Strong 3Q results directly challenge concerns that APP is decelerating due to lack of innovation and competitive headwinds. A major model breakthrough in the core gaming business shows innovation/execution are strong, with ecommerce still an unpriced call option. Remain OW, PT to $450.

A Strong 3Q Beat as Gaming Innovation Drives Reacceleration: APP's strong 3Q results directly challenge concerns that the business is rapidly decelerating due to lack of innovation and competitive headwinds. 3Q revenue/EBITDA 5%/6% above us and well ahead of management's 7-8% q/q guide, which the market feared APP would only just reach (or even miss). Importantly, the upside was driven predominantly by gaming, where a **recent major model improvements drove gaming ad revenue growth of ~50% y/y, while ecommerce ad revenue grew over 100% y/y**. Management compared the new model architecture to AXON 2.0 in technical significance and noted that its rollout remains partial, with particularly meaningful benefits for newer advertisers and categories where data is more limited. **In our view, this shows APP's ability to continue innovating and gaining share, even at significant scale**. Management guided to ~8% q/q revenue growth in 4Q and reiterated its confidence in a long-term growth opportunity of ~30%. The company also noted a focus on M&A opportunities that add data and advertiser relationships. We believe APP is less focused on consumer facing (e.g. social) assets.

We Continue to See Significant Room for Conversion Rate Improvements, With 3Q Reinforcing Our Bull Case: We came away from 3Q incrementally confident in APP's ability to drive sustained above-market growth. As we detailed in APP vs. U: This Game Isn't Zero-Sum, **APP's conversion rates remain low (~1.3% today), leaving significant headroom for continued improvements** in targeting efficiency and effective take rate. Our recent analysis suggests that sustaining ~20bp of annual conversion-rate improvement could drive net revenue ~15% above consensus by 2030. Importantly, **we continue to believe that APP and U's success is not mutually exclusive**, as both networks can improve advertiser returns and gain share in a fragmented market. **We also view ecommerce as a TAM expander rather than**

a headwind to gaming, with new advertisers improving monetization of lower-value impressions. **3Q also highlighted the limitations of third-party channel checks**, which suggested APP might barely meet or even miss guidance despite the company ultimately delivering 14% q/q growth. In our experience, small samples in this highly fragmented market can produce misleading signals, a point management also reinforced on the call. Taken together, **continued gaming innovation, ecommerce expansion, and improving conversion efficiency leave us constructive on APP's ability to drive further positive revisions.**

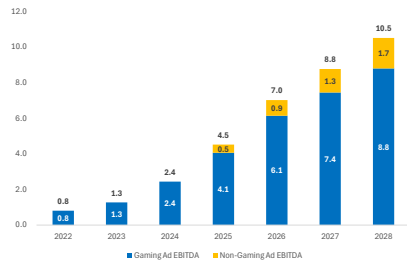

Remain OW, PT to $450: We raise our '26/'27 EBITDA by 3%/4% to reflect APP's strong 3Q results, 4Q guidance, and our expectations for continued model improvements across gaming and ecommerce. We maintain our OW rating and raise our PT to $450 (from $400), based on a target 14x EV/EBITDA multiple. We continue to view APP as the best executor in mobile ad tech, with significant room for continued conversion-rate improvements, share gains, and expansion into new advertising verticals. With that context, we view APP's current (after-market) multiple of 14x our '28e GAAP EPS as highly attractive, with continued earnings revisions and evidence of sustained above-market growth providing potential catalysts for multiple recovery.

OVERWEIGHT THESIS

APP remains the strongest executor in the mobile app advertising market and we expect them to continue gaining share even in a weaker macro environment. We also expect non-gaming to drive the majority of APP's dollar ad revenue growth going forward as the company pushes into new ad verticals.

BULL CASE $650.00

15x Bull Case 2028E EBITDA

AppLovin accelerates share gains in the ad network and sees limited impact from macro headwinds. New pools of ad spend outside gaming begin to leverage APP more aggressively. Total revenue grows at a >33% CAGR through 2028. Scale drives more significant leverage across the cost structure, leading EBITDA margins to reach ~91% in 2028.

BASE CASE $450.00

14x Base Case 2028E EBITDA

AppLovin drives continued share gains in the ad network business despite macro uncertainty. Non-gaming ad verticals scale at a steady pace. Total revenue grows at a ~29% CAGR through 2028. Scale drives leverage across the cost structure, leading EBITDA margins to exceed 80% in 2028.

BEAR CASE $175.00

8x Bear Case 2028E EBITDA

Ad network growth slows more than expected as APP's competitive edge wanes and macro weighs heavily on the business. Non-gaming verticals fail to achieve significant scale. Total revenue grows at a ~15% CAGR through 2028. Limited growth drives more modest operating leverage, leading EBITDA margins to dip below 77% by 2028.
