# ASIA: NEED TO KNOW | GS MIDDAY REGIONAL UPDATE | 12 NOVEMBER 2026

# 亚洲：必知事项 | 高盛午间地区更新 | 2026 年 11 月 12 日

12 November 2026 | 2:14 PM China Standard Time

## Overall in Asia 亚洲总体情况

Asian equities traded mixed, with Korea and Indonesia outperforming while Taiwan and Hong Kong led declines. AI and semiconductor positioning remained the dominant theme, with profit-taking in Taiwan and HK internet/AI contrasting with strength in domestic Chinese semis and Samsung. Broader flows remained selective rather than aggressively risk-on, while FX softness and idiosyncratic macro risks continued to weigh across ASEAN.

亚洲股市涨跌互现，韩国和印尼表现优于大市，而台湾和香港领跌。AI 和半导体配置仍是主导主题，台湾和香港互联网/AI 获利回吐，与国内半导体和三星的强势形成对比。整体资金流向仍具选择性，而非激进的风险偏好，同时外汇疲软和特有的宏观风险继续拖累东盟市场。

## Regional Updates: 区域更新：

**Taiwan: TAIEX -2.63%** finally succumbs to profit-taking into the close after holding up well in the first half of the session, following a 17% rally over the previous four sessions. The selloff is broad-based, with TSMC (2330) -2.3% weighing on the index, while many small/mid caps see sharper intraday reversals as the OTC Index comes off 4.5% from its highs. Non-techs, particularly financials, remain resilient as expected. Desk flows start quiet and better to buy but selling picks up throughout the day, especially late in the session. Market turnover is up 16% DoD amid the increased volatility.

台湾：TAIEX -2.63%，在前四个交易日累计上涨 17%之后，盘中前半段表现尚可，但尾盘最终因获利回吐而走低。抛售面广泛，台积电（2330）-2.3%拖累大盘，而许多中小盘股出现更剧烈的日内反转，OTC 指数从高点回落 4.5%。非科技股，尤其是金融股，如预期般保持韧性。交易台资金流早盘清淡且偏向买盘，但卖盘随后逐渐增多，尤其是在尾盘。随着波动加剧，市场成交量较前一日增长 16%。

**Korea: KOSPI -0.99%** trades a volatile session, swinging from early gains to losses as Nvidia leadership headlines drove sharp moves across AI-linked sentiment. Samsung Electronics (005930) rose as much as 3.4% on speculation that potential disruption at Nvidia could create an opportunity to regain HBM share from SK Hynix, while Meritz Financial Group (138040) fell as much as 13% after Q3 net profit dropped 27% y/y. The won outperformed regional currencies as foreign investors bought local equities. Elsewhere, Cosmax (192820) beat Q3 operating profit expectations, while Daishin Securities (003540) faced a KRW120.1bn FTC penalty over treasury bond auction collusion.

韩国：KOSPI -0.99%交易震荡，早盘上涨后转跌，因英伟达（Nvidia）的领导层消息引发 AI 相关情绪的剧烈波动。三星电子（005930）一度上涨 3.4%，市场猜测英伟达可能面临的变局或为其提供从 SK 海力士手中夺回 HBM 市场份额的机会；而 Meritz 金融集团（138040）一度下跌 13%，此前其第三季度净利润同比下降 27%。韩元表现优于地区货币，因外资买入本地股票。其他方面，Cosmax（192820）第三季度营业利润超预期，而大信证券（003540）因在国债拍卖中串谋被韩国公平交易委员会处以 1201 亿韩元罚款。

**Japan: NKY -0.90%.** NKY popped at the open before coming back higher, with the 200DMA / 62k in focus. Defensives outperformed cyclicals, largely on post-earnings reactions in NXHD (9147), Suntory (2587) and Kose (4922), though strength faded from the highs. Cyclicals / AI continued to push higher, with SUMCO (3436) up on an earnings beat and TEL (8035) alone contributing ~45% of NKY gains. NVDA concerns weighed on Ibiden (4062) and Advantest (6857), but weakness did not spill into broader AI names. Recruit (6098) was the worst NKY contributor despite a Q2 beat, with crowded positioning, rotation away from defensives and a slightly less optimistic outlook weighing. Flows remained cautious, with opportunistic selling into bounces rather than aggressive chasing.

日本：NKY -0.90%。NKY 开盘冲高后回落，200 日均线/6.2 万点成为关注焦点。防御性板块表现优于周期性板块，主要受 NXHD (9147)、三得利 (2587) 和高丝 (4922) 财报后反应推动，尽管涨势从高点有所减弱。周期性板块/AI 继续走高，SUMCO (3436) 因业绩超预期上涨，TEL (8035) 单独贡献了 NKY 涨幅的约 45%。对 NVDA 的担忧令 Ibiden (4062) 和 Advantest (6857) 承压，但疲软未蔓延至更广泛的 AI 个股。Recruit (6098) 尽管第二季度业绩超预期，却是 NKY 最大的拖累，拥挤的持仓、从防御性板块的轮出以及略为乐观的前瞻指引均构成压力。资金流向保持谨慎，反弹时出现机会性卖出，而非激进追涨。

**China: SHSZ300 -0.75%.** China surged early before strength faded, with SHCOMP facing resistance around the 3,700 level. ChiNext gave back an early ~1.9% gain as profit-taking hit optical transceivers following yesterday's aggressive rally. Domestic chipmakers led, supported by continued Nvidia/Jensen Huang headlines and the domestic substitution theme, while reports that ByteDance's head of AI chip R&D resigned after its self-developed chip missed post-tape-out performance targets were viewed positively for local chipmakers on lower near-term vertical integration risk. Cambricon (688256) gained 9.83%. Banks and insurers came under some early pressure on headlines around a potential tax on government bond interest income, though downside was contained. Robotics saw further profit-taking after its recent rally. Turnover remained a positive, running +30% DoD and projected to finish above RMB2tn.

