、监管审查和竞争纳入执行风险。

Melius: *"We thought we had experience, but nothing prepares you for what has happened at $NVDA over the last few weeks. The only situation remotely close to this we can recall was HP in 2010. Waiting to see what that Board would do (and who they would hire) that time didn't work out."*

Melius："我们以为我们有经验，但过去几周 $NVDA 发生的一切让人始料未及。我们能回想起的唯一类似情况是 2010 年的惠普（HP）。当时等待董事会采取行动（以及他们会聘请谁）并没有奏效。"

None of the firms are calling out a fundamental collapse: DC/AI demand, earnings and FCF remain strong and valuation has compressed sharply, but the group broadly sees leadership visibility and governance risk dominating the stock near term, with AMD/MRVL/AVGO among potential beneficiaries.

没有任何一家公司指出基本面崩盘：DC/AI 需求、盈利和自由现金流依然强劲，估值已大幅压缩，但该群体普遍认为，领导层可见度和治理风险将在近期主导股价，AMD/MRVL/AVGO 是潜在的受益者。

AMD: William Blair upgrades to Outperform as INTC slips + NVDA turmoil improve competitive setup

AMD：William Blair 将评级上调至跑赢大盘，因 INTC 下滑且 NVDA 动荡改善了竞争格局

William Blair upgrades AMD from Market Perform, no PT, as INTC Diamond Rapids slips to mid-2027 while Venice ramps with strong demand and server rev is expected to more than double next year. Helios is now live at Anthropic, META, MSFT, OpenAI and ORCL, with MI500 due 3Q27, while NVDA's issues could strengthen AMD as a second source; after an ~18% pullback, valuation has fallen to ~31x/21x CY27/28 EPS. Risks remain custom ASICs, Arm, HBM/CoWoS supply and warrant dilution.

William Blair 将 AMD 评级从"与大盘持平"上调，未设目标价，原因是 INTC 的 Diamond Rapids 推迟至 2027 年年中，而 Venice 需求强劲且正在放量，预计明年服务器收入将翻倍以上。Helios 现已在 Anthropic、META、MSFT、OpenAI 和 ORCL 投入使用，MI500 预计于 2027 年第三季度推出，而 NVDA 的问题可能强化 AMD 作为第二供应商的地位；在回调 ~18% 后，估值已降至 ~31x/21x 的 2027/28 财年 EPS。风险仍包括定制 ASIC、Arm、HBM/CoWoS 供应以及认股权证摊薄。

NVDA / China AI: U.S. prepares tighter remote-compute controls – The Information / Reuters

NVDA / 中国 AI：美国准备实施更严格的远程计算管控 – The Information / Reuters

Commerce is finalizing rules extending advanced-chip licensing to seven additional countries, including Singapore and Malaysia, and restricting Chinese firms' remote access to Blackwell-class chips. The rules could arrive this month but remain under review. Reuters separately reports Chinese AI firms rushing to secure overseas Nvidia compute before restrictions tighten.

商务部正在最终确定规则，将先进芯片许可要求扩展至包括新加坡和马来西亚在内的另外七个国家，并限制中国企业远程访问 Blackwell 级芯片。这些规则可能于本月出台，但仍处于审查阶段。路透社另报道称，中国 AI 企业正赶在限制收紧前争相获取海外英伟达算力。

AMD: RBC management meeting says DC demand exceeds supply with visibility into 1H28

AMD：RBC 管理层会议称数据中心需求超过供应，需求可见性已延伸至 2028 年上半年

Following an investor meeting with finance/IR, RBC says MI4xx/Helios should grow double digits q/q through 2027, MI5xx remains on track for 2H27 and AI GPU rev should surpass server CPU in 4Q26; management targets 100% server CPU growth in 2027. AMD has up to 8GW of frontier-lab deals through 2030 and RBC sees AI GPU/XPU share rising from ~5% to ~10% by 2028, with packaging/DRAM supply and rack-scale execution the key constraints. Sector Perform, PT $540 from $400.

