TMTB EOD Wrap; Anthropic ARR feedback

TMTB 今日收盘总结；Anthropic 的营收情况反馈

TMT BREAKOUT
2 HOURS AGO • PAID

Listen

Good afternoon. **QQQs -2.9%** opened -1.6% and leaked lower all day, closing just off the lows, as the AI infra complex got liquidated across the board with more of the same buyer's strike we've seen over the last couple of weeks.

下午好。QQQ 指数开盘时下跌 2.9%，随后跌幅扩大至 1.6%，并一整日处于下跌态势，最终在接近最低点时收盘。由于人工智能相关板块的资产被大量抛售，且出现了与过去几周类似的买盘压力，导致该指数持续下跌。

What caused the sell off today?

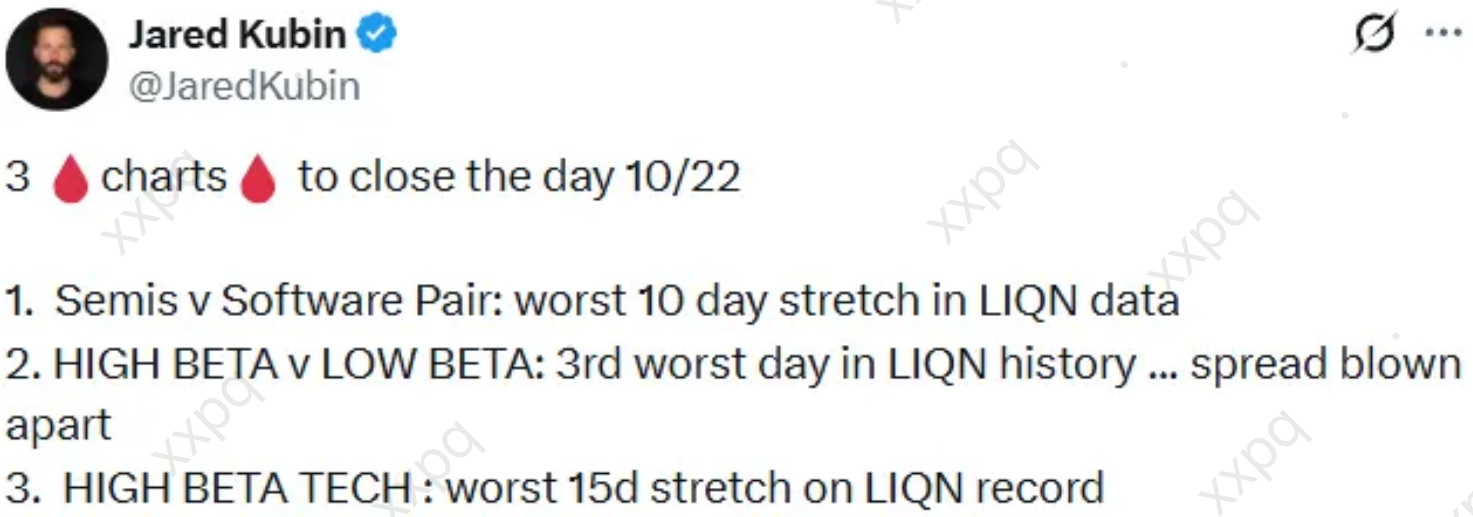

今天为何会出现抛售现象?

Some of it due to **META's -7%** equity raise fears putting financing the infra trade back in focus and causing the stock to round trip its 6% pop; semicap moved lower on **LRCX's -12%** guide; **NOK -15%** closed at lows after its mixed print despite a sizeable EBIT beat; and a slew of what seems like new hacking news every hour didn't help sentiment across the space. Nothing was spared in semi land with most stocks down 5%+.

部分原因在于市场对 META 股价可能下跌 7%的担忧，这使得人们再次关注基础设施领域的融资问题，从而导致相关股票股价在上涨 6%后又出现下跌；由于 LRCX 的业绩预期下调了 12%，半导体板块的股价也有所下跌；NOK 的股价则因业绩表现不佳而下跌 15%，尽管其息税前利润仍高于预期；此外，几乎每小时都有新的黑客攻击新闻传出，这些负面消息进一步影响了整个行业的市场情绪。半导体板块几乎所有股票的股价都下跌了 5%以上。

Sentiment continues be as low I've seen it all year although positioning still somewhat elevated: GS prime has total semi & semi equip US net exposure at 10%, down from highs of 14%, but still well above last 5 year average. Some more detail from GS Prime here on X. Hearing chatter MS has average TMT fund ~-5%+ MTD and GS -7-8% MTD. Lots of pain out there.

