Fintech shares have broadly underperformed in 3Q, which we believe has been driven in large part by the increase in rates and re-inflation in oil prices, which together serve as both negative indicators for low-end consumer health and more fundamental macro headwinds for fintech lenders where funding costs are facing upward pressure. Consumer spending trends have broadly held in well, despite these concerns, with low-end consumer wage growth continuing to serve as a cushion. So in the near term, we believe the focus will be on whether the shifting backdrop will derail the structural market share gains across the group. Heading into earnings, we are **short-term positive** on the setup into earnings for **CHYM, XYZ, RELY, UPST** and **more cautious on SOFI, KLAR, and WU**. Finally, as in prior quarters, we spotlight **several mini-deep dives across our fintech coverage**, including 1) a bottom up risk loss build for **XYZ**, 2) a sizing of the Apple Upgrade program for **KLAR**, 3) a build out of the high value sender opportunity for **RELY**, and 4) bottom-up build of **UPST** CP margin improvement in the back half of the year.

3Q Fintech Spotlights:

- **XYZ Risk Loss Build:** XYZ risk losses have missed expectations every quarter given the strong growth in lending products, and we expect this quarter to be no exception. Inside we spotlight our bottom-up build for risk losses on a product-by-product basis. We believe continued scaling of Afterpay products within Cash App, and the duration extension of Cash App Borrow put an upward bias on risk losses, and believe the elevated focus on these dynamics recently means this could be a deciding factor of how the stock reacts immediately following earnings. We believe a risk loss miss is expected and believe the interplay of the growth in lending products and the associated risk losses will be the deciding factor in how the market digests this aspect of the quarter.
- **KLAR / Apple Upgrade Program:** We spotlight the potential impact of the AAPL upgrade program on both volumes and transaction margins. Overall, we see a strong upward bias to this program over time, as we believe favorable funding dynamics for Apple devices (higher prices, sunsetting legacy programs, mobile carriers pulling back) will create a growing financing gap for KLAR to fill. However, we are more cautious on the transaction margin for this program in the near term, as we believe KLAR's capital constraints are leading the company to

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. sell the receivables, resulting in third parties capturing the bulk of the program economics. We see this as a major source of long-term earnings power once KLAR's organic capital generation improves and allows them to internalize the funding.

- **RELY High Value Sender:** We spotlight our recent analysis on RELY's high value sender business, which has been growing healthily. While we expect disruptions in the Indian corridor to depress HVS growth in 3Q, company commentary suggests this headwind will be less than expected, although the low take rate nature of the volumes means the impact to the quarter is low. We remain positive on the TAM expansion and growth accelerators at RELY, as well as the increased mgmt focus on driving higher profitability.
- **UPST Contribution Margin Build:** We remain more optimistic on the potential for CP margin expansion at UPST given the scaling of new products and the re-allocation of resources towards the high margin personal loans business. While we remain cautious around the achievability of street volume expectations in future years, we believe near term numbers are likely to be in-line to better.

Single stock highlights:

Where we are more constructive:

- **RELY:** We believe continued progress on growth initiatives and strong margin expansion should make for a solid finish to the year, while lower than expected disruption in the Indian corridor is also a small offset. We believe investor focus is on how the company messages the trajectory of margins into next year and the extent to which it will sustainably outperform its long term margin guidance.
- **UPST:** With volumes coming in in-line, we believe the focus shifts to the CP margins, where we believe continued reacceleration in core personal and the positive trajectory of the new products should help de-risk the remainder of the year.
- **CHYM:** While the company already raised guidance intra-quarter, we look for further signs that the momentum on Chime Prime and the mix shift to credit volumes is sustaining payments revenue growth into next year. For more details, please see our deep dive published alongside this note.
- **XYZ**: We see positioning as more debated, with an inordinate amount of focus on borrow/risk loss dynamics. We are optimistic that the focus can shift from minutiae around the lending products towards the sustained stronger growth in primary banking actives and the growth in the more durable commerce enablement volumes, which have sustained in the high teens. In Square, as with prior quarters, we see accelerating GMV growth as the key to the story.

…and more cautious:

- **SOFI:** We are cautious on the implications of recent rate movements on the incremental fair value marks and gain on sale ratios. Additionally, we remain focused on how loan pricing has evolved, as the higher rate environment has already led to higher deposit costs, which could lead to both NIM headwinds and lower pricing for third-party loan buyers.

