Samsung SDI 3Q26 - US ESS growth drives margin inflection

Samsung SDI reported 3Q26 results. Revenues and margins beat our expectation. We raise our estimates and TP to KRW570,000

The good: Samsung SDI delivered a stronger-than-expected margin recovery in 3Q26, with revenue rising 53% YoY and 21% QoQ to KRW4.7tn, while operating profit doubled sequentially to KRW408bn (8.7% OPM). AMPC increased to KRW122bn from KRW108bn in 2Q26, while operating profit excluding AMPC reached KRW286bn with underlying OPM expanding to 6.3% from 2.5% in 2Q26. Meanwhile, cash and cash equivalents increased to KRW2.4tn from KRW1.5tn in 2Q26, providing additional financial flexibility as SDI continues to invest in U.S. ESS capacity expansion. The improvement was supported by accelerating ESS and AIDC-related demand, stronger European EV sales and improving operating leverage. Management also disclosed over 60GWh of ESS orders secured through October, with two additional U.S. LFP production lines scheduled to begin operations from 1H27. We expect the margin recovery to continue into 4Q26, supported by higher utilization, increasing ESS shipments and further operating leverage.

The bad: While the margin recovery is encouraging, questions remain over its sustainability. First, AIDC-related demand has been a key driver of ESS and BBU growth, but the duration of this growth cycle remains uncertain, particularly as industry capacity expands. Second, while underlying OPM has improved to 6.3% excluding AMPC, the longer-term margin outlook remains exposed to declining AMPC benefits beyond 2030. The key question is whether higher utilization, manufacturing efficiencies and improved product mix can sufficiently offset the reduction in subsidies. Meanwhile, EV battery demand remains uneven, particularly in the U.S., where weaker demand from EV demand continues to weigh on volumes.

DETAILS

(Continued……) The bottom line: We view 3Q26 as an important confirmation of SDI's earnings recovery, with the stronger-than-expected underlying margin suggesting that improving utilization and operating leverage are becoming increasingly meaningful drivers of profitability. We raise our earnings estimates to reflect the stronger 3Q results and improving ESS outlook, and increase our DCF-based price target to KRW570,000 from KRW560,000, leaving WACC and terminal value unchanged. Although ESS and AIDC demand should support further near-term earnings growth, we believe the market is already pricing in a meaningful recovery. The sustainability of AIDC-driven growth and SDI's ability to maintain margins as AMPC benefits decline remain the key longer-term questions.

INVESTMENT IMPLICATIONS :

Samsung SDI's 3Q26 results were a strong beat on both the top and bottom line, with revenue excluding AMPC rising 50% YoY to KRW4.6tn and operating profit excluding AMPC reaching KRW286bn, well ahead of expectations. More importantly, the operating margin excluding AMPC improved to 6.3%, confirming that the earnings recovery is increasingly driven by underlying profitability rather than subsidies alone. ESS remains the clear bright spot, supported by U.S. AI data-center and utility-scale storage demand, while EV remains mixed amid weaker U.S. demand, partly offset by improving European orders. Looking ahead, we expect ESS growth to continue offsetting EV weakness, supporting higher utilization and further margin improvement. Although execution risks around EV volumes, U.S. capacity ramp-up and free cash flow remain, SDI's earnings recovery is gaining momentum. We remain Market-Perform on the stock and raise our price target to KRW 570,000 from 560,000.

Samsung SDI's 3Q26 results strengthen the case for an underlying earnings recovery, with profitability improving beyond the contribution from AMPC. Revenue excluding AMPC reached KRW4.6tn, while operating profit excluding AMPC increased to KRW286bn, ahead of our KRW170bn forecast. The underlying operating margin reached 6.3%, compared with our expectation of 4.0%. We raise our 2026/27 revenue forecasts to KRW16.9tn/24.2tn and EPS forecasts to KRW12,061/20,284. ESS and data center demand remain central to our recovery thesis, although capacity execution and cash generation remain important tests.

The principal highlight was stronger underlying profitability rather than higher subsidy income. Reported revenue reached KRW4,686bn and operating profit KRW408bn. Excluding AMPC, revenue was KRW4,563bn, up 50% y-o-y and 21% q-o-q, compared with our forecast of KRW4,230bn and consensus of KRW4,065bn. Operating profit excluding AMPC reached KRW286bn, versus our KRW170bn estimate and consensus of KRW54bn. Gross margin excluding AMPC expanded to 27.4%, while operating margin reached 6.3%, above our forecasts of 23.5% and 4.0%, respectively. AMPC of KRW122bn was below both our estimate and consensus, reinforcing that the operating beat was driven by the business before credits.

