TMTB Morning Wrap TMTB 晨间综述

TMT BREAKOUT
11 MINUTES AGO • PAID

Listen

Good morning. **QQQs -60bps** to start the morning as of 8:35am dipping on a hotter CPI (Core CPI mOM +0.33% vs 0.2%) with **yields spiking 7-11bps** across the curve and **Oil +1%** on reports Houthis struck Saudi Aramco HQ & Iran striking tankers in SoH.

早上好。截至早上 8:35，QQQ 开盘下跌 60 个基点。受 CPI 高于预期影响，指数走低（核心 CPI 月环比上涨 0.33%，预期为 0.2%）；收益率曲线各期限收益率飙升 7-11 个基点。另据报道，胡塞武装袭击了沙特阿美总部，伊朗则在霍尔木兹海峡袭击油轮，油价上涨 1%。

In Tech, **Semis -1.3%** as all eyes on Anthropic's investor day briefing today. **Internet/Software flat**. **ACN +2%** on a positive update at their investor day. **ASML flat** after a decent set of numbers. **CRWV -7%** as investors and X focus on spiking bonds yields ('32 bonds hit 14% yield, below 80c) while CDS almost at 1000bps. Cyber weaker **(PANW/CRWD -3%)** on OpenAI in early talks to acquire a Cyber co and OAI CFO saying cyber will be a revenue driver next year. **GOOGL +1%** as Gemini 4 Argon went GA. **DELL/HPE -3-4%** on a Barclays dg.

科技板块方面，半导体股下跌 1.3%，市场焦点集中在 Anthropic 今日的投资者日简报。互联网/软件板块持平。ACN 在投资者日发布积极更新后上涨 2%。ASML 在公布一组表现不错的数据后持平。CRWV 下跌 7%，投资者和 X 上的讨论聚焦于债券收益率飙升（2032 年债券收益率升至 14%，价格跌破 80 美分），与此同时，CDS 利差接近 1,000 个基点。网络安全股走弱（PANW/CRWD 下跌 3%），因 OpenAI 正就收购一家网络安全公司进行初步谈判，且 OpenAI 首席财务官表示，网络安全明年将成为收入增长驱动力。Gemini 4 Argon 正式发布后，GOOGL 上涨 1%。巴克莱下调评级后，DELL/HPE 下跌 3%-4%。

Stocks mostly saw losses in Asia on Wednesday: TPX -0.23%, NKY -0.05%, Hang Seng -0.13%, HSCEI +0.1%, SHCOMP -0.88%, Shenzhen -1.81%, Taiwan TAIEX +0.59%, Korea KOSPI -0.44%.

周三亚洲股市多数下跌：TPX 下跌 0.23%，NKY 下跌 0.05%，恒生指数下跌 0.13%，HSCEI 上涨 0.1%，SHCOMP 下跌 0.88%，深圳指数下跌 1.81%，台湾加权指数（TAIEX）上涨 0.59%，韩国 KOSPI 下跌 0.44%。

We'll hit **ASML** first, then the usual. Let's get to it...

我们先谈 ASML，然后再看常规内容。开始吧.....

ASML: Margin-Led Beat/Raise; More 2028 Capacity, but 2027 Plan Unchanged

ASML：利润率推动业绩超预期并上调指引；增加 2028 年产能，但 2027 年计划不变

Q3 revenue a tad light €11.66B grew 55% y/y versus 21% last quarter and street at 11.71, with gross margin of 57.5% versus Street at 56.0% and EPS of €12.93 versus €10.87; Q4 revenue guidance is ~3% above Street, with stronger operating leverage underneath.

第三季度营收略低于预期，为 116.6 亿欧元，同比增长 55%；上一季度增幅为 21%，市场预期为 117.1 亿欧元。毛利率为 57.5%，高于市场预期的 56.0%；每股收益为 12.93 欧元，高于 10.87 欧元。第四季度营收指引比市场预期高出 ~3%，且预计将实现更强的经营杠杆。

Overall, solid numbers despite especially the GM upside, with productivity upgrades

driving the margin beat and guidance raise. The bigger positive is that demand now exceeds planned supply in both 2027 and 2028, while higher value-based pricing has been agreed with major customers and starts contributing next year. The near-term limitation remains units: 2027 low-NA capacity stays around 85 tools, below the 90–100 bull bogey, with more meaningful capacity upside pushed into 2028. Bears will point to the systems miss, a small bump of €500M to FY26 revs and say FY27 #s not going to move much.

总体而言，业绩数据稳健，尤其是毛利率（GM）超预期；生产效率提升推动利润率超预期及指引上调。更大的利好是，2027 年和 2028 年的需求如今均超过计划供应量，同时已与主要客户就更高的价值定价达成一致，并将从明年开始贡献收入。短期限制仍在于出货量：2027 年低数值孔径（low-NA）产能维持在约 85 台设备，低于多头预期的 90–100 台；更显著的产能上行空间要到 2028 年才会释放。空头会指出系统收入未达预期，FY26 收入仅上调 5 亿欧元，并称 FY27 的数字不会有太大变化。

Key Takeaways

- **Demand visibility:** Orders continue strengthening across advanced logic and DRAM, with substantial EUV ordering for 2028 and customer interest extending into 2029–30. Customers keep raising short- and medium-term equipment requirements, and the previously planned 30% capacity increases in both 2027 and 2028 are no longer sufficient. Importantly, 2029–30 commentary is customer interest, not a disclosed amount of firm bookings.

  需求可见度：先进逻辑和 DRAM 领域的订单持续增强，2028 年 EUV 订单量可观，客户兴趣已延伸至 2029–30 年。客户不断上调短期和中期设备需求；此前计划在 2027 年和 2028 年分别将产能提高 30%，如今已无法满足需求。需要特别指出的是，关于 2029–30 年的表述反映的是客户兴趣，并非已披露的确定订单金额。

- **Capacity ceiling:** The 2027 low-NA plan remains ~85 systems, up ~30%, versus Street around 87 and bull expectations of 90–100. The callback clarified that lead times leave little room to materially change the 2027 build plan, although a few additional tools may be possible. There is more flexibility to move 2028 beyond the previously implied ~110 systems through shorter cycle times, high-NA/R&D bay usage, smart testing and supply-chain improvements. No additional cleanroom footprint is planned to address 2028 demand.

产能上限：2027 年低数值孔径（low-NA）设备计划仍为~85 台，增长~30%；华尔街一致预期约为 87 台，看涨预期为 90–100 台。电话会补充说明，交付周期意味着大幅调整 2027 年生产计划的空间有限，不过仍可能增加少量设备。通过缩短周期、使用高数值孔径（high-NA）/研发洁净室区域、采用智能测试及改善供应链，2028 年的产量则有更大灵活性，有望超过此前暗示的~110 台。公司计划不增加洁净室面积来应对 2028 年的需求。

- **Pricing agreed:** Major-customer value-based pricing negotiations are complete. Benefits phase in through 2027 and become more fully visible in 2028 as existing volume purchase agreements expire; purchases outside those agreements already face higher pricing. The callback also clarified that this is not simply a parts-price increase: it applies across improvements that add value to the system. The timing is becoming clearer, but mgmt has not provided a quantified company-wide pricing uplift.

定价已达成一致：面向大客户的价值定价谈判已完成。相关收益将在 2027 年前逐步体现；随着现有批量采购协议到期，2028 年起收益将更加充分地显现。协议之外的采购目前已适用较高价格。电话会议还明确指出，这并非单纯上调零部件价格，而是适用于所有能为系统增值的改进项目。定价调整的时间安排正变得更加明朗，但管理层尚未提供公司整体定价涨幅的量化数据。

- **Upgrade strength:** Installed Base Management (IBM) revenue reached €3.29B, up 68% y/y and 13% above Street, with Q4 stepping up again to €3.7B. FY26 IBM growth is now ~50%, up from ~30%. Customers are paying to extract more wafer capacity from existing tools and cleanrooms, giving ASML an earnings-growth lever that does not depend on shipping additional EUV systems. Software-heavy upgrade mix is the key reason margins are outperforming.