在与财务/投资者关系部门举行投资者会议后，RBC 表示 MI4xx/Helios 应在 2027 年前实现两位数的季度环比增长，MI5xx 仍按计划在 2027 年下半年推出，AI GPU 收入应在 2026 年第四季度超过服务器 CPU；管理层目标是在 2027 年实现服务器 CPU 100% 的增长。AMD 拥有截至 2030 年高达 8GW 的前沿实验室交易，RBC 预计到 2028 年 AI GPU/XPU 份额将从 ~5% 上升至 ~10%，封装/DRAM 供应和机架级执行是主要制约因素。行业评级为“与大盘持平”，目标价从 400 美元上调至 540 美元。

Samsung / SK Hynix / NAND: Chinese SSD order cuts redirect supply to U.S. – ZDNet Korea

三星 / SK 海力士 / NAND：中国 SSD 订单削减将供应转移至美国 – ZDNet Korea

Samsung and SK Hynix are reallocating some enterprise-SSD supply from Chinese customers to U.S. cloud providers, ZDNet reports. Chinese buyers have reduced orders as GPU and HBM restrictions delay AI deployments. Industry sources expect strong U.S. demand to absorb the displaced volume, limiting the effect on overall NAND demand.

据 ZDNet 报道，三星和 SK 海力士正将部分企业级 SSD 供应从中国客户转移至美国云服务商。由于 GPU 和 HBM 的限制延缓了 AI 部署，中国买家已减少订单。业内消息人士预计，美国强劲的需求将消化这些转移的份额，从而限制其对整体 NAND 需求的影响。

STX: BofA IR meeting says C27 nearline capacity is essentially sold out

STX：美银 IR 会议表示 C27 近线容量已基本售罄

Following meetings with STX IR, BofA says most C27 nearline EB volumes are committed and LTAs cover most C28, with management seeing little risk from DC slowing or neocloud financing given industry undersupply. Sep-Q softness was product-transition/Mozaic staging rather than demand, pricing still has upside and incremental GM is estimated in the high-70s to low-80s%. Buy/$1,200 on 16x C28 EPS of $75.07.

在与 STX 投资者关系部门会面后，美银表示，C27 近线企业级（EB）硬盘的大部分产能已被预订，长期协议（LTA）覆盖了大部分 C28 的产能；鉴于行业供应不足，管理层认为数据中心放缓或新型云服务融资带来的风险很小。第三季度的疲软是产品过渡/Mozaic 部署所致，而非需求问题，定价仍有上行空间，预计增量毛利率在 70% 高位至 80% 低位之间。基于 C28 每股收益 75.07 美元的 16 倍估值，给予“买入”评级，目标价 1,200 美元。

WDC: BofA management meetings show demand above supply with commitments extending into C29+

WDC：美银管理层会议显示需求高于供给，且承诺订单已延至 C29 及以后

Following meetings with the CFO/IR, BofA says WDC’s top five customers have committed C27 base volumes, two extend into C28 and one into C29, with no order changes from neocloud uncertainty. Two additional HAMR qualifications are expected in the March quarter, volume ramps in 1H27 and incremental C27 capacity carries higher pricing, though DRAM/NAND inflation pressures cost/TB for 3-4 quarters. Buy/$800.

在与 CFO/IR 会面后，美银表示 WDC 前五大客户已承诺 C27 基准销量，其中两家延伸至 C28，一家延伸至 C29，且未因新云不确定性出现订单变动。预计在 3 月季度将完成两项额外的 HAMR 认证，27 年上半年开始量产爬坡，且增量 C27 产能享有更高定价，尽管 DRAM/NAND 通胀在 3-4 个季度内对成本/TB 造成压力。买入/800 美元。

P: UBS checks support upside into the print but valuation keeps it at Sell

P：UBS 核查支持财报前上行空间，但估值使其维持卖出评级

UBS Evidence Lab finds ~80% of respondents calling all-flash demand Strong/Very Strong, with discounting falling despite 50-100% storage price increases. UBS raises October-quarter rev to $1.35B above guide and FY28 EPS 34% to $3.95 on a second hyperscaler deal adding ~$480M of 2H FY28 rev, but remains below Street $4.18 and sees NAND costs pressuring GM. Sell, PT $88 from $80.

瑞银 Evidence Lab 发现，~80% 的受访者称全闪存需求强劲/非常强劲，尽管存储价格上涨了 50-100%，但折扣力度却在下降。瑞银将 10 月季度营收上调至 13.5 亿美元，高于指引，并将 2028 财年每股收益上调 34% 至 3.95 美元，因第二家超大规模云服务商客户交易为 2028 财年下半年增加了 ~4.8 亿美元营收，但仍低于市场预期的 4.18 美元，并认为 NAND 成本将给毛利率带来压力。评级为卖出，目标价从 80 美元上调至 88 美元。

QCOM: BofA IR call says DC is moving from simulation to silicon, but execution proof still needed

QCOM：美银 IR 电话会议表示，数据中心正从模拟转向硅片，但仍需证明执行力

Following a virtual IR fireside, BofA says HBC real-silicon results match simulations, merchant XPU/CPU opportunities should advance over the next 3-6 months and most of the $15B FY29 DC target is already covered. The $5B FY27 DC target is supply constrained, but DC mix dilutes QCT GM 1.5-2pts while Apple approaches zero and handset memory costs remain a drag. Underperform/$170, with re-rating requiring proven DC execution.