整体市场情绪仍处于今年以来的最低水平，不过投资仓位依然偏高：GS Prime 在半导体相关领域的净持仓比例为 10%，虽已从之前的 14%有所下降，但仍远高于过去 5 年的平均水平。GS Prime 在 X 平台上分享了更多详细数据。据传闻，MS 旗下相关基金的月度亏损率在 1001#-5%之间，而 GS 旗下的同类基金则面临 7-8%的月度亏损率。目前市场上普遍存在较大的亏损压力。

Some great discussion in TMTB Slack here on the state of the AI trade. Nobody's really doubting token demand and adoption curve but debate continues to be around timing and whether it monetizes fast enough to pay for the buildout.

在 TMTB 的 Slack 频道里，关于人工智能行业的现状有很多精彩的讨论。虽然没人怀疑代币的需求以及其被采用的趋势，但人们仍在争论具体的时间点，以及该行业能否快速实现盈利，从而为相关发展提供资金支持。

Moving on... 继续前进.....

Software -9bps held in as AI losers got squeezed again (**MNDY +6.7%; HUBS +7%; ADBE +6%; INTU +5.7%**) and IT services which gets lumped in the same group caught a bid (**ACN +7.7%; CTSH +6%**). In internet, hypers were dragged down by **META's** funding concerns with the read-through being **AMZN -4.5%** might have to raise capital too (race to who gets there first according to META's 14C). **SPOT +11%** threaded the needle on a good print where GM bear fears were alleviated and ads on track to accelerate to dd growth in Q4, which is what bulls wanted to see. Bull case sounds a lot cleaner leaving the print and as we touched on yesterday, a good print was likely to met with buying as investors look for AI-safe havens and NFLX still in "do not touch" category among many investors.

软件板块下跌 9 个基点，因 AI 输家再次遭到挤压（MNDY +6.7%；HUBS +7%；ADBE +6%；INTU +5.7%），而被归入同一组的 IT 服务板块则获得买盘（ACN +7.7%；CTSH +6%）。在互联网板块，超大盘股因 META 的融资担忧而受到拖累，其传导效应是 AMZN 可能也不得不筹集资金，下跌 4.5%（根据 META 的 14C 文件，这是一场谁先到那里的竞赛）。SPOT +11%，在一份良好的财报中精准拿捏，GM 空头担忧得到缓解，广告业务有望在第四季度加速至两位数增长，这正是多头想看到的。离开这份财报后，看多逻辑听起来清晰了许多，正如我们昨天提到的，一份良好的财报很可能会迎来买盘，因为投资者在寻找 AI 安全避风港，而 NFLX 在许多投资者眼中仍属于“不可触碰”类别。

Anthropic

Earlier, we gave our best first shot at modeling Anthropic's #s given the very limited information we have before the S-1 gets filed (just going off press reports over the last week). What I took away from the exercise was a lot of big swing factors in what moves the #s and a very wide range of outcomes depending on the assumptions you tweak.

