3Q26 Mortgage Finance Preview: Higher-for-Longer Weighs on Sector

We lower EPS estimates (-9%) for the originators and title stocks to reflect higher mortgage rates and a weaker origination backdrop. We continue to favor RKT and FAF within the mortgage space.

We revise our 2026 and 2027 origination forecasts to reflect a more persistent higher-for-longer rate environment, with the 30Y FRM now up 110bps YTD and 54bps q/q. Purchase activity has slowed meaningfully, and refinance remains constrained with less than 1% of MDO 50bps ITM. Against this backdrop, we favor RKT for its scaled servicing and strong execution and FAF for its cheap valuation and strong commercial trends.

Key 3Q Trends: (1) Both purchase and refinance application activity slowed during 3Q, -3.5% y/y and -21.0% y/y, on average, respectively. (2) Higher mortgage rates should reduce prepayment activity, driving lower amortization expense on servicing and partially offsetting weaker origination volumes. (3) With a mortgage rate of ~7% plus, we estimate only ~0.80% of mortgage debt outstanding was at least 50bps in-the-money to refinance. (4) Competitive dynamics in the broker channel may be shifting as some competitors have faced balance sheet and profitability pressures. (5) Affordability remains a key policy focus, with FHFA Director Bill Pulte's recent tweets focused on title insurance and private mortgage insurance.

Stocks We Favor: RKT and FAF remain our preferred ways to play a prolonged higher-for-longer rate environment. RKT should continue to gain share through its integrated COOP/RDFN/Compass ecosystem, while its scaled servicing platform should provide meaningful earnings support even in a trough origination environment. At the same time, the company remains highly levered to a future rate rally through its DTC recapture capability. FAF offers a differentiated combination of commercial title growth and margin self-help. Management continues to expect a record commercial revenue year, supported by large data center transactions, while Endpoint and Sequoia should drive efficiency gains and margin expansion. We believe both companies are well positioned to outperform mortgage peers.

Reiterate OW on UWMC. The stock is down 70% YTD (vs. +12% S&P 500) and trades at ~4x our 2027 estimates. However, the material (\$2.05B) capital raise last quarter helped shore up the balance sheet and de-risks the equity, in our view. Management has much to prove, but we think with Oaktree as a strategic partner, the company will place greater emphasis on expenses and profitability.

Barclays Capital Inc. and/or one of its affiliates does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Quick Investment Views

Originator Servicers

- **PennyMac Financial (PFSI, EW, \$71 PT) – 27YE ROE target remains a show-me story; 3Q environment was challenging and ROE likely tracking to MSD.** While management reaffirmed its ROE target of mid-teens (by 27YE), it acknowledged that a softer origination backdrop could delay achievement by a quarter. Near term, weaker volumes are expected to pressure earnings, though lower amortization expense should provide a partial offset. However, we remain EW given consecutive ROE revisions lower, ongoing pressure from a smaller origination market and correspondent channel dynamics (shares trade at ~0.7x P/B).
- **Rocket Companies (RKT, OW, \$15 PT) – Servicing scale from COOP should provide earnings support through a softer origination environment.** RKT's results are increasingly reflecting the contribution from COOP, with net servicing revenue of ~\$2B contributing to a more resilient revenue mix. We view the company as a LT share consolidator through its integrated COOP/RDFN/Compass ecosystem and diversified origination channels even with lower industry volumes, particularly as competitors remain challenged by profitability pressures. We view RKT as best positioned among the originators to outperform in a higher-for-longer environment, and we see meaningful upside potential should rates rally.
- **UWM Holdings (UWMC, OW, \$2 PT) – Oaktree capital injection strengthens the balance sheet.** The \$2.05B capital investment from Oaktree/Ishbia family and dividend cut helped alleviate near-term balance sheet pressure, though investors remain focused on UWMC's ability to ultimately redeem the preferred shares given the steep premium schedule. We believe the 2H earnings outlook will remain challenged, particularly given the lack of a meaningful servicing hedge. Offsetting the pressure are continued workforce reductions that could benefit opex. We remain OW, as we believe much of the downside is reflected in the current valuation of 4.2x '27E EPS.

Title Insurance

- **First American Financial (FAF, OW, \$79 PT) – Commercial strength continues to support earnings.** Management continues to expect a record commercial revenue year in 2026, supported by higher-ARPO transactions (e.g., data centers). In addition, ongoing technology and AI investments should drive efficiency gains and eventually support higher normalized pre-tax title margins. Overall, we reiterate our OW rating with the shares trading at a discount (8.4x '27E EPS).
- **Fidelity National Financial (FNF, EW, \$47 PT) – Margin expected to be down in 3Q from recruiting; FG remains an overhang on FNF shares.** Similar to FAF, FNF is benefiting from a resilient commercial market, though its greater exposure to local commercial transactions may limit relative upside. Easier commercial ARPO comps should remain supportive. Near term, however, we expect margins to compress due to recruiting investments, while negative sentiment around FG continues to weigh on shares. We remain EW, balancing solid commercial fundamentals against a challenged residential backdrop and FG-related concerns.

Mortgage Insurance

- **Esent Group (ESNT, EW, \$66 PT) – Credit normalization in focus.** ESNT's delinquency rate continues to see the largest y/y increase (+41bps in 2Q) among MI peers (+23bps avg). While the combined P&C and quota share businesses should generate a high-90s combined ratio and provide some earnings diversification if MI trends weaken, we expect the contribution from these initiatives to build gradually over time rather than serve as a meaningful near-

term catalyst. As a result, we remain EW, reflecting a balanced risk/reward profile (7.7x '27E EPS).

- **MGIC Investment (MTG, EW, \$29 PT) – Capital return story.** Within our MI coverage, MTG has repurchased the highest percentage of shares outstanding YTD (~8%). Credit has normalized the slowest with DQs up 16bps in 2Q vs. 23bps avg. While the company applies a 7.5% claim rate assumption to underwriting, management has indicated the '23/'24 vintages have trended near 2%-3%, which could support earnings and capital returns in the near term. That said, we do believe credit normalization from more recent vintages will result in lower reserve releases over the next few years. With the shares trading at 7.8x '27E EPS, we remain EW.
- **NMI Holdings (NMIH, EW, \$43 PT) – Above average ROE; credit normalization in focus.** NMIH continues to generate above average ROE in the sector, delivering 15.4% ROE in 2Q26 (vs. ~13.2% average). Additionally, the pull-to-par between NIW and IIF market share could help support above average IIF growth longer-term. However, delinquency trends should continue to normalize similar to other MI peers, but management expects embedded borrower equity and a strong labor market to support cures and favorable reserve development. Overall, we remain EW with the shares trading at 7.0x '27E EPS.
- **Radian Group (RDN, EW, \$36 PT) – Specialty results in focus; discounted valuation.** Similar to other MI peers, credit trends continue to normalize, though the impact has largely been offset by favorable reserve development. However, RDN shares have slightly underperformed the MI group YTD (-9.5% vs. -6.6% on average), reflecting weaker-than-expected Specialty (Inigo) results with a higher expected combined ratio last quarter, due to reserves related to the conflict in the Middle East. While these developments have weighed on sentiment surrounding the acquisition, we believe the valuation already reflects much of the risk and reiterate EW, with the shares trading at 6.1x '27E EPS (below both MI and P&C peers).

MREITs

- **AGNC Investment Corp. (AGNC, EW, \$10 PT) – Challenging rate backdrop results in book value pressure.** Management continues to view Agency MBS returns as attractive, supporting expected ROEs of 15%-17%. Based on management's high-\$0.30s to low-\$0.40s earnings outlook, we believe the \$0.36 dividend remains covered. That said, this was likely a challenging quarter for book values, with the 10Y treasury increasing ~82bps q/q and Agency MBS spreads (OAS) widening ~19bps. We estimate AGNC's book value is down ~19% q/q, implying the shares are trading at ~1.3x P/B.
- **Annaly Capital Management (NLY, EW, \$24 PT) – Diversified business model supports attractive risk-adjusted returns, but higher rates/spreads still weigh on BV.** The company's diversified exposure across Agency MBS, MSR, and residential credit should allow NLY more investing flexibility. Management indicated that incremental capital would continue to be allocated to Agency MBS, although the planned reduction in Agency exposure should prove beneficial if spreads compress over time. Given rate and spread moves since last quarter, we estimate BV is down ~11% in 3Q, implying the shares are trading at ~1.0x P/B.
- **Brightspire Capital (BRSP, UW, \$4 PT) – Dividend coverage pushed to mid-'27.** Management pushed out its expectation for full dividend coverage to 2Q27/3Q27 (from YE26) following the \$300MM NNN asset sale. We also remain cautious on BRSP's ability to achieve its YE26 loan portfolio target of \$3.5B and mid-2027 target of \$4.0B (down from a prior expectation of ~\$4.25B), given the current portfolio balance of ~\$2.9B. Overall, we see limited potential for a near-term re-rating as the earnings run-rate remains below the quarterly

dividend, and we continue to view the stock as a "show-me" story. We therefore maintain our UW rating.