Samsung SDI's 3Q26 results extend the recovery in revenue and profitability. Revenue increased 53% y-o-y and 21% q-o-q to KRW4.7tn, while operating profit doubled sequentially to KRW408bn, lifting the reported operating margin to 8.7% from 5.4% in 2Q. AMPC increased to KRW122bn from KRW108bn, providing additional earnings support. Importantly, the improvement extended beyond credits, with operating profit excluding AMPC reaching KRW286bn and the underlying operating margin expanding to 6.3%. Together, the revenue and margin trends indicate that the recovery is becoming more firmly established rather than simply reflecting higher subsidy income.

The quarterly tracker points to a recovery in both revenue and operating profitability, alongside a gradual improvement in estimated utilization. Our operating assumptions incorporate approximately 13GWh of global battery shipments and utilization of 52% in 3Q26, compared with approximately 11GWh and 49% in 2Q. Against this shipment base, revenue excluding AMPC implies revenue per GWh of KRW357bn, versus KRW348bn in 2Q and KRW273bn a year earlier. This represents approximately 2.8x the China battery price benchmark, broadly unchanged sequentially. We view SDI's greater US exposure as important context for this premium, rather than interpreting the ratio as a like-for-like battery ASP comparison. With gross and operating margins excluding AMPC reaching approximately 27% and 6%, respectively, the gap between the two narrowed to around 21%

We expect the underlying recovery to continue in 4Q26, with operating margin excluding AMPC improving further to 6.6%. We forecast revenue excluding AMPC of KRW4,990bn and operating profit excluding AMPC of KRW329bn, compared with KRW4,563bn and KRW286bn in 3Q. Gross margin is expected to remain broadly stable at 27.2%, suggesting further operating improvement without additional gross-margin expansion. For 2026, we forecast revenue excluding AMPC of KRW16,898bn and operating profit excluding AMPC of KRW475bn, compared with a KRW139bn operating loss in the first half. Our forecasts therefore point to a return to positive full-year operating earnings before credits, rather than a recovery dependent solely on AMPC.

Our US demand framework continues to support a storage-led recovery, despite weaker EV battery demand. We forecast US EV battery demand declining from 134GWh in 2025 to 109GWh in 2026, while ESS demand increases from 42GWh to 66GWh and data center demand rises from 7GWh to 27GWh. Total battery demand is expected to reach 202GWh in 2026 and 289GWh in 2027, increasing further to 486GWh by 2030.

We forecast SDI's ESS shipments, including data centers, increasing from 12GWh in 2025 to 22GWh in 2026, more than offsetting the decline in EV shipments from 29GWh to 25GWh. Total shipments are forecast to reach 47GWh, while the tracker places US shipments at approximately 63% of the total. Looking into 2027, we expect total shipments to increase to 81GWh against effective capacity of 133GWh, supporting utilization of 61%, compared with 47% in 2026. We view SDI's concentrated US and storage exposure as positioning it more directly within our AI data center demand theme, although the table does not separately quantify AIDC shipments. ESS shipments are forecast to reach 130GWh by 2030, becoming the larger component of SDI's shipment mix.

SHORT TERM OUTLOOK

- **2026 business outlook:** Samsung SDI's earnings recovery strengthened in 3Q26, with revenue increasing 20.9% q-o-q and 52.6% y-o-y to KRW4.69tn and operating profit doubling sequentially to KRW408bn, equivalent to an 8.7% operating margin. Battery revenue reached KRW4.41tn and operating profit KRW362bn, supported by stronger ESS and BBU demand, expanding European EV sales and higher demand for high-power cylindrical batteries. Electronic Materials generated revenue of KRW276bn and operating profit of KRW46bn. Management expects to maintain company-wide profitability in 4Q26, supported by growth in utility ESS and UPS shipments, higher U.S. production and AMPC benefits, and improving small-battery earnings. European volume-model launches should support EV sales, although declining volumes in existing projects remain a profitability headwind.

- **ESS and demand for AI:** ESS remains Samsung SDI's clearest near-term growth driver. The company secured more than 60GWh of ESS orders through October 2026, primarily for the U.S. utility market, supporting full loading of the production lines discussed on the call. Management targets additional orders by year-end exceeding the volume secured through October and is negotiating long-term utility ESS and UPS supply agreements. The first U.S. ESS LFP line began mass production in early October, with cell shipments starting in mid-October and finished-product deliveries planned for December. AI infrastructure demand is also supporting UPS and BBU growth, with management expecting the BBU market to expand at approximately 30% CAGR through 2030.

- **Investment plan and expansion:** Samsung SDI is expanding U.S. ESS production through existing-line conversions and the development of Synergy Cells. Following the start of LFP mass production in October, two additional lines are being converted and are scheduled to begin operating in phases from 1H27, with orders already secured for both. Samsung SDI also acquired full ownership of Synergy Cells, its former GM joint venture, in August and plans to convert the facility from EV to ESS battery manufacturing. Proceeds from the partial sale of its Samsung Display stake will support investment in core growth projects and debt repayment, improving financial flexibility as the company expands localized production.