继一场线上 IR 炉边谈话之后，美银表示 HBC 的实硅结果与仿真相符，商用 XPU/CPU 机会应在未来 3-6 个月内推进，且 150 亿美元 FY29 DC 目标的大部分已落实。50 亿美元 FY27 DC 目标受供应限制，但 DC 组合使 QCT 毛利率稀释 1.5-2 个百分点，同时 Apple 接近零，且手机内存成本仍是拖累。评级为跑输大盘/170 美元，重估需证明 DC 执行力。

MU / China Memory: Cotton calls for CXMT export blacklisting – CNBC

MU / 中国存储：Cotton 呼吁将 CXMT 列入出口黑名单 – CNBC

Senator Tom Cotton urged Commerce to add Chinese DRAM maker CXMT to its Entity List, which would restrict access to U.S. technology. The request raises potential supply-chain risk for a growing memory competitor; Commerce has not announced the designation. CXMT's existing Defense Department listing is separate.

参议员汤姆·科顿敦促商务部将中国 DRAM 制造商 CXMT 列入实体清单，这将限制其获取美国技术。这一请求给这家不断增长的存储芯片竞争对手带来了潜在的供应链风险；商务部尚未宣布相关指定。CXMT 此前被列入国防部名单是另一回事。更多一手研报请加微信：FCCNN88

GEV: MS says Siemens Energy targets reinforce its above-Street 2030 bull case

GEV：摩根士丹利表示，西门子能源的目标强化了其高于市场共识的 2030 年看涨情形

Siemens Energy raised its margin target to 20-22% and disclosed ~1,400bps of FY26 gas backlog margin improvement, supporting MS's view that GEV pricing/margins can continue rising. MS models 2030 rev/EBITDA of $85.7B/$23.9B vs. Street $79.3B/$20.4B, with the gas market at 130-150GW annually through 2035. Potential slot cancellations are the debate, but MS expects re-contracting at higher prices; OW/$1,350.

西门子能源上调其利润率目标至 20-22%，并披露 26 财年燃气业务储备利润率改善~1,400 个基点，支持了 MS 的观点，即 GEV 的定价/利润率可以继续上升。MS 预测 2030 年营收/EBITDA 为 857 亿美元/239 亿美元，而市场预期为 793 亿美元/204 亿美元，并预计到 2035 年燃气市场年规模将达 130-150GW。潜在的档期取消是争论焦点，但 MS 预计能以更高价格重新签约；增持/1,350 美元。

GEV: Jefferies checks suggest cancelled turbine slots can be resold at materially higher prices

GEV：杰富瑞核查表明，取消的涡轮机档期可以以显著更高的价格转售

Following EEI and EPC/utility checks, Jefferies says secondary-market turbine pricing is ~3x GEV's current order-book pricing, while non-refundable deposits on cancelled speculative slots create additional cash upside when capacity is resold. Large-frame CCGT availability has loosened somewhat, but utilities continue ordering into the early 2030s; the main negative is further delay/cost inflation at OPG's BWRX-300 SMR. Buy/$1,100.

继 EEI 和 EPC/公用事业公司核查之后，Jefferies 表示二级市场涡轮机定价约为 GEV 当前订单定价的 3 倍，而取消投机性机位时的不可退还存款在产能转售时带来额外的现金上行空间。大型 CCGT 的可用性略有松动，但公用事业公司仍在持续订购至 2030 年代初；主要负面因素是 OPG 的 BWRX-300 小型模块化反应堆（SMR）进一步延期/成本通胀。买入/1,100 美元。

GEV: BofA says record gas turbine orders reinforce GEV share leadership

GEV：美银表示创纪录的燃气轮机订单巩固了 GEV 的市场份额领导地位

McCoy data show global 9M26 turbine orders hit a record 93.8GW, +43% y/y, with GEV taking 42% of global MW and 51% in North America, rising to 68%/74% in 3Q. Large-turbine demand is at its strongest in 10+ years and small-turbine orders are 2.3x last year, though BofA's 2027 EPS of $22.86 remains below Street $25.75. Buy/$1,310.