Mortgage Industry Trends

Origination Estimates: We revise our 2026 total origination forecast lower by 4% to \$1.93T (~9% lower than the avg. of Fannie/MBA), which implies a -1.3% y/y decline vs. 2025 estimated total market originations. Our revised 2026 forecasts contemplate a -2.0%/-9.3% change from our prior purchase/refi estimates. Our 2027 origination estimate is \$1.96T (was \$2.28T), which implies +1.4% y/y vs. the BARC '26 estimate, and is ~10.7% lower than industry forecasts.

- **Refi Split:** Our 2026 estimates imply that 28% (was 29%) of all originations will be refinances compared to 33% for both Fannie and MBA. For 2027, we estimate a refi split of ~27% (was ~33%) compared with 35%/30% for Fannie/MBA. These estimates are still below the historical average of 45% (1990-2015).
- **Fannie/MBA Estimates 2026:** MBA and Fannie are now both forecasting ~\$2.12T in FY26 originations. Fannie decreased estimates by 9.6% QTD, mostly due to a decrease in refi (-22.1%) and slightly lower purchase (-1.9%). MBA's estimates are down 2.3% QTD due to lower refi (-6.3%), while purchase is roughly unchanged.
- **Fannie/MBA Estimates 2027:** Fannie decreased estimates by 7.5% QTD to \$2.28T, driven by lower purchase (-6.2%) and lower refi (-10.0%). MBA's estimates decreased by 4.1% to \$2.10T due to slightly lower purchase (-2.6%) and lower refi (-7.3%).
- **30Y FRM Estimates:** Fannie/MBA are currently forecasting the 30Y mortgage rate at ~6.8% (Figure 8) by 26YE (would imply ~2.5% of all mortgage debt outstanding is ~50bps ITM to refinance). The forward curve currently implies a ~7.35% 30Y FRM at 26YE (Figure 9) and would imply 0.31% of all MDO would be 50bps ITM.
- **Application Data:** MBA's mortgage application data for 3Q showed purchase applications (Figure 10) were, on average, -3.5% y/y (vs. +5.4% in 2Q). Refi applications (Figure 11) on average were -21.0% y/y (vs. +23.7% in 2Q). Refi applications in September were weaker than July/August at -52.0% y/y on average.

Housing Supply: Overall, existing home listings continue to come in below the 2015-19 average. YTD (Jan to August), '26 monthly sales are -20.6% on average vs. -21.4% in '25, -19.7% in '24, and -20.8% in '23 (Figure 14). Additionally, housing turnover (Figure 15) decreased to 3.2 months in July (vs. 3.5 months in June and 2.6 months last July). Combined, these factors remain a headwind to purchase volumes.

- **Builder Sentiment:** HMI (or home builder sentiment) came in at ~32 in September, vs. ~36 in June and ~32 last September (Figure 16). Over 60% of home builders continue to use incentives (Figure 19, 66% in September vs. 62% in June and 65% last September). Incentives include rate buy-downs or lowering closing costs to improve sales. Notably, 38% of builders are reducing home prices (vs. 35% in June and 39% last September).
- **New Home Sales:** New home sales as a percentage of total existing home sales remain above 10% and were 14.7% in August vs. 14.8% last August and 11.5% in August 2019 (Figure 18).

FIGURE 19. ...Likely Partially Due to Builders Turning to Incentives to Improve Sales

Source: NAHB, Barclays Research

Affordability: The cost of servicing a new mortgage (Figure 20) has increased slightly to ~25% of the average consumer's income from 23% in June and 22% in January, and remains elevated compared to historical levels (median of 16% since 1995). The gap between the average home price and what a typical consumer with the median income can afford (Figure 21) increased to its widest level in history (currently at ~\$166K vs. \$151K in June and \$132K in January).

- **Home Price Appreciation Outlook:** Elevated 30Y FRM and current home price levels have materially constrained purchase activity. Home price appreciation (HPA) remains a key challenge in terms of affordability (Figure 22) and a significant headwind for purchase volumes. That being said, HPA appears to have moderated as the average 2025 HPA growth was +2.6% vs. +5.9% in 2024; the YTD average (through July) is +1.5%. Still, for a meaningful recovery in purchase volumes, we believe HPA would need to decline further and broaden across regions, coupled with a 30-year fixed mortgage rate below 6%.

Mortgage Coupon Distribution

The housing market saw a material pull-forward in refi originations during COVID, mostly due to the historically low interest rate environment (Figure 29) and has resulted in a large portion of MDO below 6%. Currently, 73.7% of all MDO is below 6% (vs. 74.4% at 25YE, 81.2% at 24YE, and 89.7% at 23YE). The distribution continues to be heavily skewed toward lower-coupon mortgages due to the "locked-in" effect, which results in lower refi TAM.

At the quarter-end 30Y FRM of 7.03%, we estimate ~0.83% of all mortgage debt outstanding was 50bps ITM; this compares with 1.1% at 25YE, 1.2% at 24YE, and 0.50% at 23YE (Figure 27). The ~30bps decrease from 25YE to quarter-end is likely due to a refi pull-forward in 4Q25 and early 1Q26 when the 30Y FRM declined to just below 6% in late February (from 6.50% in early September). We believe 3Q26 volume results will continue to reflect a slowdown in refi volumes. Additionally, just 0.41% of MDO is 75bps ITM (Figure 28).

Valuation Across Mortgage Finance

The SPX was up 2% in 3Q26, while broader financials (XLF) were roughly flat. Our mortgage coverage materially underperformed, down 20% on average (excluding MREITs), driven primarily by weakness across the originator-servicer group. UWMC declined 48% following a meaningful hedge loss in 2Q that ultimately led to the Oaktree capital raise, while PFSI was down 29% after pushing out its mid-teens ROE target to 27YE/early 2028. Despite the larger servicing book from the COOP acquisition, RKT was down 27%, likely reflecting higher mortgage rates and a softer-than-expected origination backdrop. Title insurers also underperformed as residential market conditions weakened q/q and headline risk increased following comments from Bill Pulte (FHFA Director); FAF declined 11%, while FNF was down 18%, with the greater underperformance likely reflecting continued concerns around FG (covered by Alex Scott). On average, Mortgage Insurance stocks were down 12%, with pressure accelerating late in the quarter following Bill Pulte's comments regarding PMI cancellation policies and the potential use of AI to reduce mortgage insurance costs (the group was down 4% QTD halfway through September). RDN (-19%) was the weakest performer in the group, driven by additional reserves within its Specialty segment related to the conflict in the Middle East.

SPX's valuation re-rated lower q/q and is now trading at a ~0.30x premium to its historical average (vs. ~4x premium at the start of the year) while XLF trades at a ~0.55x premium. On average (excluding MREITs), mortgage companies within our coverage are trading at a ~3x turn discount to historical P/E averages, led by UWMC at an ~8x turn discount, followed by RKT at ~7x and FAF at ~3x. PFSI is trading at a ~1x turn discount on a P/E basis, but is trading below book value (~0.7x).

For the MREITs, AGNC and NLY are roughly in-line with their historical average P/B ratios, though we estimate they are trading at a 0.1-0.2x turn premium when adjusting for rate and spread moves. BRSP is trading roughly in line with its historical average as well after management pushed out its dividend coverage expectation to mid-2027 due to the [NNN sale](#). On average, Mortgage Insurance stocks are trading ~0.4x below their historical average P/B multiples.

Originator-Servicers

Sector Trends

- We revise our 2026 total origination forecast lower to \$1.93T (-4.1% vs. 2Q BARCe) vs. the \$2.12T industry forecast. For 2027, we forecast \$1.96T (-14.3% vs. 2Q BARCe) vs. the \$2.19T industry forecast.
- Mortgage application data for 3Q from MBA showed purchase apps were, on average, down 3.5% y/y (vs. +5.4% in 2Q) while refi apps were down 21.0% y/y (vs. +23.7% in 2Q).
- We estimate 60% of current mortgages are below 5% note rate and 74% have a note rate below 6%. A general rule of thumb is that 50-75bps of rate incentive is needed to refi. Based on the current coupon distribution of mortgage debt outstanding, 0.83% of MDO is 50bps ITM at 30Y FRM of 7.03%, and 0.41% is 75bps ITM. If rates decline to 6%, 14.2% of mortgages would be 50bps ITM to refi and 9.3% would be 75bps ITM.