- **LFP battery:** LFP has moved into commercial manufacturing, with Samsung SDI's first U.S. prismatic LFP line for ESS beginning mass production in October. Two additional converted lines are scheduled to start operating in phases from 1H27, supported by secured orders. Beyond ESS, Samsung SDI has won a European EV LFP project and is expanding cylindrical LFP products for BBU applications. Long-term cathode-material agreements with Korean suppliers support the localization of its U.S. supply chain, while Synergy Cells is being prepared for next-generation, high-capacity ESS LFP production.

- **AMPC:** Higher U.S. production is expected to increase AMPC benefits in 4Q26 and support further improvement in ESS profitability. The key near-term drivers are the ramp-up of the first LFP line, higher output from existing NCA lines and additional LFP conversions. For longer-term supply, management is discussing volumes beyond 2030 with key customers

知识星球：前沿信息收录
VX:FCCNN88

and negotiating prices that reflect the anticipated reduction in AMPC benefits. Higher-capacity ESS cells, improved energy density, supply-chain optimization and manufacturing productivity are expected to help offset the impact of declining credits.

- **NCA- large prismatic batteries:** High-nickel prismatic batteries remain an important part of Samsung SDI's portfolio alongside its expanding LFP business. Higher output from existing U.S. NCA lines, together with the new LFP line, is expected to support utility ESS sales growth in 4Q26. In European EVs, shipments for customers' volume models have expanded since initial supply began in 2Q26, with further growth expected in 4Q. Samsung SDI is also pursuing new high-nickel prismatic projects and preparing its Hungary production lines and materials supply chain for secured programs.

- **Recent technique/technology:** Samsung SDI is broadening its technology portfolio across AI infrastructure, humanoid robotics and aerospace applications. For BBU, the company is expanding from conventional 18650 cells into higher-capacity 21700 products and diversifying from high-nickel chemistries into LFP. ASSB and pack samples for humanoid applications were supplied in September, with customer evaluations underway ahead of targeted commercialization in 2H27. Management expects humanoid and aerospace shipments to increase gradually from 2027 and account for more than 10% of cylindrical battery sales by 2028. In Electronic Materials, high-thermal-conductivity EMC has received mass-production approval from major semiconductor customers.

- **Meaningful deals/agreements in 2026 YTD:** Samsung SDI's latest order update highlights more than 60GWh of ESS orders secured through October, primarily for U.S. utility applications. Management targets additional orders by year-end exceeding the volume secured through October and plans to finalize utility ESS and UPS long-term supply agreements under negotiation. Both additional LFP conversion lines scheduled to start operating from 1H27 already have orders. In Europe, the company secured an EV LFP project and continues to pursue high-nickel prismatic and 46-series programs. The acquisition of full ownership of Synergy Cells in August adds a standalone U.S. production base for future ESS expansion.

LONG TERM OUTLOOK

- **Supply chain:** Samsung SDI's supply-chain strategy is increasingly aligned with localized U.S. ESS production and prohibited foreign entity requirements. Long-term LFP cathode-material agreements with Korean suppliers support its North American expansion, while the company is securing materials and components for awarded European projects. For all-solid-state batteries, Samsung SDI is establishing the supply chain for cathode materials and solid electrolytes. Supply-chain optimization, higher productivity and improved operating efficiency remain important levers for protecting profitability as AMPC benefits decline.

- **Premium vs mass EV market:** Samsung SDI is broadening its European EV portfolio beyond premium high-nickel applications. Shipments for customers' volume models have increased since 2Q26, while a newly secured European EV LFP project extends its exposure to lower-cost chemistries. The company is pursuing opportunities across high-nickel, LFP and mid-nickel products, alongside high-nickel prismatic and 46-series programs. Europe remains the stronger near-term growth market, while management expects U.S. EV demand to remain subdued.

- **NMX and LFP batteries:** Samsung SDI's chemistry diversification is advancing through LFP commercialization and a broader European EV portfolio. U.S. ESS LFP mass production began in October, with two additional converted lines scheduled to start operating in phases from 1H27. The company is extending LFP into European EVs and cylindrical BBU products, while preparing next-generation, high-capacity LFP production at Synergy Cells. Alongside high-nickel and mid-nickel products, this broader portfolio should improve its ability to address different customer cost and performance requirements.

- **46-series cell batteries:** Samsung SDI continues to pursue 46-series cylindrical battery projects with multiple customers alongside high-nickel prismatic opportunities. The broader cylindrical portfolio is also expanding into humanoid and aerospace applications, where high power, long cycle life, low weight and low-temperature performance are important differentiators. Management expects these emerging applications to account for more than 10% of cylindrical battery sales by 2028, supporting diversification beyond conventional EV and power-tool demand.