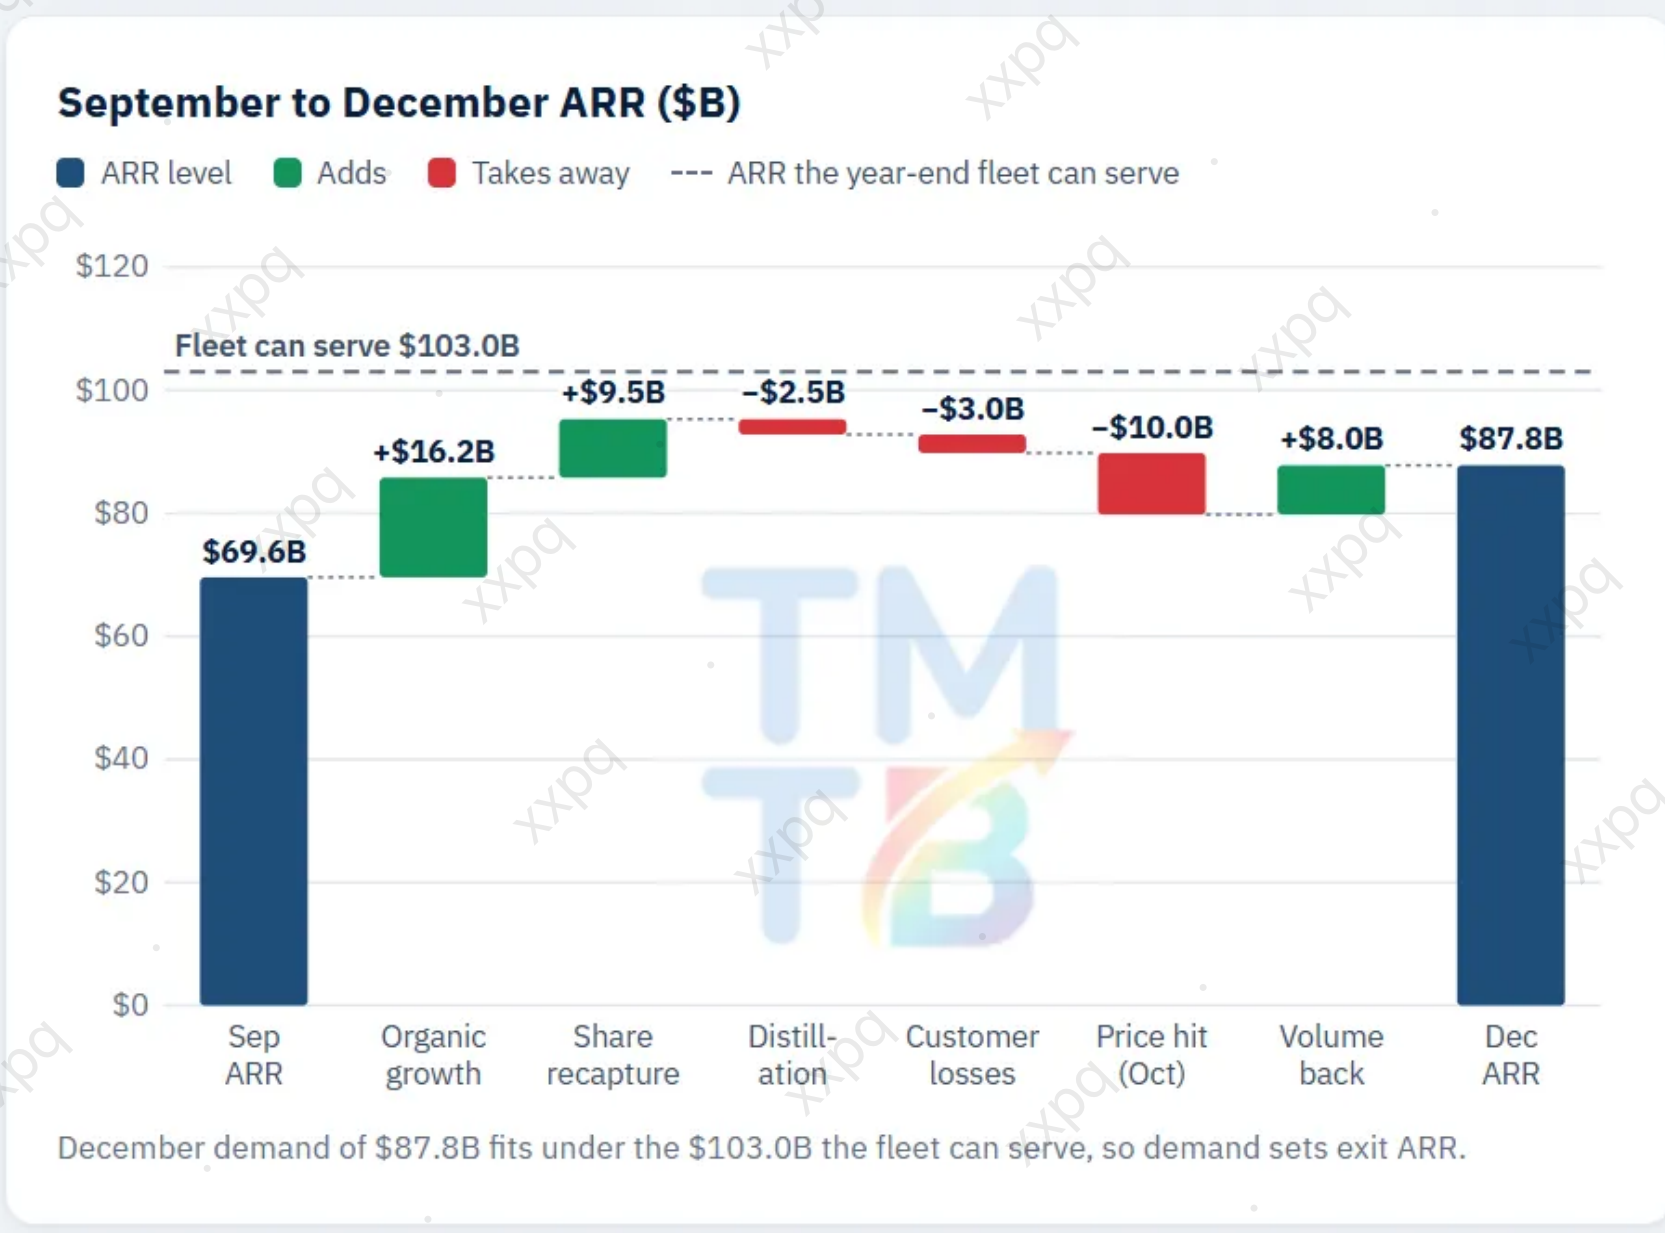

此前，鉴于在提交 S-1 文件之前我们掌握的信息极为有限（仅能参考过去一周的媒体报道），我们已尽力对 Anthropic 的各类指标进行了初步估算。通过这次尝试，我意识到影响这些指标变动的因素非常多，而且根据所采用的假设不同，其结果也会有很大差异。

In terms of the ARR number for Dec, got a bit of pushback on my $86B # (shifting share recapture up a bit gets us to $88B). Most we talked to today said they are in the $90B+ range, which makes sense as I can get to $90-$92B pretty easily, but getting above $95B requires more aggressive assumptions.

至于 12 月的年度经常性收入数值，我原本预计为 860 亿美元，但这一数字遭到了质疑；如果将股份回收的影响考虑进去，数值会上升到 880 亿美元左右。今天与我交谈过的人大多认为该数值应在 900 亿美元以上。这个预测其实也合情合理，因为 800 亿到 920 亿美元这个区间是很容易达到的，但要超过 950 亿美元，则需要更为乐观的假设。

Lots of moving pieces and ranges so we built an interactive version of our Anthropic Q4 ARR bridge with detail on why we are making our assumptions. Change any assumption and see where December lands: here

由于涉及的因素和变量太多，我们于是开发了一个交互式版本，用于展示 Anthropic 在第四季度的营收预测情况，并详细说明我们做出这些假设的依据。只需更改其中的任意一个假设，就能查看 12 月的营收数值会变成多少：点击此处即可。更多一手研报请加微信：FCCNN88