PennyMac Financial Services (PFSI)

• Guidance and Intra-Quarter Updates:

- **QTD Update:** PFSI expects 3Q operating ROE to trend closer to MSDs (vs. guide of MSD to HSD) given the higher rate environment and softer industry volumes. Management expects Production pre-tax income to be lower q/q due to the softer-than-expected origination environment. In servicing, management expects pre-tax income to be higher q/q, with amortization expected to be down 10%+ q/q. Corporate expenses are expected to be roughly flat y/y as 2Q headwinds from credit costs, AWS spending, and incentive compensation revaluation normalize. For more QTD updates, see PFSI's presentation [here](#).
- Management said consumer direct margins are steady q/q on a product-by-product basis (but could be up on a consolidated basis from a larger mix of closed-end seconds), broker margins could be down q/q due to competition, and correspondent margins are stable.
- Management expects 3Q ROE to be closer to MSD and improve to HSD in 4Q assuming rates stabilize and the timing mismatch of lock volumes and originations expense normalize. PFSI continues to target mid-teens ROE by 27YE, though at current rate levels, achievement is more likely toward the end of 2027.
 - A decline in rates would accelerate the path to mid-teens ROE.
 - High-teens to low-twenties remains management's long-term ROE target.
- Management no longer expects broker direct market share to reach its prior 26YE target of 10% given the competitive environment, and remains selective in the correspondent channel.
- The company expects cost to originate will decline by more than 50% by 27YE. Recent cost realignment is expected to generate ~\$60MM of annualized cost savings.
- Management reiterated its long-term target of reducing servicing costs to \$55 per loan (vs. \$89 currently). The company expects to exit 2026 near \$80 per loan and move closer to \$70 by the end of 2027.
- As of the 2Q call, hedge costs are in the MSD range (vs. \$52MM in 2Q and \$14MM in 1Q).
- **Cenlar:** The acquisition is expected to close around 4Q. PFSI acquired Cenlar's subservicing business for \$172.5MM in cash (with up to \$85MM of contingent consideration payable over three years) and the transaction is expected to close in 2H26. The acquisition is expected to be modestly dilutive in 2026-27 (\$0.70-0.80 GAAP and <\$0.30 on an operating basis annually) and accretive in 2028, with management targeting ~\$2.00 of annual post-integration earnings contribution. Post-runoff, Cenlar's subservicing book should add ~\$433B in UPB to PFSI. For more details on the acquisition and our view, see [PFSI to Acquire Cenlar's Subservicing Business, 02/11/2026](#).
- See [Conference Takeaways, 09/ 15/2026](#) for takeaways from our PFSI fireside chat at the Barclays Global Financials Conference.
- **EPS Estimates:** We estimate 3Q EPS of \$1.34 (was \$1.77). Our 2026E EPS is \$6.80 (was \$7.15) and 2027E EPS is \$11.42 (was \$12.11).

- **Valuation and Price Target:** We lower our price target to \$71 (was \$85) based on 0.85x our MRQ BVPS of \$83.49. Our previous price target was based on 7x our 2027 EPS estimate. We switched our valuation methodology to P/B as servicing heavy businesses have historically been valued on book value multiples. Additionally, given the current origination backdrop, investors appear less willing to underwrite earnings-based valuations and apply traditional P/E multiples. We lower our PT to reflect risk to achieving the mid-teens ROE target (notably, the company has revised its ROE target several times this year).

Rocket Companies (RKT)

- **Guidance and Intra-Quarter Updates:**

- 3Q adjusted revenue guidance: \$2,500MM-\$2,700MM (vs. BARC \$2,568MM and 2Q26 revenue of \$2,761MM).
- 3Q expense guidance (assuming the midpoint of the revenue guidance range): \$2,350MM (vs. BARC \$2,363MM and 2Q26 expenses of \$2,503MM), including (a) \$110MM of intangible asset amortization, (b) \$90MM of stock-based compensation, and (c) \$100MM of estimated one-time acquisition costs.
- Management increased its COOP expense synergy target by \$100MM to \$500MM in 2Q, with the incremental savings expected in 1H27, and the initial \$400MM target still on track for 26YE.
- Management expects 3Q volumes to decline sequentially due to higher mortgage rates and 2H volumes to be weaker than 1H.
- As of the 2Q earnings call, management indicated QTD GOS margins were steady with channel-specific improvement.
- In early September, RKT announced an initiative to migrate brokers from UWMC to Rocket Pro, including a \$10K referral bonus (the initiative runs through 26YE).
- The company named Alessio Sanfilippo CEO of Redfin.
- See [Conference Takeaways, 09/15/2026](#) for takeaways from our RKT fireside chat at the Barclays Global Financials Conference.

- **EPS Estimates:** We forecast 3Q EPS of \$0.13 (was \$0.16). Our 2026E EPS is \$0.56 (was \$0.59) and 2027E EPS is \$0.78 (was \$0.95).

- **Valuation and Price Target:** We lower our price target to \$15 (was \$17) based on 19x (was 18x) our 2027 EPS estimate of \$0.78 (was \$0.95).

UWM Holdings (UWMC)

- **Guidance and Intra-Quarter Updates:**

- UWMC eliminated its quarterly dividend (previously \$0.10/share) and indicated that any dividend reinstatement, including potential special dividends, will be evaluated quarterly.
- UWMC guided to FY26 revenue of \$3,500MM-\$4,500MM on its 4Q25 earnings call (management has not updated this guidance), we model \$3,425MM.
- Management expects servicing cost reductions to begin in 2027 following the transition to its in-house servicing platform.
- Management reiterated its intention to opportunistically sell portions of its MSR portfolio.
- **Capital Injection:** UWMC raised \$2.05B of capital with Oaktree Capital and SFS Group, consisting of \$1.65B of preferred equity and a \$400MM rights offering (200MM shares). UWMC also issued detachable warrants for 135MM shares each to the Ishbia family and Oaktree with strike prices of \$2 and \$6, respectively. In addition, the Board will be expanded by two seats to include Oaktree representatives.

- **EPS Estimates:** We forecast 3Q EPS of \$0.03 (was \$0.04). Our 2026E EPS is \$0.13 (was \$0.14) and 2027E EPS is \$0.28 (was \$0.31).

- **Valuation and Price Target:** We maintain our price target of \$2 based on 7x (unchanged) our 2027 EPS estimate of \$0.28 (was \$0.31).

Title Insurance

Sector Trends/Commentary

- The FHFA Title Insurance pilot, which was launched by the previous administration, was extended through November 2027. Recall that the pilot program was set to expire this May.
- FAF/FNF have provided guidance for their title margins under a more normalized environment (FAF 13.5% and FNF 15-20%), with potential for upside due to AI/tech investments. Management teams have stated that a more normalized environment would include existing home sales of ~5MM. August existing home sales were 3.98MM (-1.2% y/y) and July's were 4.06MM (+0.74% y/y).
- Management teams remain positive on commercial revenue growth in 2026; FNF expects results similar to or better than 2025, while FAF believes 2026 could be a record year; both companies indicated that their commercial pipelines remain strong.
- 2026 NII could come in better than initial expectations given the change in the perceived interest rate path. See below for company-specific guidance.

Fidelity National Financial (FNF)

• Guidance and Intra-Quarter Updates:

- FNF expects its normalized annual adjusted pre-tax title margin to be 15%-20%. 1H26 margin was ~15.7%, though management indicated it could compress in 2H due to seasonality, recruiting investments, and acquisitions, which should result in top-line benefits over the coming quarters.
 - Management said its AI initiatives could drive more meaningful margin expansion in 2027 and believes its direct business will benefit more than its agency business. AI/tech could provide upside to its 15% to 20% pre-tax title margin range.
- Order trends: Open purchase up 4% y/y and +6% y/y, in July and August, respectively. Open refi was +15% y/y and -5% y/y, while open commercial was +8% y/y in August.
- Management expects investment income of \$95MM-\$100MM over the next 12 months, assuming Fed funds rates remain unchanged. The corporate segment is also expected to receive ~\$28MM per quarter of common and preferred dividend income from FG (covered by Alex Scott).
- FNF continues to reserve title claims at 4.5% of total premiums.
- Management believes commercial revenue could reach a record high in FY26 due to a strong pipeline across sectors.
- See [Conference Takeaways, 09/16/2026](#) for takeaways from our FNF fireside chat at the Barclays Global Financials Conference.
- **EPS Estimates:** We forecast 3Q EPS of \$1.31 (was \$1.41). Our 2026E EPS is \$4.95 (was \$5.16) and 2027E EPS is \$5.37 (was \$5.85).
- **Valuation and Price Target:** We lower our price target to \$47 (was \$54) based on a Sum-of-the-Parts analysis. We use 10x (unchanged) on our 2027 EPS estimate for core title of \$4.32 (was \$4.80) and 4.0x (was 5.5x) for NTM+1 EPS of \$1.05 (unchanged).

First American Financial (FAF)

• Guidance and Intra-Quarter Updates:

- Management expects pre-tax title margins to continue expanding through 2H26, although the magnitude of improvement will likely depend on commercial revenue strength (note that 4Q is difficult to forecast).
- Management reiterated expectations for 2026 to be a record year for commercial revenue.
 - The commercial pipeline remains strong as 2Q26 saw 14 transactions with a premium of \$1MM+ (vs. 11 in 2Q25) and another 3 QTD (as of the 3Q call). Additionally, data center revenue increased 147% y/y.
- The company announced that it is increasing its dividend to 61c/shr in 4Q26 from 55c.
- Management had previously said the current NII run-rate should serve as a reasonable proxy for 2H26. However, with one rate hike and potentially 2 more, we expect some positive impact to NII in 4Q and beyond.
- Management expects Endpoint and Sequoia to be rolled out nationwide by 27YE.
 - Management noted that company-wide technology spending has remained relatively flat since 2022 and does not expect spending to increase materially from current levels.
- See [August Monthly Title Order Counts, 09/16/2026](#) for FAF's most recent monthly order count results.