McCoy 数据显示，全球 9M26 涡轮机订单创下 93.8GW 的历史新高，同比增长 43%，其中 GEV 占据全球 42% 的兆瓦数份额，在北美占据 51% 的份额，第三季度这一比例分别上升至 68%/74%。大型涡轮机需求处于 10 多年来的最强水平，小型涡轮机订单是去年的 2.3 倍，尽管美银 2027 年每股收益 22.86 美元的预测仍低于市场预期的 25.75 美元。买入评级，目标价 1,310 美元。

SHOP: Hearing 3p saying GPV tracking inline with street.

SHOP：听说 3p 表示 GPV 跟踪情况与市场预期一致。

BABA: Alibaba upgraded to Buy from Hold at DZ Bank

BABA：德意志银行将阿里巴巴评级从持有上调至买入

PANW: DB partner survey puts PANW clearly ahead of security peers into F1Q27

PANW：德银合作伙伴调查显示，PANW 在进入 F1Q27 时明显领先于安全同行

DB's 50-partner survey shows PANW with the strongest above-plan result at 48% vs. CRWD 27% and ZS -5%, highest 12-month optimism at 65% and 42% naming it best positioned for AI security. DB expects rev ~1-1.5% above guide, NGS ARR ~1% above and ~$30M op-income upside, though Chronosphere contribution may obscure organic NNARR and firewall demand faces memory constraints. Buy/$430.

DB 的 50 位合作伙伴调查显示，PANW 表现最佳，超计划结果达 48%，而 CRWD 为 27%，ZS 为 -5%；12 个月乐观情绪最高，达 65%，42% 的受访者认为其在 AI 安全领域定位最佳。DB 预计营收 ~1-1.5% 高于指引，NGS ARR ~1% 高于指引，~3000 万美元运营收入超预期，不过 Chronosphere 的贡献可能会掩盖有机 NNARR，且防火墙需求面临内存限制。评级：买入/目标价 430 美元。

SNOW: Evercore checks support meaningful AI upside,

with FY28 bull case ~10% above Street

SNOW：Evercore 调研支持显著的 AI 上行空间，FY28 牛市情形 ~10% 高于市场预期

Following customer, partner and expert checks, Evercore models FY28 product rev at $7.89B in its base case vs. $8.68B in the bull case, with Cortex AI reaching $1.24B and CoCo the largest swing factor. CoCo has 9,100+ weekly accounts, CoWork 5,800, Automations is GA and power users are spending $1K-2K/month, though many pilots remain pre-production and token costs/spending caps are risks. Evercore expects an initial FY28 product guide of 38-39%; OP/$430.

在客户、合作伙伴和专家核查之后，Evercore 在其基准情景下将 FY28 产品收入建模为 78.9 亿美元，而在牛市情景下为 86.8 亿美元，其中 Cortex AI 达到 12.4 亿美元，CoCo 是最大的波动因素。CoCo 拥有 9,100+周活跃账户，CoWork 为 5,800，Automations 已正式发布（GA），重度用户每月花费 1K-2K 美元，尽管许多试点仍处于预生产阶段，且代币成本/支出上限是风险因素。Evercore 预计 FY28 产品初始指引为 38-39%；OP/430 美元。

TTWO: BofA says ~15M GTA VI day-one units would keep the ~50M FY27 bogey in play

TTWO：BofA 表示，~15M 的 GTA VI 首日销量将使 ~50M 的 FY27 目标仍有实现可能

Client conversations point to a ~50M FY27 unit bogey vs. ~33M implied by guidance and BofA's 45M, with ~15M day-one units and ~$1.9B launch-weekend sales the key signals after the Nov. 19 launch. BofA's FY27/28 EPS of $7.43/$13.02 sits well above Street $6.95/$10.04, while GTA Online needs another ~$200-250M y/y in 2H27. Buy/$330.