- **All-Solid-State Batteries:** Samsung SDI targets commercialization of all-solid-state batteries for humanoid applications in 2H27. Cell and pack samples were supplied in September, with customer performance evaluations and product-specification refinement underway. The company is preparing production capabilities and the supply chain for cathode materials and solid electrolytes. Management sees safety becoming increasingly important as humanoid applications expand

知识星球：前沿信息收录
VX:FCCNN88

from industrial settings toward household use, supporting demand for differentiated battery technologies.

- **GM JV:** Samsung SDI acquired full ownership of its former GM joint venture, Synergy Cells, in August and plans to convert the site into an ESS battery manufacturing base. The facility will initially produce next-generation, high-capacity LFP batteries, with mass production expected between 2H28 and early 2029, depending on investment progress. Conversion design work and medium- to long-term customer supply discussions are underway, with additional production lines to be introduced in phases following the initial ramp.

- **Stellantis JV:** StarPlus Energy is becoming an increasingly important platform for Samsung SDI's U.S. ESS expansion. Its first ESS LFP line began mass production in early October, followed by cell shipments in mid-October and planned finished-product deliveries in December. Two additional lines are being converted and are scheduled to begin operating in phases from 1H27, with orders secured for both. Together with existing NCA production, the LFP ramp should support higher localized ESS output and stronger customer delivery capabilities.

- **Hyundai:** The Hyundai relationship remains an important part of Samsung SDI's European EV portfolio, supported by production at its Hungary plant. The broader European ramp is progressing, with shipments for customers' volume models increasing since 2Q26 and further growth expected in 4Q. Samsung SDI is preparing production lines and securing key materials and components for awarded programs, supporting delivery execution as European EV demand recovers.

- **Battery cell capacity:** Samsung SDI's near-term capacity expansion is increasingly focused on U.S. ESS. The first U.S. ESS LFP line started mass production in October 2026, with two additional converted lines scheduled to begin operating in phases from 1H27. Synergy Cells is targeting initial mass production between 2H28 and early 2029, followed by phased additions of production lines. More than 60GWh of ESS orders secured through October provides demand visibility, while existing-asset conversions offer a phased approach to expanding localized supply.

I. REQUIRED DISCLOSURES

References to "Bernstein" or the “Firm” in these disclosures relate to the following entities: Bernstein Institutional Services LLC (April 1, 2024 onwards), Sanford C. Bernstein & Co., LLC (pre April 1, 2024), Bernstein Autonomous LLP, BSG France S.A. (April 1, 2024 onwards), Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司, Sanford C. Bernstein (Canada) Limited, Sanford C. Bernstein (India) Private Limited (SEBI registration no. INH000006378), Sanford C. Bernstein (Singapore) Private Limited, Sanford C. Bernstein Japan KK（サンフォード・C・バーンスタイン株式会社）and analysts employed by Société Générale Africa Technologies & Services to produce Bernstein research under a Global Services Agreement in place between Bernstein and Société Générale.

Bernstein is part of a joint venture between Société Générale (SG) and AllianceBernstein, L.P. (AB). Unless specifically noted otherwise, for purposes of these disclosures, references to Bernstein’s “affiliates” relate to both SG and AB and their respective affiliates.

VALUATION METHODOLOGY

Samsung SDI Co Ltd

We value Samsung SDI using the DCF approach with a WACC of 9.3% and a terminal growth rate of 3%. Our DCF model is based on annual free cash flow forecasts until 2050, plus a terminal value estimate to capture the continuing value of the company. Our price target is KRW570,000

RISKS

Samsung SDI Co Ltd

Samsung SDI's earnings growth depends on the adoption of electric vehicles and energy storage systems to boost battery revenues and profits. Any change in strategy by automakers, or lack of cost declines would reduce this upside. Other downside risks include loss of sales to OEM switching battery suppliers. A reduction of US IRA subsidies would reduce benefits to Samsung SDI’s profitability which is also a downside risk.

Key upside risks comprise: 1) higher-than-anticipated demand for ESS batteries, particularly driven by robust data center requirements; 2) increased EV battery demand from clients such as BMW following the launch of new models; and 3) accelerated commercialization advancements in solid-state battery technology

RATINGS DEFINITIONS, BENCHMARKS AND DISTRIBUTION

EQUITY RATINGS DEFINITIONS

Bernstein brand

The Bernstein brand rates stocks based on forecasts of relative performance for the next 12 months versus the S&P 500 for stocks listed on the U.S. and Canadian exchanges, versus the Bloomberg Europe Developed Markets Large and Mid Cap Price Return Index EUR (EDME) for stocks listed on the European exchanges and emerging markets exchanges outside of the Asia Pacific region, versus the Bloomberg Japan Large and Mid Cap Price Return Index USD (JPL) for stocks listed on the Japanese exchanges, and versus the Bloomberg Asia ex-Japan Large and Mid Cap Price Return Index (ASIAX) for stocks listed on the Asian (ex-Japan) exchanges -unless otherwise specified.