In macro land, bonds got the safe haven bid all day: the **10Y -18bps to ~4.95%**, back below 5% for the first time since 9/23 in what the biggest one-day drop in more than two years (Bessent's 8D Chess as *Akh* put it). Odds of a 10/28 hike went to ~0% from ~16% yesterday and ~41% on 10/14, and odds of no more hikes this year rose to ~28% from ~10% (a December hike still ~72% priced, with 2027 hike bets fading too). **WTI +2.4% to $99.47** after briefly trading above $100, as the NYT reported the US and Israel plan to strike Iran again after the midterms and Saudi Arabia reported attacks on Dammam airport and an Aramco field. **BTC -4%** to ~$81K.

在宏观领域，债券全天获得避险买盘：10 年期收益率下降 18 个基点至~4.95%，自 9 月 23 日以来首次回落至 5%以下，创下两年多来最大单日跌幅（正如 Akh 所说，这是 Bessent 的 8D Chess）。10 月 28 日加息的概率从昨天的~16%和 10 月 14 日的~41%降至~0%，今年不再加息的概率从~10%升至~28%（12 月加息仍定价为~72%，随着 2027 年油价上涨的预期逐渐减弱，WTI 油价上涨 2.4%，达到 99.47 美元；该油价曾短暂超过 100 美元。据《纽约时报》报道，美国和以色列计划在中期选举后再次对伊朗发动攻击，而沙特阿拉伯则报告称其达曼机场及阿美公司的油田遭到了袭击。比特币价格则下跌 4%，降至 1008 美元，约合 8.1 万美元。

Not a lot to call out on company specific news given broad nature of sell off, but let's get to the ~~good~~ stuff...

