Good morning. **QQQs +70bps** after Friday's finish to Red October. **Oil -4%** on reports that negotiations between Iran and U.S. continue to end the war and dialogue continue. Yields flattish.

早上好。在"红色十月"行动结束后的周五收盘后，QQQ 指数上涨了 70 个基点。由于有消息称伊朗与美国仍在为结束战争进行对话，油价则下跌了 4%。各债券的收益率则基本保持稳定。

In Tech, the **MRVL -2%/LITE -4%** deal officially on the tape (4.5 MRVL shares per LITE share) — still haven't talked to many investors positive on the deal for either side. **Semis 1.3%** leading the way higher with strength in memory **(SKHY +3.5% / MU +1.5%)** and **Neoclouds (CRWV/NBIS +2%). NVDA +1%. CRWD +3%** on a DB upgrade; **ORCL -1%** on 6-part $10B Bond offering.

在科技板块，MRVL -2%/LITE -4%的交易正式见诸报端（每股 LITE 换 4.5 股 MRVL）——目前仍未与多少对该交易双方均持乐观态度的投资者交流过。半导体板块上涨 1.3%领涨，内存（SKHY +3.5% / MU +1.5%）和 Neoclouds（CRWV/NBIS +2%）表现强劲。NVDA +1%。CRWD 因德意志银行上调评级上涨 3%；ORCL 因分 6 部分发行 100 亿美元债券下跌 1%。

Overnight, **Asia mixed** but Korea up: TPX -0.88%, NKY -0.33%, Hang Seng +0.42%, HSCEI +0.56%, SHCOMP +1.08%, Shenzhen +1.94%, Taiwan TAIEX -0.65%, Korea KOSPI +2.24%. **Hynix +4%/ Samsung +2%**

隔夜，亚洲市场表现不一，韩国市场表现较好：TPX 下跌 0.88%，NKY 下跌 0.33%，恒生指数上涨 0.42%，HSCEI 上涨 0.56%，上证指数上涨 1.08%，深证成指上涨 1.94%，台湾 TWSE 指数下跌 0.65%，而韩国 KOSPI 指数则上涨 2.24%。海力士股价上涨 4%，三星股价上涨 2%。

Busy week for earnings. Finalizing some bogeys and we'll start sending them out later today...

这周是财报发布的高峰期。我们正在处理一些遗留问题，今天晚些时候就会开始发送财报……

LITE / MRVL: Marvell confirms to purchase LITE in an all-stock transaction at fixed 4.50 shares of MRVL for each share of LITE, "representing approximately $1,132 per share of LITE common stock. Deal closing 1H '2H. Call at 8am.

LITE / MRVL：Marvell 已确认将以全股票交易的方式收购 LITE，收购价格为每股 LITE 对应 4.50 股 MRVL 股票，相当于每股 LITE 股票约 1,132 美元。该交易预计在 2022 年上半年完成，详情可致电询问。

LITE/MRVL: Mizuho says potential deal creates optical powerhouse but drives scarcity winners + heavy MRVL dilution

LITE/MRVL：瑞穗银行认为，该交易虽能造就一家强大的光学企业，但也会导致相关股票供应减少，同时还会使 MRVL 的稀释程度加剧。

Mizuho sees a LITE/MRVL combination creating a leading optical platform across EML/CW lasers, transceivers, OCS, DSPs and NPO/CPO, but also tightening supply and boosting pricing power for peers such as AVGO, CRDO, COHR, SEI and select China optical names. Downstream, NVDA/AMD/CIEN/NOK/ERIC/hyperscalers could face more concentrated laser/DSP supply. Financing is the key issue

瑞穗银行认为，LITE 与 MRVL 的结合将为 EML/CW 激光器、收发器、OCS、DSP 以及 NPO/CPO 等领域打造出领先的光学解决方案；同时，这也将加剧 AVGO、CRDO、COHR、SEI 等企业，以及部分中国光学企业的供应压力，提升其定价能力。在下游领域，NVDA、AMD、CIEN、NOK、ERIC 以及那些大型云计算公司可能会面临更为紧张的激光器/DSP 供应状况。融资问题则是关键所在。

AI FUNDING

ORCL: Files automatic mixed securities shelf (6 part $10B Debt)

ORCL：提交了自动混合证券上市申请（共 6 部分，债务规模为 100 亿美元）

ORCL: Stephens upgrades to OW/$213 as Investor Day

resolves cloud funding/FCF concerns

甲骨文：随着投资者日上会解决了有关云业务融资及自由现金流的担忧，斯蒂芬斯将其目标价上调至 213 美元/股。

Stephens upgrades ORCL from Equal Weight and raises PT to $213 from $185, saying Investor Day materially de-risked OCI by capping incremental cloud infrastructure funding at ~$20B while pointing to lower capital intensity and much higher FCF. With the funding overhang reduced, Stephens says perceived OCI risk has come out of the stock and feels materially better about the setup.

斯蒂芬斯将甲骨文的投资评级从“均衡”上调，并将目标价从 185 美元提升至 213 美元。他认为，在投资者日上，甲骨文通过将用于云基础设施建设的资金上限设定在 200 亿美元以内，从而大幅降低了风险；同时，该公司的资本密集度也有所下降，自由现金流则显著上升。由于资金压力已减轻，斯蒂芬斯认为甲骨文的风险已经降低，对这家公司的前景持更为乐观的态度。

OpenAI / AI Funding: Fundraising target cut to about $20B – FT

OpenAI/AI 领域的融资：募资目标降至约 200 亿美元——《金融时报》

OpenAI has reduced its fundraising target to about $20B from $30B and its proposed valuation to $1.25T from $1.4T. The initial close could fall below $20B after investors reduced allocations, with a subsequent offering to wealthy individuals potentially filling the gap. WSJ said has only raised $11B out of the $20 so far.