The Bernstein brand has three categories of ratings:

- Outperform: Stock will outpace the market index by more than 15 pp
- Market-Perform: Stock will perform in line with the market index to within +/-15 pp
- Underperform: Stock will trail the performance of the market index by more than 15 pp

Coverage Suspended: Coverage of a company under the Bernstein research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

知识星球：前沿信息收录
VX:FCCNN88

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Not Covered (NC) denotes companies that are not under coverage.

Bernstein brand stock ratings are based on a 12-month time horizon.

Autonomous brand – common stocks

The Autonomous brand rates common stocks as indicated below. As our benchmarks we use the Bloomberg Europe 600 Financials Price Return Index (E600BK) and Bloomberg Europe Dev Mkt Financials Large and Mid Cap Price Ret Index EUR (EDMFI) index for developed European banks and Payments, the Bloomberg Europe 600 Insurance Price Return Index (E600IN) for European insurers, the S&P 500 and S&P Financials for US banks and Payments coverage, S5LIFE for US Insurance, the S&P Insurance Select Industry (SPSIINS) for US Non-Life Insurers coverage, the Bloomberg Emerging Markets Financials Large, Mid and Small Cap Price Return Index (EMLSF) for emerging market banks and insurers and Payments, and the Bloomberg Japan Financials Large & Mid Cap Price Return Index (JPFILM) for Japanese Financials. Ratings are stated relative to the sector (not the market).

The Autonomous brand has three categories of common stock ratings:

- Outperform (OP): Stock will outpace the relevant index by more than 10 pp
- Neutral (N): Stock will perform in line with the market index to within +/-10 pp
- Underperform (UP): Stock will trail the performance of the relevant index by more than 10 pp

Coverage Suspended: Coverage of a company under the Autonomous research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Those denoted as 'Feature' (e.g., Feature Outperform FOP, Feature Under Outperform FUP) are our core ideas.

Not Covered (NC) denotes companies that are not under coverage.

Autonomous brand common stock ratings are based on a 12-month time horizon.

Autonomous brand – preferred stocks

The Autonomous brand has three categories of preferred stock ratings:

- Outperform (OP): The total return of the preferred instrument is expected to outperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Neutral (N): The total return of the preferred instrument is expected to perform in line with preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Underperform (UP): The total return of the preferred instrument is expected to underperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous preferred stock ratings are based on a 6-month time horizon.

AUTONOMOUS CREDIT RESEARCH

Where this report contains investment recommendations for credit instruments, as defined in article 3(1)(35) of the Market Abuse Regulation, the information below is presented to comply with its disclosure requirements.

The report may also include reference(s) to published opinions by other Autonomous or Bernstein analysts covering the equity securities of the issuer(s) referenced herein. Please note an investment recommendation for credit instruments published by the author(s) of this report may differ from the published view of the analyst covering equity securities for the issuer(s) contained in

知识星球：前沿信息收录
VX:FCCNN88

this report and vice versa.

CREDIT RATINGS DEFINITIONS

The Autonomous brand has three categories of credit ratings:

- Credit Outperform (C-OP): The total return of the Reference Credit Instrument is expected to outperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.
- Credit Neutral (C-N): The total return of the Reference Credit Instrument is expected to perform in line with the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.
- Credit Underperform (C-UP): The total return of the Reference Credit Instrument is expected to underperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous credit ratings are based on a 6-month time horizon.

A list of all investment recommendations produced by the author(s) of this report alongside credit ratings history are available upon request.

It is at the sole discretion of the Firm as to when to initiate, update and cease research coverage. The Firm has established, maintains and relies on information barriers to control the flow of information contained in one or more areas (i.e. the private side) within the Firm, and into other areas, units, groups or affiliates (i.e. public side) of the Firm