客户交流表明，FY27 单位销量目标约为 ~50M，而指引隐含的数值和美银的 45M 为 ~33M，在 11 月 19 日发布后，~15M 的首日销量和 ~$1.9B 的首发周末销售额是关键信号。美银 FY27/28 EPS 为 $7.43/$13.02，远高于华尔街的 $6.95/$10.04，同时 GTA Online 在 2H27 需要同比再增加 ~$200-250M。买入/$330。

MSFT: MS Ignite preview looks for proof AI adoption is

broadening into monetization

MSFT：微软 Ignite 大会预览，寻求 AI 采用正广泛转化为货币化的证据

F1Q27 showed Azure +48% cc, Copilot daily users +~50% q/q, Foundry rev >3x and 19K+ customers across Fabric/Foundry; Ignite needs to show these trends converting into seats, E7 migration and usage-based spend. Key watch items are Agent 365, Maia 300 and faster capacity deployment, with Nadella/CFO meetings Nov. 17-18. MS FY28 EPS of $24.41 is above Street $23.97; OW/$650.

F1Q27 显示 Azure 同比增长 48%，Copilot 日活跃用户环比增长约 50%，Foundry 收入增长超 3 倍，Fabric/Foundry 客户总数超 1.9 万；Ignite 大会需展示这些趋势转化为席位销售、E7 迁移以及基于使用量的支出。重点关注项目包括 Agent 365、Maia 300 以及更快的产能部署，Nadella/CFO 会议将于 11 月 17-18 日举行。微软 FY28 每股收益（EPS）为 24.41 美元，高于市场预期的 23.97 美元；评级为增持/目标价 650 美元。

CRM: Mizuho checks are mixed but still point to cRPO above the 14% guide

CRM：Mizuho 的调研反馈喜忧参半，但仍指向 cRPO 高于 14% 的指引

Some partners modestly missed plan, but upsells remained solid and several renewals carried tens of millions of ACV, leaving Mizuho expecting F3Q cRPO above guide and F4Q guidance slightly above Street's ~11%. F3Q rev/EPS of $11.46B/$3.42 are near Street, while gradual Agentforce adoption and accelerating M&A across Braze, Listen Labs and Cresta remain the key debates. OP/$280.

部分合作伙伴略低于计划，但增销保持稳健，且数笔续约带来了数千万美元的年度合同价值（ACV），这使得野村预计第三季度剩余履约义务（cRPO）将高于指引，第四季度指引略高于市场预期的 ~11%。第三季度营收/每股收益为 114.6 亿美元/3.42 美元，接近市场预期，而 Agentforce 的逐步采用，以及 Braze、Listen Labs 和 Cresta 的并购活动加速，仍是关键讨论点。OP/$280。

WDAY: Oppenheimer survey supports AI durability but not near-term growth acceleration

WDAY：Oppenheimer 调查支持 AI 的持续性，但不支持近期增长加速

Its 67-customer Rising survey shows only 18% building LLM workflows instead of buying Workday vs. 35% in Salesforce, while 48% plan to standardize agents on WDAY; however, just 36% are in AI production and 75% expect flat seats. Budget sentiment weakened sharply, offset by a record 51% live on or implementing Financials, and Oppenheimer sees slight F3Q cRPO upside but FY28 Street subscription growth as too high. OP/$220.

其 67 位客户的 Rising 调查显示，仅有 18%在构建而非购买 Workday 的 LLM 工作流，而 Salesforce 中该比例为 35%，同时 48%计划在 WDAY 上标准化代理；然而，仅 36%处于 AI 生产阶段，75%预期席位持平。预算情绪显著减弱，但创纪录的 51%已上线或正在实施 Financials 抵消了这一影响，Oppenheimer 预计 F3Q cRPO 略有上行，但认为 FY28 Street 的订阅增长预期过高。OP/$220。

ACN: William Blair AI leader call increases confidence in opportunity, but near-term organic growth remains soft

ACN：William Blair AI 领导者通话增强了对该机会的信心，但近期有机增长依然疲软

Following a call with Chief AI/Data Officer Lan Guan, William Blair notes only ~15% of 18K+ AI projects since early 2023 have scaled and just ~5% of clients can repeatedly scale, while FY27 guidance implies ~2% organic growth vs. 3% in FY26. The key debate is AI-driven deflation in legacy services versus new readiness/run opportunities, with productivity savings shared with clients. Market Perform at 17.3x FY27 EPS.

