AI Value Chain: Is the AI trade over? The bear theses and our responses

Daniel Zhu
+1 917 344 8309
daniel.zhu@bernsteinsg.com

We were wrong to be bullish on AI on the short term. On September 29, we initiated on networking with a positive view on AI in both the short- and long-term (for more details, see: US Networking: Scaling the bandwidth wall. Initiating with a positive view). Our short term positive view was underpinned by the belief that we had strong visibility to near-term growth for AI infrastructure spend, and that valuations for our sector were not demanding relative to the rest of hardware / semis.

Despite solid short term results, we have now experienced the second sharpest drawdown in the SOX since the launch of ChatGPT. Numbers have continued to trend higher, including significant guide-ups for all five of our covered companies that have reported since our launch. However, our coverage is down, with stocks down between -12% to -42%. This has come amid broader multiple compression in hardware/semis; despite estimates continuing to trend up, on Thursday the SOX was down 38% from its high water mark in June 22, marking the second sharpest drawdown since the launch of ChatGPT, behind only the post-Liberation Day drawdown.

The first fundamental bear thesis contributing to the drawdown has been incremental concern about the sustainability of AI lab economics, and as a result, the availability of financing for a continued build. These concerns have been exacerbated by softer AI lab revenues. However, AI lab revenues have come in stronger in October, and remain constructive on AI adoption and thus hyperscaler ROI and the sustainability of the build longer-term.

The second, and more recent concern, has been incremental caution about land and power constraints, exacerbated by sweeping Democratic victories in the midterms. We see limited impact to 2027 numbers, as capacity delivering in 2027 is already in the ground. While there is more risk to 2028 numbers, there is also more options to work with policymakers and work around restrictions, and we believe AI data centers will ultimately be willing to pay to resolve these issues.

We believe macro and technical factors have also contributed to the sell-off, including: 1) investors exiting TMT positions for liquidity ahead of major anticipated IPOs, 2) rising interest rates and concerns of renewed war with Iran and 3) pressing of shorts to force liquidations.

So where do we go from here? While we don't find the bear case particularly compelling, and remain positive longer-term, we acknowledge that the bear case is hard to prove or disprove in the near-term, and the catalyst past looks light until January. On net, we see some potential for a technical bounce in the short term, but believe a full recovery will take longer.

PRICE TARGET CHANGE IN BOLD

O - Outperform, M - Market-Perform, U - Underperform, NR - Not Rated, CS - Coverage Suspended

Source: Bloomberg, Bernstein estimates and analysis.

INVESTMENT IMPLICATIONS

We leave our forecasts unchanged, but we reduce our target prices for Lumentum, Celestica, and Corning. We reiterate our Outperform ratings on Arista, Ciena, Celestica, Coherent, and Lumentum, as well as our Market-Perform ratings on Cisco and Corning. Specifically:

DETAILS

We were wrong to be bullish on AI on the short term. On September 29, we initiated on networking with a positive view on AI in both the short- and long-term (for more details, see: US Networking: Scaling the bandwidth wall. Initiating with a positive view). Our short term positive view was underpinned by the belief that we had strong visibility to near-term growth for AI infrastructure spend, and that valuations for our sector were not demanding relative to the rest of hardware / semis.

Despite generally solid near-term results, we have now experienced the second sharpest drawdown in the SOX since the launch of ChatGPT. Numbers have continued to trend higher as expected, including significant guide-ups vs. sell-side consensus for all five of our covered companies that have reported since our launch. The picture has been more mixed compared to the buy-side bogeys that we'd heard, but we have generally seen positive earnings night reactions, suggesting that on net numbers were seen as incrementally positive. However, the stocks have still experienced sharp drawdown despite estimates continuing to trend up, due to multiple compression. We are now seeing the second sharpest drawdown since the launch of ChatGPT, behind only the post-Liberation Day drawdown.

- **Numbers have generally been positively received.** Numbers have continued to trend higher as expected, including significant guide-ups vs. sell-side consensus for all five of our covered companies that have reported since our launch (Exhibit 1-Exhibit 5). The picture has been more mixed compared to the buy-side bogeys that we'd heard: Arista was a clean beat despite concerns that management would be overly conservative. Corning was more in-line, while Celestica met the bogey on revenue but was perhaps a bit light on margins. For Coherent, soft results for the quarter were outweighed by strong full year revenue and margin guidance, while Lumentum's results were entirely overshadowed by the Marvell deal (for more details, see: LITE: The deal is real; Lumentum earnings beat, but acquisition by Marvell confirmed). Nonetheless, we have generally seen positive earnings night reactions, suggesting that on net numbers were seen as incrementally positive.