OpenAI 将融资目标从 300 亿美元下调至约 200 亿美元，同时将公司的估值从 1.4 万亿美元降至 1.25 万亿美元。由于投资者减少了投资额度，首次融资金额可能会低于 200 亿美元；之后或许会通过向富人募资来填补这一缺口。《华尔街日报》称，该公司目前仅筹集到了 200 亿美元中的 110 亿美元而已。

CRWV / NBIS / Neoclouds: High-yield funding becomes prohibitive – WSJ

CRWV / NBIS / Neoclouds：高收益融资变得难以实现——《华尔街日报》

The WSJ reports that neocloud bond issuance has effectively stalled as borrowing costs surge. CoreWeave bonds issued at 9.75% now yield over 15%; Nebius dropped a high-yield offering and is using customer prepayments. The constraint is material for AI deployment, although Nebius says asset-backed financing remains available. Capital access, rather than demand alone, is increasingly separating operators.

《华尔街日报》报道称，由于借贷成本上升，新云债券的发行已几乎停滞。CoreWeave 发行的债券初始利率为 9.75%，而现在其收益率已超过 15%；Nebius 则取消了高收益债券的发行，转而依靠客户的预付款度日。这一状况对人工智能项目的推进造成了很大阻碍，不过 Nebius 表示仍有可能通过资产支持融资来解决资金问题。如今，决定企业能否获得资金的，不再是需求本身，而是获取资金的能力。

AVGO / Anthropic: Blackstone expects junk rating after IPO – FT

AVGO/Anthropic：黑石预计这两家公司在上市后会被评为垃圾级股票——FT 报

Blackstone now expects Anthropic to carry a high speculative-grade rating after its IPO, versus its earlier investment-grade expectation. The revised assumption affects a $63B TPU financing package: over $42B of senior debt has Broadcom guarantees, while $18B of junior debt relies on Anthropic's lease payments. Major agencies have not issued an official rating.

黑石现在预计，Anthropic 在上市后将会被评定为高投机级信用等级，而此前他们则认为该公司的信用等级属于投资级。这一调整影响了总额为 630 亿美元的 TPU 相关融资计划：其中 420 多亿美元的高级债务有博通公司提供担保，而 180 亿美元的低级债务则依赖于 Anthropic 的租金支付能力。目前，各大评级机构尚未给出正式的信用评级。

META: S&P cuts credit outlook to negative – S&P

META：标普将其信用评级展望下调至负面——标普

S&P affirmed Meta's AA– rating but cut its outlook to negative. It forecasts capex of $140B in 2026, over $225B in 2027 and $252B in 2028, with free operating cash-flow deficits of $22B, $71B and $39B, respectively. Data-center leases could push

leverage above 1x in 2027; the forecast excludes Meta's planned $60B at-the-market equity program.

标准普尔维持了 Meta 的 AA–评级，但将其前景展望下调为负面。该机构预计，2026 年 Meta 的资本支出将为 1400 亿美元，2027 年为 2250 亿美元以上，2028 年为 2520 亿美元以上；同时，其自由运营现金流将分别出现 220 亿美元、710 亿美元和 390 亿美元的负值。由于数据中心的租赁成本，2027 年 Meta 的杠杆率可能会超过 1 倍；此外，该预测并未计入 Meta 计划进行的 600 亿美元股权融资计划。

GOOGL / AI Debt: Euro bond sale tests investor appetite – Bloomberg

GOOGL/AI 相关债务：欧元债发行状况考验投资者意愿——彭博社

Alphabet opened a seven-part euro bond offering with maturities from two to 19 years, following its May issuance. Initial pricing implied an average concession of about 45bp to outstanding bonds, subject to tightening. Its existing euro spreads have widened by as much as 60bp since May as investors reassess AI spending and borrowing

在 5 月发行欧元债券之后，Alphabet 再次推出新一轮共 7 种期限的欧元债券发行计划，这些债券的到期时间从 2 年到 19 年不等。初步定价显示，与现有债券相比，这些新债券的利率优惠幅度约为 45 个基点，不过这一数值还可能进一步上升。由于投资者正在重新评估在人工智能领域的投资与借贷情况，Alphabet 现有欧元债券的利差自 5 月以来已扩大了多达 60 个基点。

Moving on... **继续.....**

CRWD: DB upgrades to Buy/$300 as AI expands cyber TAM and strengthens Falcon's consolidation edge

CRWD：随着人工智能扩大网络领域的市场空间，并提升 Falcon 的整合优势，该股的评级上调至“买入”，目标价定为 300 美元。

DB upgrades from Hold and raises PT to $300 from $240, arguing AI expands cyber TAM from >$200B today to ~$260B/$565B by CY29/CY34 while reinforcing CRWD's

endpoint leadership, trusted-consolidator role and proximity to agent/token activity. Checks are DB's strongest yet, with endpoint momentum accelerating for four straight quarters and Falcon Flex/single-agent architecture driving share gains; Guardian, SafeMind and Nvidia/CoreWeave partnerships add AI upside. DB sees CRWD comfortably ahead of its $10B FY30 ARR target and sustaining >20% compounded growth for years.

德意志银行将 CrowdStrike 的评级从持有上调，并将目标价从 240 美元上调至 300 美元，理由是人工智能使网络安全的潜在市场总额从当前的超过 2000 亿美元扩大到 2029/2034 财年的约 2600 亿/5650 亿美元，同时巩固了 CRWD 在端点领域的领导地位、值得信赖的整合者角色以及与智能体/代币活动的紧密关联。德意志银行的调研是其迄今为止最强的一次，端点势头连续四个季度加速，Falcon Flex/单智能体架构推动市场份额增长；Guardian、SafeMind 以及英伟达/CoreWeave 的合作关系增添了人工智能上行空间。德意志银行认为 CRWD 将轻松超越其 2030 财年 100 亿美元年度经常性收入的目标，并在未来数年保持超过 20%的复合增长。

COIN: MS downgrades to Underweight/$120 as weaker trading + crypto uncertainty undermine the earnings recovery

COIN：由于交易状况不佳以及加密货币领域的不确定性影响了盈利的恢复，MS 的评级被下调至“减持”级别，目标价定为 120 美元。

MS cuts COIN from Equal-weight and PT to $120 from $258, lowering 2027/28 revenue 28%/18% to $6.4B/$6.6B and EBITDA 47%/25% to $1.9B/$2.4B; retail trading revenue falls 40%/21% to $2.6B/$2.8B, still ~40% of revenue and the key earnings swing factor. The Binance hack adds uncertainty around crypto confidence/regulation/adoption, while lower normalized earnings and a reduced 12x target multiple vs. 20x drive the sharply lower PT.

