New themes: Air Defense and Agricultural Production

This month, we provide a quantitative view of two new global themes which may provide opportunity for investors to diversify away from AI-related themes. Air Defense is supported by the growing complexity of aerial threats and the need for scalable, multi-layered protection. Our News Pulse is stronger for Air Defense than the broader Defense theme. The second new theme is Agricultural Production, driven by food security and the need to raise agricultural output despite constraints on land, water, and labour. Long-only funds have shifted increasingly overweight this theme in recent years.

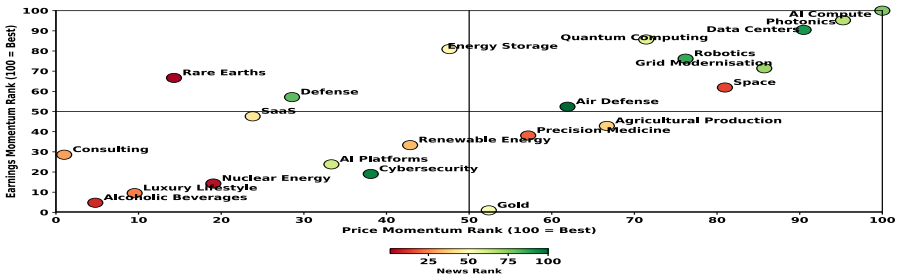

Cyber and SaaS rebound, AI leadership persists

Among 22 global themes, Cybersecurity (+17%), SaaS (+10%) and AI Compute (+5%) performed best over the last month, while Nuclear Energy (-14%), Rare Earths (-12%), and Gold (-11%) fell the most. AI-related global themes still rank highly on Triple Momentum, with AI Compute, Photonics, and Data Centers ranking highest. In contrast, Nuclear Energy, Alcoholic Beverages, and Consulting are the lowest ranked themes.

Top-ranked stocks globally within each theme

Among the Most Important Stocks within each theme, the top-ranked stocks by Triple Momentum in AI Compute is TSMC, Photonics is Fujikura, Data Centers is Kioxia, Grid Modernisation is Siemens Energy, Air Defense in Hanwha Aerospace, and in Agricultural Production is Archer Daniels Midland. In contrast, the lowest themes by Triple Momentum include Nuclear Energy, where Southern Co is the lowest-ranked Most Important Stock, Alcoholic Beverages (Constellation Brands), Consulting (Infosys), Rare Earths (MP Materials), and Luxury Lifestyle (Hermès).

Chart 1: Triple Momentum for Global Themes (earnings, price, news)
Strongest for AI Compute and Photonics, weakest for Nuclear Energy and Alcoholic Beverages

Identifying stocks associated with each theme

To identify stocks which potentially relate to each investment theme, we use data from various sources including reported revenue, news sentiment, inclusion in relevant ETFs, inclusion in relevant indices, stock-to-stock correlation with industry leaders, competitors and suppliers of industry leaders, and company descriptions. For each stock identified by this process, we ensure they are relevant to the theme and that the exposure to a theme is not inconsequential. We found this combination of multiple sources of information was more useful than any one source alone in identifying stocks associated with each theme.

Chart 34: Inputs to identify stocks associated with each investment theme
Data from various sources are used to identify stock associated with each investment theme

Source : BofA Global Quantitative Strategy

BofA GLOBAL RESEARCH

News

For each theme, we create a taxonomy of relevant words and products and search billions of news articles for stocks mentioned in relevant news. Highlighted stocks are considered candidates for inclusion. Source = RavenPack.

Stock-to-stock correlation

We identify the most obvious representative stocks and industry leaders within each theme (e.g. AI = NVIDIA, TSMC, etc.) and calculate the correlation of relative weekly returns over the last three years of these representative stocks to every stock globally. Stocks which perform in tandem with the representative stocks within each theme are considered candidates for inclusion. Source = FactSet

知识星球：前沿信息收录
更多一手投研资料扫码加微信
知识星球：前沿信息收录
VX:FCCNN88

Revenue
Companies which provide information on revenue exposure to products which relate to each theme are considered candidates for inclusion. Source = Bloomberg

ETFs
We search a database of theme-specific ETFs to identify those related to each theme (e.g. AI = Global X Artificial Intelligence and Technology ETF). The constituents of each ETF are considered candidates for inclusion. Source = Bloomberg

Index
We search a database of theme-specific Indices to identify those related to each theme (e.g. AI = MSCI ACWI IMI Robotics & AI Index). The constituents of each Index are considered candidates for inclusion. Source = Bloomberg

Competitors & Suppliers
We identify the most obvious representative stocks within each theme (e.g. AI = NVIDIA, TSMC, etc.) and then identify the competitors and suppliers to these representative stocks. These stocks are considered candidates for inclusion. Source = Bloomberg, RavenPack

Company Description
We search the Company Description of each stock using a taxonomy of words and products relating to each theme. Highlighted stocks are considered candidates for inclusion. Sources = Bloomberg, FactSet

Caveats
It is not a straightforward exercise determining the exposure of each company to a particular investment theme. It is not an exact science, so there are some limitations, including:

- The lists of stocks may not be exhaustive because some companies may have exposure to an investment theme but are not identified by the above data sources and process
- Some included stocks may have limited exposure (e.g. they may only be using AI for Chatbots)
- Company exposure may change through time so stocks which are not currently relevant to a theme may be relevant in future, and stocks which are currently relevant to a theme may not have been relevant in the past
- While a company may have exposure to a theme, it may not currently be deriving any revenue or explicitly declaring revenue associated with a theme and, therefore, not be identified by this data and process
- For the analysis of News and Company Descriptions, the inclusion of companies in these themes may be determined by the words and products included in the theme-specific Taxonomies which have been created based on experience and judgement and may not be all inclusive.