- **But multiples have compressed sharply, and the stocks have experienced a sharp drawdown.** Despite a series of results which have received neutral-to-positive investor feedback, our coverage is down, with stocks down between -12% to -42% (Exhibit 6). This has come amid broader multiple compression in hardware/semis, in which stock prices have dropped even as numbers continue to be revised upwards (for more details, see Stacy Rasgon's note: U.S. Semiconductors and Semicap: A crisis of confidence?). On Thursday, the SOX was down 38% from its high water mark in June 22, marking the second sharpest drawdown since the launch of ChatGPT, behind only the post-Liberation Day drawdown (Exhibit 7).

- **We see two major fundamental bear theses, as well as a number of macro and technical factors that further contribute to the sell-off.** The two major fundamental bear theses are that 1) weaker AI lab revenues raise concerns about the sustainability of ecosystem economics and financing and 2) incremental concerns about land and power constraints following sweeping Democratic victories in the midterms. We believe macro and technical factors have also contributed to the sell off, including liquidity needs ahead of major anticipated IPOs, negative macro data points, and pressing of shorts to force liquidations.

The first fundamental bear thesis contributing to the drawdown has been incremental concern about the sustainability of AI lab economics, and as a result, the availability of financing for a continued build. However, AI lab revenues have come in stronger in October, and remain constructive on AI adoption and thus hyperscaler ROI and the sustainability of the build.

- **Investors continue to worry about a potential digestion cycle.** Since the early days of the AI build, investors have been worried about the possibility of a mis-match in timing between the pace of AI adoption (and thus end-user demand) and the speed of the AI infrastructure build, potentially creating an air pocket in which available infrastructure exceeds demand, in turn leading to a digestion period (see our 2023 note: AI Infrastructure: The build-out is huge. Bonanza or bubble?).

- **These concerns have been exacerbated by softer AI lab revenues.** These concerns have been exacerbated by softer AI ARR in September, leading to renewed concerns that demand will be insufficient for AI clouds to generate a healthy ROI on large amounts of capacity coming online (Exhibit 8). In turn, if the AI clouds are not able to demonstrate a healthy ROI, but spend is reaching leaves that require external financing instead of simply reinvesting capex, this raises concerns that even if tech companies want to continue spending (by building anyways and deploying excess capacity to training), they may not be able to secure the financing.

- **Lab revenues have come in stronger in October, with September appearing to be a pricing blip rather than a structural deceleration. We also believe weaker pricing is not necessarily negative for the infrastructure players.** AI lab ARR generally looked weaker in September, amid price cuts. However, token volume growth have continued to be very

知识星球：前沿信息收录
VX:FCCNN88

strong, and growth now appears to have re-accelerated, as lower prices have translated to further adoption. This continues to point to there being sufficient price elasticity to absorb incremental supply. We also observe that all else equal, narrower model layer margins is not necessarily negative for the infrastructure names, given that it implies higher token demand and thus higher infrastructure layer requirements for the same level of end user demand; incremental competition in the model industry is not necessarily negative for upstream vendors. More broadly, while this is clearly directionally negative in terms of overall ecosystem health, and four labs at the frontier may not be sustainable, we observe that the AI infrastructure names had healthy economics when there were just 1-2 labs at the frontier; one of the frontier labs falling behind is likely not fatal to AI infrastructure economics.

- **We don't believe AI demand growth is a slam dunk, but the picture actually looked worse in late 2024 than it does today, before a rally in early summer of 2025.** We crudely estimate that hyperscalars will have brought ~$1.2T worth of AI infrastructure online by 2027. Assuming a 15% ROI hurdle, that implies AI data center operators would need ~$175B in net profits to justify the investment; at 24% net margins that implies ~$729B in spend. While $729B in spend is not necessarily a slam dunk, we see it as plausible. Moreover, we're surprised by the incremental bearishness, given that the picture actually looked much worse in 2024, when demand was weak enough to see sharp cuts to GPU pricing (for more details, see our 2024 note: IT Hardware: Super Micro weakness - good for Dell (and HPE)?). Inference use cases were also much narrower at the time, with OpenAI revenues in the single digit billions (for more details, see: AI Infrastructure: Revisiting the Gen AI scaling math - is inferencing really as big as we think?). At the time, excess capacity and softer pricing was reinvested into training new models, which in turn helped to drive the emergence of chain of thought models and the next leg of AI adoption in the form of AI agents. We believe that AI labs will likely respond to loosening compute constraints by doubling down on training - and we are not at that point yet.