升级业务表现强劲：装机基础管理（IBM）收入达到€3.29B，同比增长 68%，高于市场一致预期 13%；第四季度进一步升至€3.7B。FY26 IBM 收入增长预期现为~50%，高于此前的~30%。客户付费以从现有设备和洁净室中释放更多晶圆产能，这为 ASML 提供了一项不依赖额外交付 EUV 系统的盈利增长杠杆。升级业务中软件占比较高，是利润率超预期的关键原因。

- **Beat quality:** System revenue missed Street by ~5%, with logic ~12% below and memory ~4% above. The upgrade beat offset that shortfall. Reported EPS benefited from a roughly €510M equity-investment gain associated with Mistral AI; the cleaner operating-profit beat was ~5%, with EPS beat excluding

investment gains at ~7–8%. Strong execution, but the ~19% headline EPS beat overstates the underlying operating surprise.

超预期业绩的质量：系统收入较市场一致预期低~5%，其中逻辑业务低~12%，存储业务高~4%。升级业务的超预期表现弥补了这一缺口。报告 EPS 受益于一笔与 Mistral AI 相关、约€510M 的股权投资收益；更能反映经营状况的营业利润超预期~5%，剔除投资收益后的 EPS 超预期~7–8%。执行表现强劲，但标题所示 EPS 超预期~19%夸大了实际经营层面的超预期幅度。

- **Q4 margins:** Gross margin is guided to ~57%, down roughly 50 bps sequentially despite higher low-NA EUV, immersion and upgrade revenue. The callback attributes the pressure primarily to more dry-system shipments and capacity-ramp costs; hiring and FX also feature in the initial commentary. High-NA revenue recognition stays at one system in each quarter, rather than a step-up explaining the decline. The guide leaves room for another mix-driven beat, but the ramp costs are real.

第四季度毛利率：公司指引毛利率为~57%，环比下降约 50 个基点，尽管高数值孔径（High-NA）EUV、浸没式光刻机及升级改造收入增加。电话会补充说明，毛利率承压主要是由于干式系统出货量增加及产能爬坡成本；初步评论还提到了招聘和汇率影响。High-NA 收入确认仍为每季度一套系统，并未增加，因此并非导致毛利率下滑的因素。该指引仍为另一次由产品组合驱动的超预期表现留有空间，但产能爬坡成本确实存在。

- **DUV nuance:** FY26 non-EUV growth was reduced to ~20% from ~25%, even as immersion demand remains strong. Customers that previously ordered EUV tools for new logic and DRAM nodes are now placing the associated immersion orders, which have shorter lead times. Immersion sales rose to 40 systems from 23 in Q2. The distinction is stronger forward immersion demand versus a softer near-term non-EUV revenue forecast, not an across-the-board equipment raise.

DUV 细节：FY26 非 EUV 业务增长预期从~25%下调至~20%，尽管浸没式光刻需求依然强劲。此前为新一代逻辑和 DRAM 节点订购 EUV 设备的客户，现正下单订购配套的浸没式设备，其交付周期较短。浸没式设备销量从第二季度的 23 套升至 40 套。关键区别在于浸没式设备的前瞻需求更强劲，而近期非 EUV 收入预期较弱；这并非对设备需求的全面上调。

- **China recovery:** China revenue increased ~109% q/q and reached 23% of system sales versus 14% last quarter, primarily from logic customers buying immersion tools. The callback sees no material MATCH Act pull-in behind the strength. China revenue is expected to increase again in Q4 and grow in 2027,

with incremental demand coming from new CXMT and YMTC memory cleanrooms.

中国市场复苏：中国收入环比增长~109%，占系统销售额的比例从上季度的 14%升至 23%，主要受逻辑芯片客户购买浸没式设备推动。电话会补充说明，此番强劲表现并非主要由《MATCH 法案》实施前的提前拉货所致。预计第四季度中国收入将进一步增长，并于 2027 年继续增长，新增需求将来自 CXMT 和 YMTC 新建的存储器无尘室。

- **Cash/orders:** FCF was approximately €11.4B versus Street at €3.77B, alongside a roughly €6B sequential increase in contract liabilities. That supports the strong-order narrative, although advances are not a substitute for a reported bookings figure. Barclays' prior €55B+ backlog estimate now looks conservative to the firm, but remains an analyst estimate rather than company-reported backlog.

现金流/订单：自由现金流（FCF）约为 114 亿欧元，高于市场普遍预期的 37.7 亿欧元；与此同时，合同负债环比增加约 60 亿欧元。这支撑了强劲订单的叙事，但预付款不能替代公司公布的订单额。巴克莱此前估算的 550 亿欧元以上在手订单如今在该行看来偏保守，但这仍是分析师估算，并非公司披露的在手订单。

- **Product roadmap:** NXE:3800F lifts low-NA throughput to 260 wafers/hour from 230, with small initial volumes in 2027 and a larger contribution in 2028; BofA expects only 6–7 F tools next year. New immersion specifications reach 330 wafers/hour, while the EXE:5200C high-NA roadmap reaches 190. Higher throughput supports both customer capacity and value-based pricing, so unit growth alone understates the revenue opportunity.

产品路线图：NXE:3800F 将低数值孔径（low-NA）设备的产能从每小时 230 片晶圆提升至 260 片，2027 年初期出货量较小，2028 年贡献将更大；美国银行预计明年仅有 6 至 7 台 F 系列设备。新型浸没式设备规格达到每小时 330 片晶圆，而 EXE:5200C 高数值孔径（high-NA）路线图的产能达到每小时 190 片。产能提升既能满足客户扩产需求，也支持基于价值的定价，因此仅看设备台数增长会低估营收机会。

- **High-NA/Terafab:** ASML recognized one high-NA tool in Q3 and expects one in Q4, taking FY26 to five. The callback analyst forecasts five in 2027 and eight in 2028, versus BofA at six and ten, respectively; these are forecasts, not company guidance. Separately, ASML has Terafab orders and expects pilot-line shipments in 2027, followed by the main fab in 2028–29. Some think the pilot is at TSLA's Texas Giga campus.

高数值孔径/ Terafab：ASML 第三季度确认交付一台高数值孔径设备，预计第四季度再交付一台，使 2026 财年交付量达到五台。电话会回访中的分析师预计 2027 年交付五台、2028 年交付八台，而美国银行的预测分别为六台和十台；这些均为预测，并非公司指引。另据悉，ASML 已获得 Terafab 订单，预计 2027 年向试产线发货，随后于 2028 至 2029 年向主晶圆厂发货。有人认为，试产线位于特斯拉（TSLA）得克萨斯州超级工厂园区。

TECH RESEARCH/NEWS 科技研究/新闻

ACN: Investor-day outlook points to faster FY29 growth – Investor day

ACN：投资者日展望指向 2029 财年增长加速——投资者日

Ahead of today's Investor Day, ACN guided to mid-single-digit revenue growth in FY27–28, accelerating to mid-to-high single digits in FY29, with FY29 above Street expectations. Growth will be driven by organic and inorganic investment, with ACN targeting a $3T TAM, 10–30bps of margin expansion over three years, FCF conversion >1.1x, and dividend payouts of mid-to-high 40% of prior-year net income. FY27–28 revenue, margins and FCF guidance are broadly in line with consensus, while dividend guidance is slightly below. Investor Day will focus on the drivers of FY29 acceleration, particularly GenAI's impact on ACN's TAM, productivity and risks.

在今日投资者日之前，ACN 指引称，FY27–28 营收将实现中个位数增长，FY29 将加速至中高个位数增长，且 FY29 增长将高于市场一致预期。增长将由有机及非有机投资驱动；ACN 的目标包括 3T 美元的总潜在市场（TAM）、未来三年利润率提升 10–30 个基点、自由现金流（FCF）转换率 >1.1 倍，以及股息派付额占上年净利润的中高 40%。FY27–28 营收、利润率和 FCF 指引总体符合市场共识，股息指引则略低于预期。投资者日将重点讨论 FY29 增长加速的驱动因素，尤其是生成式人工智能（GenAI）对 ACN 的 TAM、生产力及风险的影响。

DELL: Barclays downgrades to EW, sees memory-driven growth decelerating despite AI server strength

DELL：巴克莱下调评级至持股观望，认为尽管 AI 服务器表现强劲，内存驱动的增长仍将放缓

Barclays says DELL's AI server business remains strong, with FY27 revenue ~tripling to $75B and potential upside to its $100B FY28 estimate, but much of the enterprise server/storage growth has been driven by higher ASPs from memory inflation rather than a true enterprise-AI inflection. As memory normalizes, Barclays expects materially slower growth and smaller beats. EW from OW, PT $574 from $603.