Description of Triple Momentum and Positioning analysis

Triple Momentum analysis

Triple Momentum refers to our analysis which combines signals from earnings momentum, price momentum, and new momentum. For each stock, earnings momentum is based on changing consensus earnings estimates. Price momentum is calculated as the slope of daily prices over the preceding 12 months. For news momentum, Natural Language Processing quantifies trends in sentiment for stock-specific news. Each month, we rank all stocks from 1 to 100, where 100 represents the strongest Triple Momentum.

In this Quant View of Global Themes report, we calculate a simple average of the Triple Momentum ranks for each theme to determine ranking of each theme relative to other themes and sectors, and also identify the highest ranked stocks within each theme, and illustrate how Triple Momentum is trending through time.

For a detailed description of our Triple Momentum analysis, refer to Triple Momentum Allocator report (Triple Momentum Allocator: Broad Momentum outperformance 09 October 2026).

Positioning analysis

Our Positioning analysis monitors the aggregate positioning of thousands of long-only Active funds globally versus benchmark by stock, sector, country, and region. Additionally, for a combination of Active and Passive funds we calculate Equity Flow (dollar value of stocks bought and sold each month) by stock, sector, country, and region. We also combine the Positioning analysis with Triple Momentum to distinguish between Crowded stocks with positive and negative Triple Momentum, and between Under-owned stocks with positive and negative Triple Momentum.

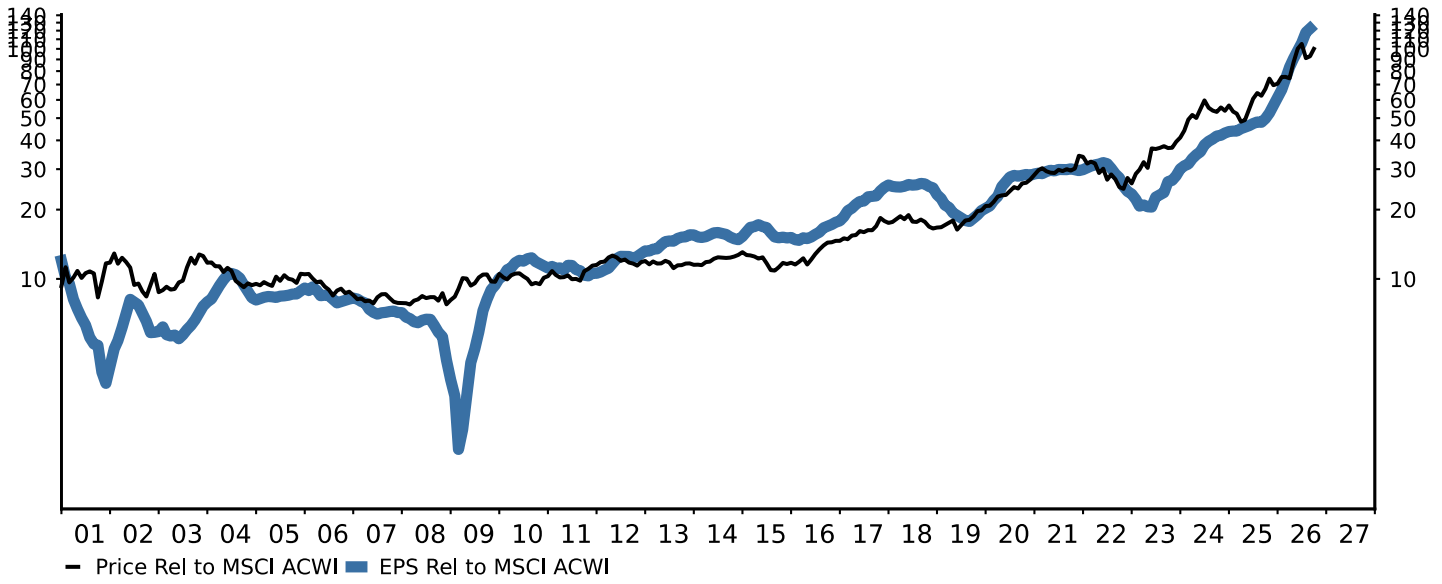

In this Quant View of Global Themes report, we calculate aggregate Positioning for each theme to determine how long-only investors are positioned, identify the most Crowded and Under-owned stocks within each theme, and illustrate how investor positioning is changing through time.

For a detailed description of our Positioning analysis, refer to Global Positioning in Stocks report (Global Positioning in Stocks: Positioning isn't always contrarian 24 September 2026).