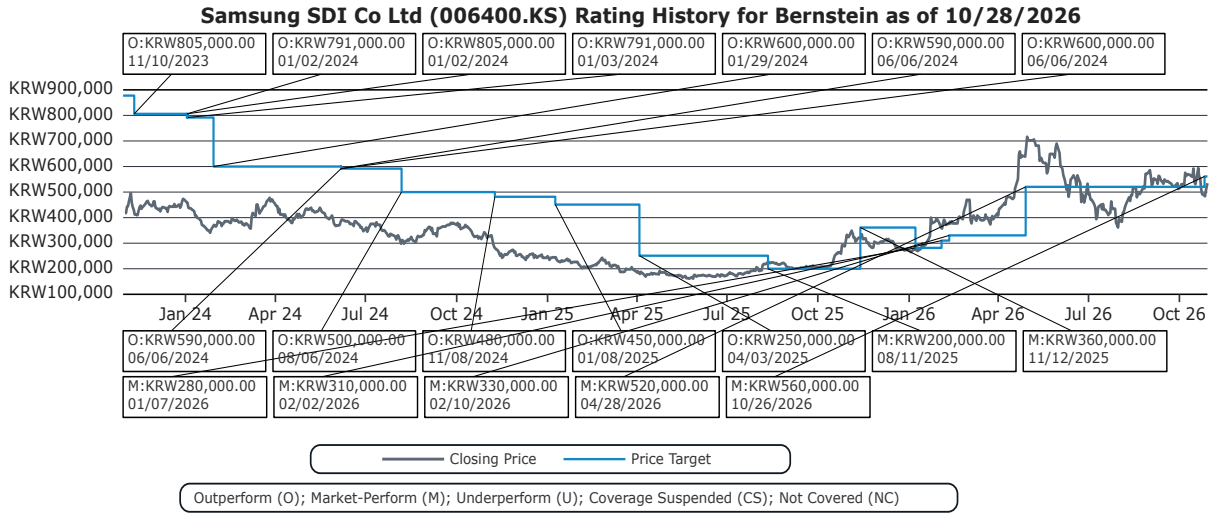

DISTRIBUTION OF EQUITY RATINGS/INVESTMENT BANKING SERVICES

Equity Rating	Market Abuse Regulation (MAR) and FINRA Rating Category	Global Rating Distribution	Investment Banking Relationships*
Outperform	BUY	52.3%	14.2%
Market-Perform (Bernstein Brand) Neutral (Autonomous Brand)	HOLD	35.6%	16.1%
Underperform	SELL	12.1%	13.6%

* These figures represent the percentage of companies within each equity rating category for which affiliates of Bernstein have provided investment banking services within the previous 12 months.
As of September 30, 2026. All figures are updated quarterly.

be subject to FINRA's restrictions regarding (among other things) communications by research analysts with a subject company, interactions between research analysts and investment banking personnel, participation by research analysts in solicitation and marketing activities relating to investment banking transactions, public appearances by research analysts, and trading securities held by a research analyst account.

Where this report has been prepared by research analyst(s) employed by Société Générale Africa Technologies & Services (part of the Société Générale group of companies), it has been prepared on behalf of a Bernstein company under a Global Services Agreement in place between Bernstein and Société Générale.

CERTIFICATION

Each research analyst listed in this report, who is primarily responsible for the preparation of the content of this report, certifies that all of the views expressed in this publication accurately reflect that analyst's personal views about any and all of the subject securities or issuers and that no part of that analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views in this publication.

II. ADDITIONAL GLOBAL CONFLICT DISCLOSURES

It is at the sole discretion of the Firm as to when to initiate, update and cease research coverage. The Firm has established, maintains and relies on information barriers to control the flow of information contained in one or more areas (i.e., the private side) within the Firm, and into other areas, units, groups or affiliates (i.e., public side) of the Firm.

III. OTHER IMPORTANT INFORMATION AND DISCLOSURES

Separate branding is maintained for "Bernstein" and "Autonomous" research products.

- Bernstein produces a number of different types of research products including, among others, fundamental analysis and quantitative analysis under both the "Autonomous" and "Bernstein" brands. Recommendations contained within one type of research product may differ from recommendations contained within other types of research products, whether as a result of differing time horizons, methodologies or otherwise. Furthermore, views or recommendations within a research product issued under one brand may differ from views or recommendations under the same type of research product issued under the other brand. The Research Ratings System for the two brands and other information related to those Rating Systems are included in the previous section.

- Autonomous operates as a separate business unit within the following entities: Bernstein Institutional Services LLC, Bernstein Autonomous LLP, Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 and Sanford C. Bernstein (India) Private Limited. For information relating to "Autonomous" branded products (including certain Sales materials) please visit: www.autonomous.com. For information relating to Bernstein branded products please visit: www.bernsteinresearch.com.

Analysts are compensated based on aggregate contributions to the research franchise as measured by account penetration, productivity and proactivity of investment ideas. No analysts are compensated based on performance in, or contributions to, generating investment banking revenues.

This report has been produced by an independent analyst as defined in Article 3 (1)(34)(i) of EU 596/2014 Market Abuse Regulation ("MAR") and the same article of MAR as it forms part of United Kingdom domestic law by virtue of the European Union (Withdrawal) Act 2018.

To our readers in the United States: Bernstein Institutional Services LLC, a broker-dealer registered with the U.S. Securities and Exchange Commission ("SEC") and a member of the U.S. Financial Industry Regulatory Authority, Inc. ("FINRA") is distributing this publication in the United States and accepts responsibility for its contents. Where this material contains an analysis of debt product(s), such material is intended only for institutional investors and is not subject to the US independence and disclosure standards applicable to debt research prepared for retail investors.

Bernstein Institutional Services LLC may act as principal for its own account or as agent for another person (including an affiliate) in sales or purchases of any security which is a subject of this report. This report does not purport to meet the objectives or needs of any specific individuals, entities or accounts.