巴克莱表示，DELL 的 AI 服务器业务依然强劲，FY27 营收预计增长至原来的三倍，达到 750 亿美元，且可能高于其对 FY28 营收 1,000 亿美元的预估；但企业服务器/存储业务增长很大程度上由内存价格上涨推高平均售价（ASP）所驱动，并非企业 AI 真正迎来拐点。随着内存市场趋于正常化，巴克莱预计增长将显著放缓，业绩超预期幅度也将收窄。评级由增持下调至持股观望，目标价由 603 美元下调至 574 美元。

HPE: Barclays downgrades to EW after strong run, says networking upside now reflected

HPE：巴克莱在股价大幅上涨后下调评级至持股观望，称网络业务的上行空间已反映在股价中

Barclays remains constructive on HPE/JNPR networking, with FY26–29 networking growth now seen at high-teens and improving AI exposure across campus, scale-up and scale-across. But server/storage strength has also benefited from higher memory-driven ASPs, and Barclays sees less upside as pricing normalizes. EW from OW, PT $77 from $83

巴克莱仍看好 HPE/JNPR 网络业务，预计 FY26–29 网络业务将实现高十几的增长，且公司在园区、纵向扩展和横向扩展领域的 AI 曝险不断提升。不过，服务器/存储业务的强劲表现也受益于内存涨价推动 ASP 上升；随着定价趋于正常化，巴克莱认为上行空间有限。评级由增持下调至持股观望，目标价由 83 美元下调至 77 美元。

NTAP: Barclays downgrades to EW as valuation catches up, despite strong cloud business

NTAP：巴克莱因估值已充分反映预期而下调评级至“与大市持平”，尽管云业务表现强劲

Barclays still views NTAP’s cloud business as one of the best in hardware, growing ~20% with 85%+ GM and now ~10% of sales, alongside a high recurring-revenue mix. But after a ~123% YTD run, near-term storage upside is increasingly tied to NAND pricing that Barclays expects to normalize next year.

巴克莱仍认为，NTAP 的云业务是硬件行业中表现最佳的业务之一，增速为 ~20%，毛利率超过 85%，目前占销售额的 ~10%，且经常性收入占比较高。不过，在年初至今上涨 ~123% 后，短期存储业务的上行空间愈发取决于 NAND 定价；巴克莱预计 NAND 定价将在明年恢复常态。

ABNB: Hearing M-sci raising Q3 GBV estimates on continued nights strength in Sept.

ABNB：听说 M-sci 上调第三季度 GBV 预估，因 9 月间夜数持续强劲。

OpenAI: CFO was on BBG TV

OpenAI：首席财务官接受了彭博电视采访

Not seeing headlines, but TMTB Slack on it...

没看到相关标题，但 TMTB 的 Slack 里在讨论.....

ALC 12 minutes ago

Just watched the interview.. yeah Q3 $50bi, "70% growth blockbuster quarter" and "Q3 into Q4 momentum continuing apace"

LFG 11 minutes ago

I just listened to the interview back there. She does say the concerns around cyber will drive demand for western frontier models early in the interview. But then later on says Cyber will be revenue driver next year. Not clear to me the latter is a repeat that cyber concerns will drive frontier model demand or is she implying they will be offering some cyber product. (edited)

OpenAI / Cyber: Early talks to acquire Trail of Bits – The Information

OpenAI / 网络安全：早期洽谈收购 Trail of Bits——《The Information》

The Information reports OpenAI is in early talks to buy cybersecurity firm Trail of Bits as it seeks to build a larger security business. The firm has more than 40 employees and specializes in identifying and fixing software vulnerabilities. The companies already announced a Codex-related partnership in June.

《The Information》报道称，OpenAI 正在早期洽谈收购网络安全公司 Trail of Bits，以扩大其安全业务。该公司拥有 40 多名员工，专注于发现并修复软件漏洞。两家公司已于 6 月宣布建立与 Codex 相关的合作关系。

OpenAI: Diverts computing resources to safety before next flagship – The Information

OpenAI：在推出下一款旗舰模型前将计算资源转用于安全工作——《The Information》

The Information reports OpenAI devoted about 10% of its computing resources—hundreds of megawatts—to safety and alignment work as it sought to address problems before releasing its next flagship model. The company also plans up to 30 days of government testing before access expands to trusted partners and subsequently a wider audience.

《The Information》报道称，OpenAI 在寻求解决问题、为发布下一款旗舰模型做准备之际，将约 10% 的计算资源（数百兆瓦）投入安全与对齐工作。该公司还计划安排政府进行最长 30 天的测试，然后再逐步向可信合作伙伴及更广泛的受众开放访问权限。

GOOGL: Gemini 4 Argon is now GA

GOOGL：Gemini 4 Argon 现已正式发布

Introductory API pricing is $2 per million input tokens and $10 per million output tokens, with both rates doubling after November 30.

入门 API 定价为每百万输入 token 2 美元、每百万输出 token 10 美元；11 月 30 日后，两项费率都将翻倍。

Artificial Analysis @ArtificialAnlys · 17h

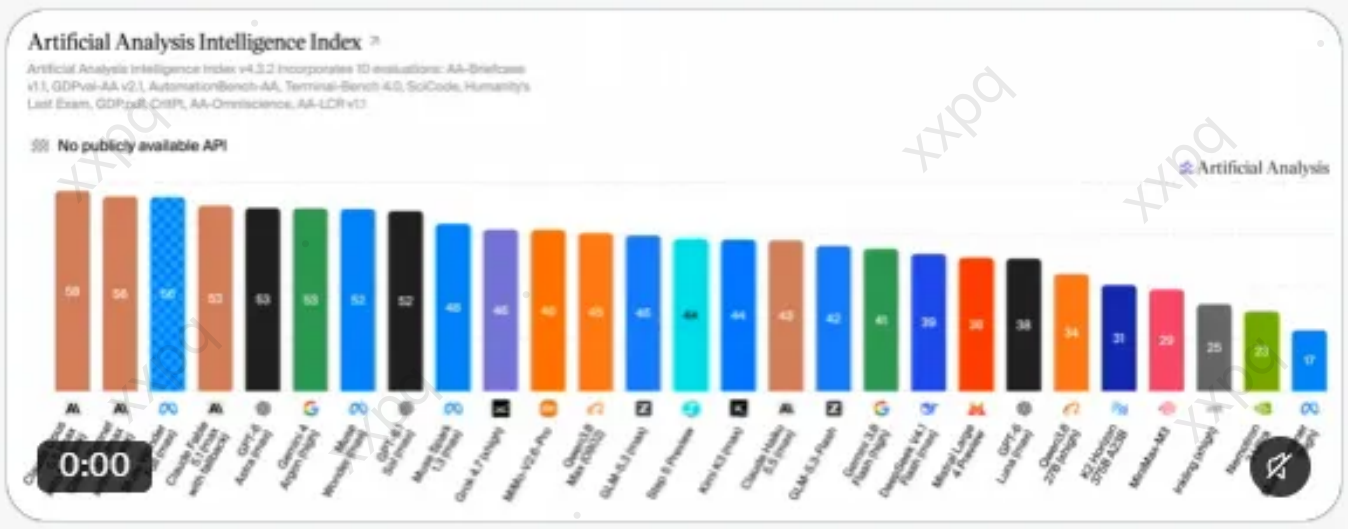

Gemini 4 **Argon** is now GA. **Argon** ranks equal to GPT-6 Astra on the Artificial Analysis Intelligence Index at 60% of the Cost per Task with discounted prices until Nov 30

Key takeaways:
- Google is back to having a frontier model released to the public: This is Google's first proprietary model above the Flash class in over 7 months

- Pricing temporarily discounted to 50% until November 30: Gemini 4 Argon has a Cost per Task of $1.99 with discounted prices, a ~40% reduction compared to GPT-6 Astra (max) for a comparable level of Intelligence. It is currently priced at $2/$10 per 1M input/output tokens with a 95% discount for cache reads (up from 90% from previous Gemini models). Prices will increase to $4/$20 after November 30