Appendix

Table 42: Themes - Short Description
The below table lists short description on the current themes

Theme	Short Description
AI Compute	The processing backbone of AI - supplying the chips, accelerators, GPUs, and high-bandwidth memory that power AI training and inference.
AI Platforms	The cloud, data, and software platforms that make AI usable. It includes hyperscale AI platforms, foundation models, and tools used by developers to create AI solutions.
Data Centres	The physical backbone that supports AI - including data centres, power, servers, cooling, networking, and electrical infrastructure needed to run large-scale AI workloads.
Photonics	Companies involved in generating, controlling, and detecting light (photons) and turning it into practical components and systems for fibre-optic networks, computation/interconnect, sensing, and precision manufacturing/medicine.
Grid Modernisation	Companies enabling the expansion, digitalisation, and resilience of electricity networks through transmission infrastructure, transformers, distribution equipment, grid automation, smart metering, and power management technologies.
Robotics	Companies building or enabling programmable machines that sense, manipulate, move, or automate physical tasks, including humanoids, industrial robots, service robots, and robot-enabling automation components.
Cybersecurity	Companies enabling secure digital operations through network security, endpoint protection, identity management, cloud and data security, and cyber resilience solutions.
Quantum Computing	Companies building or enabling computing systems that use quantum-mechanical phenomena such as superposition and entanglement to solve problems beyond classical methods.
Defense	Companies generating revenue by selling military goods and services to defence customers, including weapons systems, vehicles, munitions, sensors, military electronics, and defence-related services.
Air Defense	Companies enabling the detection, tracking and interception of modern aerial threats, including drones, cruise and ballistic missiles, and hypersonic weapons. The spans layered air-defense systems, interceptors, counter-drone technologies, radars and sensors, command-and-control networks, electronic warfare and directed-energy weapons.
Space	Companies exposed to the space value chain, including launch services, satellite manufacturing, satellite communications, Earth observation / geo-intelligence, and the ground systems and infrastructure that enable space-based services.

Table 43: Themes - Short Description (continued)
The below table lists short description on the current themes

Theme	Short Description
Precision Medicine	Treatment and prevention strategy that accounts for individual differences in genetics, environment, and lifestyle – delivering the right treatment to the right people at the right time. Its medical field moving away from one-size-fits-all to molecular-level targeting.
Energy Storage	Companies with exposure to the energy storage value chain, including battery raw materials, materials processing, cell manufacturing, BESS integration, and ownership or operation of assets that store electricity for later use.
Nuclear Energy	Companies exposed to the nuclear power value chain, including uranium mining, reactor technology, fuel-cycle services, key components, enabling infrastructure, and nuclear plant operations used to generate electricity from nuclear fission.
Renewable Energy	Companies generating or enabling energy from naturally replenished sources such as solar, wind, hydro, geothermal, bioenergy, and related equipment and project value chains.
Agricultural Production	Companies that enable or participate in agricultural production, including seeds and crop protection, fertilizers and crop nutrition, farm machinery and precision technologies, irrigation and agricultural infrastructure, crop cultivation, and the storage, and trading. Inlcudes both direct crop producers and the companies supplying the inputs, equipment and infrastructure required to increase agricultural output.
Gold	Companies whose economics are directly linked to gold - typically mining, refining, royalty/streaming, or products where demand is tied to gold as an investment or store of value.
Rare Earths	Companies exposed to the mining, separation, refining, magnet materials, or downstream use of rare-earth elements (REEs) that are critical for high-tech, energy, and defence applications.
Alcoholic Beverages	Brewers, distillers, and vintners with leading brands that generate recurring consumer demand through alcoholic beverage production, premiumisation and global distribution.
Luxury Lifestyle	Companies monetising high-end branded goods and experiences where demand is driven by exclusivity, craftsmanship, heritage, status, and pricing power rather than functional necessity.
SaaS	Companies that provide software over the internet, typically generating recurring revenue through subscriptions or usage-based pricing.
Consulting	Companies that generate revenue mainly from expert advice and implementation services, driven by specialised human capital rather than software, products, or physical assets.

Disclosures

Important Disclosures

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster[R1]
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

[R1]Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Due to the nature of quantitative analysis, the issuers or securities recommended or discussed in this report are not continuously followed. Accordingly, investors must regard this report as providing stand-alone analysis and should not expect continuing analysis or additional reports relating to such issuers and/or securities.
BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.
The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Recipients who are not institutional investors or market professionals should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.
Officers of BofAS or one or more of its affiliates (other than research analysts) may have a financial interest in securities of the issuer(s) or in related investments.
Refer to BofA Global Research policies relating to conflicts of interest.
"BofA Securities" includes BofA Securities, Inc. ("BofAS") and its affiliates. Investors should contact their BofA Securities representative or Merrill Global Wealth Management financial advisor if they have questions concerning this report or concerning the appropriateness of any investment idea described herein for such investor. "BofA Securities" is a global brand for BofA Global Research.

General Investment Related Disclosures:

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are not regulated in a manner similar to U.S. securities markets. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities or digital assets that may have been recommended or discussed in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments recommended or discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.