摩根士丹利将 COIN 评级从“Equal-weight”下调，目标价从 258 美元下调至 120 美元，将 2027/28 年营收下调 28%/18%至 64 亿美元/66 亿美元，EBITDA 下调 47%/25%至 19 亿美元/24 亿美元；零售交易营收下降 40%/21%至 26 亿美元/28 亿美元，仍占营收的 40%，是盈利的关键波动因素。币安黑客事件增加了围绕加密信心/监管/采用的不确定性，而正常化盈利下降以及目标倍数从 20 倍降至 12 倍，共同推动目标价大幅下调。

OKTA: Will join S&P 500 before trading opens Nov 4th, up from S&P Midcap 400

OKTA：将在 11 月 4 日交易开始前入选标准普尔 500 指数，此前它属于标准普尔中盘 400 指数。

APH: GS adds to Conviction List

APH：GS 被列入定罪名单

SPCX: Musk provides update on Grok Bot and Buildout

SPCX: DB sees compute ramp reaching ~2.7GW by YE26, with ~$77B annualized neocloud revenue already contracted

SPCX：DB 预计到 2026 年底，计算能力规模将达到 1001#2.7 吉瓦；同时，新云业务带来的年度收入已达 1002#$770 亿美元，相关合同也已签订。

DB estimates SPCX has ~1.8–1.9GW online today, rising to ~2.3GW by November-end and ~2.7GW exiting December as another ~220K GB300s arrive in November and ~200K in December, broadly supporting management's 2.5–3.0GW target. Five signed neocloud customers represent roughly 1.6GW and ~$77B of annualized revenue, implying ~$45–50B/GW pricing, with additional large deals/add-ons likely given industry capacity constraints.

DB 估计 SPCX 目前有~1.8–1.9GW 在线，到 11 月底将升至~2.3GW，并在 12 月底达到~2.7GW，因为 11 月将有另外~22 万台 GB300 到货，12 月还有~20 万台，这总体上支持了管理层 2.5–3.0GW 的目标。五个已签约的 neocloud 客户约占 1.6GW，年化收入约~770 亿美元，意味着~每 GW 450–500 亿美元的定价，鉴于行业产能限制，可能还会有更多大额交易/追加订单。

SPCX / SATS / Telecom: SpaceX explores Boost Mobile deal – Washington Post / Reuters

SPCX / SATS / 电信行业：SpaceX 正在考虑与 Boost Mobile 达成合作——《华盛顿邮报》/ 路透社

After major U.S. carriers rebuffed its network-access requests, SpaceX is discussing buying EchoStar's Boost Mobile or using its network arrangements, the Washington Post reports. A deal could accelerate Starlink Mobile's expansion, but AT&T and T-Mobile may need to approve transfer of Boost's existing access contracts. Talks remain preliminary; no deal has been announced.

据《华盛顿邮报》报道，在美国各大运营商拒绝其网络接入请求后，SpaceX 正在考虑收购 EchoStar 的 Boost Mobile 业务，或使用该公司的网络设施。这样的交易有望加速 Starlink Mobile 的业务扩展，但 AT&T 和 T-Mobile 可能需要批准 Boost 现有的网络接入合同转让事宜。目前相关谈判仍处于初步阶段，尚未有任何正式协议达成。

TSM / SPCX / Terafab: Musk reportedly softens stance on TSMC role – DigiTimes

TSM / SPCX / Terafab：据《DigiTimes》报道，马斯克对台积电的角色态度有所软化。

DigiTimes reports that Musk has become more pragmatic about TSMC's role in Terafab, after initially insisting on building and operating the fab himself while offering TSMC only leased space. Supply-chain sources say the two sides plan to revisit cooperation. The report describes potential renegotiation, not a finalized partnership.

据《DigiTimes》报道，马斯克在看待台积电在 Terafab 项目中的角色时变得更加务实了。此前他坚持要亲自建造并运营这座工厂，只愿意让台积电提供租赁场地。供应链相关人士表示，双方计划重新探讨合作事宜。该报道指的是可能进行的重新谈判，而非已经确定的合作关系。

COHR: Coherent upgraded to Outperform from Market Perform at Northland

COHR：在北地证券的评级中，Coherent 的评级已从“市场表现”上调至“表现优异”。

RIVN: UBS upgrades to Buy/$17 as R2 ramp + margin inflection create better risk/reward

RIVN：由于 R2 业务的发展以及利润率状况的改善，UBS 将该股的评级上调至“买入”，目标价定为 17 美元，认为其风险收益比相当不错。

UBS upgrades RIVN from Neutral after the stock’s ~19% one-month selloff, viewing valuation as attractive ahead of the R2 ramp. Initial R2 demand looks solid, and UBS expects broader trim availability plus scale to drive a positive inflection in automotive gross margins. Buy/$17.