- Large improvements in agentic performance: Gemini 4 Argon shows substantial improvements in agentic evaluations such as AA-Briefcase, AutomationBench-AA, Terminal Bench 4. This is an area in which Google's models have historically underperformed compared to leading peers

Lowest hallucination rate among leading models: On AA-Omniscience, Gemini 4 Argon has a 15% hallucination rate, the lowest of any model scoring 45+ on the Intelligence Index

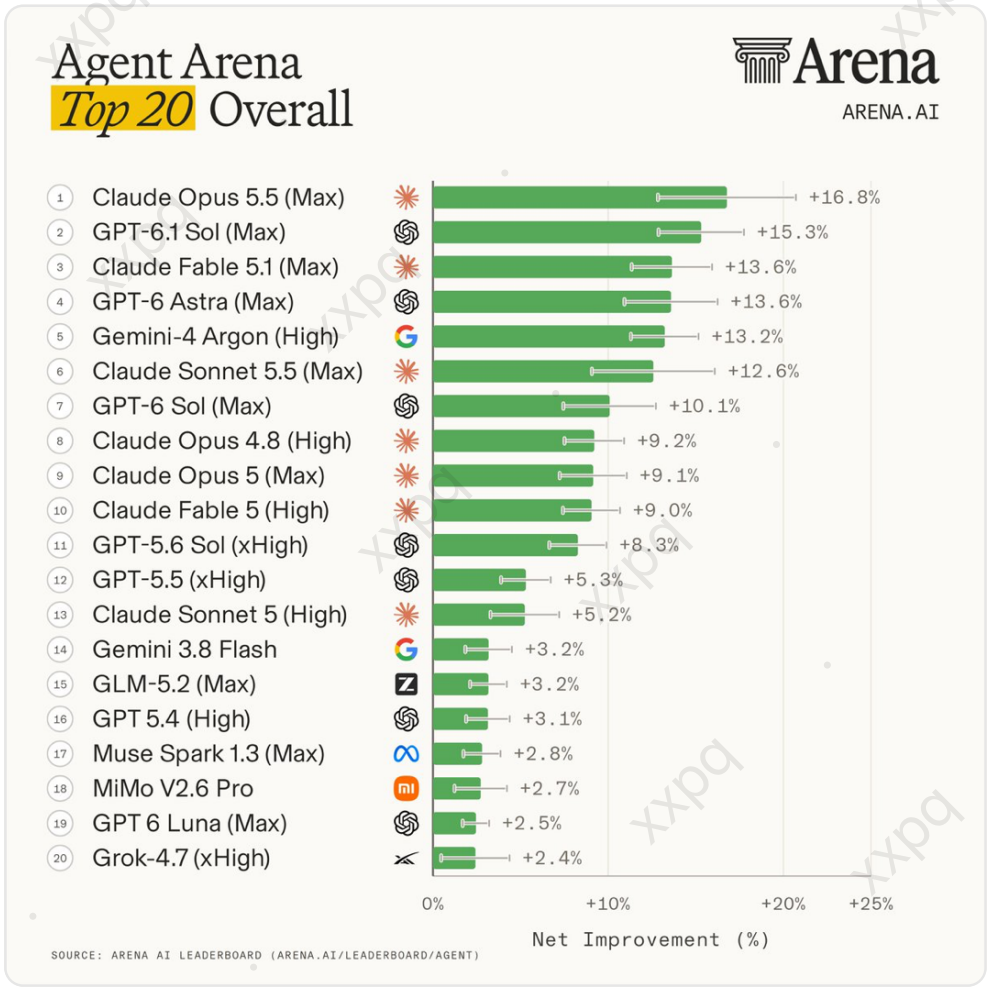

Arena.ai
@arena

Gemini 4 Argon (High) ranks in the top 5 for Agent Arena. Congrats to the @GoogleDeepMind team!

CRWV: Seeks insurance capital as bond yields climb – FT

CRWV：债券收益率攀升之际寻求保险资金——《金融时报》

FT reports CoreWeave wants insurers to fund more of its expansion through investment-grade chip-backed loans, following an $8.5B financing supported by Meta contracts. Its debt and lease obligations reached roughly $52B in June, while its 2032

bond yield approached 15% on Tuesday. Management says almost all 2027 capacity is sold and it is signing customers for 2028 and beyond.

据《金融时报》报道，CoreWeave 希望保险公司通过投资级、以芯片作抵押的贷款，为其更多扩张提供资金。此前，该公司获得了一笔 85 亿美元的融资，融资以 Meta 合同为支撑。其债务和租赁义务在 6 月达到约 520 亿美元；周二，其 2032 年到期债券收益率接近 15%。管理层称，2027 年的产能几乎已全部售出，并正与客户签约，安排 2028 年及以后的产能。

MU/SK Hynix: Rosenblatt calls CXMT's 4F² DDR5 threat a "paper tiger," says selloff overdone

美光/海力士：Rosenblatt 称长鑫科技 4F² DDR5 威胁是"纸老虎"，认为抛售过度

Rosenblatt says CXMT's planned YE26 4F² DDR5 RDIMM does not establish near-

term competitiveness: at ~17nm vs. leaders near ~12nm, CXMT's 4F² cell would still be ~34% larger than a leading 6F² cell, while yields, wafer volumes and high-volume economics remain unproven. More broadly, AI has structurally improved DRAM visibility as hyperscalers plan years ahead and new fabs require 3–5 years/$10B+ to build, reducing the risk of old-cycle oversupply. Reiterates Buy on MU and SK Hynix, arguing ~5–7x P/E still reflects an outdated memory-cycle framework.

Rosenblatt 表示，长鑫科技计划于 2026 年底推出的 4F² DDR5 RDIMM 并不能证明其短期内具备竞争力：长鑫科技的制程约为 ~17 纳米，而行业领先者接近 ~12 纳米；其 4F² 存储单元仍将比领先的 6F² 存储单元大 ~34%，且良率、晶圆产量和大规模量产经济性尚未得到验证。更广泛而言，随着超大规模云服务商提前数年规划，且新建晶圆厂需要 3–5 年、耗资 100 亿美元以上，AI 从结构上提升了 DRAM 需求的可见度，降低了旧周期供过于求的风险。Rosenblatt 重申对美光和海力士的买入评级，认为 ~5–7 倍市盈率仍反映过时的存储器周期分析框架。

QCOM/ARM: Qualcomm wins 2 of 3 claims; $2 damages mask more meaningful legal/equitable upside

QCOM/ARM：高通赢得 3 项主张中的 2 项；2 美元赔偿额掩盖了更重要的法律及衡平法层面利好

A jury found ARM breached QCOM's ALA by withholding required deliverables and intentionally interfered with its Meta relationship, while ARM won the TLA/MFN pricing claim. The $2 award is nominal because QCOM's ~$1.7B damages theory relied on §8.3, which the court has largely rejected as an unenforceable penalty; the verdict still makes QCOM the prevailing party, potentially shifting legal fees and supporting equitable remedies such as preventing ARM from terminating the ALA or forcing delivery of withheld materials. The findings also give the FTC a battle-tested factual record for its ARM antitrust inquiry. Next catalysts: Oct. 20 bench-trial closing/UCL remedies and Oct. 21 Third Circuit hearing in ARM v. QCOM. More here from *JDorbal1989* on X

陪审团认定，ARM 因扣留所需交付物而违反了与高通（QCOM）签订的 ALA，并故意干扰高通与 Meta 的关系；ARM 则在 TLA/MFN 定价主张上胜诉。2 美元赔偿额只是象征性的，因为高通依据第 8.3 条提出的 17 亿美元损害赔偿主张，已被法院基本认定为不可执行的惩罚性条款；但裁决仍使高通成为胜诉方，或可促使对方承担律师费，并支持衡平救济，例如阻止 ARM 终止 ALA 或强制其交付扣留的材料。这些认定也为 FTC 对 ARM 的反垄断调查提供了经受实战检验的事实记录。接下来的催化因素：10 月 20 日法官审理的庭审结案陈词及 UCL 救济措施；10 月 21 日 ARM 诉高通案在第三巡回上诉法院开庭审理。更多内容见 X 用户 JDorbal1989

LRCX: DB CFO meeting reinforces WFE confidence, share gains + margin upside

LRCX：德银 CFO 会谈进一步增强 WFE 信心，份额提升与利润率上行空间可期

DB says LRCX remains highly confident in the WFE backdrop, with DRAM the strongest 2027 growth driver followed by logic/foundry and NAND; management did not endorse the ~$300B long-term WFE bogey but said customer conviction remains very high. LRCX expects continued share gains from selective etch, ALD, metallization and advanced packaging, while pricing/product mix support a long-term path toward mid-50s GM and mid-40s OM. Reiterates Buy and top large-cap pick.