鉴于此次抛售行为具有普遍性，关于该公司的具体消息其实并没有太多可说的，那我们就直接进入重点内容吧……

AI/SEMIS

State of the things in AI Semis: people pitching SMH short in the #idea-dinner channel and getting good feedback for it, something that would have been shocking to hear just a couple months ago. Andy lays out the bear case:

AI 半导体领域的现状是：人们在#idea-dinner 频道上推荐卖出 SMH 股票，而且得到了不错的反馈。就在几个月前，这种事情还让人难以置信。安迪则分析了看跌该股票的理由。

- Semicap took the brunt after LRCX's guide: **LRCX -11.8%; AEHR -12.9%; KLAC -9.5%; AMAT -8.1%; ASML -6.9%**. LRCX guided December to $8.6B, in line with the Street but below whispers, with the CFO saying it "would have been a bit higher if not for some near-term supply chain constraints," and China rising to ~35% of revenue. Mgmt still sees 2027 WFE >$200B, but Bernstein called that unrealistic given cleanroom constraints, which hands bears the case they've made all along that cleanrooms cap CY27 growth.

  在 LRCX 发布指引后，半导体设备股首当其冲：LRCX -11.8%；AEHR -12.9%；KLAC -9.5%；AMAT -8.1%；ASML -6.9%。LRCX 对 12 月的指引为 86 亿美元，与华尔街预期一致，但低于私下预期，CFO 表示"若非部分近期供应链限制，本会略高一些"，中国收入占比升至~35%。管理层仍预计 2027 年 WFE 超过 2000 亿美元，但 Bernstein 称鉴于洁净室限制，这一预测不切实际，这正好给了空头他们一直以来的论据，即洁净室限制了 CY27 的增长。

  - Some good discussion in TMTB Slack here around what semicap's reaction says about next year.

    在 TMTB 的 Slack 频道里，大家就半导体的反应能反映出明年市场走势如何这一话题进行了不错的讨论。

    - *Ted*: *"if WFE can't go up materially next year (as implied by LRCX guide and the reaction today in literally every semicap), but we're still on track to deliver so much compute (even if not powered)... how does that even technologically work?"*

泰德：“如果明年 WFE 的性能无法有显著提升（从 LRCX 的预测以及今天所有半导体公司的反应来看都是如此），而我们仍要实现如此高的计算能力输出（即便没有相应的能源供应）……那从技术层面来讲，这怎么可能实现呢？”

- *Arun Dhar* thinks the *“$215b bogey probably sub 200 now,”* with *“the whole semicap space saying that the previous 6 months of 2027 E and 2028 E revisions are poof… gone. Which, I mean, could be true but it has to mean that 2027 hyperscaler capex is coming down hard.”*

阿伦·达尔认为，“2150 亿美元的那个数值现在很可能已经降到 200 亿美元以下了”。此外，整个半导体行业都认为，2027 年和 2028 年的预期估值上调幅度已经完全消失了。当然，这有可能是真的，但这也意味着 2027 年那些大型科技公司的资本支出将会大幅下降。

- *jmmcapital* countered: *“WFE is the second derivative. Even flat WFE means chip output grows similar in $ terms.”*

JMMcapital 回应称：“WFE 只是二阶导数而已。即便 WFE 保持不变，芯片的产量从金额上来看仍会有所增长。”

- For what it’s worth, INTC CTO Pushkar Ranade told Dwarkesh today the world’s tools could only double leading-edge wafer output, not 10x it, even as AI compute demand triples every year:

值得一提的是，英特尔的首席技术官普什卡尔·拉纳德今天对 Dwarkesh 表示，尽管人工智能领域的计算需求每年都在增长三倍，但现有的技术最多只能让先进芯片的产量提高一倍，而无法实现 10 倍的提升。

Fireside Alpha
@firesidealpha

Intel CTO Pushkar Ranade says the world’s chipmaking tools could only double leading-edge wafer output, not 10x it, even as AI compute demand triples every year

DWARKESH: “Are there enough tools in the world to 10x the amount of wafers you’re producing at the leading edge?”...

英特尔首席技术官普什卡尔·拉纳德表示，尽管人工智能领域的计算需求每年都在增长三倍，但全球现有的芯片制造设备最多只能使先进芯片的产量提高一倍，而无法实现 10 倍的提升。

DWARKESH：“世界上是否有足够的工具，能够让最先进的晶圆生产量提升 10 倍？”……

Fireside Alpha @firesidealpha

DEVELOPING: American Airlines CEO backs Starlink when pressed on Elon Musk and Ukraine, saying customers demand the "best" connectivity

LEBEAU: “...But it raises the question, are you comfortable doing business with Starlink?”