在与首席人工智能/数据官 Lan Guan 通话后，William Blair 指出，自 2023 年初以来的 1.8 万多个 AI 项目中，仅有 ~15% 实现了规模化，且只有 ~5% 的客户能够反复规模化，而 FY27 业绩指引暗示 ~2% 的有机增长，相比之下 FY26 为 3%。核心争议在于传统服务中由 AI 驱动的通缩与新的就绪/运行机会之间的对比，其中生产力节约部分与客户共享。评级为与大盘持平，FY27 EPS 为 17.3 倍。

ZM: StoneX sees a bounded AI bet through Anthropic plus improving core growth ambitions

ZM：StoneX 认为通过 Anthropic 进行了一项有界的 AI 押注，加上不断改善的核心增长雄心

Following Zoomtopia, StoneX's $125 PT assumes Anthropic at a $965B valuation and rises to ~$130 at $1.4T, implying an Anthropic-adjusted FY27 FCF yield of ~10.1%. Zoom targets 6-8% organic growth by FY30 vs. 4.4% in FY26, with My Notes at 1.5M MAUs, AI ~60% of CX ARR and 15 new AI Services APIs, while online remains flat. Buy, with the main risk that other agent platforms own the workflow layer.

继 Zoomtopia 之后，StoneX 的 125 美元目标价假设 Anthropic 估值为 9650 亿美元，若升至 1.4 万亿美元则目标价上调至 130 美元，这意味着经 Anthropic 调整后的 FY27 自由现金流收益率为 10.1%。Zoom 的目标是在 FY30 实现 6-8% 的有机增长，而 FY26 为 4.4%，其中 My Notes 拥有 150 万月活用户，AI 占 CX ARR 的 60%，并推出 15 个新的 AI 服务 API，而在线业务保持持平。评级为买入，主要风险在于其他代理平台掌控工作流层。

HUBS: William Blair bus tour says SEO deterioration is outpacing new acquisition channels

HUBS：William Blair 的调研之旅指出，SEO 的恶化速度超过了新获客渠道。

Following William Blair's Boston bus tour, SEO pressure worsened in 3Q while AEO, LLM connectors and paid channels are growing but not yet enough to offset the decline. Upmarket cycles are also lengthening as CIO-led buying committees expand, leaving NRR under pressure with an uncertain stabilization timeline. Market Perform at 10x 2027 FCF.

继 William Blair 的波士顿路演之后，第三季度 SEO 压力加剧，尽管 AEO、LLM 连接器和付费渠道在增长，但尚不足以抵消下滑。随着 CIO 主导的采购委员会扩大，高端市场周期也在延长，导致 NRR 承压，企稳时间表尚不确定。给予"与大盘持平"评级，基于 2027 年 FCF 的 10 倍估值。

TSLA: CLSA China tracker shows sharp post-launch normalization across new-force EV brands

TSLA：CLSA 中国追踪显示，新势力电动汽车品牌在发布后出现急剧的常态化回落

Weekly orders across new-force brands fell 64% w/w after launch surges, including Li Auto -74% and XPeng -62%, while Geely Galaxy rose 11% for a third week. October China domestic passenger-vehicle sales fell 27% y/y as exports rose 62%, and CLSA expects less seasonal improvement than normal given limited stimulus. No TSLA rating.

新势力品牌的周订单在发布激增后环比下降 64%，包括理想汽车 -74% 和小鹏 -62%，而吉利银河连续第三周上涨 11%。10 月中国国内乘用车销量同比下降 27%，而出口增长 62%，CLSA 预计由于刺激措施有限，季节性改善将弱于往常。无 TSLA 评级。

CPNG: UBS says larger KFTC fine is manageable as October spending rebounds

CPNG：瑞银称随着 10 月支出反弹，更大的 KFTC 罚款可控

The $221M Coupang Eats fine equals ~11% of 2027 EBITDA and is easily covered by ~$5.4B cash, while UBS Evidence Lab shows October net spending growth rebounding to 5.1% from 0.9% and share reaching 11.7%, the highest since July 2025. That suggests September weakness was largely Chuseok timing/promotions, though a separate KFTC review of WOW bundling remains open. Buy/$25.

这笔 2.21 亿美元的 Coupang Eats 罚款相当于 2027 年 EBITDA 的~11%，且可由~54 亿美元现金轻松覆盖，同时瑞银 Evidence Lab 数据显示 10 月净支出增长从 0.9%反弹至 5.1%，份额达到 11.7%，为 2025 年 7 月以来最高。这表明 9 月的疲软很大程度上是中秋节时机/促销所致，不过 KFTC 对 WOW 捆绑销售的单独审查仍在进行中。买入/25 美元。

BIDU: Jefferies Baidu World takeaways highlight enterprise agents, ERNIE + Kunlun roadmap

BIDU：杰富瑞百度世界大会要点突显企业代理、ERNIE + 昆仑路线图

Baidu unveiled ERNIE 5.5 Flash Preview, Lightning/Yijing models, expanded enterprise-agent tools and Ciyuansuo token exchange now processing ~700B daily tokens. Kunlun's roadmap extends to M300 in 2027 with 6-10x throughput gains, while Apollo is operating across 28 cities with fully driverless service in Abu Dhabi/Dubai. Buy/$158.