在该股票一个月内跌幅达 19%之后，瑞银将 RIVN 的评级从“中性”上调至更高水平。瑞银认为，在 R2 产品上市之前，该股票的估值具有吸引力。目前对 R2 产品的需求相当强劲，瑞银预计，更丰富的产品选择以及规模效应将会推动汽车行业的毛利率出现上升趋势。推荐买入，目标价 17 美元。

RDDT: Reddit downgraded to Hold from Buy at Loop Capital

RDDT：Loop Capital 将 Reddit 的评级从“买入”下调至“持有”。

GOOGL: Wells says AI Overviews, not demand, are driving Search deceleration; PT to $365

GOOGL：威尔斯认为，是人工智能带来的变化，而非需求下降，导致了搜索业务增速放缓；目标价定为 365 美元。

Wells keeps OW but cuts PT to $365 from $371, arguing Search softness reflects AI Overview penetration, now ~82% of queries, not weaker engagement or agent displacement; Search/Gemini sessions still grew 36% y/y. Paid clicks/session is highly inversely correlated with AI Overview adoption, **so Wells cuts Search growth to +9% in 4Q26 and +4% in 1Q27 before +6% in 2Q27,** with FY27/28 EPS to $14.60/$17.79.

Wells 维持 OW 评级，但将目标价从 371 美元下调至 365 美元，认为搜索疲软反映的是 AI Overview 渗透率提升——目前覆盖 82%的查询——而非参与度走弱或代理替代；搜索/Gemini 会话量仍同比增长 36%。付费点击/会话与 AI Overview 采用率高度负相关，因此 Wells 将搜索增速下调至 4Q26 的+9%、1Q27 的+4%，随后 2Q27 回升至+6%，FY27/28 每股收益为 14.60/17.79 美元。

GOOGL: BNP says Search engagement is strengthening despite 3Q monetization miss, with AI Mode potentially larger than ChatGPT

GOOGL：BNP 认为，尽管第三季度的盈利目标未能实现，但搜索功能的用户活跃度仍在上升；此外，AI 模式带来的收益可能还会超过 ChatGPT。

BNP keeps OP/$410 after Search revenue missed Street by ~2% in 3Q, arguing the issue is monetization rather than user loss: Google app DAUs have risen from ~1.8B to >2.3B since early 2025, time spent nearly doubled to ~9.2 minutes/day, and Google still has ~3x the DAUs and ~15x the web traffic of its closest AI peers. BNP estimates ~41% of Search users are using AI Mode, ~33% more than ChatGPT's ~710M users, excluding Gemini; multi-turn ads in AI Mode and more ads in AI Overviews could begin helping as soon as 4Q. Near-term Search growth may stay lumpy as AI Mode cannibalizes some traditional queries.

BNP 在第三季度搜索收入较华尔街预期低~2%后，维持 OP/$410，认为问题在于变现而非用户流失：自 2025 年初以来，Google 应用日活用户已从~1.8B 升至>2.3B，使用时长几乎翻倍至~9.2 分钟/天，而 Google 的日活用户仍是其最接近的 AI 同行的~3 倍，网络流量是后者的~15 倍。BNP 估计，~41%的搜索用户正在使用 AI Mode，比 ChatGPT 的~710M 用户多~33%，其中不包括 Gemini；AI Mode 中的多轮广告以及 AI Overviews 中更多广告最早可能从第四季度开始带来帮助。随着 AI Mode 蚕食部分传统查询，搜索业务的近期增长可能仍会不均衡。

AMZN: Phillip upgrades to Buy/$330 as strong demand visibility supports aggressive AI capex

AMZN：菲利普将该股评级上调至“买入”，目标价定为 330 美元，强劲的需求前景为大规模的 AI 相关投资提供了支撑。

Phillip raises AMZN to Buy from Accumulate and PT to $330 from $320 after Q3, arguing strong demand visibility justifies elevated capital spending. It sees Amazon well positioned in AI through a model-agnostic strategy, custom silicon and full-stack infrastructure combined with partnerships across leading LLM providers.

菲利普在第三季度报告发布后，将亚马逊的评级从“持有”上调至“买入”，同时将目标价从 320 美元提升至 330 美元。他认为强劲的需求前景为增加资本支出提供了依据；此外，亚马逊通过采用与模型无关的战略、自研芯片及全栈式基础设施，并与各大 LLM 提供商建立合作关系，因此在人工智能领域拥有极大的优势。

AI Cloud: Jefferies sees a healthy AI “pit stop,” not a bubble, as demand/backlog stay strong but capex/FCF pressure drives rotation

人工智能云领域：杰富瑞认为，由于需求与订单量依然强劲，人工智能行业只会出现暂时的调整，而不会形成泡沫；不过资本支出与自由现金流方面的压力会导致相关企业的战略调整。

Jefferies says AI demand remains intact: hyperscaler + ORCL backlog reached ~$2.5T,

+106% y/y, while aggregate cloud growth accelerated to 57% from 48% last quarter. The debate has shifted from demand to ROI/financing as CY27 capex estimates rise toward ~$1.5T including SPCX/CRWV, with combined hyperscaler + META + ORCL FCF not expected to turn positive again until CY29; that has driven rotation into high-FCF software names. Jefferies' bottom line is a capacity/capex pause rather than an end to the AI cycle

杰富瑞表示，AI 需求依然完好：超大规模云厂商+ORCL 积压订单达到~$2.5 万亿，同比增长+106%，而整体云业务增长从上季度的 48%加速至 57%。随着 CY27 资本开支预估升至~$1.5 万亿（包括 SPCX/CRWV），争论已从需求转向 ROI/融资，而超大规模云厂商+META+ORCL 的合计自由现金流预计要到 CY29 才会再次转正；这推动了资金轮动至自由现金流高的软件股。杰富瑞的核心结论是产能/资本开支暂停，而非 AI 周期的终结

SHOP: Hearing M-sci saying Q4 GMV tracking above street, Oct GMV moderated

商店动态：M-sci 称第四季度的 GMV 增长表现优于预期，10 月的 GMV 则有所放缓。

BKNG: Hearing M-sci mixed saying Q4TD room night and AOV decel'd through end of Oct

BKNG：听到 M-sci 称 Q4TD 的房间夜间使用率以及平均每间房收入在 10 月底前持续下降。

DDOG/NET: Bernstein calls selloff unwarranted, sees AI-native/Workers momentum offsetting Q4 cloud softness

DDOG/NET：伯恩斯坦认为此次抛售行为毫无必要，认为专为人工智能设计的解决方案以及相关技术的发展势头，足以抵消第四季度云服务领域的疲软状况。

Bernstein argues Friday's selloff overread AWS/TWLO weakness and seasonal/token-usage headwinds, with early Q4 web metrics already rebounding. For DDOG, its "Born

in AI" cohort may have added >$200M ARR this quarter, supporting ~40% y/y Q4 growth even if traditional customers slow toward ~25%; Bernstein's model implies roughly $90M of upside vs. guide if the strength lands between Q3/Q4. For NET, Workers may have reached ~$500M ARR in Q3, ~3x since 4Q25, with another ~25% q/q possible in Q4 as deployed applications scale ~3x YTD; that could support 40%+ growth into FY27.