知识星球：前沿信息收录
VX:FCCNN88

- **KLAR:** We expect visibility to remain low with the ongoing CFO transition, and see a wide range of outcomes on the stock in the short term (over the longer term (1 yr) we view the stock as very dislocated / undervalued). However, our negative short-term view on the stock into earnings results largely from where street volume expectations sit, which assume a large acceleration in 2027 off of the LDD growth in the back half of the year.
- **WU:** We see further risk to guidance with the continued delay of the IMXI deal (which is included in guidance). We also remain focused on the margin headwinds that resulted from the accelerated mix shift to digital payout to account in recent period, which we view as a structural headwind to the business and a difficult dynamic to offset in the near term.

GS expectations ahead of the quarter

Exhibit 1: Thoughts on consumer fintech into the quarter

GS Color into the Quarter					
Ticker	Bias	GS into the quarter	Ticker	Bias	GS into the quarter
RELY	+	We believe the ongoing TAM expansion initiatives across high value senders, SMB and Remitly Global card will continue to augment the strong growth in the core business. WE believe investors will remain focused on the path of margins into 2027.	AFRM	=	Heading into the quarter, we believe most investors expect a typical 'beat and raise' from the company, although investor conversations recently have been more ambivalent around catalyst path and the broader environment for consumer lenders amid higher rates.
UPST	+	With UPST originations for the quarter coming in relatively in line with the street and better than feared, we believe the focus will be on the trajectory of CP margins, which we believe will continue to improve.	SOFI	-	We see the impact of higher fundiing costs and competitive pricing dynamics in the deposit and loan markets, respectively, to weigh on the outlook for the Company in the near-term.
XYZ	+/=	While investor focus has been on the ongoing normalization of lending activity in Cash App, we expect positive trends in Seller to be the key for the stock to work over time.	WU	-	We believe the key points of focus for investors into the quarter will be updated mgmt. commentary on the timeline regarding the IMXI deal and separatley any sign of further margin degradation across the business from recent mix dynamics in the North American outbound corridor.
CHYM	+/=	We lean positive on the quarter as the continued impacts of Chime Prime should drive further trailwinds to spending, take rate and user acquisition. We believe investors will be focused on additional detail quantifying the financial impacts of the proposed Stride Bank acquisition.	KLAR	-	We believe visibility into the business is likely to remain low, and in the short term, we are more cautious on the set up on 2027 numbers which assume a large acceleration in GMV off of the implied back half ramp. Unless volume guidance comes in better than guidance, we see risk in the near term that 27 expectations drift lower. We continued to view earnings as depressed and view the eventual turnaround in transaction margins as key for the stock

Deconstructing XYZ's Risk Loss Outlook

Risk losses have missed expectations in each of the last four quarters, and we see potential for that trend to continue. Our bottom-up build forecasts total losses of $589mn in 3Q and $602mn in 4Q, driven primarily by the continued scaling of Cash App Borrow and Afterpay post-purchase products. While underlying loss rates appear relatively stable, product mix continues to shift toward higher-loss consumer lending categories, creating an upward bias to reported loss expense.

Given heightened investor focus on credit performance, we believe risk losses remain one of the most important debate points heading into earnings. In particular, we see potential for additional variability from both the growing contribution of Afterpay products within Cash App and the recent duration extension of Cash App Borrow, which could influence incremental credit loss rates and reported loss recognition.

Klarna and the Apple Upgrade Program: Incremental Volume Opportunity, Margin Still the Key Debate

Klarna's recently launched Apple Upgrade Program represents a meaningful incremental growth opportunity (please find our recent note). The program expands beyond Apple's prior Citizens-backed iPhone financing offering to include Apple Watches, iPads, and Macs, while launching at a time when carrier financing programs are seeing less emphasis and device prices continue to increase. We believe these factors could support greater adoption of financing solutions and create a sizable opportunity for Klarna to participate in future Apple upgrade activity. Our analysis suggests the program could contribute roughly 4% of 2027 GMV, with iPhone upgrades representing the primary volume driver and higher-ticket iPads and Macs providing an additional tailwind.

Importantly, the opportunity extends beyond simply replacing Apple's former Citizens-backed financing relationship. We believe the combination of moderating carrier subsidy intensity, expansion into additional Apple product categories, and financing structures that reduce friction relative to traditional lending products broadens the addressable market. While carrier financing is likely to remain the dominant purchase channel, even modest share gains within the Apple ecosystem can support meaningful GMV growth given the size of the underlying market. As a result, we view evidence of accelerating Apple-related originations as a potentially important contributor to GMV growth over the next several quarters.