- **EPS Estimates:** We forecast 3Q EPS of \$1.88 (was \$1.95). Our 2026E EPS is \$7.04 (was \$7.10) and 2027E EPS is \$7.16 (was \$7.51).

- **Valuation and Price Target:** We lower our price target to \$79 (was \$83) based on 11x (unchanged) our 2027 EPS of \$7.16 (was \$7.51).

Mortgage Insurers

Sector Trends

- We expect 3Q NIW to be \$90B and forecast 2026 FY NIW of \$344B vs. \$311B in 2025 (+10.7% y/y). We forecast 2027 NIW at \$338B (implying -1.9% y/y).
 - We do not expect a meaningful annual or sequential increase to 2H26 PMI NIW demand given that affordability issues persist.
- Previously, NMIH noted it expects its borrowers to need a 75bps incentive to refinance while MTG has noted it expects ~75-100bps to be needed to refinance. Due to the lower amount of equity built up in recent years, recapturing the loans is likely when homeowners refi.
- Management teams continue to expect credit to normalize with typical seasoning as COVID vintages continue to season along with slower HPA growth, which should result in higher DQs.
- 3Q seasonality typically calls for a sequential increase in the DQ rate. Note that 2Q DQ trends were generally in line with typical seasonal patterns, with companies reporting sequential declines in DQ rates. Notably, in 1Q, DQ rates increased counter to seasonality and drove share weakness following 1Q results. For more company-specific details, see [Takeaways from 2Q26 Mortgage Insurance Earnings, 08/10/2026](#).
- Repurchase capacity: ESNT has ~\$223MM of repurchase capacity remaining. MTG's repurchase capacity is ~\$764MM. NMIH has ~\$167MM of capacity remaining, and RDN has ~\$686MM remaining (management expects \$200MM-\$250MM of annual available capital for potential share buybacks, and FY26 could come in toward the high end).

Essent Group (ESNT)

- **Guidance and Intra-Quarter Updates:**

- Management expects an MI premium yield of ~40bps for the remainder of 2026. Elevated mortgage rates are expected to keep persistency elevated, while IIF growth will be slower due to affordability issues. Management believes affordability must improve for a recovery in housing demand, which is likely to occur at the end of the decade.
- ESNT guided to \$320MM of written P&C reinsurance premiums, with roughly half expected to be earned in FY26 at a combined ratio in the high-90s. The reinsurance segment is viewed as a longer-term investment with the goal of growing BVPS.
- ESNT's book is expected to continue to age, which should result in continued credit normalization.
- ~50% of ESNT's in-force portfolio has a mortgage rate of 5.5% or lower.

- **EPS Estimates:** We forecast 3Q EPS of \$1.76 (was \$1.74). Our 2026E EPS is \$7.17 (was \$7.11) and 2027E EPS is \$7.33 (was \$7.20).

- **Valuation and Price Target:** We raise our price target to \$66 (was \$65) based on 9x (unchanged) our 2027E EPS of \$7.33 (was \$7.20).

MGIC Investment (MTG)

- **Guidance and Intra-Quarter Updates:**

- MTG's quarterly dividend will increase to \$0.17 (was \$0.15).
- Opex is expected to come in at the low end of its \$190MM-\$200MM FY26 guide.
- Management indicated that credit trends remain consistent with broad-based normalization and MTG continues to apply a 7.5% initial claim rate (2023 and 2024 vintages actual claim rate is in the 2%-3% range).
- Management expects persistency to remain elevated through 2026, which should result in premium yields following a similar trajectory to the past several years.
- According to management, affordability continues to constrain housing market growth despite a strong purchase quarter in 2Q, while refi activity remains largely dependent on the direction of mortgage rates.

- **EPS Estimates:** We forecast 3Q EPS of \$0.80 (was \$0.77). Our 2026E EPS is \$3.22 (was \$3.18) and 2027E EPS is \$3.27 (was \$3.16).

- **Valuation and Price Target:** We raise our price target to \$29 (was \$28) based on 9.0x (unchanged) our 2027 EPS estimate of \$3.27 (was \$3.16).

NMI Holdings (NMIH)

- **Guidance and Intra-Quarter Updates:**

- Management expects normal book seasoning and seasonal 2H headwinds to pressure credit performance through 2026.
- Embedded borrower equity and a healthy labor market should continue to support cures and favorable reserve development.
- Management expects NMIH's core yield to remain relatively stable and does not anticipate any notable changes in competitive pricing.
- Refi activity could pressure premium yields, and management does not expect the 21st Century ROAD to Housing Act to have a significant near-term impact on the PMI industry.
- Management expects dollar opex to increase over time as it continues to invest in the business.

- **EPS Estimates:** We forecast 3Q EPS of \$1.28 (unchanged). Our 2026E EPS is \$5.23 (was \$5.25) and 2027E EPS is \$5.37 (was \$5.38).

- **Valuation and Price Target:** We maintain our price target of \$43 based on 8.0x (unchanged) our 2027 EPS estimate of \$5.37 (was \$5.38).

Radian Group (RDN)

• Guidance and Intra-Quarter Updates

- Management expects share repurchases to track toward the upper end of its previously announced FY26 range of \$200MM-\$250MM (subject to market conditions).
 - Cure trends continue to outperform expectations, with ~90% of defaults expected to cure within one year and reserving assumptions reflecting a 92.5% cumulative cure rate.
 - Specialty combined ratio expected to be in the low 90s in 2H26 due to additional reserves for the conflict in the Middle East.
 - Management expects 2H26 Specialty earned premiums to be ~20% higher than 1H26 due to normal seasonality.
 - The company expects to repay the \$75MM outstanding on its credit facility and refinance its 2027 debt maturity at a balance similar to the current amount outstanding.
 - **Divestiture:** RDN completed the sale of its real estate services business, entered into an agreement to sell its title business, and exited the mortgage conduit business earlier this year.
- **EPS Estimates:** We forecast 3Q EPS of \$1.21 (was \$1.24). Our 2026E EPS is \$4.82 (was \$4.88) and 2027E EPS is \$5.08 (was \$5.02).
 - **Valuation and Price Target:** We raise our price target to \$36 (was \$35) based on 7x (unchanged) our 2027 EPS estimate of \$5.08 (was \$5.02).

MREITs

Sector Trends

- From 2Q end to 3Q end, the 10Y UST yield is up ~62bps while the 5Y UST yield is up ~106bps. Notably, mortgage spreads (OAS) widened by ~19bps in the quarter. We estimate that P/B adjusted for QTD change in spreads and 10Y UST are 1.3x and 1.0x for AGNC and NLY, respectively (vs. current 1.0x and 0.9x).
- Agency MBS spreads have widened by the most since 3Q23 (+14bps), a period during which AGNC and NLY reported book value declines of ~13% and ~9%, respectively. By comparison, we currently estimate QTD book value declines of ~19% for AGNC and ~11% for NLY.
- As of 2Q26 earnings calls, MREITs within our coverage remain cautiously optimistic on agency MBS returns. Management teams remain confident that the earnings power of their portfolios should cover the quarterly dividends.
 - Both AGNC and NLY held expected Agency MBS returns steady q/q (as of their respective 2Q26 calls. For company-specific details, please see below).

AGNC Investment Corp. (AGNC)• **Guidance and Intra-Quarter Updates:**

- Incremental Agency MBS investments are expected to generate ROEs of ~15%-17% at 7.0x-7.5x leverage (based on spreads of ~130bps-150bps).
- As of the week of July 12, TBVPS was down ~1%, or a little less than 2% net of the monthly dividend accrual for July.
- FY26 net new supply is expected to be ~\$150B, which is below the previous expectation of \$180B-\$200B. Management expects banks, foreign investors, and REITs to remain net purchasers of Agency MBS through the rest of 2026.
- Management expects slower prepay speeds due to the increase in mortgage rates and slower Fed MBS runoff.
- As of July 21, management expects the GSEs to have ~\$120B of purchase capacity remaining and expects activity to accelerate when spreads reach the 160bps-170bps range.

- **EPS Estimates:** We forecast 3Q EPS of \$0.39 (was \$0.40). Our 2026E EPS is \$1.58 (was \$1.62) and 2027E EPS is \$1.51 (was \$1.56).

- **Valuation and Price Target:** We maintain our price target of \$10 based on 1.2x (unchanged) AGNC's MRQ TBVPS of \$8.58.

Annaly Capital Management (NLY)

• Guidance and Intra-Quarter Updates:

- Management expects to outearn its \$0.75 dividend in 3Q26 and over the long term. Recall that NLY increased its quarterly dividend to \$0.75 from \$0.70 at quarter-end.
- Levered return expectations across asset classes were consistent with the prior quarter, with Agency at 14%-16%, Resi Credit at 12%-15%, and MSR at 11%-13%.
- FY26 net new supply is expected to be ~\$160B, which is below the ~\$200B expectation at the beginning of the year.
- Agency MBS and MSR technicals remain strong, while Resi Credit has the best risk-adjusted returns.
- Management expects future capital deployment to be more balanced between TBAs and specified pools as GSE demand softened in 2Q and valuations became more attractive.
- NLY continues to favor swaps within its hedge portfolio.