Bernstein 认为，周五的抛售过度解读了 AWS/TWLO 的疲软以及季节性/代币使用量的不利因素，而第四季度早期的网络指标已经出现反弹。对于 DDOG 而言，其"Born in AI"客户群本季度可能新增了超过 2 亿美元的 ARR，即便传统客户增速放缓至 25%左右，仍能支撑第四季度同比 40%的增长；Bernstein 的模型显示，如果增长动能落在第三季度/第四季度之间，相对指引约有 9000 万美元的上行空间。对于 NET 而言，Workers 在第三季度可能已达到 5 亿美元的 ARR，自 2025 年第四季度以来增长了 3 倍，随着已部署应用年内迄今扩展 3 倍，第四季度可能再环比增长 25%；这可能支撑进入 2027 财年 40%以上的增长。

马修·普林斯 ⛅@eastdakota

It's that time again: writing earnings and listening to music. Going with some obscure Talking Heads, a bit of Prince, mixed with the best songs off Ryan Adams's cover of Taylor Swift's 1989 Album. Let's go!!

又到这个时刻了：撰写收益报告，同时听音乐。选择一些不太出名的 Talking Heads 乐队的歌曲，再配上普林斯的作品，再加上瑞安·亚当斯翻唱泰勒·斯威夫特《1989》专辑中的精彩曲目。开始吧！！

DDOG: Evercore checks remain strong into F3Q; PT to $300

DDOG：艾弗科尔对该公司第三财季的预期依然乐观，目标价定为 300 美元。

Evercore raises PT to $300 from $280 after checks with 5 partners, 4 customers and an industry consultant showed demand at/above plan, continued migrations from Dynatrace/New Relic/Splunk, bigger deals and broadening AI Observability/Bits AI/MCP attach. Evercore sees F3Q revenue ~33–34% y/y, ~38% ex-largest customer, with only ~3.4% upside needed to reaccelerate; 4Q also looks strong, though some large AI natives are moving logs/LLM workloads to cheaper stacks. Initial FY27 guidance could land ~24–26% vs. Street ~22%, with historical conservatism leaving room to walk toward ~30–36%; even the low end is ~4% above Street.

Evercore 在与 5 家合作伙伴、4 家客户及一位行业顾问沟通后，将目标价从 280 美元上调至 300 美元，沟通显示需求达到或超过计划、客户持续从 Dynatrace/New Relic/Splunk 迁移、交易规模扩大，且 AI 可观测性/Bits AI/MCP 附加率不断提升。Evercore 预计第三财季营收同比增长~33–34%，剔除最大客户后为~38%，仅需~3.4%的上行空间即可重新加速；第四财季同样看起来强劲，尽管部分大型 AI 原生公司正将日志/LLM 工作负载迁移至更便宜的技术栈。首次 FY27 指引可能落在~24–26%，而市场预期为~22%，历史上的保守倾向为后续上调至~30–36%留出空间；即便低端也比市场预期高出~4%。

VRSN: JPM sees October .com growth acceleration as positive read-through for GDDY/WIX, while .net remains a drag

VRSN：JPM 认为，10 月.com 领域的增长加速态势对 GDDY 和 WIX 而言是利好信号，而.net 领域则依然会对这些公司造成负面影响。

JPM notes .com domain growth accelerated to 6.9% y/y in October from 6.5% in September, with ~1.5M net adds above the recent 1.0–1.2M monthly range; total domain growth reached 6.5% y/y. Trends support VRSN and read through positively to registrars GDDY/WIX, with strong business formations also helping demand. .net improved modestly but remained -1.5% y/y and only ~7% of the base; JPM expects .com strength to continue into 4Q, with upside possible since guidance excludes web-registration tailwinds. Neutral.

摩根大通指出，.com 域名增长在 10 月加速至同比 6.9%，高于 9 月的 6.5%，净新增约 150 万，高于近期每月 100 万至 120 万的区间；域名总增长达到同比 6.5%。这些趋势支撑 VRSN，并对注册商 GDDY/WIX 形成积极传导，强劲的企业注册也帮助提振需求。.net 略有改善，但仍同比-1.5%，且仅占基数的约 7%；摩根大通预计.com 的强势将延续至第四季度，并有可能上行，因为指引未计入网络注册的顺风因素。中性。

U/APP: BTIG prefers U setup as Vector/Runtime momentum improves, while APP sentiment remains near lows and Commerce execution is the key debate

U/APP：随着 Vector/Runtime 领域的势头好转，BTIG 更看好 U 方案；而 APP 领域的市场情绪仍处于较低水平，此外，商业领域的执行情况则是大家关注的重点。

BTIG keeps Buy on both, with U/$53 and APP/$396. For U, checks point to a strong 3Q as D28 campaigns ramp, with Runtime, better backward compatibility and new UA financing potentially improving targeting, conversion and spend; Commerce also starts contributing in 2H26/2027, though 4Q guidance remains the key risk. For APP, sentiment is near 2022/23 lows as take-rate pressure, competition and share loss weigh on gaming; Commerce onboarding is improving and new TikTok/Trybe partnerships could reduce friction, but BTIG sees 2027 hinging on training-data acquisitions, a broader hybrid-model upgrade and restoring model performance, with gross-margin stabilization the key proof point.