The second, and more recent concern, has been incremental caution about land and power constraints, exacerbated by sweeping Democratic victories in the midterms. Land and power availability continues to be a concern, exacerbated by sweeping Democratic victories in the midterms and an apparent push-out in capex at Google due to land and power delays. However, we see limited impact to 2027 numbers, as capacity delivering in 2027 is already in the ground. While there is more risk to 2028 numbers, there is also more options to work with policymakers and work around restrictions, and we believe AI data centers will ultimately be willing to pay to resolve these issues. For more details, see our note: US Data Centers: Unpacking the midterm results - a new balance of power, the same power imbalance?

- **Land and power continues to be a concern.** Land and power availability has already been tight, and concerns have been exacerbated by sweeping Democratic victories in the midterms and an apparent push-out in capex at Google due to land and power delays. Most notably, Texas is the most important state for the data center build, and Texas governor-elect Gina Hinojosa campaigned on a platform including a moratorium on approvals.

- **Limited impact to 2027.** State actions so far have grandfathered projects under construction, and for the most part, any build that has yet to break ground was unlikely to be completed in 2027 anyways, given current build timelines. For instance, in Texas only 0.3GW of credible capacity targeting 2027 has yet to break ground, and those projects were likely already delayed. As a result, even in a more negative policy environment, we see limited impact to 2027 numbers.

- **There is space to work around 2028 issues.** Hinojosa stated in an interview with CNN that, "It's not that I hate data centers. We just need to stop what we are doing until we have protections for Texans". That framing fits with a broader theme, in which state governments usually look to get data centers to contribute more of their economics to the state or to the community. Moreover, data centers often relocate in response to local bans; as a result, its fairly rare for data center projects to be truly killed. We believe most AI data center projects will be willing to pay to get data center builds online on time, and so as long as newly elected governments are able to enact their policy framework promptly, AI data centers will likely be able to resume builds under the new framework.

- **AI data centers don't appear desperate.** We note that newer GPUs offer meaningfully better price-performance, both in terms of compute per unit of power and compute per unit of cost (Exhibit 9). Accordingly, in an environment where power was the constraint rather than semiconductors, the logical course of action would be to switch off older GPUs and retrofit that capacity so that it can be used for newer GPUs. Feedback from the industry suggests that AI labs are not doing this and are instead focusing on running GPUs as long as possible, which suggests that they continue to view silicon as the constraints, and thus want to maximize every chip even if it is not necessarily power efficient to do so, likely because they remain confident that they can build enough power and land capacity to bring new chips online without needing to switch older chips off. While we lack strong conviction in power and land availability, we are generally constructive that these

知识星球：前沿信息收录
VX:FCCNN88

problems are fixable, and observe that data center operators' actions seem to suggest confidence that the issues will be fixed.

We believe macro and technical factors have also contributed to the sell-off. Less fundamentally, we've also heard that fund flows have been a headwind, as investors exit TMT positions for liquidity ahead of major anticipated IPOs, and the macro outlook has also been negative, especially given rising rates and concerns of renewed war with Iran. We also believe there may have been some pressing of shorts in the hopes of triggering forced liquidations of portfolios which are both levered and underwater - which appears to have happened to some extent on Thursday.

So where do we go from here? While we don't find the bear case particularly compelling, and remain positive longer-term, we acknowledge that the bear case is hard to prove or disprove in the near-term, and the catalyst past looks light until January. On net, we see some potential for a technical bounce in the short term, but believe a full recovery will take longer.

- **We don't find the bear case particularly compelling, but they are hard to disprove.** In particular, the concerns that AI demand cannot keep pace with the AI infrastructure build have never really gone away and probably never will go away. With that said, we observe that the success of Meta Muse shows that there is consumer willingness to adopt AI that could also absorb much of the incremental supply. We believe that because AI is compute constrained, many potentially compelling use cases are being priced out, and there should be room for prices to normalize at a level where hyperscalers continue to get healthy economics but lower costs help drive adoption. The power and land side is further from our expertise and thus our level of conviction is lower, but in general we would wait to see more evidence that AI lab buildouts are actually under strain (especially in terms of switching off older GPUs for retrofits or more desperate signings of partnerships for companies with power) before we'd begin to panic.