To our readers in Canada: If this publication pertains to a Canadian domiciled company, it is being distributed in Canada by Sanford C. Bernstein (Canada) Limited, which is licensed and regulated by the Canadian Investment Regulatory Organization. If the publication pertains to a non-Canadian domiciled company, it is being distributed by Bernstein Institutional Services LLC, which is licensed and regulated by both the SEC and FINRA, into Canada under the International Dealers Exemption.

To our readers in Brazil: This report has been prepared by Bernstein Institutional Services LLC, and Banco BTG Pactual S.A. ("BTG") is responsible for the distribution of this report in Brazil.

To readers in the United Kingdom: This publication has been issued or approved for issue in the United Kingdom by Bernstein Autonomous LLP, authorised and regulated by the Financial Conduct Authority and located at 60 London Wall, London EC2M 5SH, +44 (0)20-7170-5000. Registered in England & Wales No OC343985.

This document is for distribution only to persons who (i) have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended, the "Financial Promotion Order"), (ii) are persons falling within Article 49(2)(a) to (d) ("high net worth companies, unincorporated associations, etc.") of the Financial Promotion Order, (iii) are outside the United Kingdom, or (iv) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) in connection with the issue or sale of any securities may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as "relevant persons"). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

To our readers in the member states of the EEA: This publication is being distributed by BSG France SA, which is authorised and regulated by the Autorité de Contrôle Prudentiel et de Résolution (ACPR) and Autorité des Marchés Financiers (AMF).

To our readers in Hong Kong: This publication is being distributed in Hong Kong by Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司, which is licensed and regulated by the Hong Kong Securities and Futures Commission (Central Entity No. AXC846) to carry out Type 4 (Advising on Securities) regulated activities and subject to the licensing conditions mentioned in the SFC Public Register (https://www.sfc.hk/publicregWeb/corp/AXC846/details)). This publication is solely for professional investors, as defined in the Securities and Futures Ordinance (Cap. 571). The purpose of this report is solely to provide an analysis of the issuers referred to in this report and is not intended for any purpose contrary to the laws of Hong Kong.

To our readers in Singapore: This publication is being distributed in Singapore by Sanford C. Bernstein (Singapore) Private Limited, only to accredited investors or institutional investors, as defined in the Securities and Futures Act 2001 of Singapore ("SFA"). Recipients in Singapore should contact Sanford C. Bernstein (Singapore) Private Limited in respect of matters arising from, or in connection with, this publication. Sanford C. Bernstein (Singapore) Private Limited is regulated by the Monetary Authority of Singapore and licensed under the SFA as a capital markets services licence holder for dealing in capital markets products that are securities and collective investment schemes and an exempt financial adviser for advising on, issuing and promulgating analyses and reports on securities. Sanford C. Bernstein (Singapore) Private Limited is registered in Singapore with Company Registration No. 20213710W and located at 8 Marina Boulevard, #12-01, Marina Bay Financial Centre, Singapore 018981, +65-6326-7000.

To our readers in the People's Republic of China: The securities referred to in this document are not being offered or sold and may not be offered or sold, directly or indirectly, in the People's Republic of China (for such purposes, not including the Hong Kong and Macau Special Administrative Regions or Taiwan, the "PRC") in contravention of any applicable laws of the PRC.

This document does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC to any person to whom it is unlawful to make the offer or solicitation in the PRC.

We do not represent that this document may be lawfully distributed, or that any securities may be lawfully offered, in compliance with any applicable registration or other requirements in the PRC, or pursuant to an exemption available thereunder, or assume any responsibility for facilitating any such distribution or offering. In particular, no action has been taken by us which would permit a public offering of any securities or distribution of this document in the PRC. Accordingly, the securities are not being offered or sold within the PRC by means of this document or any other document. Neither this document nor any advertisement or other offering material may be distributed or published in the PRC, except under circumstances that will result in compliance with any applicable laws and regulations.

To our readers in Japan: This publication is being distributed in Japan by Sanford C. Bernstein Japan KK (サンフォード・C・バーンスタイン株式会社), which is registered in Japan as a Financial Instruments Business Operator with the Kanto Local Finance Bureau (registration number: The Director-General of Kanto Local Finance Bureau (FIBO) No.3387) and regulated by the Financial Services Agency. It is also a member of Investment Management Association of Japan. This publication is solely for qualified institutional investors in Japan only, as defined in Article 2, paragraph (3), items (i) of the Financial Instruments and Exchange Act.

For the institutional client readers in Japan who have been granted access to the Bernstein website by Daiwa Securities Group Inc. ("Daiwa"), your access to this document should not be construed as meaning that Bernstein is providing you with investment advice

LEGAL

All research publications are disseminated to our clients through posting on the firm's password protected websites, bernsteinresearch.com and autonomous.com. Certain, but not all, research publications are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience.

This publication has been published and distributed in accordance with the Firm's policy for management of conflicts of interest in investment research, a copy of which is available from Bernstein Institutional Services LLC, Director of Compliance, 245 Park Avenue, New York, NY 10167. Additional disclosures and information regarding Bernstein's business are available on our website www.bernsteinresearch.com.