BTIG 对两者均维持买入评级，目标价分别为 U/$53 和 APP/$396。对于 U，随着 D28 广告系列加速推进，各项核查指向强劲的第三季度，Runtime、更好的向后兼容性以及新的 UA 融资可能改善定向、转化和支出；Commerce 也将于 2026 年下半年/2027 年开始贡献收入，但第四季度指引仍是主要风险。对于 APP，由于抽成率压力、竞争和份额流失拖累游戏业务，市场情绪接近 2022/23 年低点；Commerce 入驻正在改善，新的 TikTok/Trybe 合作可能减少摩擦，但 BTIG 认为 2027 年取决于训练数据收购、更广泛的混合模型升级以及恢复模型性能，而毛利率企稳是关键验证点。

CBRS: UBS cuts PT to $250 but keeps Buy as near-term momentum supports upside to 3Q/4Q

CBRS：瑞银将目标价下调至 250 美元，但仍维持“买入”评级，因近期市场势头有望推动股价在第三季度和第四季度进一步上涨。

UBS sees upside to September results and December guidance from OpenAI colocation demand, initial CS-4 shipments and broader adoption through AWS, Gimlet and Oracle. Hardware sales could offset a mix shift toward cloud consumption, while AMD-powered disaggregated inference adds longer-term optionality. Buy, PT $250 from $330.

瑞银认为，得益于开放 AI 的托管服务需求、首批 CS-4 产品的交付，以及 AWS、Gimlet 和 Oracle 等公司的广泛采用，OpenAI 在 9 月的业绩以及 12 月的业绩预期都将有所提升。硬件销售有望弥补向云服务消费转型的影响，而基于 AMD 芯片的分布式推理技术则为该公司带来了更长期的成长空间。建议买入，目标价从 330 美元下调至 250 美元。

Optical/Networking: JPM bullish on demand/capacity, prefers COHR/FN

光学/网络领域：JPM 看好需求与产能前景，青睐 COHR/FN 公司。

JPM sees optical demand strong through CY27 with LTAs extending into CY28+, while InP capacity expands and higher-margin DCI, OCS and CPO/NPO begin layering onto transceiver growth. COHR is preferred at ~12x CY28 EPS: F1Q rev/EPS seen at ~$2.39B/$2.08 vs Street ~$2.31B/$2.01, with data-center growth >80% and F2Q rev/EPS ~$2.57B/$2.30 vs Street ~$2.55B/$2.24; lower-margin TRx limits near-term GM upside, but OCS/multi-rail/CPO/NPO and higher-priced 1.6T improve the LT mix. FN follows at ~14x CY28, with Nvidia/AWS-HPC ramps supporting F1Q ~$1.43B/$4.27 and F2Q ~$1.54B/$4.56 vs Street ~$1.41B/$4.19 and ~$1.48B/$4.43; GM should trough in F1Q then recover.

摩根大通认为，光需求在 CY27 前保持强劲，长期协议延伸至 CY28 及以后，同时 InP 产能扩张，更高毛利的 DCI、OCS 和 CPO/NPO 开始叠加到收发器增长之上。COHR 在~12 倍 CY28 每股收益下更受青睐：预计 F1Q 营收/每股收益为~23.9 亿美元/2.08 美元，而市场预期为~23.1 亿美元/2.01 美元，数据中心增长超过 80%，F2Q 营收/每股收益为~25.7 亿美元/2.30 美元，而市场预期为~25.5 亿美元/2.24 美元；较低毛利的 TRx 限制了近期毛利率上行空间，但 OCS/多轨/CPO/NPO 以及价格更高的 1.6T 改善了长期结构。FN 紧随其后，~14 倍 CY28，英伟达/AWS-HPC 的放量支撑 F1Q ~13 亿美元/4.27 美元和 F2Q ~15.4 亿美元/4.56 美元，而市场预期为~14.1 亿美元/4.19 美元和~14.8 亿美元/4.43 美元；毛利率应在 F1Q 触底后回升。

CRDO: Mizuho management meeting highlights Positron ASIC as a meaningful new memory-wall opportunity

CRDO：瑞穗管理层会议指出，正电子 ASIC 是极具潜力的新型内存技术机遇。

Following meetings with Positron management, Mizuho highlights its first custom AI ASIC, Asimov, targeting the memory wall with a 3nm design, Titan server platform and CRDO's 112G OmniConnect; first ~$55M OCI deployment starts production in 4Q26 and Positron says it has ~$750M of interest from Tier-2 hyperscalers/neoclouds. Asimov uses lower-cost LPDDR5X instead of HBM and disaggregated memory to raise available DRAM, improve XPU utilization and reduce HBM/stacking constraints, with CRDO positioned to supply the memory interconnect and potentially earn revenue in FY28. Positron plans roughly one new ASIC per year, making this a positive longer-term read-through for CRDO.