- **In the face of what they describe as existential risk, we don't believe that the AI labs or hyperscalars will cut investment...** We remind investors that in the medium term, AI labs and hyperscalers remain the key decisionmaker, and they appear to be convicted in continued investments in the face of what they say as an existential risk. We believe that it will take much clearer evidence of weaker AI demand for the labs and hyperscalers to actually cut investment.

- **...But we also recognize that the greater scale today comes with greater scrutiny and more financing and policy risk.** With that said, we also acknowledge that as the AI industry reaches a larger scale, that naturally invites more scrutiny as well as financing and policy risks. Even if AI labs and hyperscalars remain convicted, given that they are not just invested their own cash flows, but also raising external financing, they need to convince Wall Street as well, and the industry has also attracted more regulatory scrutiny.

- **We could see a short-term technical bounce.** Thursday felt like a capitulation move, and we also observe that if IPO funding flows have created selling pressure on the stocks, major IPOs themselves could serve as a clearing event. Accordingly, our low-conviction near-term view remains positive.

- **But we are also not confident in the catalyst path, the SOX is in a seasonally weaker period, and concerns about the pace of adoption and the availability of land and power aren't going to go away.** However, beyond a technical bounce, we also believe that it could take longer for a full recovery. We see a relatively light catalyst path until hyperscaler capex updates in January and Nvidia GTC in March. The SOX is also entering a seasonally weaker period, trading flattish in Nov-Dec in both 2024 and 2025 (despite being consistently up in Nov pre-AI - Exhibit 10). We also believe that many of the fundamental concerns will never truly go away - even if AI adoption is sufficient to justify investments in 2027, the same question will remain for 2028.

We leave our forecasts unchanged, but we reduce our target prices for Lumentum, Celestica, and Corning. We reiterate our Outperform ratings on Arista, Ciena, Celestica, Coherent, and Lumentum, as well as our Market-Perform ratings on Cisco and Corning. Specifically:

- **We lower our Lumentum price target to $635, the face-value of the acquisition offer of 4.5 Marvell shares.** We note that as long as investors view the Marvell-Lumentum deal as likely, Lumentum stock actually shouldn't trade on fundamentals, but rather the odds of deal close, with views on Lumentum's fundamentals better expressed through a Marvell sum-of-the-parts valuation. Our attempt at the arb math points to a 67% odds of deal close, which feels high to us given potential opposition from shareholders and Chinese regulators. While we are hesitant to take the other side of the trade from merger arbs, we also believe that Lumentum also still offers upside as an independent company, and that the stock could work with or without the deal. We now value Lumentum at $635, the value of the acquisition offer of 4.5 Marvell shares as

知识星球：前沿信息收录
VX:FCCNN88

of Friday's close price of $141.2 per Marvell share, compared to our previous valuation which assumed a $200 price per Marvell share. We believe that the next major catalyst for Lumentum is likely to be the Marvell shareholder vote, which has yet to be scheduled.

- **We also lower our price target for Corning to $120, 21x our $5.65 in 2028 EPS.** We continue to worry that Corning's key non-AI businesses (telco, smartphone, TV, autos) face weakening end markets. While we continue to believe Corning has an opportunity to gain per-GPU content, given the negative sentiment around AI, we are not confident that the market will be willing to assign an AI premium to Corning in addition to the upside to numbers that the business offers. We now value Corning at its 5-year average historical multiple of 21x (previously 25x) to reflect a smaller AI premium. On our $5.65 in 2028 EPS points to a price target of $120, down from $140 previously.

- **We also lower our price target for Celestica to $340, 14x our estimate of $24 in 2027 EPS and 9x our estimate of $38 in 2028.** Bears have often argued that if Celestica does not have a sustainable competitive advantage against its ODM/EMS peers, it should trade more like those peers. Not only do we disagree, we also observe that Celestica is now trading at a lower multiple on consensus numbers than its historical EMS peers of Jabil and Flex, which we see as hard to justify. Given the lack of clear upside catalysts, we err towards conservatism, and value Celestica at Flex's FY 2027 multiple of 14x. Combined with our estimate of $24 in FY 2027 EPS, this implies a target price of $340. This also implies a price target 9x our estimate of $38 in 2028, compared to our previous estimate of 13x 2028, which is now in line with Flex's multiple on FY 28 and Jabil's multiple for FY 29.