ROBERT ISOM (CEO): “American has always been the https://t.co/lSiTF146M9

最新进展：当被问及埃隆·马斯克与乌克兰局势时，美国航空公司的首席执行官表示支持 Starlink 服务，称客户们需要“最优质”的网络连接体验。

勒博：“……但这引出了一个问题：您愿意与星链开展业务合作吗？”

罗伯特·伊索姆（首席执行官）：“美国航空一直都是…… https://t.co/lSiTF146M9

- **NVDA -4%:** Jensen at GTC Berlin told CNBC neocloud demand is “off the charts,” but “what is missing in the middle is the working capital to fuel that growth... there’s a scarcity of capital,” and on whether NVDA would backstop them, he told Bloomberg TV “We invested in them... that’s different than backing them,”

NVDA 下跌 4%：在柏林 GTC 大会上，Jensen 告诉 CNBC，新云服务的需求“高得惊人”，但“目前缺乏用于推动这种增长的营运资金……资金十分紧张”。至于 NVDA 是否会为其提供支持，他则对彭博电视表示：“我们已对它们进行了投资……但这与直接为它们提供支持是两回事。”

- **NOK -14.9%** opened -7% and closed near the lows despite EBIT of €605M vs. €454M Street and 2027 Optical/IP guided +25-30% vs. Street ~20%. The pushback was a light 4Q revenue guide (€6.29B midpoint vs. €6.34B), FCF conversion cut to 35-55% from 55-75% as NOK puts another ~€400M into working capital to secure supply, and AI & Cloud orders of €1.5B vs. €2.8B last quarter (still +118% y/y).

NOK -14.9%，开盘跌 7%，收盘接近低点，尽管 EBIT 为 6.05 亿欧元，高于市场预期的 4.54 亿欧元，且 2027 年光通信/IP 业务指引为增长 25-30%，而市场预期为 1001#20%。市场的负面反应源于第四季度营收指引偏弱（中值 62.9 亿欧元，对比预期 63.4 亿欧元）、自由现金流转化率从 55-75%下调至 35-55%，因 NOK 再投入 1002#4 亿欧元用于营运资金以保障供应，以及 AI 与云订单为 15 亿欧元，低于上季度的 28 亿欧元（但同比仍增长 118%）。

- PCB maker **TTMI -27.7%** on its print, *920* in TMTB Slack here noting it *“missed their DC guide for Q3. Said timing”* with one of three higher-layer-count programs pushed out, and *AB* here hearing from shorts that the call flagged *“some TPU guys cough cough Tan Tan (AVGO), pushing out / delaying and canceling.”*

PCB 制造商 TTMI 的股价下跌了 27.7%。TMTB 的报道指出，该公司“未能达到第三季度的业绩预期”，其中一款多层电路板产品的生产时间也被推迟了。另有消息称，一些做空该股的人士表示，该公司还宣布“某些 TPU 相关产品的发展计划也被推迟或取消”。

We’ll stop there as the rest was just a sea of red…

我们就到此为止吧，因为剩下的全是红色……

INTERNET

- **META -7%** on funding and ‘27 margin concerns. Numbers were fine, but mgmt only committed to strong revenue growth for 2027 with no EBIT commitment, and the 10-Q showed ~$356B of leases not yet commenced plus ~$455B of non-

cancelable commitments (~$122B of it due in 2027), ~$810B in all. The 14C also didn't sound good re: funding (see our morning wrap for details on the quotes). As we wrote this morning, buyside 2027 EPS sits around $34-35: bulls put 25x on it, bears say low-30s EPS at sub-20x = sub $650.

META 因融资和"27 年利润率担忧下跌 7%。数据本身没问题，但管理层仅承诺 2027 年实现强劲营收增长，未对 EBIT 作出承诺，而 10-Q 显示尚有约 3560 亿美元租赁尚未开始，加上约 4550 亿美元不可撤销承诺（其中约 1220 亿美元于 2027 年到期），合计约 8100 亿美元。14C 在融资方面的表述也不乐观（引述细节见我们今早的摘要）。正如我们今早所写，买方对 2027 年 EPS 的预期约为 34-35 美元：看多方给予 25 倍估值，看空方则认为 EPS 在 30 出头、市盈率低于 20 倍=股价低于 650 美元。