The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors where that permission profile is not consistent with the licenses held by the entities noted herein. This document is for distribution only as may be permitted by law. This publication is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of, or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject any of the entities referenced herein or any of their subsidiaries or affiliates to any registration or licensing requirement within such jurisdiction. This publication is based upon public sources we believe to be reliable, but no representation is made by us that the publication is accurate or complete. We do not undertake to advise you of any change in the reported information or in the opinions herein. This publication was prepared and issued by entity referred to herein for distribution to eligible counterparties or professional clients. This publication is not an offer to buy or sell any security, and it does not constitute investment, legal or tax advice. The investments referred to herein may not be suitable for you. Investors must make their own investment decisions in consultation with their professional advisors in light of their specific circumstances. The value of investments may fluctuate, and investments that are denominated in foreign currencies may fluctuate in value as a result of exposure to exchange rate movements. Information about past performance of an investment is not necessarily a guide to, indicator of, or assurance of, future performance.

This report is directed to and intended only for our clients who are "eligible counterparties", "professional clients", "institutional investors" and/or "professional investors" as defined by the aforementioned regulators, and must not be redistributed to retail clients as defined by the aforementioned regulators. Retail clients who receive this report should note that the services of the entities noted herein are not available to them and should not rely on the material herein to make an investment decision. The result of such act will not hold the entities noted herein liable for any loss thus incurred as the entities noted herein are not registered/ authorised/ licensed to deal with retail clients and will not enter into any contractual agreement/arrangement with retail clients. This report is provided subject to the terms and conditions of any agreement that the clients may have entered into with the entities

noted herein. All research reports are disseminated on a simultaneous basis to eligible clients through electronic publication to our client portal.

The information in this report was prepared by Bernstein solely for the internal business use of our clients. Clients may store, display, analyze, reformat and print the information in this report for this limited use only. Clients may not copy, alter, create derivative works, resell, reverse engineer, commercially exploit, share or distribute any part of the information contained herein for any purpose without Bernstein's express written consent. These restrictions include extracting data or using the content to develop indices or other products. Further, you may not use this report, or any portion of this report, to train or finetune any third-party machine learning or artificial intelligence system, or as a prompt or input into any such system. You also may not, without Bernstein's express written consent, do any of the foregoing in connection with your own internal machine learning or artificial intelligence system.

Bernstein may use artificial intelligence tools in the preparation of its materials. Any such materials are reviewed by Bernstein's research analysts prior to publication.

This report has been prepared for information purposes only and is based on current public information that we consider reliable, but the entities noted herein do not warrant or represent (express or implied) as to the sources of information or data contained herein are accurate, complete, not misleading or as to its fitness for the purpose intended even though the entities noted herein rely on reputable or trustworthy data providers, it should not be relied upon as such. Opinions expressed are the author(s)' current opinions as of the date appearing on the material only and we do not undertake to advise you of any change in the reported information or in the opinions herein.

Any references to Societe Generale herein are purely factual, based upon publicly available information, and included for comparative purposes only. They do not constitute an opinion or recommendation with respect to the securities of Societe Generale.

This publication was prepared and issued by the entity referred to herein for distribution to eligible counterparties or professional clients. The information in this report is intended for general circulation and does not constitute an offer to buy or sell any security, investment, legal or tax advice nor a personal recommendation, as defined by any of the aforementioned regulators. It does not take into account the particular investment objectives, financial situations, or needs of individual investors. The report has not been reviewed by any of the aforementioned regulators and does not represent any official recommendation from the aforementioned regulators. The investments referred to herein may not be suitable for you. Investors must make their own investment decisions in consultation with advice sought from a financial adviser regarding the suitability of the investment product, taking into account the specific investment objectives, financial situation or particular needs of any recipient of the recommendation, before the recipient makes a commitment to purchase the investment product.

The analysis contained herein is based on numerous assumptions. Different assumptions could result in materially different results. The information in this report does not constitute, or form part of, any offer to sell or issue, or any offer to purchase or subscribe for shares, or to induce engagement in any other investment activity. The value of any securities or financial instruments mentioned in this report may fluctuate subject to market conditions. Information about past performance of an investment is not necessarily a guide to, indicative of, or assurance of future performance. Estimates of future performance mentioned by the research analyst in this report are based on assumptions that may not be realized due to unforeseen factors like market volatility/fluctuation. In relation to securities or financial instruments denominated in a foreign currency other than the clients' home currency, movements in exchange rates will have an effect on the value, either favorable or unfavorable. Before acting on any recommendations in this report, recipients should consider the appropriateness of investing in the subject securities or financial instruments mentioned in this report and, if necessary, seek independent professional advice.

The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors where that permission profile is not consistent with the licenses held by the entities noted herein. This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject the entities noted herein to any regulation or licensing requirement within such jurisdiction.