That said, the primary investor debate remains economics rather than volume. While the program could support attractive transaction margins if receivables were retained on balance sheet, Klarna's strategy of selling loans to funding partners transfers a meaningful portion of the economics to third parties. As shown below, transaction margins under a loan-sale structure could range from roughly 30-130bps depending on merchant pricing, funding costs, and credit performance, versus materially higher economics under a retained-loan scenario. Consequently, we believe investors will be focused not only on evidence that Apple volumes are ramping, but also on whether the program can ultimately support a path toward sustainable transaction margin expansion.

An update to RELY high-value sender analysis

Below we update the high-value sender analysis for RELY, showing the potential impact on revenue growth over time. In Exhibit 4 we provide an illustrative high-value sender model which we still believe will be a major driver of hitting the company's near-term target of new products representing at least 5% of revenue in 2026 and 10% in 2028.

- **Send Volume**: High-value sender adoption continues to increase, with the cohort representing ~10% of send volume in 2Q26 versus ~8% in early 2025. We expect this mix shift to continue as RELY further acquires customers sending funds for larger use cases such as education, real estate, and other major life events. Our updated framework assumes high-value sender volume growth remains well above the core business and drives an increasing share of company-wide volume.
- **Take Rates**: We continue to assume high-value senders monetize at lower rates than the core remittance business, consistent with prior management commentary that larger transactions carry lower effective pricing. We assume a 75bps take-rate which is in line with other digital players operating in this segment (most notably WISE).
- **Revenue**: Our updated framework suggests high-value senders generate approximately $80mn of revenue in 2026, representing ~4.1% of total company revenue, and increase to more than ~5.6% of revenue in 2027. Importantly, this analysis does not assume a meaningful contribution from other growth initiatives, including SMB, receivers, or send-now-pay-later products. As a result, we continue to view high-value senders as one of the most important contributors to RELY's product diversification strategy and believe the segment contributes to de-risking management's target for new products to contribute at least 5% of revenue in 2026.

Exhibit 4: We expect to see continued growth in the HVS vertical as the product matures

UPST: Improvement in new product economics and increased focus on core personal supports CP margin upside

Earlier in the year UPST messaged their enhanced focus on their core personal loan product and expectations to at least achieve break-even CP margin on secured products. We believe UPST's more recently launched Superprime product has been a drag on total unsecured contribution margins, as the company competes for more affluent consumers through more competitive interest rates and higher overall customer acquisitions costs. Given UPST's core personal product carries a materially higher CP margin, we believe this enhanced focus, combined with the secured product's contribution margin headwinds abating, we believe there could be 3-4% upside to 2027 street contribution profit, with nearer term CP margin results potentially increasing visibility into the inflection.

Consumer Credit Snapshot

Below we highlight consumer credit performance across a combination of short and longer duration lenders. Data is organized by originator and highlights delinquency curves and cumulative charge-offs (based on availability). In aggregate, credit trends continue to suggest relatively stable results YTD, with slightly improving results from newer AFRM, SOFI, and UPST securitizations. Importantly, we highlight that each securitization could carry collateral with differing risk characteristics.

App Downloads

We leveraged GS Data Works to highlight trends in app downloads and app MAUs (Monthly Active Users) for key consumer facing apps owned by our coverage companies. App downloads trended negative for the third quarter in a row, as MAUs continue to decelerate on a YoY basis across most names, Despite the overall negative trend to QoQ MAU growth, Remitly, SoFi, and Cash App were positive QoQ.

Exhibit 27: Consumer Finance app downloads and MAUs declined broadly for most companies while SOFI continues to see DD growth in app downloads and MAUs

YoY Change in App Downloads (%)

We, Will Nance, Jack Evans, Chandru Ravikumar and Ryan Wolf, hereby certify that all of the views expressed in this report accurately reflect our personal views about the subject company or companies and its or their securities. We also certify that no part of our compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

I, Dan Duggan, Ph.D., hereby certify that all of the views expressed in this report accurately reflect my personal views, which have not been influenced by considerations of the firm's business or client relationships.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

Contributing Authors: Will Nance Goldman Sachs & Co. LLC, Jack Evans Goldman Sachs & Co. LLC, Chandru Ravikumar Goldman Sachs India SPL, Ryan Wolf Goldman Sachs & Co. LLC, Dan Duggan, Ph.D. Goldman Sachs & Co. LLC.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

GS Data Works Disclosure

GS Data Works leverages alternative data sources and advanced analysis techniques to create unique data-driven insights across equity, credit and macro research. GS Data Works analysis provided by Dan Duggan, Ph.D. and Jaswanthi Masada.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such

advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: https://www.goldmansachs.com/worldwide/india/research-analyst. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.