- **We maintain our target multiples and price targets for Arista, Cisco, Ciena, and Coherent.** We observe that Arista and Cisco are relatively less impacted by AI spend concerns, given that the majority of their revenues and profits are still coming from enterprise. We also note that all four companies also should benefit from power and land constraints, which drives demand for scale-across, while Coherent is trading in line with its pre-AI average multiple.

- **We reiterate our Outperform ratings on Arista, Ciena, Celestica, Coherent, and Lumentum, as well as our Market-Perform ratings on Cisco and Corning.**

I. REQUIRED DISCLOSURES

References to "Bernstein" or the "Firm" in these disclosures relate to the following entities: Bernstein Institutional Services LLC (April 1, 2024 onwards), Sanford C. Bernstein & Co., LLC (pre April 1, 2024), Bernstein Autonomous LLP, BSG France S.A. (April 1, 2024 onwards), Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司, Sanford C. Bernstein (Canada) Limited, Sanford C. Bernstein (India) Private Limited (SEBI registration no. INH000006378), Sanford C. Bernstein (Singapore) Private Limited, Sanford C. Bernstein Japan KK（サンフォード・C・バーンスタイン株式会社）and analysts employed by Société Générale Africa Technologies & Services to produce Bernstein research under a Global Services Agreement in place between Bernstein and Société Générale.

Bernstein is part of a joint venture between Société Générale (SG) and AllianceBernstein, L.P. (AB). Unless specifically noted otherwise, for purposes of these disclosures, references to Bernstein's "affiliates" relate to both SG and AB and their respective affiliates.

VALUATION METHODOLOGY

This research publication covers six or more companies. For valuation methodology and other company disclosures:

Or, you can also write to the Director of Compliance, Bernstein Institutional Services LLC, 245 Park Avenue, New York, NY 10167.

RISKS

This research publication covers six or more companies. For risks and other company disclosures:
Please visit: https://bernstein-autonomous.bluematrix.com/sellside/Disclosures.action.
Or, you can also write to the Director of Compliance, Bernstein Institutional Services LLC, 245 Park Avenue, New York, NY 10167.

RATINGS DEFINITIONS, BENCHMARKS AND DISTRIBUTION

EQUITY RATINGS DEFINITIONS

Bernstein brand

The Bernstein brand rates stocks based on forecasts of relative performance for the next 12 months versus the S&P 500 for stocks listed on the U.S. and Canadian exchanges, versus the Bloomberg Europe Developed Markets Large and Mid Cap Price Return Index EUR (EDME) for stocks listed on the European exchanges and emerging markets exchanges outside of the Asia Pacific region, versus the Bloomberg Japan Large and Mid Cap Price Return Index USD (JPL) for stocks listed on the Japanese exchanges, and versus the Bloomberg Asia ex-Japan Large and Mid Cap Price Return Index (ASIAX) for stocks listed on the Asian (ex-Japan) exchanges -unless otherwise specified.

The Bernstein brand has three categories of ratings:

- Outperform: Stock will outpace the market index by more than 15 pp
- Market-Perform: Stock will perform in line with the market index to within +/-15 pp
- Underperform: Stock will trail the performance of the market index by more than 15 pp

Coverage Suspended: Coverage of a company under the Bernstein research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Not Covered (NC) denotes companies that are not under coverage.

Bernstein brand stock ratings are based on a 12-month time horizon.

Autonomous brand – common stocks

知识星球：前沿信息收录
VX:FCCNN88

The Autonomous brand rates common stocks as indicated below. As our benchmarks we use the Bloomberg Europe 600 Financials Price Return Index (E600BK) and Bloomberg Europe Dev Mkt Financials Large and Mid Cap Price Ret Index EUR (EDMFI) index for developed European banks and Payments, the Bloomberg Europe 600 Insurance Price Return Index (E600IN) for European insurers, the S&P 500 and S&P Financials for US banks and Payments coverage, S5LIFE for US Insurance, the S&P Insurance Select Industry (SPSIINS) for US Non-Life Insurers coverage, the Bloomberg Emerging Markets Financials Large, Mid and Small Cap Price Return Index (EMLSF) for emerging market banks and insurers and Payments, and the Bloomberg Japan Financials Large & Mid Cap Price Return Index (JPFILM) for Japanese Financials. Ratings are stated relative to the sector (not the market).

The Autonomous brand has three categories of common stock ratings:

- Outperform (OP): Stock will outpace the relevant index by more than 10 pp
- Neutral (N): Stock will perform in line with the market index to within +/-10 pp
- Underperform (UP): Stock will trail the performance of the relevant index by more than 10 pp

Coverage Suspended: Coverage of a company under the Autonomous research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Those denoted as 'Feature' (e.g., Feature Outperform FOP, Feature Under Outperform FUP) are our core ideas.