在与 Positron 管理层会面后，瑞穗重点介绍了其首款定制 AI ASIC——Asimov，该产品采用 3nm 设计、Titan 服务器平台以及 CRDO 的 112G OmniConnect，旨在应对内存墙问题；首个价值 5500 万美元的 OCI 部署将于 2026 年第四季度投产，Positron 表示已获得来自二级超大规模云服务商/新型云厂商约 7.5 亿美元的合作意向。Asimov 采用成本更低的 LPDDR5X 而非 HBM，并通过解耦内存来提升可用 DRAM 容量、提高 XPU 利用率并缓解 HBM/堆叠限制，CRDO 则有望供应内存互连并可能在 2028 财年实现收入。Positron 计划大约每年推出一款新 ASIC，这对 CRDO 而言是一个积极的长期信号。

TTWO: Wedbush cuts PT to $280 but says market is

underpricing GTA VI's post-launch earnings durability

TTWO：韦德布什将该股的目标价下调至 280 美元，同时认为市场低估了《GTA VI》发布后的盈利能力。

Wedbush keeps OP/Best Ideas but cuts PT to $280 from $300 as FY29 EPS falls to $9.98 from $11.19 on a modeled Rockstar royalty pool equal to ~50% of operating profit. Q2 bookings/EPS are seen at the top of guide at $1.67B/$1.00 vs. Street $1.66B/$0.92, with the Q3 GTA VI guide the key catalyst; base case assumes 31M launch-quarter units, 46% Ultimate mix/$62.50 net ASP, and 24M online MAUs spending ~$5/month. The core bull case is that earnings do not peak at launch: ex-launch bookings rise from $6.7B FY27 to $8.5B/$9.2B in FY28/FY29 as GTA catalog, Online (~$1.45B FY29), PC (~$720M FY28) and 2K (~$3.3B FY29) scale; bear/base/bull values are $120/$280/$410.

Wedbush 维持跑赢大盘/最佳想法评级，但将目标价从 300 美元下调至 280 美元，因按 Rockstar 版税池相当于营业利润 50%的模型测算，FY29 每股收益从 11.19 美元降至 9.98 美元。第二季度预订量/每股收益预计处于指引高端，分别为 16.7 亿美元/1.00 美元，而市场预期为 16.6 亿美元/0.92 美元，第三季度《GTA VI》指引是关键催化剂；基准情形假设首发季度销量 3100 万份，终极版占比 46%/净均价 62.50 美元，以及 2400 万在线月活跃用户每月支出 5 美元。最乐观的预测是：游戏发布时盈利并不会达到峰值。随着《GTA》系列游戏、在线模式（2029 财年预计收入约 14.5 亿美元）、PC 平台版本（2028 财年预计收入约 7.2 亿美元）以及 2K 系列游戏的发展，游戏发布后的预订额将从 2027 财年的 67 亿美元上升至 2028 财年和 2029 财年的 85 亿美元/92 亿美元。而相对悲观的预测则认为，这些数字分别为 120 美元/280 美元/410 美元。

TTWO: Piper teen survey points to strong GTA VI demand, with ~70% attach among newest-gen console owners

TTWO：皮珀针对青少年的调查显示，《GTA VI》的需求极为强劲，在最新一代游戏机拥有者中，有 70%的人表示愿意购买该游戏。

Piper's ~9K-teen survey shows ~70% of PS5/Xbox Series owners plan to buy GTA VI, including ~55% immediately; ~90% of intended buyers plan to play GTA Online, implying an initial payer rate of ~44%. Adjusting for ~21% console overlap, Piper still sees demand well above its base case, with strong purchase intent across

daily/weekly gamers. Into the Nov. 9 print, Piper models bookings of ~$1.64B and EPS of $1.23, sees few FY guide changes likely, and keeps OW/$290.

Piper 的~9K 青少年调查显示，~70%的 PS5/Xbox Series 拥有者计划购买 GTA VI，其中~55%会立即购买；~90%的意向购买者计划玩 GTA Online，这意味着初始付费率为~44%。经~21%的主机重叠调整后，Piper 仍认为需求远高于其基准情景，日活/周活玩家的购买意愿强劲。对于 11 月 9 日的财报，Piper 模型预测预订量为~16.4 亿美元，每股收益为 1.23 美元，认为财年指引不太可能变化，并维持 OW/290 美元。

Anthropic:

Similarweb
@Similarweb

Ahead of Anthropic's IPO:

Worldwide traffic to Claude's upgrade page rebounded in September, nearly returning to its May and June levels.

May: 18.6M
June: 18.6M
July: 16.8M
August: 14.7M
September: 17.6M

AFRM: JPM constructive into F1Q as GMV bar looks beatable despite rates/Amazon headwinds

AFRM：JPM 对第一财季持乐观态度，认为尽管存在利率上升及亚马逊带来的不利因素，但总商品交易额仍有望实现增长。

JPM reiterates OW/$105, seeing F1Q as FY27's slowest GMV-growth quarter but still supporting upside to full-year estimates and F2Q/2H guidance. Street implies ~30% GMV growth, ~6pts of deceleration and near the high end of guidance, versus AFRM's ~5% historical GMV beat; Visa/MC/Chase trends are stable, while Amazon, ~22% of GMV, softened partly on Prime Day timing. Higher rates are the main offset, with +100bps potentially costing ~40bps of RLTC margin over ~2 years, but ~80% fixed-rate funding, more interest-bearing mix, Affirm Card and newer verticals provide offsets.

摩根大通重申增持评级/目标价 105 美元，认为第一财季是 2027 财年 GMV 增长最慢的季度，但仍支持全年预期以及第二财季/下半年指引的上行空间。市场隐含约 30%的 GMV 增长、约 6 个百分点的减速，且接近指引高端，而 AFRM 历史上 GMV 超预期约 5%；Visa/MC/Chase 趋势稳定，而占 GMV 约 22%的亚马逊则因 Prime Day 时点因素部分走软。利率上升是主要抵消因素，+100 个基点可能在约 2 年内侵蚀约 40 个基点的 RLTC 利润率，但约 80%的固定利率融资、更多有息组合、Affirm Card 及较新垂直领域提供了抵消。

FIG: Redburn initiates Neutral/$23 as long-term design workflow uncertainty offsets product strength

图：Redburn 选择中性/23 美元这一方案，是因为在长期设计流程中存在不确定性，这些不确定性会削弱产品的优势。

Redburn sees a wide range of outcomes for how digital design workflows evolve, limiting conviction on Figma's long-term positioning. It also flags limited cash generation after stock-based compensation as a valuation constraint.

