China’s wind sector has corrected sharply on weak earnings and slowing onshore demand growth, prompting us to revise our onshore installation outlook and expect a more moderate growth trajectory through FY30. However, we remain positive on offshore wind and export-related opportunities, supported by stronger policy backing, a recovering project pipeline, and rising global competitiveness of Chinese suppliers. We maintain our OW rating for Goldwind-H.

- **Goldwind-H has corrected by roughly 50% since 1Q26-end**, underperforming the HSCEI, which has declined by ~3%. We attribute the weakness primarily to (1) weaker-than-expected 2H26 management guidance, implying a HoH margin decline and (2) a decline in China’s onshore wind turbine tender activity, which has raised concerns over the medium-term installation outlook.

- **Offshore wind and wind exports, however, follow a different cycle and remain on an uptrend.** Policy support continues to strengthen, with the Renewable Energy 15th Five-Year Plan targeting over 100GW of cumulative offshore wind capacity and ~100GW of new projects commencing construction, providing visibility for the next few years. As a result, we expect auction activity and equipment tenders to recover from 2027 onwards. Meanwhile, China’s export opportunity remains strong. Domestic OEMs and suppliers continue to gain global market share, supported by competitive costs, improving execution capabilities, and an expanding overseas service footprint. Goldwind continues to guide for solid overseas turbine orders, primarily from emerging markets.

- **Action and recommendation.** We are lowering our FY26-28E forecasts by 13-20%, incorporating 2Q26 operating trends and management’s 2H26 guidance, including a relatively weaker margin outlook in 2H26 and softer-than-expected China onshore wind demand. We are rolling forward our valuation horizon from Dec-26 to Dec-27 and reducing our PT by 38% to HK$12.0. The PT cut is primarily driven by our shift from a P/E-based approach to a P/B-based methodology for the wind turbine business, reflecting a more capital-intensive and lower-return industry backdrop. We maintain our OW rating on Goldwind-H, as we believe its current valuation more than softer-than-expected China onshore wind demand, while offering attractive exposure to a continued overseas expansion.

Summary Investment Thesis and Valuation

Goldwind is China's largest wind turbine generator (WTG) manufacturer, which maintained a domestic market share of ~20% over 2020-25. The company also owns a sizable wind farm portfolio, with attributable installed capacity approaching 8GW by end-2025, providing recurring earnings alongside its turbine manufacturing business. We maintain our OW rating on Goldwind-H, as we believe its current valuation more than reflects softer-than-expected China onshore wind demand, while offering attractive exposure to a continued overseas expansion.

We value Goldwind-H on a SOTP basis, applying a P/B framework across its key business segments. We assign a target P/B of 1.2x to the wind turbine manufacturing and 0.6x to the wind farm operations businesses, broadly in line with the average trading multiples of H-share-listed wind power operators based on Bloomberg consensus estimates. This yields our Dec-2027 price target of HK$12.0.

China's wind export opportunity remains strong

China's wind export opportunities continue to expand as global demand for affordable renewable energy accelerates, particularly across emerging markets in Asia, the Middle East, Latin America, and Central Asia. Chinese turbine manufacturers have leveraged their scale, vertically integrated supply chains, and cost competitiveness to gain market share internationally.

Looking ahead, the strongest growth opportunities are likely to come from markets with ambitious decarbonization targets but limited domestic manufacturing capacity, including Saudi Arabia, Uzbekistan, Brazil, Vietnam, and several African countries. In addition to turbine exports, Chinese companies are increasingly moving up the value chain through localized manufacturing, EPC contracting, project development, and long-term service agreements, which should help strengthen their competitive position despite rising trade barriers in Europe and North America.

We believe overseas expansion represents one of the most attractive structural growth drivers for China's wind sector, potentially supporting volume growth, improving utilization rates, and providing a growing mix of higher-margin international revenue over the medium term. Goldwind should be one of the key beneficiaries within our coverage.

Goldwind-H: Maintain OW with a revised PT of HK$12.0

Earnings changes: We lower our FY26-28 earnings forecasts by 13-20%, incorporating 2Q26 operating trends and management's 2H26 guidance, including a relatively weaker margin outlook and softer-than-expected China onshore wind demand.

PT and rating: We roll-forward our valuation horizon from Dec-26 to Dec-27 and reduce our price target by 38% to HK$12.0. The PT cut is primarily driven by our shift from a P/E-based approach to a P/B-based methodology for the wind turbine business, reflecting a more capital-intensive and lower-return industry backdrop. We maintain our OW rating, as we believe its current valuation more than reflects softer-than-expected China onshore wind demand, while offering attractive exposure to a continued overseas expansion.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.