- **EPS Estimates:** We forecast 3Q EPS of \$0.80 (unchanged). Our 2026E EPS is \$3.13 (unchanged) and 2027E EPS is \$3.07 (was \$3.01).

- **Valuation and Price Target:** We maintain our price target of \$24, based on ~1.2x (unchanged) NLY's MRQ BVPS of \$20.15.

BrightSpire Capital (BRSP)

• Guidance and Intra-Quarter Updates:

- The [NNN asset sale](#) delayed management's expectation for positive dividend coverage by two quarters to 2Q27/3Q27 (previous expectation was 26YE).
- Capital from the sale is expected to be redeployed into opportunities that are expected to generate ~150bps higher ROEs.
- Management reiterated its target of growing the loan portfolio to \$3.5B by 26YE (vs. ~\$2.9B currently) and approaching \$4.0B by mid-2027.
- QTD net deployment is ~\$267MM, implying a loan portfolio of roughly \$3.2B.
- As of 2Q, there were 4 loans on BRSP's Watch List (\$136MM carrying value), which are expected to decrease to 3 loans (\$125MM). There are no properties with a risk rating of 5 on the watch list. There were 6 REO assets (\$330MM), which are expected to decrease to 4 (\$268MM). For more granular updates, see [2Q26 Earnings Review: Strong Origination Quarter; Dividend Coverage Delayed, 08/03/2026](#).
- **EPS Estimates:** We forecast 3Q EPS of \$0.13 (unchanged). Our 2026E EPS is \$0.52 (unchanged) and 2027E EPS is \$0.56 (was \$0.53).
- **Valuation and Price Target:** We lower our price target to \$4 (was \$6) based on ~0.5x (was ~0.7x) our 2026 undepreciated BVPS estimate of \$7.76 (was \$7.81). Our lower multiple reflects uncertainty around BRSP's dividend coverage timeline.

Price (02-Oct-2026) **USD 8.79**
 Price Target **USD 10.00**

Why EQUAL WEIGHT?

MBS spreads have tightened, but there is still a strong dividend yield. The potential for additional book value volatility keeps us on the sidelines.

Upside case **USD 12.00**

Our upside case assumes a rally in Agency MBS due to tighter spreads. In such a scenario, we also expect a 20% higher TBVPS at 1.2x BVPS.

Downside case **USD 5.00**

Our downside case assumes rising interest rates and/or widening spreads cause a multiple compression to 0.75x BVPS and 20% decrease to TBVPS.

Price (02-Oct-2026) **USD 18.50**
Price Target **USD 24.00**

Why EQUAL WEIGHT?

We continue to view NLY's dividend yield as attractive and see potential for further book value growth should spreads tighten and rate cuts materialize. Overall, we view the risk-reward as balanced at current levels.

Upside case **USD 29.00**

Our upside case assumes a rally in Agency MBS caused by tighter spreads and even less rate volatility, causing book value increase. Our upside estimate is based on 1.2x a 20% higher BVPS.

Downside case **USD 12.00**

If rates become volatile or if spreads re-widen, book value may decrease and lead to a decline in the multiple to 0.6x P/B.

Price (02-Oct-2026) **USD 3.81**
Price Target **USD 4.00**

Why UNDERWEIGHT?

The current environment is challenging for BRSP to redeploy its capital and we believe there is higher execution risk to reach BRSP's ideal \$3.5B+ portfolio size, which could pressure dividend coverage in upcoming quarters. The risk/reward is unfavorable and multiple rerating is unlikely to occur in the near term, in our view, until the macro improves.

Upside case **USD 7.00**

Our upside case assumes pressures on the office property sector are alleviated and BRSP shares trade up to 0.85x P/B.

Downside case **USD 3.00**

If loan impairments increase materially or the macro environment deteriorates meaningfully, BRSP shares could trade down to 0.35x P/B.

Price (02-Oct-2026) **USD 60.22**
 Price Target **USD 66.00**

Why EQUAL WEIGHT?

ESNT IIF share should remain relatively stable with growth slowing. However, as the COVID vintages continue to season (2021-2023) and newer vintages enter peak loss years, we expect DQ rates to continue to increase, which could cause credit concerns. We find the risk/reward fair and the shares fairly valued as it builds out its P&C/Quota segment.

Upside case **USD 73.00**

Our upside case assumes credit outperforms expectations and the stock trades to 10x P/E.

Downside case **USD 49.00**

Our downside case contemplates a scenario where the economy slows and ESNT's loss ratios increase. We would also expect the shares to trade down to 0.75x P/B.

Price (02-Oct-2026) **USD 39.26**
Price Target **USD 47.00**

Why EQUAL WEIGHT?

FNF should see similar title trends to FAF in terms of order counts, commercial revenue, and margin trends. The company's 70% ownership of F&G is a material differentiator from an earnings standpoint as it provides a counter-cyclical earnings stream but also adds complexity to the underwriting case. We find the shares fairly valued.

Upside case **USD 68.00**

Our upside scenario assumes that investors value title earnings at 14x.

Downside case **USD 32.00**

Our downside scenario assumes that investors value title earnings at 9x.

Price Target **USD 79.00**

Why OVERWEIGHT?

The setup remains challenging for residential title insurance. Still, we believe order counts likely troughed over the past couple of years. We expect commercial volumes to have another strong year in 2026 and drive incremental pre-tax title margin expansion along with potential upside to investment income.

Upside case **USD 97.00**

Our upside scenario assumes better-than-expected origination volumes in 2026 and the stock trades to 13.5x.

Downside case **USD 57.00**

Our downside scenario assumes that the origination market is weaker-than-modelled and the stock trades to 8x.

Price (02-Oct-2026) **USD 26.95**
Price Target **USD 29.00**

Why EQUAL WEIGHT?

With HPA slowing and COVID vintages season, we expect credit to continue to normalize. We expect MTG to remain a share repurchase story.

Upside case **USD 33.00**

Our upside case assumes credit comes in better than expected and the shares re-rate to 10x P/E.

Downside case **USD 19.00**

Our downside case assumes the economy deteriorates, causing credit losses to remain above normal through 2026 and the stock trades to 0.8x P/B.

Upside/Downside scenarios

U.S. Consumer Finance						NEUTRAL	
NMI Holdings, Inc. (NMIH)						EQUAL WEIGHT	
Income statement (\$mn)	2025A	2026E	2027E	2028E	CAGR	Price (02-Oct-2026)	USD 38.83
Net premiums earned	602	633	665	692	4.7%	Price Target	USD 43.00
Total investment income	103	120	126	129	7.9%	Why EQUAL WEIGHT? NMIH continues to achieve strong double-digit ROEs with its low expense ratio and has been able to continue to grow its IIF share. We are more cautious in 2026 as we expect DQ rates should continue to increase as the newer vintage portfolios season. With this in mind, we find the current valuation fair.	
Losses incurred	58	83	103	122	28.3%		
Operating expenses	120	127	138	140	5.3%		
Pre-tax income	500	515	522	531	2.1%		
Net income	389	400	403	410	1.8%		
Margin and return data	2025A	2026E	2027E	2028E	CAGR	Upside case USD 54.00 Our upside case assumes credit outperforms expectations and the stock trades to 10x P/E.	
Average premium rate (%)	0.3	0.3	0.3	0.3	-0.7%		
Group loss ratio (%)	9.6	13.1	15.5	17.6	22.5%

Price (02-Oct-2026) **USD 62.00**
Price Target **USD 71.00**

Why EQUAL WEIGHT?

PFSI has revised its 2026 ROE guide in three consecutive quarters due to elevated expenses tied to tech investments and a smaller-than-expected origination market. With continued pressure in the correspondent channel and recapture performance lagging peers, we view the risk/reward as balanced.

Upside case **USD 83.00**

Our upside case assumes a 1x P/B assuming origination volumes and margins are higher than expected.

Downside case **USD 42.00**

Our downside case assumes that cycle/macro concerns (i.e., rising unemployment) materialize and result in higher servicing costs with lower ROEs and keep investors on the sidelines and PFSI trades at 0.5x P/B.

Upside/Downside scenarios

Price (02-Oct-2026) **USD 32.57**
Price Target **USD 36.00**

Why EQUAL WEIGHT?

RDN should see the same normalization of credit that the rest of the MI space is experiencing and will see uncorrelated benefits with Inigo, which could ultimately drive upside to earnings. However, execution risk remains and there is an increased level of complexity to valuation following the Inigo acquisition.

Upside case **USD 46.00**

Our upside case assumes that credit comes in better than expected. In addition, top-line also benefits from a combination of stronger-than-expected premium yield and IIF growth, and the shares trade to ~9x P/E.

Downside case **USD 27.00**

Our downside case assumes the economy deteriorates and causes credit losses to remain above-normal through 2026 and the stock trades down to ~0.75x P/B.

