Weekly: Oct PE settlement, TiO2 Update, Fertilizer Market Debrief

Industry Overview

PE settles +5cpp for Oct, China imports and higher oil

North American PE contracts settled +5cpp in October. With Brent above $100/bbl and naphtha near $950/mt, CFR China PE prices rose 5.5–9.6cpp, helping lift Oct US export prices to ~54cpp from ~48cpp in August, although still below April's ~84cpp peak. China also shifted from a net PE exporter in May (536kt imports vs. 567kt exports) to a net importer, as September imports rose to 927kt from 672kt in August while exports were 290kt (down from 617kt in April). Ultimately, this continues to drive strong demand for US exports of PE. Low Chinese inventories and feedstock-driven run cuts have also provided further support. Consultants expect North American NTP flat through Nov/Dec before falling 7cpp in January. Limited spot availability, the Formosa force majeure and slow Golden Triangle startup provide near-term support, while crude volatility and the eventual supply ramp remain downside risks to price through year end.

TiO2 sees limited pricing gains as demand remains weak

TZMI's Oct update points to continued weakness across the TiO2 market, with demand slowing amongst all regions. 4Q26E pricing was unchanged in N America, largely flat in Europe (-0.3%), and down ~1% in China vs the prior outlook, with 1H27E largely unchanged across regions. In N America, milder weather conditions have subdued resi repaint demand, and the new-housing market remains weak amid higher input costs and higher mortgage rates. Europe remains soft, with demand slowing, particularly in countries with social unrest, as construction contracts sharply despite positive manufacturing activity. At the same time, renewed production from several facilities is easing supply tightness, potentially adding further pressure to pricing. In China, domestic pricing remains under pressure as weak end-market demand and elevated inventories persist, while lower input costs are giving producers flexibility to compete on price and secure volumes. Anti-dumping measures in India and the UK (feedback stage) provide some regional support, though elevated inventories in India have resulted in only gradual price growth. Western producers are also now reportedly offering select customers price rollovers into 1Q27 to maintain volumes and cash flow.

Mosaic Rallies, Urea Awaits India; Phosphates Slip

Third-quarter earnings dominated North American fertilizer news this week: Mosaic shares rallied more than 17% on November 4 despite a $72M 3Q net loss as the company hinted at trough conditions, citing better-than-anticipated North American phosphate demand while Nutrien and CF Industries' adj. EBITDA rose ~25% on higher ammonia selling prices and sales volumes. Attacks on shipping in the Strait of Hormuz were unabated, though crude oil and natural gas prices plunged on the back of the US "Blue Wave" even as discussion mounted over the next move against Iran. Urea prices weakened modestly in the absence of a new India import tender, now expected in the first half of next week at the earliest, while ammonia is closing in on a month of gains. Granular phosphate prices drifted lower on weak buying appetite despite tight availability, with India DAP at its lowest level since April, while sulfur prices dropped amid a significant correction and sulfuric acid resumed its decline.

financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are not regulated in a manner similar to U.S. securities markets. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities or digital assets that may have been recommended or discussed in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments recommended or discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.