- **SPOT +11.1%** with a very solid print that cleared the runway for bulls: 4Q GM guide held at 33.8% vs. fears of a step-down, with an operating income guide of €820M vs. €811M Street and subs beating offsetting another small revenue miss. With NFLX in no man's land, SPOT is one of the few names seen as not disrupted by AI, with ~$20 of FCF/share next year. We think likely starts acting better after chopping around all year

SPOT 的股价上涨了 11.1%，表现极为强劲，为多头势力创造了有利条件：其第四季度的毛利率预计仍为 33.8%，并未如市场所担忧的那样出现下降；营业利润预计为 8.2 亿欧元，而市场预期为 8.11 亿欧元。此外，该公司的业绩表现优于市场预期，这一优势抵消了营收方面的小幅不足。在 NFLX 面临困境的情况下，SPOT 是为数不多不会受到人工智能影响的公司之一，预计明年每股自由现金流可达 1001#$20。我们认为，在经历了一整年的波动之后，该公司的表现有望逐步好转。

- **GOOGL -3%** on some weaker 3p checks (following some from Clev yesterday) from this morning as M-sci seeing advertising slow exiting September into October.

由于 M-Sci 预计广告行业在 9 月到 10 月间的增长势头将会放缓，谷歌股价今日下跌 3%，这一走势与昨日 Clev 发布的报告一致。

- The agentic-vulnerable names got squeezed: **Z +8.5%; UPWK +7.3%; CHWY +4.7%; EXPE +4.5%; ETSY +4.1%; DUOL +3%**, EXPE bouncing after yesterday's -5%, and **BKNG +1.7%** green despite BTIG flagging 4Q room-night softness from France (~10% of the business) and Middle East disruptions. We think some went into META's print short OTA so some covering helped there today as well.

那些处于弱势地位的公司的股价有所回升：Z 上涨 8.5%；UPWK 上涨 7.3%；CHWY 上涨 4.7%；EXPE 上涨 4.5%；ETSY 上涨 4.1%；DUOL 上涨 3%。EXPE 在昨日下跌 5%之后今日又有所反弹；BKNG 则上涨 1.7%。尽管 BTIG 指出法国市场（约占该公司业务量的 10%）以及中东地区的状况不佳，但 BKNG 的股价依然上涨。我们认为，有些资金转而投资了 META 的在线旅游平台，因此今天也有资金流入该平台，从而推动了其股价上升。

- **NFLX +3.1%** shrugged off Wolfe's downgrade as the rotation flows overwhelmed and even bears having trouble getting much downside after yesterday's print.

在昨日的财报公布后，市场资金持续流向 NFLX，即便沃尔夫下调了该股的评级，NFLX 的股价仍上涨了 3.1%；就连看跌该股的人也难以再让其股价进一步下跌。

SOFTWARE

- **CRM +3.5%** after The Information reported it will start charging outside AI agents (Claude included) per-action fees from November.

在《The Information》报道称其将从 11 月开始对除 Claude 在内的其他 AI 助手的每项操作收取费用后，CRM 的股价上涨了 3.5%。

- App software ripped: **MNDY +6.7%; HUBS +6.9%; ADBE +6.1%; INTU +5.7%; FIG +4.9%; ADSK +4.1%; WDAY +3.5%.** · IT services joined the squeeze: **ACN +7.7%; CTSH +6%; INFY +3.7%; EPAM +3.5%**.

应用软件行业表现不佳：MNDY 上涨 6.7%；HUBS 上涨 6.9%；ADBE 上涨 6.1%；INTU 上涨 5.7%；FIG 上涨 4.9%；ADSK 上涨 4.1%；WDAY 上涨 3.5%。IT 服务行业也面临压力：ACN 上涨 7.7%；CTSH 上涨 6%；INFY 上涨 3.7%；EPAM 上涨 3.5%。

- **SAP +3.4%** after cloud backlog grew 26% cc, slightly better than bogeys helping bulls who say AI is accelerating cloud migrations rather than causing hesitation.

由于云服务订单量同比增长 26%，SAP 的股价上涨了 3.4%。这一表现略好于预期，也为那些认为人工智能会加速云服务迁移进程、而非阻碍这一进程的乐观派提供了支持。

- **IBM +26bps** opened -4% and finished green, helped by the factor rotation, after

its beat (software +9%, FCF guide raised), though UBS thinks recaptured slipped deals added 3.5pts to software growth, leaving organic software at ~1%, with consulting signings -2%.

