Company Sector

Industrials/Multi-Industry

Company Description

ITT Corporation is a Connecticut based supplier of flow control and motion and interconnect solutions. In 2011, the company spun off its defense business as Exelis and its water technology business as Xylem. The remaining businesses maintained the ITT name and includes the heritage Motion & Flow Control segment. Its products include industrial pumps, aircraft fuel systems, motion control, electronic connectors, and friction materials.

Investment Rationale

ITT is a top-tier operator with plenty of opportunities for margin expansion to deliver positive EPS revisions next year. End markets (oil & gas, aerospace) have solid visibility into longer-term growth. ITT has improved pricing and operated well against constrained supply chains. We expect it to continue delivering strong organic results as it scales its business through increased M&A.

Price objective basis & risk

ITT Inc. (ITT)
We base our $254 price objective on 17x 2027E EV/EBITDA, a premium to peers trading at 15x 2026E. We argue a premium is warranted due to above-peer earnings growth and prospective upward earnings revisions.

Downside risks to our PO are 1) ITT may overpay for deals in the pursuit of diversifying and expanding its product portfolio, 2) capex spending in the oil & gas, Aerospace & Defense, power gen, and other key end markets could be lower than expected, 3) short-cycle pumps and connectors could slow, 4) it could have above-peer exposure to auto markets, 5) ITT may have to choose between different value creation strategies as it scales the business.

VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R2]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

[R2] Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.