Not Covered (NC) denotes companies that are not under coverage.

Autonomous brand common stock ratings are based on a 12-month time horizon.

Autonomous brand – preferred stocks

The Autonomous brand has three categories of preferred stock ratings:

- Outperform (OP): The total return of the preferred instrument is expected to outperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Neutral (N): The total return of the preferred instrument is expected to perform in line with preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Underperform (UP): The total return of the preferred instrument is expected to underperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous preferred stock ratings are based on a 6-month time horizon.

AUTONOMOUS CREDIT RESEARCH

Where this report contains investment recommendations for credit instruments, as defined in article 3(1)(35) of the Market Abuse Regulation, the information below is presented to comply with its disclosure requirements.

The report may also include reference(s) to published opinions by other Autonomous or Bernstein analysts covering the equity securities of the issuer(s) referenced herein. Please note an investment recommendation for credit instruments published by the author(s) of this report may differ from the published view of the analyst covering equity securities for the issuer(s) contained in this report and vice versa.

CREDIT RATINGS DEFINITIONS

The Autonomous brand has three categories of credit ratings:

- Credit Outperform (C-OP): The total return of the Reference Credit Instrument is expected to outperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.

知识星球：前沿信息收录
VX:FCCNN88

- Credit Neutral (C-N): The total return of the Reference Credit Instrument is expected to perform in line with the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.

- Credit Underperform (C-UP): The total return of the Reference Credit Instrument is expected to underperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous credit ratings are based on a 6-month time horizon.

A list of all investment recommendations produced by the author(s) of this report alongside credit ratings history are available upon request.

It is at the sole discretion of the Firm as to when to initiate, update and cease research coverage. The Firm has established, maintains and relies on information barriers to control the flow of information contained in one or more areas (i.e. the private side) within the Firm, and into other areas, units, groups or affiliates (i.e. public side) of the Firm

DISTRIBUTION OF EQUITY RATINGS/INVESTMENT BANKING SERVICES

Equity Rating	Market Abuse Regulation (MAR) and FINRA Rating Category	Global Rating Distribution	Investment Banking Relationships*
Outperform	BUY	52.3%	14.2%
Market-Perform (Bernstein Brand) Neutral (Autonomous Brand)	HOLD	35.6%	16.1%
Underperform	SELL	12.1%	13.6%

* These figures represent the percentage of companies within each equity rating category for which affiliates of Bernstein have provided investment banking services within the previous 12 months.
As of September 30, 2026. All figures are updated quarterly.

PRICE CHARTS/ RATINGS AND PRICE TARGET HISTORY

This research publication covers six or more companies. For price chart and other company disclosures, please visit https://bernstein-autonomous.bluematrix.com/sellside/Disclosures.action or you can write to the Director of Compliance, Bernstein Institutional Services LLC, 245 Park Avenue, New York, NY 10167.

+65 Sanford C. Bernstein (Singapore) Private Limited; Singapore

+81 Sanford C. Bernstein Japan KK; Tokyo, Japan

Where this report has been prepared by research analyst(s) employed by a non-US affiliate, such analyst(s), is/are (unless otherwise expressly noted below) not registered as associated persons of Bernstein Institutional Services LLC or any other SEC-registered broker-dealer and are not licensed or qualified as research analysts with FINRA. Accordingly, such analyst(s) may not be subject to FINRA's restrictions regarding (among other things) communications by research analysts with a subject company, interactions between research analysts and investment banking personnel, participation by research analysts in solicitation and marketing activities relating to investment banking transactions, public appearances by research analysts, and trading securities held by a research analyst account.

Where this report has been prepared by research analyst(s) employed by Société Générale Africa Technologies & Services (part of the Société Générale group of companies), it has been prepared on behalf of a Bernstein company under a Global Services Agreement in place between Bernstein and Société Générale.

CERTIFICATION

Each research analyst listed in this report, who is primarily responsible for the preparation of the content of this report, certifies that all of the views expressed in this publication accurately reflect that analyst's personal views about any and all of the subject securities or issuers and that no part of that analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views in this publication.

II. ADDITIONAL GLOBAL CONFLICT DISCLOSURES

It is at the sole discretion of the Firm as to when to initiate, update and cease research coverage. The Firm has established, maintains and relies on information barriers to control the flow of information contained in one or more areas (i.e., the private side) within the Firm, and into other areas, units, groups or affiliates (i.e., public side) of the Firm.

