KOSPI PREVIEW

KOSPI futures -2.9% amid continued weakness in Tech on the back of disappointing earnings while SOX -7.2% indicate very little defense on the way down. Our US desk noted that asset managers finished net sellers, reversing early week tech demand while velocity was orderly.

KOSPI 期货下跌 2.9%，原因是科技板块的业绩表现不佳，导致该板块持续疲软；SOX 指数则下跌 7.2%，表明该板块在下跌过程中几乎没有任何支撑力量。我们的美国市场团队指出，资产管理者在当周末选择了净卖出操作，从而扭转了此前科技板块的买盘势头，而交易节奏则保持平稳。

MAIN HEADLINES

- **MEMORY:** OpenAI's Sam Altman met with executives of Samsung and SK Group in back to back sessions during his visit to Korea, and is expected to have discussed cooperation in expanding the supply of HBM memory chips and AI datacenter businesses. https://tinyurl.com/ymvpz8eu

  内存方面：在访问韩国期间，OpenAI 的萨姆·阿尔特曼分别与三星和 SK 集团的高管会面，预计双方探讨了在扩大 HBM 内存芯片供应以及发展人工智能数据中心业务方面的合作可能。https://tinyurl.com/ymvpz8eu

- **SEC(005930):** 1) Samsung's foundry business is showing signs of a turnaround, with 8nm-and-below utilization expected to exceed 100% in 2027 and the number of 2nm projects secured in 2026 projected to more than double YoY https://tinyurl.com/2acrb975. 2) Co will acquire Samsung Display's entire 10.16% stake in TCL CSOT for W1.3tn, aiming to strengthen its strategic partnership with the Chinese display maker. https://tinyurl.com/yvzpk34t

  SEC(005930)：1) 三星的代工业务出现好转迹象，2027 年 8 纳米及更先进制程的产能利用率预计将超过 100%；而 2026 年三星获得的 2 纳米制程项目数量预计将比去年翻一番以上。详情请见：https://tinyurl.com/2acrb975。2) 该公司打算以 1.3 万亿韩元的价格收购三星显示在 TCL CSOT 中所持有的 10.16%股份，以此加强与这家中国显示制造商之间的战略合作关系。详情请见：https://tinyurl.com/yvzpk34t。

- **MEMORY | KIOXIA CY3Q26 READ-ACROSS:** Key takeaways include: 1) Solid CY3Q26 results; divergence in CY4Q26 expectations vs. SEC/Hynix due to shipment timing shift and different base effect, 2) Expect NAND S/D to remain tight through CY27, providing further upside to pricing, and 3) Multi-year LTAs providing strong visibility into demand beyond CY27-28. https://tinyurl.com/3et7n3ua

  内存领域 | KIOXIA CY3Q26 产品的表现：关键要点如下：1) CY3Q26 产品的表现良好；由于产品交付时间的变动以及不同的基数效应，CY4Q26 产品的预期与 SEC 和 Hynix 的预测存在差异；2) 预计直到 2027 年，NAND 闪存的市场供应仍将保持紧张状态，这有助于进一步提升产品价格；3) 长期合同能够帮助我们更清晰地了解 2027 年至 2028 年之后的需求情况。https://tinyurl.com/3et7n3ua

- **TECH | 4Q MEMORY PRICING:** TrendForce expects 4Q26 DRAM ASP for PC/server/mobile to increase by +13-18%/+10-15%/+0-5% qoq, while forecasting eMMC/UFS ASP to grow +4-9% qoq during the same period. TrendForce estimates are higher than GSe for PC DRAM, broadly in-line for server DRAM and mobile DRAM, while lower than GSe for eMMC/UFS NAND.

  科技 | 第 4 季度内存价格走势：TrendForce 预计，2026 年第四季度，用于 PC、服务器和移动设备的 DRAM 平均价格将分别环比上涨 13-18%、10-15%和 0-5%；而 eMMC/UFS 的平均价格则有望环比上涨 4-9%。TrendForce 的预测数值高于 GSe 对 PC 用 DRAM 的预估，与 GSe 对服务器用 DRAM 及移动设备用 DRAM 的预测大致相当，但低于 GSe 对 eMMC/UFS NAND 的预估。

- **KRX UNVEILS LOW-PBR LIST:** The Korea Exchange has designated and disclosed 151 low-PBR listed companies - 96 on KOSPI and 55 on KOSDAQ - as part of follow-up measure to improve Korea's capital markets and encourage persistently undervalued firms to voluntarily enhance corporate value. https://tinyurl.com/4a7ckrpz

  韩国交易所公布低市净率上市公司名单：作为改善韩国资本市场状况、鼓励那些长期被低估的上市公司主动提升自身价值的举措，韩国交易所已确定了 151 家低市净率上市公司——其中 96 家在 KOSPI 指数中，55 家在 KOSDAQ 指数中。https://tinyurl.com/4a7ckrpz