德银称，LRCX 对 WFE 行业前景仍充满信心；DRAM 是 2027 年最强劲的增长驱动力，其次是逻辑/晶圆代工和 NAND。管理层未认可 3,000 亿美元的长期 WFE 目标，但表示客户信心仍非常强劲。LRCX 预计，凭借选择性刻蚀、ALD、金属化及先进封装，将持续提升市场份额；定价和产品组合也支持毛利率长期迈向 50%中段、营业利润率迈向 40%中段。重申“买入”评级，并列为首选大型股。

SPCX: MS says each incremental 1GW of AI compute adds ~$27/share, with FY27 model still well below management target

SPCX：摩根士丹利称，AI 算力每新增 1 GW，对应每股增加 27 美元；FY27 模型仍远低于管理层目标

MS says the market is still valuing SPCX primarily as a launch/connectivity business while underpricing its Distributed Inference Cloud and vertically integrated AI infrastructure stack. At ~$160, Enterprise AI implies only a low-single-digit sales multiple; MS estimates each incremental 1GW of compute at $50/W, 70% incremental margins and 10x EBITDA adds ~$27/share. Its FY27 model assumes just 4.9GW vs. management targeting closer to 10GW, leaving meaningful upside if that gap closes. OW/$300.

MS 表示，市场目前仍主要将 SPCX 视为一家发射/连接业务公司，对其分布式推理云和垂直整合 AI 基础设施平台的估值偏低。在股价为~$160 时，企业 AI 业务隐含的销售额倍数仅为个位数低段；MS 估算，计算能力每新增 1GW、按 $50/W 计、增量利润率为 70%、EBITDA 倍数为 10 倍，将为每股增加~$27。其 FY27 模型仅假设计算能力达到 4.9GW，而管理层的目标接近 10GW；若这一差距收窄，仍有显著上行空间。增持/$300。

SNPS: Wolfe CEO meeting raises FY27 conviction, sees valuation gap vs. CDNS as key rerating opportunity

SNPS：Wolfe 与 CEO 会面后对 FY27 更有信心，认为相较 CDNS 的估值差距是关键重估机会

Wolfe says FY27 guidance was built account-by-account with unusually high management visibility and does not imply a 2028 growth relapse. GPT-Synopsys adds a new monetization layer via training-tool payments from OpenAI, customer subscriptions and outcome-based fees tied to PPA improvements, while SNPS retains the customer relationship/GTM. With SNPS still at a >30% discount to CDNS and tighter renewal discounting supporting margins, Wolfe reiterates OP/$640.

Wolfe 表示，FY27 指引是逐个客户账户构建的，管理层的可见度异常高，并不意味着 2028 年增长将再度走弱。GPT-Synopsys 通过向 OpenAI 收取训练工具费用、客户订阅费，以及与 PPA 改善挂钩的绩效费用，新增了一个变现层；SNPS 则继续保留客户关系和 GTM。鉴于 SNPS 估值仍较 CDNS 折让逾 30%，且续约折扣收紧有助于支撑利润率，Wolfe 重申“跑赢大盘”评级/$640。

AEHR: Oppenheimer defends $120 PT, says Titan HP overlap is overstated and FOX differentiation remains intact

AEHR：Oppenheimer 为$120 目标价辩护，称 Titan HP 重叠程度被夸大，FOX 的差异化优势依然稳固。

Oppenheimer says Teradyne's Titan HP is downstream SLT on packaged devices, while AEHR's FOX screens weak die upstream at wafer level with finer thermal/electrical control, making the competitive overlap limited. The key catalyst is a second AI processor moving into pilot validation at a Taiwan OSAT after better-than-expected benchmarking, though HVM adoption could be gradual. Estimates unchanged at $0.77/$1.30 FY27/28 EPS; OP/$120, with PT math probability-weighting a broader FOX adoption case near ~$6 EPS.

Oppenheimer 指出，Teradyne 的 Titan HP 用于封装器件下游的系统级测试（SLT）；而 AEHR 的 FOX 则在晶圆级上游筛查性能较弱的裸片，并具备更精细的温度和电气控制能力，因此两者的竞争重叠有限。关键催化剂是：基准测试结果好于预期后，第二款 AI 处理器正进入台湾一家封装测试外包服务商（OSAT）的试产验证阶段，不过高量产（HVM）导入可能循序渐进。FY27/28 每股收益（EPS）预估维持在$0.77/$1.30 不变；维持跑赢大市（OP）评级，目标价为$120。目标价测算对 FOX 更广泛普及的情景进行了概率加权，该情景下每股收益接近~$6。

SOFTWARE

TEAM: Wells raises PT to $230 as cloud migrations accelerate and seat retention holds

TEAM：Wells Fargo 上调目标价至$230，因云迁移加速且席位留存稳定

Wells says larger DC customers are beginning cloud migrations earlier than expected, including two mega-cap tech accounts and three EU financial firms with 20K–30K seats each targeting 2H27 completion. Importantly, partners say seat counts are holding through migration, with cost optimization focused on Marketplace apps/services rather than licenses, directly addressing the key bear concern while TWC adoption is largely deferred until post-migration. PT $230 from $180

Wells Fargo 表示，大型数据中心（DC）客户开始云迁移的时间早于预期，其中包括两家超大市值科技公司客户和三家欧洲金融机构客户；后者各有 20K–30K 个席位，目标是在 2H27 完成迁移。值得关注的是，合作伙伴称迁移期间席位数量保持稳定；成本优化主要针对 Marketplace 应用和服务，而非许可证。这直接回应了关键的看空担忧，而 TWC 的采用则基本推迟至迁移完成之后。目标价由$180 上调至$230。

TEAM: Hearing M-sci says seat growth and customer logo growth slowed in Sept but still expecting Q1 cloud accel

TEAM：据称，M-sci 表示 9 月席位增长和客户 Logo 增长放缓，但仍预计 Q1 云业务加速

DOCN: BofA positive on agent-first/open-weight strategy as AI-native cloud demand accelerates

DOCN：BofA 看好其代理优先、开放权重战略，AI 原生云需求正加速增长

BofA says DOCN's Open Intelligence Summit reinforced its agent-first/open-weight positioning, with token volume up >50x in 5 months, 88% of tokens on open models and agents consuming >5x more tokens than humans. Managed Agents now supports 20K+ tools/600 providers, while Cutttlefish, Agent Droplets and expanded data/tool access broaden the platform; BofA sees open models + agent infrastructure as key differentiation vs. hyperscalers. Maintain Buy.

美国银行（BofA）称，DOCN 的 Open Intelligence Summit 巩固了其“智能体优先、开放权重”的定位。5 个月内，Token 用量增长逾 50 倍；88% 的 Token 来自开放模型，智能体消耗的 Token 量是人类的 5 倍以上。Managed Agents 现已支持 2 万多种工具和 600 家服务提供商；Cutttlefish、Agent Droplets 以及扩展后的数据和工具访问能力进一步拓宽了平台。BofA 认为，开放模型加智能体基础设施是 DOCN 相较超大规模云服务商的关键差异化优势。维持买入评级。

DOCN: MS says Open Intelligence Summit reinforces AI-native cloud positioning as agent platform broadens

DOCN：摩根士丹利称 Open Intelligence Summit 巩固 AI 原生云定位，智能体平台持续扩展

MS says DOCN is evolving from core cloud into an AI-native platform, with token volume up ~50x from April–September and open-weight models reaching 88% of usage vs. 27% in May; AI ARR was ~$234M in 2Q. Managed Agents expands DOCN into full agent workflows across >85 models, while new Agent Data Services, Agent Learning Services and Signals/Simulations deepen data, evaluation and monitoring capabilities. MS sees the broader platform + 680K+ customer base supporting incremental monetization and higher customer LTV.