III. OTHER IMPORTANT INFORMATION AND DISCLOSURES

Separate branding is maintained for "Bernstein" and "Autonomous" research products.

- Bernstein produces a number of different types of research products including, among others, fundamental analysis and quantitative analysis under both the "Autonomous" and "Bernstein" brands. Recommendations contained within one type of research product may differ from recommendations contained within other types of research products, whether as a result of differing time horizons, methodologies or otherwise. Furthermore, views or recommendations within a research product issued under one brand may differ from views or recommendations under the same type of research product issued under the other brand. The Research Ratings System for the two brands and other information related to those Rating Systems are included in the previous section.

知识星球：前沿信息收录

- Autonomous operates as a separate business unit within the following entities: Bernstein Institutional Services LLC, Bernstein Autonomous LLP, Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 and Sanford C. Bernstein (India) Private Limited. For information relating to "Autonomous" branded products (including certain Sales materials) please visit: www.autonomous.com. For information relating to Bernstein branded products please visit: www.bernsteinresearch.com.

Analysts are compensated based on aggregate contributions to the research franchise as measured by account penetration, productivity and proactivity of investment ideas. No analysts are compensated based on performance in, or contributions to, generating investment banking revenues.

This report has been produced by an independent analyst as defined in Article 3 (1)(34)(i) of EU 596/2014 Market Abuse Regulation ("MAR") and the same article of MAR as it forms part of United Kingdom domestic law by virtue of the European Union (Withdrawal) Act 2018.

To our readers in the United States: Bernstein Institutional Services LLC, a broker-dealer registered with the U.S. Securities and Exchange Commission ("SEC") and a member of the U.S. Financial Industry Regulatory Authority, Inc. ("FINRA") is distributing this publication in the United States and accepts responsibility for its contents. Where this material contains an analysis of debt product(s), such material is intended only for institutional investors and is not subject to the US independence and disclosure standards applicable to debt research prepared for retail investors.

Bernstein Institutional Services LLC may act as principal for its own account or as agent for another person (including an affiliate) in sales or purchases of any security which is a subject of this report. This report does not purport to meet the objectives or needs of any specific individuals, entities or accounts.

To our readers in Canada: If this publication pertains to a Canadian domiciled company, it is being distributed in Canada by Sanford C. Bernstein (Canada) Limited, which is licensed and regulated by the Canadian Investment Regulatory Organization. If the publication pertains to a non-Canadian domiciled company, it is being distributed by Bernstein Institutional Services LLC, which is licensed and regulated by both the SEC and FINRA, into Canada under the International Dealers Exemption.

This document may not be passed onto any person in Canada unless that person qualifies as "permitted client" as defined in Section 1.1 of NI 31-103.

To our readers in Brazil: This report has been prepared by Bernstein Institutional Services LLC, and Banco BTG Pactual S.A. ("BTG") is responsible for the distribution of this report in Brazil.

To readers in the United Kingdom: This publication has been issued or approved for issue in the United Kingdom by Bernstein Autonomous LLP, authorised and regulated by the Financial Conduct Authority and located at 60 London Wall, London EC2M 5SH, +44 (0)20-7170-5000. Registered in England & Wales No OC343985.

This document is for distribution only to persons who (i) have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended, the "Financial Promotion Order"), (ii) are persons falling within Article 49(2)(a) to (d) ("high net worth companies, unincorporated associations, etc.") of the Financial Promotion Order, (iii) are outside the United Kingdom, or (iv) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) in connection with the issue or sale of any securities may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as "relevant persons"). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

To our readers in the member states of the EEA: This publication is being distributed by BSG France SA, which is authorised and regulated by the Autorité de Contrôle Prudentiel et de Résolution (ACPR) and Autorité des Marchés Financiers (AMF).

To our readers in Hong Kong: This publication is being distributed in Hong Kong by Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司, which is licensed and regulated by the Hong Kong Securities and Futures Commission (Central Entity No. AXC846) to carry out Type 4 (Advising on Securities) regulated activities and subject to the licensing conditions mentioned in the SFC Public Register (https://www.sfc.hk/publicregWeb/corp/AXC846/details)). This publication is solely for professional investors, as defined in the Securities and Futures Ordinance (Cap. 571). The purpose of this report is solely to provide an analysis of the issuers referred to in this report and is not intended for any purpose contrary to the laws of Hong Kong.