百度发布了 ERNIE 5.5 Flash Preview、Lightning/亦言模型，扩展了企业级智能体工具，词源所 token 交易所目前每日处理 ~700B token。昆仑的路线图延伸至 2027 年的 M300，吞吐量将提升 6-10 倍，而 Apollo 已在 28 个城市运营，并在阿布扎比/迪拜提供全无人驾驶服务。买入/158 美元。

OLED: Oppenheimer management meeting sees clearer IT runway but near-term margin pressure

OLED：奥本海默管理层会议显示 IT 业务前景更清晰，但短期面临利润率压力

Following a management meeting, Oppenheimer says OLED IT penetration could rise from ~5% to 15% by 2030 on ~$20B of new fabs, with Gen 8.6 capacity +~10% by end-2027, though blue revenue is unlikely in 2027. GM is tracking near the 74% low end as iridium costs rise, materials mix dilutes margins and China rev is down ~13% YTD, while the 2028 Samsung renewal remains open. OP/$115.

在管理层会议后，奥本海默表示，OLED IT 渗透率可能从~5%升至 2030 年的 15%，基于~200 亿美元的新晶圆厂投资，且 8.6 代产能到 2027 年底将增加约 10%，尽管 2027 年不太可能有蓝色材料收入。毛利率正接近 74%的低端，因铱成本上升、材料组合稀释利润率，且中国收入年初至今下降~13%，而 2028 年三星续约仍悬而未决。目标价 115 美元。

NEWS

AI / Data-Center Policy: Hawley backs a nationwide construction pause – Politico

AI / 数据中心政策：霍利支持全国范围内暂停建设 —— Politico

Senator Josh Hawley became the first Senate Republican to support a nationwide data-center construction moratorium until Congress guarantees projects will not raise household utility bills. This remains a political proposal, with most Republicans still supporting construction subject to consumer protections.

参议员乔什·霍利成为首位支持全国范围内暂停数据中心建设的共和党参议员，直至国会保证项目不会推高家庭公用事业账单。这仍是一项政治提议，大多数共和党人仍支持在消费者保护的前提下进行建设。

MSFT / Data Centers: Power costs and curtailment remain constraints – Bloomberg / Bloomberg

MSFT / 数据中心：电力成本和限电仍是制约因素 – Bloomberg / Bloomberg

Microsoft pledged to fund data-center power needs without government subsidies or raising other customers' bills; its West Texas project remains held up by a permitting moratorium. Separately, ERCOT's chief will seek legislative authority to curtail data centers before a power emergency, earlier than current rules allow

微软承诺在不依赖政府补贴或不提高其他客户账单的情况下，为数据中心的电力需求提供资金；其西德克萨斯州项目仍因许可暂停而受阻。此外，ERCOT 负责人将寻求立法授权，以便在电力紧急情况发生前对数据中心进行限电，这比现行规则允许的时间更早

AI Infrastructure / Credit: Waxman warns of $200B in idle chips – Bloomberg

AI 基础设施 / 信贷：Waxman 警告称将有 2000 亿美元的闲置芯片 – Bloomberg

Sixth Street CEO Alan Waxman estimates roughly $200B of chips are sitting in warehouses because data centers are not ready, exposing investors to depreciation before deployment. He says uncertain economics have largely kept his firm on the sidelines, while insurers' exposure limits could push borrowers toward costlier funding.

Sixth Street 首席执行官 Alan Waxman 估计，约有 2000 亿美元的芯片积压在仓库中，因为数据中心尚未准备就绪，这使投资者在部署前面临贬值风险。他表示，经济前景的不确定性已使他的公司基本保持观望，而保险公司的风险敞口限制可能迫使借款人转向成本更高的融资渠道。

SK Hynix / HBM: HBM4 yields reportedly exceed 70% – Chosun Biz

SK Hynix / HBM：报道称 HBM4 良率超过 70% – Chosun Biz

SK Hynix's HBM4 yield has reportedly risen above 70%, supporting its production ramp and competition with Samsung and Micron. The company has not disclosed the figure. Chosun cautions that differing measurement methods make manufacturers' reported yields difficult to compare directly.