- **KIA(000270) | D/G TO NEUTRAL FROM BUY:** 3Q OP @ W1.82tn (miss BBGe/GSe). We lower our target multiple to 6.1x as although profitability is still higher than its peers, there is now more uncertainty on the margin profile given the recent miss, hence we think fair multiple will likely be capped at historical levels as opposed to peers' levels. This leads our TP to be cut to W120k from W210k, and we downgrade our rating to Neutral from Buy. https://tinyurl.com/326wd2yb

  KIA(000270)：建议将持仓从“买入”调整为“中性”。预计第三季度的营业利润为 1.82 万亿韩元，这一数值低于市场预期。由于该公司的盈利能力虽然仍高于同行，但最近的业绩表现不佳使得其利润率的不确定性增加，因此我们认为其合适的估值倍数应与历史水平相当，而非与同行水平相同。据此，我们将目标价从 21 万韩元下调至 12 万韩元，并将评级从“买入”下调为“中性”。https://tinyurl.com/326wd2yb

- **KEPCO(015760):** Following the South Korean government's decision to lift the mandatory Prime Minister prior-approval requirement for public asset sales, KEPCO is reviewing the sale of its non-core assets including the gas terminal in Jordan and the coal-fired power plant in the Philippines amid financial difficulties. https://tinyurl.com/yb7e322u

  KEPCO(015760)：由于韩国政府决定取消公共资产出售时必须获得总理事先批准的强制要求，KEPCO 在面临财务困境的情况下，正在考虑出售其非核心资产，其中包括位于约旦的天然气终端以及位于菲律宾的燃煤发电厂。https://tinyurl.com/yb7e322u

- **OCTOBER EXPORTS:** Korea's headline exports fell 4.1% mom sa, normalizing from an extraordinary 18.1% gain in the prior month (beat GSe/BBGe). The exports accelerated to 93.7% yoy, the most since January 1974. Semiconductor exports gained further by 6.9% mom, posting gains over the last 13 months and offsetting sharp drops of 9.6% across all other exports. https://tinyurl.com/59ds9mxn (GIR)

  10 月出口情况：韩国的总体出口额环比下降 4.1%，而上月的增幅则高达 18.1%，这一异常高的增幅已有所回落。不过，与去年同期相比，出口额仍增长了 93.7%，为 1974 年 1 月以来的最高水平。半导体产品的出口额环比上升了 6.9%，在过去的 13 个月里一直保持增长势头，从而抵消了其他各类产品出口额 9.6% 的大幅下跌。https://tinyurl.com/59ds9mxn (GIR)

- **COSMETICS:** Korea's October cosmetics exports rose 57.5% YoY to US$1.4bn, a record for October, according to trade data released November 1. January–October exports reached US$12.57bn, already above the full-year 2025 total of US$11.42bn. In October 1–25 data, exports rose 62.7% to the US and 106.1% to the EU. Strong US and European demand supports Q4 overseas sales momentum for brands and ODM utilization. https://tinyurl.com/e9bparrh

  化妆品行业：根据 11 月 1 日公布的贸易数据，韩国 10 月的化妆品出口额同比增长 57.5%，达到 14 亿美元，创下了该月的最高纪录。1 月至 10 月的累计出口额则为 125.7 亿美元，已经超过了 2025 全年的 114.2 亿美元。在 10 月 1 日至 25 日期间，对美国的出口额增长了 62.7%，而对欧盟的出口额则增长了 106.1%。美国和欧洲市场的强劲需求为各品牌及 ODM 厂商的第四季度海外销售带来了良好机遇。https://tinyurl.com/e9bparrh

- **SEPTEMBER IP:** Headline IP rose 9.0% mom sa in September, rebounding from a 4.6% contraction in the prior month (much stronger than our above-consensus forecast). The sequential increase was driven entirely by strong end-quarter rebounds in the production of semiconductors (+19.2%) and autos (+39.9%). https://tinyurl.com/yvtum776 (GIR)

  9 月工业生产指数：9 月的工业生产指数环比上升了 9.0%，此前一个月该指数还出现了 4.6% 的下降幅度，因此此次反弹相当显著，远超我们的预期。这一上升势头主要得益于季度末半导体产业（上升 19.2%）和汽车产业（上升 39.9%）的强劲表现。https://tinyurl.com/yvtum776 （GIR）

- **TECH | OCT 2026 EXPORT TRACKER:** According to the MOTIE, exports for the major tech products we track (memory, OLED, Li-ion batteries, and MLCC) showed an overall positive trend. Key points are: 1) DRAM export value growth reached +595% in October, 2) MLCC exports increased +37% yoy, and 3) YTD SEC plastic film imports +53% yoy, while Hynix epoxide imports +8% yoy. https://tinyurl.com/3hvcvpxm