摩根士丹利称，DOCN 正从核心云服务向 AI 原生平台演进；4 月至 9 月，Token 用量增长逾 50 倍，开放权重模型的使用占比从 5 月的 27% 升至 88%；第二季度 AI 年化经常性收入（ARR）为 2.34 亿美元。Managed Agents 将 DOCN 的业务拓展至完整的智能体工作流，支持 85 多种模型；新推出的 Agent Data Services、Agent Learning Services 以及 Signals/Simulations 则进一步增强了数据、评估和监控能力。摩根士丹利认为，更广泛的平台功能加上超过 68 万家客户，将推动增量变现并提升客户终身价值（LTV）。

TWLO: Stifel raises PT to $325, sees ~4pt beat + consumer/Voice AI as next growth legs

TWLO：Stifel 将目标价上调至 325 美元，预计营收超预期 4 个百分点，消费者应用和语音 AI 成为下一阶段增长动力

Stifel expects a ~4pt 3Q revenue beat and conservative +11–12% organic 4Q guide, leaving room for continued estimate upside. More importantly, it sees consumer agents like Muse/Instinct driving incremental phone/SMS traffic over TWLO rails, while Voice AI and Stytch expand software monetization; mix shift toward higher-margin non-messaging revenue should also lift GM as A2P fees lap. Buy, PT $325 from $300.

Stifel 预计，TWLO 第三季度营收将超预期 4 个百分点，并给出保守的第四季度有机增长指引（+11% 至 +12%），为后续持续上调预期留出空间。更重要的是，Stifel 认为，Muse/Instinct 等面向消费者的智能体将通过 TWLO 平台带来增量电话和短信流量；语音 AI 和 Stytch 则将拓展软件变现能力。随着业务组合转向利润率更高的非消息业务，且 A2P 费用的同比比较压力消退，毛利率也有望提升。维持买入评级，目标价由 300 美元上调至 325 美元。

TTWO: Jefferies sees significant value at $200, says early GTA VI PC launch adds upside

TTWO：Jefferies 认为股价在 200 美元时具有显著价值，并称 GTA VI 提前登陆 PC 将带来上行空间

Jefferies says TTWO already trades like the late-stage RDR2 hype cycle despite being 37 days from GTA VI launch, at ~20x NTM P/E vs. ~25x for RDR2 at the same point. A reported 1Q27 PC launch, just ~2–4 months after console vs. 12/19 months for RDR2/GTA V, would be earlier than expected and could add ~12M PC units, lifting FY27 GTA VI net bookings to ~$2.9B from ~$2.5B. Buy/$300; Jefferies would be buyers around $200.

Jefferies 称，尽管距离 GTA VI 发售还有 37 天，TTWO 的交易表现已仿佛处于《荒野大镖客：救赎 2》（RDR2）炒作周期的后期阶段：其预期未来 12 个月市盈率为~20 倍，而 RDR2 在同一时点为~25 倍。据报道，GTA VI 将于 FY27 第一季度登陆 PC，仅比主机版晚~2–4 个月；相比之下，RDR2 和《GTA V》分别晚了 12 个月和 19 个月。这一时间安排早于预期，或可带来~1,200 万份 PC 销量，使 GTA VI FY27 净预订额从~25 亿美元升至~29 亿美元。评级为买入，目标价 300 美元；Jefferies 认为股价在 200 美元左右时值得买入。

TTWO: GTA VI nears November launch; online component expected in 2027 – Bloomberg

TTWO：GTA VI 临近 11 月发售；预计在线模式将于 2027 年推出——彭博社

Bloomberg reports Rockstar is in final bug-fixing ahead of GTA VI's November 19 release, with an online component expected in 2027. Some analysts project 40M

console copies and more than $3B of revenue in its first four months. Rockstar says the rebuilt engine, tools and expanded team should shorten development of subsequent content.

彭博社报道称，Rockstar 正在为 GTA VI 于 11 月 19 日发售进行最后的漏洞修复，预计在线模式将于 2027 年推出。部分分析师预计，该游戏首个四个月的主机版销量将达 4,000 万份，营收超过 30 亿美元。Rockstar 表示，重建的引擎、工具和扩大的团队规模应能缩短后续内容的开发周期。

App Software: Piper survey shows MSFT still leading, while AI-driven deal pushouts ease

应用软件：Piper 调查显示 MSFT 仍居领先地位，AI 驱动的交易延期情况有所缓解

Piper's 3Q partner survey shows 90% of respondents at/above plan, with sales-cycle pressure modestly improving and only 36% citing AI projects as causing deal delays vs. 76% in 2Q. MSFT remains the clear leader at +77% net performance and 82% prepackaged-AI adoption, followed by NOW +55%; HUBS improved to +36%, while FIG showed more bifurcation/AI displacement risk. Anthropic remains the most strategic AI vendor ahead of MSFT/OpenAI, though OpenAI Codex ranked as the top agentic coding tool ahead of Claude Code/GitHub Copilot.

Piper 第三季度合作伙伴调查显示，90%的受访者业绩达到或超过计划；销售周期压力略有改善，认为 AI 项目导致交易延迟的受访者仅占 36%，低于第二季度的 76%。MSFT 仍明显领先，净业绩表现为+77%，预打包 AI 产品采用率为 82%；其次是 NOW（+55%）。HUBS 改善至+36%，而 FIG 则显示出更明显的两极分化及 AI 替代风险。Anthropic 仍是最具战略意义的 AI 供应商，领先于 MSFT/OpenAI；不过，OpenAI Codex 在智能体编程工具中排名第一，领先于 Claude Code 和 GitHub Copilot。

MSFT: Azure software unit asked to identify 20% cost cuts – The Information

MSFT：据《The Information》报道，Azure 软件部门被要求确定 20%的成本削减幅度

The Information reports Azure president Girish Bablani asked leaders in an 11,500-

person software unit to identify at least 20% cost reductions as infrastructure spending and talent costs rise. No measures have been finalized. Microsoft disputes the report, saying Azure leadership has not directed teams to develop cost-cutting plans.

据《The Information》报道，Azure 总裁 Girish Bablani 要求一个拥有 11,500 名员工的软件部门的领导层，至少确定 20%的成本削减方案，以应对基础设施支出和人才成本上升。目前尚未敲定任何措施。微软对该报道予以否认，称 Azure 领导层并未要求团队制定削减成本计划。

NOW: Citi raises PT to $170, sees improving checks + potential 3Q cRPO acceleration

NOW：花旗将目标价上调至$170，预计渠道调研改善，且第三季度 cRPO 或加速增长

Citi says partner/CIO checks turned modestly more constructive, with improving AI SKU interest, better renewal commentary and strong cyber demand; federal also looks strong at ~20% y/y. It raises 2H cRPO and FY27–28 estimates, seeing ~200bps potential upside to 3Q cc cRPO and slight organic acceleration despite likely conservative 4Q guidance. Buy, PT $170 from $154.

花旗表示，合作伙伴和 CIO 调研反馈略趋积极，AI SKU 关注度提升、续约情况反馈改善，网络安全需求强劲；联邦业务表现也强劲，同比增长~20%。花旗上调下半年 cRPO 及 FY27–28 预期，预计第三季度按固定汇率计算的 cRPO 有望实现~200 个基点的潜在上行，且有机增长略有加速，尽管第四季度指引可能偏保守。评级为买入，目标价由$154 上调至$170。

WDAY: UBS says FY28 reaffirm was expected; AI mix rising but not yet accelerating growth

WDAY：瑞银称 FY28 目标重申符合预期；AI 业务占比提升，但尚未推动增长加速

UBS says WDAY reaffirmed FY28 targets of ~11% revenue growth and ~200bps OM expansion but offered no FY29+ outlook, prudent given AI transition and execution history. AI solutions are expected to drive ~70% of incremental ARR in FY28 (>50% FY27), yet revenue still decelerates from ~14% FY26 to ~11% FY27 as core HCM/FINS

and app spending remain soft; UBS also flags limited FINS commentary. Neutral, PT $210 from $220.