Price (02-Oct-2026) **USD 11.70**
Price Target **USD 15.00**

Why OVERWEIGHT?

We believe that RKT is a long-term winner in the mortgage space and note the company is more levered to refinance and the DTC channel. The softer total origination market will likely continue to somewhat weigh on results but with the COOP acquisition closed, the deal should result in a more balanced business model.

Upside case **USD 21.00**

Our upside assumes better-than-expected integration/synergies from COOP/RDFN acquisition and an improved origination market. Under that scenario, we expect RKT to trade at 21x.

Downside case **USD 8.00**

Our downside assumes we are in a prolonged low origination environment and/or the COOP/RDFN deals have a more challenging integration process than expected. Under that scenario, we expect RKT shares to trade at 10x our 2027 EPS.

Price (02-Oct-2026) **USD 1.26**
Price Target **USD 2.00**

Why OVERWEIGHT?

We continue to find the risk/reward attractive as UWMC is trading meaningfully below its historical average and we see potential upside to earnings due to its industry-leading broker channel and strong margins.

Upside case USD 5.00

Our upside case assumes originations come in better than expected and GOS margins expand, resulting in UWMC trading at 19x.

Downside case USD 1.00

Our downside case assumes the shares trade down to closer to BVPS.

Upside/Downside scenarios

知识星球：前沿信息收录

VX:FCCNN88

Valuation Methodology and Risks

U.S. Consumer Finance

AGNC Investment Corp. (AGNC / AGNC)

Valuation Methodology: Our \$10 price target is based on ~1.2x P/B on our estimate for AGNC's 2Q Tangible BVPS (\$8.58).

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Volatility in the interest rate markets and wider spread could pressure agency MBS values and AGNC's book value. If spreads were to tighten, then book values could benefit.

AerCap Holdings (AER / AER)

Valuation Methodology: Our price target is based on 10x our 2027 EPS estimate of \$17.77. We are using a higher target multiple than the historical average of 7.5x as the current point in the cycle is favorable and AER has excess capital to accretively deploy.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Key risks include 1) a reduction in air travel demand and higher tariffs weighing on aircraft demand, which would reduce new lease yields and GOS margins; and 2) OEM disruptions impacting fleet deliveries, which would weigh on growth.

American Express (AXP / AXP)

Valuation Methodology: Our price target is based on 17x our 2027 EPS estimate of \$20.14. We use a ~2.5x turn premium to historical averages due to AXP's network, strong credit and spend growth, and the Platinum refresh which should drive DD net card fee growth.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: If AXP meets its aspirational LT growth target of 10% plus revenue growth, the shares could potentially re-rate higher. Additional risks to the upside include slower-than-anticipated credit normalization, in which case AXP could lower its reserve ratio resulting in an earnings tailwind. Downside risks include faster-than-anticipated credit normalization and/or a recession, in which case AXP would need to increase its reserve ratio resulting in an earnings headwind.

Annaly Capital Management Inc. (NLY / NLY)

Valuation Methodology: Our \$24 price target is based on ~1.2x our estimate for NLY's MRQ BVPS of \$20.15.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: NLY's book value may fluctuate due to the uncertain rate environment, resulting in spreads fluctuating as well. The Fed may continue its restrictive monetary policy and maintain the current rates.

Bread Financial (BFH / BFH)

Valuation Methodology: Our price target is based on 8x our 2027 EPS estimate of \$13.69, reflecting a ~1x premium to the historical average multiple to account for stronger loan growth and better than expected credit improvement.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: The main risk to our thesis is the trajectory of credit and loan growth. The prolonged negative impact of inflation on BFH's non-prime tilted customer base and impact of a worsening macro outlook, could push out timing to get to <6% target NCOs even longer. The return back to growth also remains a concern given the K-shaped recovery.

Brightspire Capital (BRSP / BRSP)

Valuation Methodology: Our \$4 price target is based on ~0.5x our 2026 Undepreciated BVPS estimate of \$7.76 (undepreciated).

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Continued challenges in the commercial property market could lead to negative changes to BRSP's portfolio risk ratings, resulting in specific reserves against loans. If the Fed ends its tightening cycle and short-term rates decline, it could alleviate pressure on borrowers and tenants.

Capital One Financial (COF / COF)

Valuation Methodology: Our price target is based on 10x our adjusted 2027 EPS estimate of \$23.69.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: A macro slowdown could result in credit underperforming our estimates. While we see LT potential with the DFS acquisition, there is some execution risk around integration and expanding network acceptance.

Essent Group (ESNT / ESNT)

Valuation Methodology: Our price target of \$66 is based on a 9x P/E multiple on our 2027 EPS estimate of \$7.33.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Key downside risks include 1) deterioration in macro environment (higher unemployment, lower house prices, etc.) that result in higher delinquencies, lower cure rates, and ultimately higher loss rates; and 2) regulatory/FHA reform that increases competition from government mortgage insurance companies; Upside risk is better-than-expected HPA supports elevated reserve release.

Fidelity National Financial (FNF / FNF)

Valuation Methodology: We value FNF on a Sum-of-the-Parts valuation. Our \$47 price target is based on 10x our 2027E core title earnings of \$4.32/sh and 4.0x our estimate of 2027 FG earnings of \$1.05/sh (which represents FNF's ~70% share).

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: If purchase and refinance volumes rebound more than we anticipate, revenue and margins could come in higher than what we have modelled, resulting in upside to earnings. Continued concerns over worsening macro outlook could result in negative sentiment and pressure FNF's multiple. Negative headwinds to F&G earnings.

First American Financial (FAF / FAF)

Valuation Methodology: Our price target of \$79 is based on 11x our 2027 EPS of \$7.16.

Valuation Methodology and Risks

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: If purchase and refinance volumes rebound more than we anticipate, revenue and margins could come in higher than what we have modelled, resulting in upside to earnings. Higher-than-expected title claims could negatively impact earnings. Continued concerns over a worsening macro outlook could result in negative sentiment and pressure FAF's multiple.

MGIC Investment (MTG / MTG)

Valuation Methodology: Our \$29 price target is based on 9x P/E on our 2027 EPS estimate of \$3.27.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Key downside risks include: 1) deterioration in the macro environment (higher unemployment, lower house prices, etc.) that result in higher delinquencies, lower cure rates, and ultimately higher loss rates; and 2) regulatory/FHA reform that increases competition from government mortgage insurance companies; Upside risk is better-than-expected credit results.

NMI Holdings, Inc. (NMIH / NMIH)

Valuation Methodology: Our \$43 price target is based on an 8x multiple on our 2027 EPS estimate of \$5.37.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Key risks include: 1) deterioration in the macro environment (higher unemployment, lower house prices, etc.) that result in higher delinquencies, lower cure rates, and ultimately higher loss rates; 2) regulatory/FHA reform that increases competition from government mortgage insurance companies; and 3) price cuts from competitors that could lead to lower premium rates. Upside risks include 1) stronger credit environment resulting in higher levels of reserve releases; 2) lower rates resulting in higher NIW and faster IIF growth than expected; and 3) higher levels of capital return. These risks could result in a material rerating of the shares.

Navient Corp. (NAVI / NAVI)

Valuation Methodology: Our price target is based on 8x our 2027 EPS estimate of \$0.93. We are using 8x which is in-line with SLM's (another student lender) historical median.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: We believe there are several execution risks on NAVI's growth plan considering it is not a market it has meaningful history in; however, if achieved it would drive upside to our estimates. Student loan growth (refi in particular) could come in better than expected if rates are lower, driving further growth.

OneMain Holdings, Inc (OMF / OMF)

Valuation Methodology: Our price target is based on 7x our 2027 adj. EPS estimate of \$8.61. We are using OMF's average historical P/E ratio.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Upside risk include faster mixshift toward frontbook, which could drive better credit than what our estimates contemplate, and OMF obtaining the bank charter approval. Downside risks include prolonged negative impact of inflation on the core customer base and impact of a worsening macro outlook, which could push out timing to get to 6-7% target NCOs even longer.

PennyMac Financial Services Inc. (PFSI / PFSI)

Valuation Methodology: Our \$71 price target is based on 0.85x MRQ BVPS of \$83.49.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: A rate rally could drive incremental purchase volume upside and support higher production revenue to offset tech investments. On the other hand, limited recapture visibility could make it difficult to offset higher amortization expense. An increase in DQs could also result in higher-than-expected servicing costs.

Radian Group (RDN / RDN)

Valuation Methodology: Our \$36 price target is based on 7x P/E on our 2027 EPS estimate of \$5.08.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Key downside risks include (i) deterioration in macro environment (higher unemployment, lower house prices, etc.) that result in higher delinquencies, lower cure rates, and ultimately higher loss rates; and (ii) Inigo acquisition integration; Upside risk is if combined ratio recovers faster than expected.

Rocket Companies (RKT / RKT)

Valuation Methodology: Our \$15 price target is based on 19x our 2027 EPS estimate of \$0.78.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: Risks to our price target include the potential for fewer synergies from COOP/RDFN deals than expected being realized. Additionally, if the challenging rate environment continues and refi volumes remain at trough, RKT will continue to see limited volumes.

