Despite positive 3-month price performance for our natural gas E&P coverage of +8%, investor sentiment toward the complex remains mixed ahead of a winter setup that includes an outlook for strong associated gas supply growth out of the Permian Basin and concerns over the potential for weaker winter demand stemming from El Niño climate patterns. In the near-term, we have seen 3Q26 revisions trend downward across our gas E&P coverage given widening Appalachian Basin differentials in September driving the potential for upside to curtailed volumes in the region.

Given this backdrop, we reiterate our mid-cycle view for Henry Hub pricing at $3.50/MMBtu in 2027/2028 and screen our natural gas E&P coverage for compelling risk/reward skew and attractive valuation relative to peers. We highlight **AR** given a constructive outlook on the company's structural cost reduction pathway alongside an attractive 13% FCF yield on average 2027/2028 estimates. We highlight **EQT** as a low-cost, integrated Appalachian producer benefiting from continued operating efficiencies and accelerating commercial momentum with power and LNG end markets. We highlight **EXE** given the company's durable cash flow profile, incremental focus toward executing on its commercial strategy, and attractive valuation at a 12% FCF yield on average 2027/2028 estimates.

Antero Resources: Highlight Strong Visibility into Cost Improvements and Attractive Valuation at Current Levels

Ahead of 3Q26 earnings, we reiterate our Buy rating on AR with a price target of $46 and highlight an attractive risk/reward skew with 18% upside at current levels. We remain constructive on AR as management continues to execute against its cost reduction targets, driving structural improvements in the business and operating margins. Management expects cash costs to decline >25% from 2025 levels to ~$2.00/Mcfe by year-end 2028, driven primarily by firm transport optimization as legacy commitments roll off and the development mix shifts toward dry gas production (Exhibit 2). Additionally, we see long term upside as further legacy contract roll-offs beyond 2028 could expand the annual margin improvement from a three-year ~$300 mn opportunity to ~$600-$700 mn over a five-year horizon. We acknowledge the challenging in-basin pricing remains a near-term headwind, particularly heading into the 3Q print, though we see AR's improving cost structure helping to offset this pressure. We also see an attractive valuation for AR with the company trading at a 13% FCF yield on average 2027/2028 estimates relative to Appalachian peer average of 10% (peers include EXE, EQT, RRC). Looking ahead, we seek clarity on AR's outlook for gaining direct exposure to in-basin demand projects that expect to support improved local pricing as announcements for regional power and data center demand projects continue to materialize.

EQT Corp: Highlight Continued Commercial Momentum and Organic Operational Improvement

We remain constructive on EQT ahead of 3Q26 earnings with a raised price target of $62 implying ~14% upside to current levels, as we highlight proven productivity improvement, continued commercial momentum across power and LNG, and increasing flexibility to return capital to shareholders. On operations, EQT continues to deliver efficiency gains, as compression projects have driven production outperformance this year. While weak in-basin natural gas pricing seen during 3Q26 could drive incremental curtailed volumes for the quarter, we highlight EQT's tactical ability to adjust volumes quickly in response to the pricing environment and hold a constructive outlook on volumes recovering in 4Q26. Additionally, we highlight continued momentum of EQT's commercial and marketing business given >3 Bcf/d in announced long-term supply agreements with Utility and Data Center related end markets. Longer-term, we highlight that EQT's 30 years of de-risked inventory enables optionality for longer-term volume growth into new demand opportunities that arise. Despite EQT's 12-month underperformance at -5% versus peers at +5% (peers include EXE, RRC, AR, TOU), we see the business set up to benefit from the potential for a tightening Appalachian natural gas pricing environment through the end of this decade and increased shareholder returns. As EQT approaches its $5.0 bn net debt target, we see line of sight into the business reaching this milestone by year-end 2026, which enables greater flexibility for incremental shareholder returns per share in 2027 and 2028 (Exhibit 3) or further balance sheet improvement. Looking ahead, we seek clarity on capital allocation priorities beyond the $5.0 bn net debt target and commentary around progress on the company's commercial strategy.

Expand Energy: Highlight Compelling Risk/Reward Skew, Note Recent Management Changes

We continue to see compelling risk/reward skew for EXE at current levels with a 12-month price target of $117 (26% upside), driven by 1) cash flow durability, 2) accelerated focus on commercial strategy, and 3) attractive valuation at current levels. We also highlight the company's recent announcement of a new CEO and President, effective October 26. First, we highlight EXE's "hedge-the-wedge" strategy, which provides an outlook for meaningful upside to post-hedge price realizations at current strip pricing (Exhibit 4). The company is also seeking to drive ~$750 mn in incremental free cash flow over the next 3-5 years through capturing new demand, accessing premium markets and monetizing volatility. We see the recent Twin Eagle acquisition as complementary to both these key drivers of our Buy rating, as the business' steady EBITDA generation is more defensive to the cyclical nature of the natural gas commodity, and Twin Eagle's extensive US transmission and storage footprint provides a greater range of commercial opportunities for EXE. On 3Q26, we see EXE's basin diversification and hedging profile as a relative advantage given the weak US natural gas prices seen during the quarter, particularly for Appalachian in-basin pricing. Additionally, we see mean-reversion potential for EXE as the stock has underperformed year-to-date (-15%) versus our gassy E&P coverage (+1%), and we see EXE trading at a 12% FCF yield on average 2027/2028 estimates relative to Appalachian peer average of 9% (peers include EQT, AR, RRC, NFG). We continue to seek clarity on the execution of EXE's accelerated commercial strategy with incremental supply agreements.

Valuation & Key Risks

We are adjusting our estimates to reflect our updated views, mark-to-market commodity prices across our coverage for 3Q26, adjust our 4Q26 Brent/WTI price to $100/$90 per bbl respectively, and maintain our mid-cycle commodity price estimates of $3.50/$3.50 per MMBtu Henry Hub and $80/$75 per bbl Brent for 2027/2028, resulting in higher 12-month price targets for EQT, RRC, and TOU. We also incorporate the Twin Eagle acquisition into our EXE forecasts resulting in a higher 12-month price target.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; registered market maker. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in

See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this [illegible]ny.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.