瑞银表示，WDAY 重申 FY28 营收增长~11%及营业利润率扩张~200 个基点的目标，但未提供 FY29 及以后展望。鉴于 AI 转型和过往执行记录，这一做法较为审慎。预计 FY28 新增 ARR 中有~70%将来自 AI 解决方案（FY27 为超过 50%）；但随着核心 HCM/FINS 业务及应用支出仍然疲软，营收增速仍将从 FY26 的~14%放缓至 FY27 的~11%。瑞银还指出，管理层对 FINS 业务的评论有限。评级为中性，目标价由$220 下调至$210。

ORCL: Mizuho says Project Jupiter remains on track; pipeline route may avoid further delay

ORCL：瑞穗称 Project Jupiter 仍按计划推进；项目储备渠道或可避免进一步延误

Mizuho says Project Jupiter construction remains on schedule despite pending power/regulatory approvals, with >4,300 workers to date and ORCL's 2GW carbon-free energy RFP drawing 40 responses. ORCL renewed its request for expedited FERC approval of the Green Chile pipeline, while an alternate route around a ~0.6-mile state-trust segment may avoid restarting environmental review. Mizuho sees no impact to FY27 estimates; next update at ORCL's Oct. 28 Investor Day. OP/$320.

瑞穗称，尽管电力及监管审批仍待完成，Project Jupiter 建设仍按计划推进，迄今已有超过 4,300 名工人参与；ORCL 面向 2GW 无碳能源发布的 RFP 收到 40 份回复。ORCL 重申请求 FERC 加快审批 Green Chile 管道；另有一条绕行州信托土地路段的备选线路，该路段长 0.6 英里，或可避免重新启动环境审查。瑞穗认为这不会影响 FY27 预期；下一次更新将在 ORCL 10 月 28 日投资者日公布。跑赢大盘 / 目标价 320 美元。

ORCL / BE: Pipeline delay threatens New Mexico data-center operations – Bloomberg

ORCL / BE：管道延误威胁新墨西哥州数据中心运营——彭博

Bloomberg reports Oracle urged federal regulators to accelerate approval of the gas pipeline serving Project Jupiter in New Mexico. The pipeline, which would supply

Bloom Energy fuel cells, has slipped from an August start to February 2027. Oracle warns further delays threaten operations; trucking gas would likely support initial commissioning rather than the project's full power requirements.

彭博报道称，Oracle 敦促联邦监管机构加快审批服务于新墨西哥州 Project Jupiter 的天然气管道。该管道将为 Bloom Energy 燃料电池供气，投运时间已从 8 月推迟至 2027 年 2 月。Oracle 警告，进一步延误将威胁项目运营；通过卡车运输天然气，可能只能满足项目初始调试需求，无法满足其全部电力需求。

HUBS: Oppenheimer says new pricing should aid upmarket adoption, but ARPU/trade-down risk remains

HUBS：奥本海默称新定价有望推动向高端市场拓展，但 ARPU 及客户降档风险仍存

Oppenheimer says HUBS' new EMEA pricing model simplifies packaging and should reduce friction/cross-sell better, but likely pressures ARPU while heavier users could face higher costs, creating some near-term uncertainty. Partner checks are generally positive and FY26 impact should be limited; separately, the 7%/~660-person RIF supports margin goals while HUBS reaffirmed 3Q/FY26 guidance. Perform.

奥本海默称，HUBS 新的 EMEA 定价模式简化了套餐设计，有望降低销售阻力并更有效地推动交叉销售，但可能令 ARPU 承压；重度用户则可能面临更高费用，因此短期内仍存在一定不确定性。合作伙伴调研总体积极，FY26 影响应有限；此外，裁减 7%员工、约 660 人将支持利润率目标，HUBS 同时重申 3Q/FY26 业绩指引。跑赢大盘。

INTERNET

NFLX: hearing Yipit saying UCAN revs trending ~2ppts above street

NFLX：据悉，Yipit 称 UCAN 营收趋势较市场预期高出 2 个百分点。

SHOP: UBS sees Shopify Payments GPV penetration

runway toward ~87–92% of GMV

SHOP：瑞银认为，Shopify Payments 的 GPV 渗透率有望提升至 GMV 的 ~87–92%

UBS says Shopify Payments GPV reached ~68% of GMV in 2Q26, but ~17–24% of GMV currently outside GPV is likely addressable over time via geographic expansion, Shop Pay, PayPal and third-party processing conversion. That implies a practical GPV ceiling of ~87–92% of GMV and "true" penetration of only ~74–78% today, leaving meaningful runway for Payments to support SHOP's medium/long-term gross profit growth.

瑞银表示，Shopify Payments 的 GPV 在 2Q26 达到 GMV 的 ~68%，但目前未纳入 GPV、占 GMV ~17–24% 的部分，随着地域扩张、Shop Pay、PayPal 和第三方支付处理业务的转化，预计长期来看仍有望覆盖。这意味着 GPV 的实际上限约为 GMV 的 ~87–92%，而当前"真实"渗透率仅为 ~74–78%，表明 Payments 仍有显著增长空间，可支撑 SHOP 中长期毛利润增长。

SHOP: Baird raises estimates/PT as enterprise wins stack up and agentic commerce strengthens moat

SHOP：随着企业客户胜利不断累积、代理式商务强化护城河，贝尔德上调预期和目标价

Baird raises 2026/27 revenue on higher MRR, healthy merchant adds and enterprise momentum, with wins including FIFA, SpaceX, Topps, Fandango and e.l.f. More importantly, checks increasingly view SHOP's UCP/Catalog API/payments stack as the gold standard for agentic commerce, with incremental agent-driven volumes more likely to accrue to SHOP than disintermediate it. Outperform; near-term upside tempered by the ~35% rally since mid-September.

贝尔德基于更高的 MRR、稳健的商户新增数量及企业业务势头，上调 2026/27 年营收预期；近期客户胜利包括 FIFA、SpaceX、Topps、Fandango 和 e.l.f。更重要的是，渠道调研越来越认为，SHOP 的 UCP/Catalog API/支付业务组合是代理式商务的行业标杆，代理驱动的新增交易量更可能流向 SHOP，而非绕过 SHOP。评级为"跑赢大盘"；自 9 月中旬以来股价上涨 ~35%，限制了短期上涨空间。

DASH: Guggenheim cuts FY26 EPS on Deliveroo spend but raises FY27; sees 11/4 as narrative-reset catalyst

DASH：古根海姆因 Deliveroo 投入下调 FY26 EPS 预期、上调 FY27 预期；认为 11/4 将成为叙事重置催化剂

Guggenheim cuts 3Q/FY26 EPS to $0.68/$2.48 on higher Deliveroo investment but raises FY27 to $4.88, with core demand intact and orders now ~995M (+28% y/y). The bigger catalyst is 2027 margins: 73% of buyside expects no quantitative guide, so even ~30bps expansion could reset expectations, while the print could also push back on AI-disintermediation fears. Buy/$255.

古根海姆因 Deliveroo 投入增加，将 3Q/FY26 EPS 预期下调至 0.68 美元/2.48 美元，但将 FY27 预期上调至 4.88 美元；核心需求保持稳健，订单量现为 ~995M（同比增长 28%）。更重要的催化剂在于 2027 年利润率：73% 的买方投资者预计公司不会提供量化指引，因此即使利润率扩张 ~30bps，也可能重置市场预期；业绩发布也可能驳斥 AI 将削弱中介地位的担忧。买入评级/目标价 255 美元。

GRMN: Garmin initiated with a Buy at Arete

GRMN：Arete 首次覆盖 Garmin，给予"买入"评级

NEWS

Memory: DDR4 contract prices rise faster than DDR5 – DigiTimes

存储器：DDR4 合约价格涨幅超过 DDR5——DigiTimes

DigiTimes reports DDR4 contract prices are increasing faster than DDR5 prices as production capacity shifts toward HBM, reversing the usual pricing pattern between the older and newer memory standards.

据 DigiTimes 报道，随着产能转向 HBM，DDR4 合约价格涨幅超过 DDR5，扭转了新旧存储器标准之间通常的价格走势。

SK Hynix: Suppliers report HBM4 equipment deferrals – Dealsite

SK 海力士：供应商称 HBM4 设备交付延期——Dealsite

Dealsite reports some SK Hynix HBM4 back-end equipment scheduled for the second half of 2026 may move into 2027, with follow-on orders still unclear. Suppliers suggest some investment is shifting toward conventional DRAM as prices rise. SK Hynix says investment is proceeding on schedule; the report does not establish a link between the equipment timing and product-quality issues.