SLM Corp. (SLM / SLM)

Valuation Methodology: Our price target is based on a target multiple of 8x, our 2027E EPS estimate of \$3.30. The multiple is in-line with SLM's historical median as credit will remain an overhang despite the expected upside from student lending TAM expansion and strategic partners.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: A weaker macro environment could drive credit losses to be higher than modelled, resulting in both downside to earnings and SLM's trading multiple, particularly on AI concerns. The PC partnership could have slower portfolio or revenue growth than expected, resulting in softer earnings. Additionally, opex trajectory could come in higher.

Synchrony Financial (SYF / SYF)

Valuation Methodology: Our price target is based on 9x our 2027 EPS estimate of \$10.32.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: While credit at SYF has been strong, a macro slowdown could result in credit underperforming our estimates. SYF could take longer than expected to phase in late fee mitigants, which would weigh on the stock's valuation. Finally, loan growth could come in softer, clouding the trajectory of receivables growth.

Valuation Methodology and Risks

UWM Holdings Corp. (UWMC / UWMC)

Valuation Methodology: Our \$2 price target is based on 7x our 2027 EPS estimate of \$0.28.

Risks which May Impede the Achievement of the Barclays Research Valuation and Price Target: If UWMC is unable to maintain its market share, there could be downside to our earnings estimates. Additionally, an overall weaker macro could result in softer origination volumes and put further pressure on leverage. There are also execution risks with technology investments and in-house servicing.

Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

Stock Rating

Overweight - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Equal Weight - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Underweight - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Rating Suspended - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Investment Bank of Barclays Bank PLC is acting in an advisory capacity in a merger or strategic transaction involving the company.

Industry View

Positive - industry coverage universe fundamentals/valuations are improving.

Neutral - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

Negative - industry coverage universe fundamentals/valuations are deteriorating.

Below is the list of companies that constitute the "industry coverage universe":

North America Insurance/Life

AFLAC INC (AFL)	Brighthouse Financial Inc. (BHF)	Corebridge Financial Inc. (CRBG)
Equitable Holdings Inc. (EQH)	F&G Annuities & Life Inc. (FG)	Great-West Lifeco Inc. (GWO.TO)
Jackson Financial Inc. (JXN)	Lincoln National Corp. (LNC)	Manulife Financial (MFC.TO)
MetLife, Inc. (MET)	Principal Financial Group (PFG)	Prudential Financial Inc. (PRU)
Reinsurance Group of America, Incorporated (RGA)	Sun Life Financial (SLF.TO)	Unum Group (UNM)
Voya Financial (VOYA)		

U.S. Consumer Finance

AerCap Holdings (AER)	AGNC Investment Corp. (AGNC)	American Express (AXP)
Annaly Capital Management Inc. (NLY)	Bread Financial (BFH)	BrightSpire Capital (BRSP)
Capital One Financial (COF)	Essent Group (ESNT)	Fidelity National Financial (FNF)
First American Financial (FAF)	MGIC Investment (MTG)	Navient Corp. (NAVI)
NMI Holdings, Inc. (NMIH)	OneMain Holdings, Inc (OMF)	PennyMac Financial Services Inc. (PFSI)
Radian Group (RDN)	Rocket Companies (RKT)	SLM Corp. (SLM)
SoFi (SOFI)	Synchrony Financial (SYF)	UWM Holdings Corp. (UWMC)

Distribution of Ratings:

Barclays Equity Research has 1777 companies under coverage.

52% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 48% of companies with this rating are investment banking clients of the Firm; 65% of the issuers with this rating have received financial services from the Firm.

33% have been assigned an Equal Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 39% of companies with this rating are investment banking clients of the Firm; 59% of the issuers with this rating have received financial services from the Firm.

14% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 31% of companies with this rating are investment banking clients of the Firm; 57% of the issuers with this rating have received financial services from the Firm.

Guide to the Barclays Research Price Target:

Each analyst has a single price target on the stocks that they cover. The price target represents that analyst's expectation of where the stock will trade in the next 12 months. Upside/downside scenarios, where provided, represent potential upside/potential downside to each analyst's price target over the same 12-month period.

Types of investment recommendations produced by Barclays Equity Research:

In addition to any ratings assigned under Barclays' formal rating systems, this publication may contain investment recommendations in the form of trade ideas, thematic screens, scorecards or portfolio recommendations that have been produced by analysts within Equity Research. Any such investment recommendations shall remain open until they are subsequently amended, rebalanced or closed in a future research report.

Barclays may also re-distribute equity research reports produced by third-party research providers that contain recommendations that differ from and/or conflict with those published by Barclays' Equity Research Department.

Disclosure of other investment recommendations produced by Barclays Equity Research:

Barclays Equity Research may have published other investment recommendations in respect of the same securities/instruments recommended in this research report during the preceding 12 months. To view all investment recommendations published by Barclays Equity Research in the preceding 12 months please refer to <https://live.barcap.com/go/research/Recommendations>.

Disclaimer:

This publication has been produced by Barclays Research Department in the Investment Bank of Barclays Bank PLC and/or one or more of its affiliates (collectively and each individually, "Barclays").

It has been prepared for institutional investors and not for retail investors. It has been distributed by one or more Barclays affiliated legal entities listed below or by an independent and non-affiliated third-party entity (as may be communicated to you by such third-party entity in its communications with you). It is provided for information purposes only, and Barclays makes no express or implied warranties, and expressly disclaims all warranties of merchantability or fitness for a particular purpose or use with respect to any data included in this publication. Barclays may provide research to certain categories of recipients that do not use it for investment purposes, including public and private companies in covered industries, media organisations, regulators, and academic institutions that use such research for their own internal informational, news gathering, regulatory or academic purposes. To the extent that this publication states on the front page that it is intended for institutional investors and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors under U.S. FINRA Rule 2242, it is an "institutional debt research report" and distribution to retail investors is strictly prohibited. Media organisations are prohibited from re-publishing any opinion or recommendation concerning a debt issuer or debt security contained in any Barclays institutional debt research report. Any recipients that do not want to continue receiving Barclays institutional debt research reports should contact debtresearch@barclays.com. Unless clients have agreed to receive "institutional debt research reports" as required by US FINRA Rule 2242, they will not receive any such reports that may be co-authored by non-debt research analysts. Eligible clients may get access to such cross asset reports by contacting debtresearch@barclays.com. Barclays will not treat unauthorized recipients of this report as its clients and accepts no liability for use by them of the contents which may not be suitable for their personal use. Prices shown are indicative and Barclays is not offering to buy or sell or soliciting offers to buy or sell any financial instrument.

Without limiting any of the foregoing and to the extent permitted by law, in no event shall Barclays, nor any affiliate, nor any of their respective officers, directors, partners, or employees have any liability for (a) any special, punitive, indirect, or consequential damages; or (b) any lost profits, lost revenue, loss of anticipated savings or loss of opportunity or other financial loss, even if notified of the possibility of such damages, arising from any use of this publication or its contents.

Other than disclosures relating to Barclays, the information contained in this publication (including third-party data) has been obtained from sources that Barclays Research believes to be reliable, but Barclays does not represent or warrant that it is accurate or complete. Third-party data, including third-party forecasts and predictions, is provided for information purposes only, has not been adopted or endorsed by Barclays, and does not represent the views or opinions of Barclays. Presentations by Third-Party Speakers: Any views or opinions expressed by third-party speakers during a Barclays-hosted event are solely those of the speaker and do not represent the views or opinions of Barclays. Barclays is not responsible for, and makes no warranties whatsoever as to, the information or opinions contained in any written, electronic, audio or video presentations by any third-party speakers, and such presentations have not been adopted or endorsed by Barclays and do not represent the views or opinions of Barclays. Content from third-party presentations is provided for information purposes only and has not been independently verified by Barclays for its accuracy or completeness.

The views in this publication are solely and exclusively those of the authoring analyst(s) and are subject to change, and Barclays Research has no obligation to update its opinions or the information in this publication. Unless otherwise disclosed herein, the analysts who authored this report have not received any compensation from the subject companies in the past 12 months. If this publication contains recommendations, they are general recommendations that were prepared independently of any other interests, including those of Barclays and/or its affiliates, and/or the subject companies. This publication does not contain personal investment recommendations or investment advice or take into account the individual financial circumstances or investment objectives of the clients who receive it. Barclays is not a fiduciary to any recipient of this publication. The securities and other investments discussed herein may not be suitable for all investors and may not be available for purchase in all jurisdictions. The United States imposed sanctions on certain Chinese companies (<https://ofac.treasury.gov/sanctions-programs-and-country-information/chinese-military-companies-sanctions>), which may restrict U.S. persons from purchasing securities issued by those companies. Investors must independently evaluate the merits and risks of the investments discussed herein, including any sanctions restrictions that may apply, consult any independent advisors they believe necessary, and exercise independent judgment with regard to any investment decision. The value of and income from any investment may fluctuate from day to day as a result of changes in relevant economic markets (including changes in market liquidity). The information herein is not intended to predict actual results, which may differ substantially from those reflected. Past performance is not necessarily indicative of future results.