在业绩表现优于预期（软件业务增长 9%，自由现金流预期也有所上调）的推动下，IBM 的股价开盘时下跌 4%，但随后因行业板块轮动而转为上涨。不过瑞银银行认为，那些被重新争取回来的订单为软件业务的增长带来了 3.5 个百分点的贡献，因此软件业务的实际增长率仍为 1001#1%；而咨询业务方面的业务量则下降了 2%。

- Cyber caught a bid again as PHP2Shell attacks ramp: **CHKP +6%; ZS +2.8%; PANW +2.2%**, with Reuters reporting NET detected millions of exploit attempts after disclosure as banks, transport operators and governments paused services to patch, though **NET -1.1%** faded from +5.6% at the highs and **CRWD -58bps** gave back an early pop despite Mizuho's checks showing AIDR ARR up >79x June-August with early Falcon Guardian pricing at >2x AIDR.

随着 PHP2Shell 攻击的增多，Cyber 领域的风险再度上升：CHKP 上升了 6%，ZS 上升了 2.8%，PANW 上升了 2.2%。据路透社报道，由于银行、交通运营商和政府纷纷暂停服务以进行修复，NET 检测到了数百万次攻击尝试；不过 NET 的涨幅已从最高时的 5.6%下降到 1.1%。而 CRWD 则下降了 58 个基点。尽管瑞穗银行的数据显示，6 月至 8 月期间 AIDR 的收益增长了 79 倍以上，且 Falcon Guardian 的初始定价也高于 AIDR 的两倍，但其股价仍出现了下跌。

- **NOW +2.5%** into its 10/28 print with Cleveland seeing Q3 finishing ahead of expectations and a positive Q4 setup.

目前该股在 10 月 28 日的报告发布前上涨 2.5%；预计克利夫兰市的第三季度业绩将优于预期，第四季度的走势也较为乐观。

- **DDOG -5.6%** after The Information reported it offered nearly $4B for cloud-security startup Upwind, which hasn't accepted and is closing a $300M round at a $3.8B valuation (so not much of a premium).

在《The Information》报道称 DDOG 曾出价近 40 亿美元收购云安全初创公司 Upwind 之后，该股股价下跌了 5.6%。Upwind 并未接受这一报价，而是选择以 38 亿美元的估值进行 3 亿美元的融资——因此其实并没有什么溢价。

- **ORCL -2.8%** getting caught in the AI weakness (although decent outperformer). 5Y CDS topped 300bps

甲骨文股价下跌 2.8%，受人工智能领域劣势的影响；不过其表现仍算不错。其 5 年期 CDS 溢价已超过 300 个基点。

ELSEWHERE

- **TSLA -3.1%** after Q3: FSD attach >75% in North America (from >55% in Q2), but CLSA said the 2026 capex cut to ~$20B from $25B sparked fresh skepticism on commercial AI demand. Bloomberg reported Musk wants a TSLA-SPCX combination announced in 1H27, closing before Trump leaves office.

  特斯拉在公布第三季度业绩后股价下跌 3.1%：在北美地区，其 FSD 功能的使用率已超过 75%（而第二季度时这一比例为 55%以上）。不过 CLSA 认为，2026 年的资本支出将从 250 亿美元降至 1001#$20 亿美元，这一变化引发了人们对人工智能市场需求的质疑。彭博社报道称，马斯克希望能在 2027 年上半年宣布特斯拉与 SPCX 的合并计划，以便在特朗普离任之前完成这项交易。

- **AAPL +1.2%** green on a red tape on the anti-semis trade ahead of Duo release on Friday. Some of the reviews I've seen so far aren't that great, but it does look cool.

  在周五新款产品发布之前，由于反犹太贸易相关的负面消息，AAPL 的股价仍上涨了 1.2%。目前我看到的部分评测反馈并不算好，但该产品的外观确实很酷。

- **TTWO +80bps** green with Yip's GTA VI pre-orders tracking to mid-20s (M) opening weekend and low-to-mid 40s through December as TV advertising began 10/20.

  TTWO 的预期收益为+80 个基点；根据 Yip 的预测，《GTA VI》的预购量在首周票房可达 2000 万美元左右，而随着 10 月 20 日开始的电视广告宣传，到 12 月时其票房则有望达到 4000 万至 4500 万美元之间。

BULLISH AND BEARISH WEEKLY OPTION FLOW

看涨与看跌周度期权资金流向