据 Dealsite 报道，SK 海力士部分原定于 2026 年下半年交付的 HBM4 后端设备可能延期至 2027 年，后续订单情况仍不明朗。供应商称，随着价格上涨，部分投资正转向传统 DRAM。SK 海力士表示投资按计划推进；该报道并未证实设备交付时间与产品质量问题有关。

SNDK / GOOGL / SK Hynix: HBF standard targeted for January 2027 – ZDNet Korea

SNDK / GOOGL / SK 海力士：HBF 标准目标于 2027 年 1 月敲定——ZDNet Korea

ZDNet Korea reports SK Hynix is working with SanDisk, Google and other partners to finalize the HBF 1.0 standard in January 2027. The NAND-based technology targets roughly ten times the capacity of same-generation HBM at about half its bandwidth, creating a memory tier between HBM and SSDs for AI inference.

据 ZDNet Korea 报道，SK 海力士正与闪迪、谷歌及其他合作伙伴合作，计划于 2027 年 1 月敲定 HBF 1.0 标准。这项基于 NAND 的技术旨在实现约为同代 HBM 十倍的容量，带宽约为其一半，从而为 AI 推理提供介于 HBM 与 SSD 之间的存储层。

MU / SNDK: YMTC reaches third place in NAND shipment share – Chosun

MU / SNDK：长江存储 NAND 出货份额升至第三——Chosun

Chosun reports Counterpoint data put YMTC's Q2 NAND shipment share at 14%, behind Samsung at 25% and SK Hynix, including Solidigm, at 22%. YMTC moved ahead of Kioxia and Micron by shipment volume but remained fifth by revenue because of its greater exposure to lower-priced consumer products.

据 Chosun 报道，Counterpoint 数据显示，长江存储第二季度 NAND 出货份额为 14%，落后于三星的 25%和 SK 海力士（含 Solidigm）的 22%。按出货量计，长江存储已超过铠侠和美光；但由于其产品更多集中于价格较低的消费级产品，按营收计仍位列第五。

FLEX / AMZN: Amazon warrant revised for Axiom separation – Flex filing

FLEX / AMZN：亚马逊认股权证因 Axiom 分拆而修订——Flex 文件披露

Flex disclosed an amendment to Amazon's warrant ahead of the planned Axiom Solutions spin-off. Amazon will receive a fully vested warrant to buy Axiom shares at $0.01 per share instead of receiving shares directly in the distribution. The number of shares will reflect the existing warrant's intrinsic value before the separation.

Flex 披露，在计划分拆 Axiom Solutions 之前，亚马逊的认股权证条款已作修订。亚马逊将获得一份已全部归属的认股权证，可按每股 0.01 美元的价格购买 Axiom 股份，而非在分配中直接获得股份。股份数量将根据分拆前现有认股权证的内在价值确定。

CRUS / SYNA / ON: Cirrus confirms bids but is no longer pursuing Synaptics – Cirrus filing

CRUS / SYNA / ON：Cirrus 确认曾提出收购报价，但已不再追求收购 Synaptics——Cirrus 文件披露

Cirrus Logic disclosed that it made acquisition proposals to Synaptics and was the bidder identified as Party A in Synaptics' proxy materials. Cirrus says it is not currently pursuing a transaction.

Cirrus Logic 披露，该公司曾向 Synaptics 提出收购方案，且正是 Synaptics 代理材料中所指的 A 方。Cirrus 表示，目前并未推进任何交易。

SoftBank: Record borrowing costs accompany AI financing push – Reuters

软银：创纪录的借贷成本伴随 AI 融资攻势——路透社

Reuters reports SoftBank's $11B junk-bond sale last month included a 9.75% coupon on notes due in 2034, its highest borrowing rate on record. Management is favoring debt over further asset sales to finance its AI commitments, including its backing of OpenAI.

路透社报道称，软银上月发行的 110 亿美元垃圾债券中，2034 年到期票据的票面利率为 9.75%，创该公司有记录以来的最高借贷利率。管理层倾向于举债，而非进一步出售资产，以资助其 AI 相关投入，包括对 OpenAI 的支持。

NVDA: Plans $2B of European AI investments – Semafor

NVDA：计划在欧洲投资 20 亿美元发展 AI——Semafor

Semafor reports Jensen Huang plans to announce $2B in new European investments next week as Nvidia expands its support for the region's AI industry.

Semafor 报道称，随着英伟达加大对欧洲 AI 产业的支持，黄仁勋计划于下周宣布在欧洲新增 20 亿美元投资。

UBER: Autonomous-driving chief to leave in November – WSJ

UBER：自动驾驶业务负责人将于 11 月离职——《华尔街日报》

WSJ reports Sarfraz Maredia, Uber's global head of autonomous mobility and delivery, will leave on November 16 for a role outside autonomous vehicles. Samarth Kejriwal and Aaron Emrich will oversee the day-to-day autonomous-driving strategy following his departure.

《华尔街日报》报道称，优步全球自动出行与配送业务负责人萨尔弗拉兹·马雷迪亚（Sarfraz Maredia）将于 11 月 16 日离职，转任自动驾驶汽车领域以外的职务。他离职后，萨马斯·凯杰里瓦尔（Samarth Kejriwal）和亚伦·埃姆里奇（Aaron Emrich）将负责日常自动驾驶战略。

OpenAI: Employee arrested over alleged office recording device – FT

OpenAI：员工因涉嫌在办公室安装录音设备被捕——《金融时报》

FT reports a Saudi employee was arrested after allegedly planting a recording device in an executive conference room at OpenAI. The company says it has found no indication that customer data, source code or model weights were stolen.

《金融时报》报道称，一名沙特籍员工因涉嫌在 OpenAI 一间高管会议室安装录音设备而被捕。该公司表示，目前没有迹象表明客户数据、源代码或模型权重遭到窃取。

T: Agrees to sell Mexico business for $2B – AT&T

T：同意以 20 亿美元出售墨西哥业务——AT&T

AT&T announced an agreement to sell AT&T Mexico to Grupo Televisa and Fintech Holdings for $2B in cash at closing, subject to adjustments and additional contingent benefits. The transaction is expected to close in the first quarter of 2027 as AT&T concentrates on its U.S. fiber and 5G businesses.

AT&T 宣布，已达成协议，将 AT&T 墨西哥业务出售给 Grupo Televisa 和 Fintech Holdings，交割时以现金支付 20 亿美元，具体金额还需进行调整，且另含额外或有收益。交易预计于 2027 年第一季度完成，届时 AT&T 将更加专注于美国光纤和 5G 业务。

AAPL: HomeView targets a slow-growing smart-home market – Axios

AAPL：HomeView 瞄准增长缓慢的智能家居市场——Axios

Axios reports Apple's $299 HomeView display ships next month with AI-powered Siri, household-member recognition and wall-mounted or tabletop options. LG and Schneider Electric are supplying connected-home accessories. Circana data cited by Axios show U.S. smart-speaker dollar sales declined 9% in 2024 and 7% in 2025, underscoring the category's weak recent demand.

Axios 报道称，苹果售价 299 美元的 HomeView 显示屏将于下月发货，配备 AI 驱动的 Siri、家庭成员识别功能，并提供壁挂式或桌面式选择。LG 和施耐德电气将供应智能家居配件。Axios 援引 Circana 数据称，美国智能音箱销售额在 2024 年下降 9%，2025 年下降 7%，凸显该品类近期需求疲软。

ASML: EU seeks sanctions relief for critical supplier – Bloomberg

ASML：欧盟寻求放宽对关键供应商的制裁——彭博社

Bloomberg reports the EU is discussing a sanctions swap with China to protect Sindlhauser Materials, a German supplier to ASML. The company depends heavily on Chinese rare earths and critical minerals and could fail within months if restrictions remain. The proposed exchange would lift EU trade restrictions on an unnamed Chinese company.

彭博社报道，欧盟正与中国讨论制裁互换，以保护德国供应商 Sindlhauser Materials。该公司是 ASML 的供应商，严重依赖中国稀土和关键矿产；若限制措施持续，该公司可能在数月内倒闭。拟议中的互换将解除欧盟对一家未具名中国公司的贸易限制。更多一手研报请加微信：FCCNN88

NVDA / LITE / COHR: Demonstrates optical connections on a chip interposer – The Elec

NVDA / LITE / COHR：展示中介层芯片上的光互连——《The Elec》

The Elec reports Nvidia demonstrated a research prototype that places optical