据报道，SK Hynix 的 HBM4 良率已升至 70% 以上，这支持了其产能爬坡以及与三星和美光的竞争。该公司尚未披露这一数据。Chosun 警告称，不同的测量方法使得制造商公布的良率难以直接比较。

NVDA: Singapore reporting change draws fresh scrutiny – WSJ

NVDA：新加坡报告变更引发新的审查 – WSJ

A WSJ analysis questions Nvidia's switch from customer billing locations to headquarters for geographic revenue reporting after it blocked Megaspeed in June 2025. The change eliminated a separate Singapore line, previously 22% of quarterly sales. The article establishes neither a causal link nor where Megaspeed revenue was classified.

《华尔街日报》的一篇分析质疑英伟达在 2025 年 6 月封禁 Megaspeed 后，将地理收入报告从客户账单所在地改为总部的做法。这一变更取消了此前占季度销售额 22% 的独立新加坡业务线。该文章既未确立因果关系，也未说明 Megaspeed 的收入被归类在何处。

META: Infrastructure chief to step down in 2027 – Bloomberg

META：基础设施主管将于 2027 年卸任——彭博

Santosh Janardhan, Meta's infrastructure chief and engineering co-head, will step down early next year. Former AWS executive Dave Brown will succeed him. Janardhan will help with the first-quarter transition and advise on data-center construction as Meta continues its AI infrastructure expansion.

Meta 基础设施主管兼工程联席负责人 Santosh Janardhan 将于明年初卸任。前 AWS 高管 Dave Brown 将接替他的职位。Janardhan 将协助第一季度的过渡工作，并在 Meta 继续 AI 基础设施扩张期间就数据中心建设提供建议。

GOOGL / AI Models: Google tests Hydrogen and expands Gemini distribution – Business Insider / Bloomberg

GOOGL / AI 模型：谷歌测试 Hydrogen 并扩大 Gemini 分发——Business Insider / 彭博

Google employees are testing Hydrogen, a Gemini 4 Flash variant described internally as faster and more efficient; a public launch date is unannounced. Separately, Gemini voice began rolling out globally on Apple CarPlay, expanding Google's assistant distribution on iPhones.

谷歌员工正在测试 Hydrogen，这是 Gemini 4 Flash 的一个变体，内部描述为更快速、更高效；公开发布日期尚未公布。另外，Gemible 语音功能已开始在全球范围内的 Apple CarPlay 上推出，扩大了谷歌助手在 iPhone 上的分发范围。

AI Agents / UAL: United blocks automated flight bookings – WSJ

AI 智能体 / 美联航空：美联航阻止自动化航班预订 – WSJ

United will block third-party personal AI agents from booking flights on its website, citing privacy, unintended purchases and passenger attestations. Agents can still present fares and flight options. The move adds a distribution obstacle for AI travel

agents seeking to complete transactions directly.

美联航将阻止第三方个人 AI 智能体在其网站上预订航班，理由涉及隐私、意外购买以及乘客声明。智能体仍可展示票价和航班选项。此举为试图直接完成交易的 AI 旅行智能体增加了一道分发障碍。

AI Funding: Venture investors lower valuation expectations – Bloomberg

AI 融资：风险投资者降低估值预期 – Bloomberg

Theory Ventures and B Capital say AI funding discussions are shifting toward lower revenue multiples. Sapphire Ventures says some startups are delaying IPOs and other deals until Anthropic's listing, making its reception an important test for private AI financing.

Theory Ventures 和 B Capital 表示，AI 融资讨论正转向较低的营收倍数。Sapphire Ventures 称，部分初创公司正在推迟 IPO 及其他交易，直到 Anthropic 上市，使其市场反响成为私人 AI 融资的重要试金石。

INTC / SK Hynix: Shared memory targets inference inefficiency – Chosun Biz

INTC / SK Hynix：共享内存针对推理低效——Chosun Biz

At Intel's Seoul AI summit, SK Hynix described a shared-memory architecture developed with partners to reduce repeated computation. In one repeated-inference test, remote CXL DRAM reduced time to first token to 15.45 seconds from 80.76 seconds with recomputation.

在英特尔首尔 AI 峰会上，SK Hynix 介绍了一种与合作伙伴开发的共享内存架构，旨在减少重复计算。在一项重复推理测试中，使用远程 CXL DRAM 将首 token 时间从重算时的 80.76 秒降至 15.45 秒。

UMC / Samsung: Earlier 8-inch foundry exit reportedly considered – DigiTimes