  科技领域 | 2026 年 10 月出口情况追踪：根据韩国产业通商资源部的数据，我们所关注的那些关键科技产品（内存、OLED、锂离子电池以及 MLCC）的出口状况整体呈上升趋势。具体数据如下：1) 10 月时，DRAM 的出口额增长了 595%；2) MLCC 的出口额同比增长了 37%；3) 到目前为止，SEC 塑料膜的进口额同比增长了 53%，而 Hynix 的环氧树脂进口额则同比增长了 8%。https://tinyurl.com/3hvcvpxm

GIR ON 3Q EARNINGS GIR 公布第三季度财报

- **APR(278470):** 3Q OP @ W161bn broadly inline with GSe. OPM came in softer primarily reflecting unfavorable FX. Despite the margin pressure, cosmetics revenue grew 151% YoY, supported by continued momentum in Europe and US offline channel. We view the results as mixed, but remain constructive on APR's medium-term growth outlook. Maintain Buy, TP -8% @ W480k. https://tinyurl.com/ybj9uw75

  APR(278470)：第三季度的营业利润为 1610 亿瓦特，这一数值与市场预期基本一致。由于汇率不利的影响，运营利润率有所下降。尽管面临盈利压力，但得益于欧洲和美国线下渠道的持续强劲表现，化妆品业务仍实现了 151% 的同比增长。我们认为该公司的业绩表现参差不齐，不过对其中期增长前景依然持乐观态度。建议继续持有该股票，目标价为 48 万瓦特，对应跌幅为 8%。更多信息请访问：https://tinyurl.com/ybj9uw75

- **SKC(011790):** 3Q OP loss of -W50bn below GSe of -W16bn and BBG cons. All major businesses' results were below our expectations, but the company was able to continue its positive EBITDA at W19.2bn. Maintain Sell, TP -10% @ W64k. https://tinyurl.com/589fyukv

  SKC(011790)：第三季度的营业亏损为 500 亿韩元，这一数值高于市场预期的 160 亿韩元，也高于 BBG 的预测值。所有业务板块的业绩均低于我们的预期，不过该公司的 EBITDA 仍为 192 亿韩元，保持正值。建议继续持有“卖出”立场，目标价为 64,000 韩元，跌幅为 10%。https://tinyurl.com/589fyukv

- **HD MOBIS(012330):** HD Mobis 3Q26 results were in-line, with revenue delivering 4.6% YoY growth to W15,723bn on strong mix impact from the core-parts/module business along with steady performance in the after-service business. Maintain Buy, TP -6% @ W670K. https://tinyurl.com/59x8bj7e

  HD MOBIS(012330)：HD Mobis 在 2026 年第三季度的业绩表现符合预期，得益于核心零部件及模块业务带来的强劲收益，以及售后服务业务的稳定表现，其营收同比增长 4.6%，达到 15,7230 亿韩元。维持“买入”评级，目标价为 670,000 韩元，对应跌幅为 6%。https://tinyurl.com/59x8bj7e

- **HHI(298040):** 3Q OP @ W243bn (miss BBGe/GSe). Earnings were weighed down by a well-flagged ~W40bn construction cost overrun and deferred shipments to 4Q, positioning the business for an anticipated ~50% QoQ revenue rebound alongside robust order momentum. Maintain Buy, TP -4% @ W3,990K. https://tinyurl.com/yyfp3n57

  HHI(298040)：第三季度营业利润为 2430 亿瓦特，未达到预期目标。由于建筑成本高出 1001 亿瓦特，加之货物被推迟到第四季度交付，这些因素都影响了公司的盈利状况。不过，随着订单量的持续增长，预计公司季度营收将实现 50%的回升。维持“买入”评级，目标价为 3,990 万瓦特。https://tinyurl.com/yyfp3n57

- **HL MANDO(204320):** OP missed at W52bn (-45% YoY; 2.2% OPM) due to Middle East commodity inflation (W26bn), semiconductor price hikes (W16bn), and elevated R&D (+W23.5bn YoY) for humanoid actuators and EMB. Maintain Buy, TP -14% @ W94K. https://tinyurl.com/23rrkmc6

  HL MANDO(204320)：由于中东地区的商品价格上涨（影响额为 260 亿），半导体价格上升（影响额为 160 亿），再加上用于开发人形机器人及相关技术所需的研发支出增加（同比增加 235 亿），该公司的营业利润为 520 亿，同比下降 45%，营业利润率仅为 2.2%。仍建议买入，目标价为 94,000，对应跌幅为 14%。https://tinyurl.com/23rrkmc6