The information provided does not constitute a financial benchmark and should not be used as a submission or contribution of input data for the purposes of determining a financial benchmark.

This publication is not investment company sales literature as defined by Section 270.24(b) of the US Investment Company Act of 1940, nor is it intended to constitute an offer, promotion or recommendation of, and should not be viewed as marketing (including, without limitation, for the purposes of the UK Alternative Investment Fund Managers Regulations 2013 (SI 2013/1773) or AIFMD (Directive 2011/61)) or pre-marketing (including, without limitation, for the purposes of Directive (EU) 2019/1160) of the securities, products or issuers that are the subject of this report.

Third Party Distribution: Any views expressed in this communication are solely those of Barclays and have not been adopted or endorsed by any third party distributor.

United Kingdom: This document is being distributed (1) only by or with the approval of an authorised person (Barclays Bank PLC) or (2) to, and is directed at (a) persons in the United Kingdom having professional experience in matters relating to investments and who fall within the definition of "investment professionals" in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"); or (b) high net worth companies, unincorporated associations and partnerships and trustees of high value trusts as described in Article 49(2) of the Order; or (c) other persons to whom it may otherwise lawfully be communicated (all such persons being "Relevant Persons"). Any investment or investment activity to which this communication relates is only available to and will only be engaged in with Relevant Persons. Any other persons who receive this communication should not rely on or act upon it. This material, where distributed to persons in Australia, is produced or provided by Barclays Bank PLC.

This communication is directed at persons who are a "Wholesale Client" as defined by the Australian Corporations Act 2001.

Please note that the Australian Securities and Investments Commission (ASIC) has provided certain exemptions to Barclays Bank PLC (BBPLC) under paragraph 911A(2)(l) of the Corporations Act 2001 from the requirement to hold an Australian financial services licence (AFSL) in respect of financial services provided to Australian Wholesale Clients, on the basis that BBPLC is authorised by the Prudential Regulation Authority of the United Kingdom

更多一手研报资料扫码加微信

(PRA) and regulated by the Financial Conduct Authority (FCA) of the United Kingdom and the PRA under United Kingdom laws. The United Kingdom has laws which differ from Australian laws. To the extent that this communication involves the provision of financial services by BBPLC to Australian Wholesale Clients, BBPLC relies on the relevant exemption from the requirement to hold an AFSL. Accordingly, BBPLC does not hold an AFSL.

This communication may be distributed to you by either: (i) Barclays Bank PLC directly, (ii) Barrenjoey Markets Pty Limited (ACN 636 976 059, “Barrenjoey”), the holder of Australian Financial Services Licence (AFSL) 521800, a non-affiliated third party distributor, where clearly identified to you by Barrenjoey. Barrenjoey is not an agent of Barclays Bank PLC or (iii) such other non-affiliated third-party distributor(s) as may be clearly identified to you. Such non-affiliated third-party distributor(s) are not agents of Barclays Bank PLC.

This material, where distributed in New Zealand, is produced or provided by Barclays Bank PLC. Barclays Bank PLC is not registered, filed with or approved by any New Zealand regulatory authority. This material is not provided under or in accordance with the Financial Markets Conduct Act of 2013 (“FMCA”), and is not a disclosure document or “financial advice” under the FMCA. This material is distributed to you by either: (i) Barclays Bank PLC directly or (ii) Barrenjoey Markets Pty Limited (“Barrenjoey”), a non-affiliated third party distributor, where clearly identified to you by Barrenjoey. Barrenjoey is not an agent of Barclays Bank PLC. This material may only be distributed to “wholesale investors” that meet the “investment business”, “investment activity”, “large”, or “government agency” criteria specified in Schedule 1 of the FMCA.

Middle East: Nothing herein should be considered investment advice as defined in the Israeli Regulation of Investment Advisory, Investment Marketing and Portfolio Management Law, 1995 (“Advisory Law”). This document is being made to eligible clients (as defined under the Advisory Law) only. Barclays Israeli branch previously held an investment marketing license with the Israel Securities Authority but it cancelled such license on 30/11/2014 as it solely provides its services to eligible clients pursuant to available exemptions under the Advisory Law, therefore a license with the Israel Securities Authority is not required. Accordingly, Barclays does not maintain an insurance coverage pursuant to the Advisory Law.

This material is distributed in the United Arab Emirates (including the Dubai International Financial Centre) and Qatar by Barclays Bank PLC. Barclays Bank PLC in the Dubai International Financial Centre (Registered No. 0060) is regulated by the Dubai Financial Services Authority (DFSA). Principal place of business in the Dubai International Financial Centre: The Gate Village, Building 4, Level 4, PO Box 506504, Dubai, United Arab Emirates. Barclays Bank PLC-DIFC Branch, may only undertake the financial services activities that fall within the scope of its existing DFSA licence. Related financial products or services are only available to Professional Clients, as defined by the Dubai Financial Services Authority. Barclays Bank PLC in the UAE is regulated by the Central Bank of the UAE and is licensed to conduct business activities as a branch of a commercial bank incorporated outside the UAE in Dubai (Licence No.: 13/1844/2008, Registered Office: Building No. 6, Burj Dubai Business Hub, Sheikh Zayed Road, Dubai City) and Abu Dhabi (Licence No.: 13/952/2008, Registered Office: Al Jazira Towers, Hamdan Street, PO Box 2734, Abu Dhabi). This material does not constitute or form part of any offer to issue or sell, or any solicitation of any offer to subscribe for or purchase, any securities or investment products in the UAE (including the Dubai International Financial Centre) and accordingly should not be construed as such. Furthermore, this information is being made available on the basis that the recipient acknowledges and understands that the entities and securities to which it may relate have not been approved, licensed by or registered with the UAE Central Bank, the Dubai Financial Services Authority or any other relevant licensing authority or governmental agency in the UAE. The content of this report has not been approved by or filed with the UAE Central Bank or Dubai Financial Services Authority. Barclays Bank PLC in the Qatar Financial Centre (Registered No. 00018) is authorised by the Qatar Financial Centre Regulatory Authority (QFCRA). Barclays Bank PLC-QFC Branch may only undertake the regulated activities that fall within the scope of its existing QFCRA licence. Principal place of business in Qatar: Qatar Financial Centre, Office 1002, 10th Floor, QFC Tower, Diplomatic Area, West Bay, PO Box 15891, Doha, Qatar. Related financial products or services are only available to Business Customers as defined by the Qatar Financial Centre Regulatory Authority.

Russia: This material is not intended for investors who are not Qualified Investors according to the laws of the Russian Federation as it might contain information about or description of the features of financial instruments not admitted for public offering and/or circulation in the Russian Federation and thus not eligible for non-Qualified Investors. If you are not a Qualified Investor according to the laws of the Russian Federation, please dispose of any copy of this material in your possession.

Sustainable Investing Related Research: There is currently no globally accepted framework or definition (legal, regulatory or otherwise) of, nor market consensus as to what constitutes a ‘sustainable’, ‘ESG’, ‘green’, ‘climate-friendly’ or an equivalent company, investment, strategy or consideration or what precise attributes are required to be eligible to be categorised by such terms. This means there are different ways to evaluate a company or an investment and so different values may be placed on certain sustainability credentials as well as adverse ESG-related impacts of companies and ESG controversies. The evolving nature of sustainable investing considerations, models and methodologies means it can be challenging to definitively and universally classify a company or investment under a sustainable investing label and there may be areas where such companies and investments could improve or where adverse ESG-related impacts or ESG controversies exist. The evolving nature of sustainable finance related regulations and the development of jurisdiction-specific regulatory criteria also means that there is likely to be a degree of divergence as to the interpretation of such terms in the market. We expect industry guidance, market practice, and regulations in this field to continue to evolve.

Any information, data, image, or other content including from a third party source contained, referred to herein or used for whatsoever purpose by Barclays or a third party (“Information”), in relation to any actual or potential ‘ESG’, ‘sustainable’ or equivalent objective, issue, factor or consideration is not intended to be relied upon for ESG or sustainability classification, regulatory regime or industry initiative purposes (“ESG Regimes”), unless otherwise stated. Nothing in these materials, including any images included therein, is intended to convey, suggest or indicate that Barclays considers or represents any product, service, person or body mentioned in these materials as meeting or qualifying for any ESG or sustainability classification, label or similar standards that may exist under ESG Regimes. Barclays has not conducted any assessment of compliance with ESG Regimes. Parties are reminded to make their own assessments for these purposes.

IRS Circular 230 Prepared Materials Disclaimer: Barclays does not provide tax advice and nothing contained herein should be construed to be tax advice. Please be advised that any discussion of U.S. tax matters contained herein (including any attachments) (i) is not intended or written to be used, and cannot be used, by you for the purpose of avoiding U.S. tax-related penalties; and (ii) was written to support the promotion or marketing of the transactions or other matters addressed herein. Accordingly, you should seek advice based on your particular circumstances from an independent tax advisor.