中国：沪深 300 -0.75%。中国股市早盘大涨后涨势回落，上证综指在 3,700 点附近遭遇阻力。受昨日大涨后获利回吐影响，光模块板块拖累创业板指回吐了早盘~1.9%的涨幅。国内芯片制造商领涨，得益于英伟达/黄仁勋相关消息的持续发酵以及国产替代主题；同时，有报道称字节跳动 AI 芯片研发负责人因自研芯片流片后未达性能目标而辞职，这被市场解读为降低了短期内垂直整合的风险，对本土芯片厂商构成利好。寒武纪（688256）上涨 9.83%。受政府债券利息收入可能征税的消息影响，银行和保险股早盘承压，但跌幅有限。 机器人板块在近期上涨后遭遇进一步获利回吐。 成交量保持积极，环比增长 30%，预计收盘将超过 2 万亿元人民币。

**Hong Kong: HSI -1.13%.** HK equities remained weak and subdued following overnight ADR and futures weakness, with Rubio-Yi talks ahead of next week's Trump-Xi meeting doing little for sentiment. Tech weighed heavily as speculation around potential restrictions on local AI models pressured Z.ai -5.2%, MiniMax -4% and Alibaba (9988) -5%, with Alibaba also hit by concerns over access to high-performance chips and the lack of GMV growth disclosure in Double 11 data. JD.com (9618) fell 3.5%, while EVs weakened with Li Auto (2015) -3.2% and XPeng (9868) -2.5% amid competition and EU regulatory concerns. Healthcare +0.5% led modestly, while semis +2.6% outperformed as the Nvidia story refocused attention on domestic suppliers. Southbound provided some support with sizable net buying of ~$700mn.

香港：恒生指数 -1.13%。受隔夜美股预托证券（ADR）和期货走弱影响，港股持续疲软、交投清淡，下周“习特会”前的卢比奥-易会谈未能提振市场情绪。科技板块承压明显，市场对本地 AI 模型可能受限的猜测令 Z.ai 下跌 5.2%、MiniMax 下跌 4%、阿里巴巴（9988）下跌 5%；此外，阿里巴巴还受到高性能芯片获取担忧以及“双 11”数据未披露 GMV 增长的拖累。京东（9618）下跌 3.5%；电动汽车板块走弱，理想汽车（2015）下跌 3.2%、小鹏汽车（9868）下跌 2.5%，主因竞争加剧及欧盟监管担忧。医疗保健板块上涨 0.5%，小幅领涨；半导体板块上涨 2.6%，表现优于大盘，英伟达相关动态重新聚焦市场对国内供应商的关注。南向资金提供一定支撑，净买入约 7 亿港元。

**ASEAN: JCI +2.20%,** recovering despite significant macro headwinds. The rupiah hit a record low of 18,224/USD on dollar strength and MSCI risk, prompting BI intervention across FX and bonds. MSCI deletions added to the overhang, while political uncertainty rose around VP Gibran's reported resignation. Still, Indonesian bonds attracted bargain hunting after the recent yield spike. **SET -0.07%,** broadly flat as the baht weakened for a second day. CPALL outperformed on expectations for an earnings recovery, while tourism remained a structural headwind with foreign arrivals losing momentum. Thai bonds saw their strongest global fund buying in nearly five months.

东盟：JCI +2.20%，尽管面临显著的宏观逆风，但仍有所回升。受美元走强和 MSCI 风险影响，印尼盾跌至 18,224/USD 的历史低点，促使印尼央行在外汇和债券市场进行干预。MSCI 剔除加剧了市场压力，同时围绕副总统吉布兰据称辞职的政治不确定性上升。尽管如此，在近期收益率飙升后，印尼债券仍吸引了逢低买盘。SET -0.07%，随着泰铢连续第二日走弱，大盘基本持平。CPALL 表现优于大盘，因市场预期其盈利将复苏；而旅游业仍面临结构性逆风，外国游客入境势头减弱。泰国债券录得近五个月来全球基金的最强劲买入。

**India: NIFTY +0.22%.** Indian equities extended gains for a third consecutive session, supported by falling oil prices and persistent foreign buying, with roughly $6bn of November inflows helping offset broader dollar strength. Aditya Birla Capital gained 5.3% amid elevated options and cash volumes, while Oberoi Realty rose 4.8%. Bharat Electronics traded higher after UBS raised its price target to ₹550, while Adani Group stocks gained as much as 2%. Mahindra & Mahindra underperformed on profit-taking after rallying ~22% over the prior few sessions.

印度：NIFTY +0.22%。受油价下跌和持续外资流入支撑，印度股市连续第三个交易日上涨，约 60 亿美元的 11 月资金流入有助于抵消美元整体走强的影响。Aditya Birla Capital 上涨 5.3%，期权和现货成交量居高不下；Oberoi Realty 上涨 4.8%。在瑞银将目标价上调至₹550 后，Bharat Electronics 走高；Adani Group 个股涨幅最高达 2%。此前几个交易日累计上涨~22%后，Mahindra & Mahindra 因获利回吐而表现不佳。