雷德本认为，数字设计工作流程的发展可能呈现出多种不同的结果，因此难以确定 Figma 的长期发展前景。此外，基于股票的薪酬机制也会导致公司现金流入减少，这同样构成了对其估值的制约因素。

TEAM: Hearing Clev positive saying Q1 signings solid on

EU strength, finished slightly ahead

团队：克利夫表示，第一季度的签约工作在欧盟市场表现良好，最终成绩略居领先。

Software: Mizuho sees ORCL/CDNS/SNPS/TWLO as best opportunities after selloff; positive on SHOP/FIVN into prints

软件板块：瑞穗银行认为，在股价下跌后，ORCL/CDNS/SNPS/TWLO 是最佳投资机会；同时对 SHOP/FIVN 在印刷业务领域的表现持乐观态度。

Mizuho views last week's ~5.6% IGV pullback as selective buying opportunity, favoring ORCL after Investor Day clarified AI-infra funding/FCF, CDNS/SNPS after strong EDA demand + agentic AI updates, and TWLO on improving fundamentals. Into earnings, it expects SHOP low-to-mid-30s growth with agentic-commerce upside and FIVN continued subscription acceleration, AI revenue growth and enterprise wins; HUBS/KVYO/NICE face a higher bar, while TWLO's ISV slowdown is a cautious read-through for KVYO.

瑞穗将上周~5.6%的 IGV 回调视为选择性买入机会，在投资者日厘清 AI 基础设施融资/自由现金流后看好 ORCL，在 EDA 需求强劲及代理式 AI 更新后看好 CDNS/SNPS，并因基本面改善看好 TWLO。进入财报季，其预计 SHOP 将实现 30%低至中段增长并具备代理式商务上行空间，FIVN 订阅业务持续加速、AI 收入增长及企业客户斩获；HUBS/KVYO/NICE 面临更高门槛，而 TWLO 的 ISV 放缓对 KVYO 构成谨慎的参考信号。

SNAP: Guggenheim sees softer 4Q usage as global growth decelerates and U.S. pressure persists

SNAP：由于全球经济增长放缓且美国方面的压力持续存在，古根海姆预计第四季度的使用量将会下降。

October global audience reach growth slowed to +1.6% y/y from +1.9%, with U.S. reach -3.9% and international +2.6%; global reach was ~flat m/m at 709.7M. App downloads also slowed to +8.8% from +18.0%, driven by international strength as domestic trends weakened. Guggenheim still models ~6M sequential net adds in 4Q,

primarily from Rest of World.

10 月，全球用户增长速度从之前的 1.9%放缓至 1.6%，其中美国市场的用户数量下降了 3.9%，而国际市场的用户数量则增长了 2.6%。全球总用户数为 7.097 亿，环比持平。应用下载量也从之前的 18.0%降至 8.8%，这一变化主要是由于国内市场表现疲软，而国际市场依然保持强劲增长势头。古根海姆预计，第四季度全球还将有 600 万新用户加入，这些用户主要来自其他地区。

AAPL / BABA: Qwen integration sets China AI rollout – EBN

AAPL / BABA：讯飞技术的整合将推动中国人工智能的发展——EBN

Alibaba says its Qwen models will power Apple Intelligence features in China, including Siri, writing tools and visual intelligence. Developer testing begins November 4, with general availability planned alongside iOS 27.3 in December. Users can choose whether to enable Qwen, and their questions and answers will not be used to train Alibaba's models.

阿里巴巴表示，其 Qwen 模型将为苹果在中国推出的智能功能提供支持，这些功能包括 Siri、文字处理工具以及视觉识别功能。开发者测试将于 11 月 4 日开始，而该功能则计划随 iOS 27.3 版本在 12 月一同推出。用户可以自行选择是否启用 Qwen，而且他们的提问与回答不会被用于训练阿里巴巴的模型。

Data Centers / Policy: Election raises risk of construction pauses – The Information

数据中心/政策：选举可能导致建设暂停——《信息》杂志

Candidates backing some form of data-center moratorium could win as many as 15 governorships, The Information estimates. At least one major-party nominee supports a pause in 21 of 36 races, including states hosting large AI campuses. Proposals differ in scope and still require implementation, but could complicate project approvals and deployment schedules.

据《The Information》的预测，那些主张暂停建设数据中心的候选人可能会赢得多达 15 个州长职位。在 36 场竞选中，至少有 1 名来自主要政党的候选人支持在相关州暂停数据中心建设，这些州中有一些还拥有大型人工智能研发中心。尽管这些提案的具体内容有所不同，且仍需付诸实施，但它们可能会增加项目审批和部署的难度。

NVDA / Components: Murata doubles investment as capacitors tighten – Nikkei Asia / Commercial Times

NVDA/相关产业：随着电容器需求上升，村田电气加大投资力度——《日经亚洲》/《商业时报》

Murata plans ¥1T, about $6.3B, of MLCC investment over five years, roughly doubling annual spending as factory utilization stays near 95%. It targets more than doubling MLCC sales by March 2031. Separately, Commercial Times reports lead times above 52 weeks for 16V/47µF capacitors used in AI systems, highlighting supply constraints despite expansion plans.

村田计划在未来五年内投入 1 万亿日元，约合 63 亿美元，用于 MLCC 领域的研发与生产。由于工厂的利用率始终保持在 95%左右，因此其年度投资额还将进一步上升。该公司的目标是到 2031 年时，使 MLCC 的销售额实现翻倍。另外，《商业时报》报道称，用于人工智能系统的 16V/47µF 电容器的交货周期超过了 52 周，这反映出尽管有扩张计划，但供应链仍然面临压力。

DeepSeek / AI Agents: Open-source coding agent targets Claude Code – Bloomberg

DeepSeek/AI 智能体：面向 Claude Code 的开源编程智能体——彭博社报道

DeepSeek released a prototype called Super-Agent that can monitor developer group chats, identify coding problems and suggest fixes without being explicitly prompted. The open-source release extends competition with Anthropic's Claude Code into more autonomous workflows. It remains a prototype; the announcement does not establish performance parity or commercial adoption.