To our readers in Singapore: This publication is being distributed in Singapore by Sanford C. Bernstein (Singapore) Private Limited, only to accredited investors or institutional investors, as defined in the Securities and Futures Act 2001 of Singapore ("SFA"). Recipients in Singapore should contact Sanford C. Bernstein (Singapore) Private Limited in respect of matters arising from, or in connection with, this publication. Sanford C. Bernstein (Singapore) Private Limited is regulated by the Monetary Authority of Singapore and licensed under the SFA as a capital markets services licence holder for dealing in capital markets products that are

知识星球：前沿信息收录

securities and collective investment schemes and an exempt financial adviser for advising on, issuing and promulgating analyses and reports on securities. Sanford C. Bernstein (Singapore) Private Limited is registered in Singapore with Company Registration No. 202137 10W and located at 8 Marina Boulevard, #12-01, Marina Bay Financial Centre, Singapore 018981, +65-6326-7000.

To our readers in the People's Republic of China: The securities referred to in this document are not being offered or sold and may not be offered or sold, directly or indirectly, in the People's Republic of China (for such purposes, not including the Hong Kong and Macau Special Administrative Regions or Taiwan, the "PRC") in contravention of any applicable laws of the PRC.

This document does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC to any person to whom it is unlawful to make the offer or solicitation in the PRC.

We do not represent that this document may be lawfully distributed, or that any securities may be lawfully offered, in compliance with any applicable registration or other requirements in the PRC, or pursuant to an exemption available thereunder, or assume any responsibility for facilitating any such distribution or offering. In particular, no action has been taken by us which would permit a public offering of any securities or distribution of this document in the PRC. Accordingly, the securities are not being offered or sold within the PRC by means of this document or any other document. Neither this document nor any advertisement or other offering material may be distributed or published in the PRC, except under circumstances that will result in compliance with any applicable laws and regulations.

To our readers in Japan: This publication is being distributed in Japan by Sanford C. Bernstein Japan KK (サンフォード・C・バーンスタイン株式会社), which is registered in Japan as a Financial Instruments Business Operator with the Kanto Local Finance Bureau (registration number: The Director-General of Kanto Local Finance Bureau (FIBO) No.3387) and regulated by the Financial Services Agency. It is also a member of Investment Management Association of Japan. This publication is solely for qualified institutional investors in Japan only, as defined in Article 2, paragraph (3), items (i) of the Financial Instruments and Exchange Act.

For the institutional client readers in Japan who have been granted access to the Bernstein website by Daiwa Securities Group Inc. ("Daiwa"), your access to this document should not be construed as meaning that Bernstein is providing you with investment advice for any purposes. Whilst Bernstein has prepared this document, your relationship is, and will remain with, Daiwa, and Bernstein has neither any contractual relationship with you nor any obligations towards you.

To our readers in Australia: Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 is responsible for distributing research in Australia. It is regulated by the Securities and Exchange Commission under U.S. laws, by the Financial Conduct Authority under U.K. laws, which differs from Australian laws. Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 is exempt from the requirement to hold an Australian financial services license under the Corporations Act 2001 in respect of the provision of the following financial services to wholesale clients:

- providing financial product advice;
- dealing in a financial product;
- making a market for a financial product; and
- providing a custodial or depository service.

To our readers in India: This publication is being distributed in India by Sanford C. Bernstein (India) Private Limited (SCB India) which is licensed and regulated by Securities and Exchange Board of India ("SEBI") as a research analyst entity under the SEBI (Research Analyst) Regulations, 2014, having registration no. INH000006378 and as a stock broker having registration no. INZ000213537. SCB India is currently engaged in the business of providing research and stock broking services. Information about past performance of an investment is not necessarily a guide to, indicative of, or assurance of future performance. Estimates of future performance mentioned by the research analyst in this report are based on assumptions that may not be realized due to unforeseen factors like market volatility/fluctuation. In relation to securities or financial instruments denominated in a foreign currency other than the clients' home currency, movements in exchange rates will have an effect on the value, either favorable or unfavorable. Before acting on any recommendations in this report, recipients should consider the appropriateness of investing in the subject securities or financial instruments mentioned in this report and, if necessary, seek independent professional advice.

The securities described herein may not be eligible for sale in all jurisdictions or to certain categories of investors where that permission profile is not consistent with the licenses held by the entities noted herein. This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject the entities noted herein to any regulation or licensing requirement within such jurisdiction.
