We wanted to provide one interesting nugget from each team's coverage universe from the last week as well as highlight upcoming calls and prior conference call replays. Please see below.

Interesting nuggets from each team's coverage universe in the last week

- **Alnylam Pharmaceuticals (ALNY – Fye):** We see the new ASP -28% reimbursement for Part B drugs under the 340b pricing program starting Jan 1 as incrementally better than expected relative to the proposed ASP -33.4%, but still a substantial step down from current ASP +6% reimbursement. The prior framework had created a nice margin for 340b institutions buying Amvuttra and Alnylam has acknowledged the uncertainty this creates for the Amvuttra outlook. The company has also outlined multiple means to ensure Amvuttra remains economically viable for these institutions. Looking ahead, we expect ALNY to wait until 4Q results to guide for 2026, allowing them to get a better sense of customer behavior in the early part of the year. While we still expect ALNY to preannounce sales at J.P. Morgan, the 4Q update will also be important from a pipeline perspective as we also expect phase II POC for ALN-6400 in HHT in addition to phase I for ALN -2232 (ACVR1C, obesity) to be disclosed alongside the results and guidance.
- **Quick Hitters on Analyst Focus List (AFL) Picks (COGT, OLMA, ORIC - Rama):** Given market volatility, we wanted to quickly review our AFL picks. *Cogent* – We see the potential for 2 approvals for bezuclastinib (2L GIST [PDUFA date 11.30.26] and NonAdvSM [PDUFA date 12.30.26]), a very strong launch in 2L GIST, and the strategic attractiveness of the asset as having the potential to drive COGT shares to a ~$5-handle range. We expect a clean label for bezuclastinib, with no REMS or black-box warning for liver enzyme elevations. *Olema* – We view OLMA positively heading into the pivotal OPERA-01 readout (1Q27), with palazestrant data in both ESR1-mutant and wild-type patients. At current levels, there is upside on a positive outcome in the ESR1 mutant population alone. Frankly, stat sig in the wild-type population would be an significant game changer, in our view, and could materially change the outlook for OLMA shares (and potentially the strategic attractiveness of palazestrant). *ORIC* – Focus remains on rinzimetostat and the read-through from Pfizer's MEVPRO-1 study (*covered by Chris Schott*), which is now expected in 1Q27. Overall, we continue to have a positive outlook on MEVPRO-1, despite multiple data timeline pushouts, given prior data, assumptions in the study, and our positive outlook on the mechanism. Of note, there is no change to our reward/risk view for ORIC shares reading into the 1Q27 card flip - upside into the high-teens on positive MEVPRO-1 results vs. downside toward cash levels (latter of which we see as very low probability). Pending MEVPRO-1 outcome, rinzimetostat may also emerge as strategically attractive.
- **Cytokinetics & Edgewise Therapeutics (CYTK & EWTX – Romero):** On

Friday, we attended the Hypertrophic Cardiomyopathy Medical Society (HCMS) Scientific Session at the American Heart Association (AHA) Scientific Sessions taking place on Nov. 6-9, 2026 in Chicago, IL. We took in key presentations in the hypertrophic cardiomyopathy (HCM) space and gathered physician feedback as it relates to Cytokinetics' Myqorzo (aficamten) and Edgewise's EDG-7500. Please reach out if you want to catch up regarding the event!

- **CG Oncology (CGON – Cheng):** We remain on high alert for the incoming IR-NMIBC readout later this month. There is now a LBA slot for the P6's topline at SUO on Dec 2 (link). We continue to see the bar for success as near the 0.5 to low 0.6-handle for RFS HR. See our preview 1.0, 2.0.
- **Rhythm Pharmaceuticals (RYTM - Grover):** This Friday, we came out with the note discussing the reported (Reuters, WSJ) ~$10B bid to acquire Rhythm by AstraZeneca, along with takeaways from our investor huddle with management which was held the morning after the reports came out. We are not surprised to see Rhythm in M&A headline given 1) a robust commercial and clinical pipeline; 2) an unmet need supported by a large TAM; and 3) exposure to a highly active obesity market. That said, we believe the proposed valuation discounts Rhythm's clinical pipeline (PWS and potential other indications), while the recently announced royalty deal with LG Chem reinforces management's confidence in the platform. Shifting to 3Q, we came out encouraged by the reported results and would like to point out that we shouldn't be expecting an "out of the gate" ramp and instead, should assess the launch similar to rare diseases and based on steady trajectory and how new starts flow into the topline.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting https://www.jpmm.com/research/disclosures, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.
