3Q26 weakness; 4Q recovery in sight

Overweight

Price (30 Oct 26):Rmb4.86

▼**Price Target (Dec-27):Rmb6.00**
Prior (Dec-27):Rmb6.30

Daqin line volume fell 3% Y/Y in 3Q26, driving revenue/NPAT down 6%/26% Y/Y, reflecting weak Shanxi coal supply and lower-margin logistics services. We expect a sequential 4Q recovery as policy-led mine restarts, winter restocking and post-maintenance capacity normalization support coal shipments. Tighter coal supply and firmer pricing should also reduce pressure for further freight discounts, supporting margin stabilization. We forecast FY26E NPAT at Rmb7.0bn, up 19% Y/Y off a low base. At 0.6x P/B, with 3.6-4.1% FY26-28E dividend yields, improving cash flow and a Rmb400-500mn buyback, we retain OW with a Rmb6.0 price target.

- **3Q26 was volume pressured.** Daqin line freight volume fell 3% Y/Y to 94mn tonnes in 3Q26, with September volume down 5% Y/Y, reflecting weaker coal shipment from Shanxi province amid coal mine safety checks. Revenue declined 6% Y/Y, while total costs fell only 1% Y/Y, causing GPM to contract 4.7ppts Y/Y to 7.6%. 3Q26 NPAT fell 26% Y/Y to Rmb1.6bn. The weaker margin also reflects continued logistics contracting services, where profitability appears lower than core railway transportation.
- **4Q recovery has support.** Although 3Q26 was soft, FY26E earnings should still rise Y/Y, helped by a low base as 4Q25 was loss-making. Shanxi mine self-suspension, safety checks, and slower-than-expected restarts have constrained supply, but policy support is turning more visible. On October 16, NDRC, NEA, and other departments convened a Shanxi meeting to accelerate mine supply release ahead of the winter, which is positive for Daqin as ~70% of its coal source comes from Shanxi province.
- **Coal pricing helps discounts normalize.** El Niño-driven warmer-than-expected summer weather has supported power demand, while coal prices are likely to stay elevated due to supply tightness. This is positive for Daqin, as a tighter coal market should reduce pressure to offer coal shipment fee discounts this year, after discounts were initiated in 2024/2025. Higher coal prices do not automatically translate into higher railway volume, but they improve bargaining conditions and reduce the risk of further tariff concessions.
- **Valuation remains undemanding.** We now forecast FY26E revenue and profit to rise 2% and 19% Y/Y. We revise our DCF-based Dec-27 PT to Rmb6.0 from Rmb6.3, driven by ~5% earnings cuts across FY26-28E. The stock trades at 0.6x FY26-28E P/B. With 9M26 Op-CF up 168% Y/Y, a Rmb400-500mn buyback, and 3.6-4.1% dividend yield in FY26E-FY28E, we retain OW.

Summary Investment Thesis and Valuation

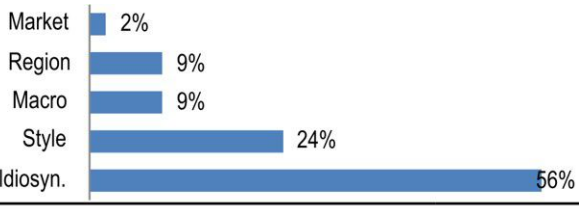

Investment Thesis

Daqin benefits from access to premium coal resources concentrated in the "Three West" regions (Shanxi, Shaanxi, and West Inner Mongolia), which account for the bulk of China's coal production. The company's profitability is further supported by its stakes in Shuohuang Railway (~41%-owned) and Haoji Railway (10%-owned), enhancing earnings diversification. We see a balanced risk-reward at current levels, underpinned by defensive operations, resilient Op-CF, and a net cash position at 25% of market cap, providing a solid valuation floor for investors. We have an OW rating on the stock.

Valuation

Our Dec-27 DCF-based PT of Rmb6.0 assumes a WACC of 7.2%, with beta of 0.6, cost of equity of 7.2%, cost of debt of 5%, tax rate of 25%, a targeted gearing of 0%, and terminal growth rate of -5%.

Risks to Rating and Price Target

Key downside risks to our rating and price target include: 1) weaker-than-expected coal transportation volume growth; 2) lower-than-expected coal consumption, which could result from a pick-up in industrial activity and the ongoing decarbonization push; 3) faster-than-expected progress in China's new energy transition at the expense of thermal power; and 4) higher-than-expected import coal volumes impacting domestic coal production.

Initiated coverage May 26, 2015. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark
