TMTB Morning Wrap TMTB 晨间综述

TMT BREAKOUT
2 MINUTES AGO • PAID

Good morning. **QQQs -1.6% / SPX -90bps** this morning following weakness overnight in Asia. **Yields down 7-9bps** across the curve while **Oil +2%** on escalating middle east tensions.

早上好。受亚洲市场夜间走势疲软的影响，今天 QQQ 指数下跌 1.6%，SPX 指数下跌 90 个基点。各期限债券的收益率均下降了 7-9 个基点；同时，由于中东局势日益紧张，油价上涨了 2%。

What's weighing on the market? Outside Iran, we got some underwhelming reactions to start Tech earnings which has **Semis -4%** and **Internet -1%. META -3%** down after being up 6% last night after some uninspiring quotes from their 14C filing keep equity raise concerns front and center while '27 margin concerns have buyside less confident in '27 upside, **LRCX/NOK trading down** on mixed prints, **IBM -8%** fading bigly, more hacking news seemingly hitting the tape every hour (**cyber names +2% early**), and rumored weaker Q4 Anthropic nums being thrown around on X (Q4 ARR in low 80s) before the S-1 filing comes out tomorrow or Monday weighing on semis sentiment.

市场在担忧什么？除伊朗外，科技股财报季开局反应平淡，半导体板块下跌 4%，互联网板块下跌 1%。META 下跌 3%，而昨晚曾上涨 6%，此前其 14C 文件中的一些言论缺乏鼓舞性，使股权融资担忧持续成为焦点，同时'27 年利润率担忧令买方对'27 年上行空间信心不足。LRCX 和 NOK 因业绩喜忧参半而下跌，IBM 下跌 8%大幅回吐涨幅，似乎每小时都有更多黑客攻击新闻登上头条（网络安全股早盘上涨 2%），且在 S-1 文件明天或周一发布之前，X 上流传着 Anthropic 第四季度数据弱于预期的传闻（第四季度 ARR 在 80 出头），拖累半导体板块情绪。

Asia stocks in the red: TPX -1.14%, NKY -2.65%, Hang Seng -3.03%, HSCEI -3.2%, SHCOMP -1.48%, Shenzhen -2.93%, Taiwan TAIEX -1.8%, Korea KOSPI -3.52%. **Softbank -7%. Samsung -4%. SK Hynix -4.5%**

亚洲股市普遍下跌：台证指数下跌 1.14%，新加坡海峡指数下跌 2.65%，恒生指数下跌 3.03%，香港恒生中国企业指数下跌 3.2%，上证指数下跌 1.48%，深证成指下跌 2.93%，台湾加权指数下跌 1.8%，韩国 KOSPI 指数下跌 3.52%。软银股价下跌 7%，三星股价下跌 4%，SK 海力士股价下跌 4.5%。

We'll cover **META**, **TXN**, **SPOT**, and **NOK** first then onto the usual...

我们先将重点放在 META、TXN、SPOT 和 NOK 上，然后再讨论常规内容……

META -3%: Better Q3 and Q4 #s and +ve Muse commentary but 2027 spending, margins and funding weighing on stock this morning

META 股价下跌 3%：第三季度和第四季度的业绩表现较好，Muse 也给出了积极评价，但考虑到 2027 年的支出、利润率以及资金状况，这些因素今日仍对股价构成压力。

#s better as revs beat Street by ~2% and EPS excluding the settlement beat by ~13%, while Q4 guidance slightly better than bogeys and Zuck and co talked up Muse's commercialization. Bulls liked the two year accel in UCAN with high incrementals and Q4 implying acceleration.

#s 的表现更佳：其营收比 Street 高出 1001#2%，而在扣除相关费用后的每股收益则高出 1002#13%；此外，其第四季度的业绩预期也优于市场平均水平。扎克伯格等人还强调了 Muse 产品的商业化前景。投资者们看好 UCAN 在两年内的发展势头，预计其业绩将实现持续增长。

However, a few things weighing on the stock:

不过，有几项因素对股价构成压力：

1. Concerns around ‘27 EPS growth as mgmt only committed to “Strong revenue growth” for 2027 with no EBIT commitment like this year’s so pushback is that numbers “could literally be anything.”

对于 2027 年的每股收益增长前景，人们感到担忧，因为管理层仅承诺 2027 年的营收将实现强劲增长，并未像今年那样给出 EBIT 方面的具体目标，因此有人认为相关数字“完全可能是随意定的”。

2. Equity raise and capex concerns weighing on stock. Last night, META filed a14C with several interesting quotes, talking “hundreds of billions of dollars over several years” and saying raising could start in fall 2026: (h/t K Rippey)

股权融资及资本支出方面的压力正在拖累股价。昨晚，META 提交了 14C 表格，其中提到了“数十年间需投入数千亿美元”的相关内容，并表示融资活动可能于 2026 年秋季开始：（消息来源：K Rippey）

"*Management had previously presented three forecast cases to the Board during a regularly scheduled Board meeting in May, and in each case, these long-term forecasts showed the Company’s need to raise hundreds of billions of dollars over a period of several years* beginning as early as fall 2026."

此前，在 5 月举行的例行董事会会议上，管理层向董事会提交了三种预测方案。根据这些长期预测，公司从 2026 年秋季开始，需要在数年内筹集数千亿美元的资金。

“The Special Committee also recognized that timing is important to secure capital before competitors saturate various funding options…in order to finance its funding needs going forward it would be prudent for the Company to do so before even more companies have absorbed available capital in the market”

“特别委员会还意识到，及时筹集资金至关重要，这样才能在竞争对手占据所有融资渠道之前获得资金……为满足未来的资金需求，该公司最好在更多企业抢光市场上的可用资金之前就完成融资。"

Debt financing alternatives of the magnitude that Company management was considering could have an adverse effect on the Company’s credit ratings and would be a less attractive alternative for the Company."

公司管理层所考虑的那种规模的债务融资方式，可能会对公司的信用评级产生不利影响，因此并非对该公司而言理想的融资选择。

Doesn't sound inspiring... **听起来没什么鼓舞人心的.....**

3. Bears will argue that catalysts in rearview, MUSE engagement has been mixed recently and carries different real variable costs unliked ads and will take time to monetize, and near-term catalysts in rear-view mirror.

   熊市观点认为，后视镜中的各种催化剂效果并不稳定，MUSE 功能的运行状况也时好时坏；此外，与广告不同，这些功能还面临着不同的实际成本问题，需要时间才能实现盈利。而从短期来看，后视镜中的那些催化剂也难以发挥作用。

Buyside numbers not really going up here and still sit around $34-35 for 2027. Bulls will say throw 25x on that = $850, while bears will say we aren't going to see much EPS growth in 2027 so $34-35 too high (it's more likely in low 30s), spending is going to remain elevated and equity raise an overhang so sub 20x is more accurate = $650.

从买入角度来看，相关数值并没有上升，2027 年的股价仍会在 34-35 美元左右。看多派认为，若以 25 倍的市盈率来计算，那么股价应为 850 美元；而看空派则认为，2027 年公司的每股收益增长幅度不会很大，因此 34-35 美元的估值过高，实际股价应该在 30 美元出头。此外，企业支出仍将保持高位，同时还有股权融资带来的压力，因此 20 倍以下的市盈率更为合理，对应的股价为 650 美元。

We think stock likely needs to digest and shifts into funding short camp near-term unless we get a change in narrative, some more concrete signs of MUSE monetization/ramp and/or until equity raise overhang lifted. Still we like the r/r near $650, so hanging in there in in our LT books.

我们认为，除非有新的进展出现，要么有更多关于 MUSE 项目盈利前景的明确迹象，要么股权融资带来的压力得到缓解，否则股市很可能需要时间来消化这些信息，短期内仍会处于看跌态势。不过，我们依然认为该股票的合理估值在 650 美元左右，因此会在我们的长期投资组合中继续持有该股票。

Some good discussion in TMTB Slack around MUSE monetization quote in callback:

在 TMTB 的 Slack 频道里，围绕回调中的 MUSE 盈利模式问题，有一些不错的讨论。

jh Today at 2:31 AM

"And so, while our family of apps has traditionally been strong at helping people for products and brands, this is a place where we are really excited that ***Muse can serve people who arrive with more explicit intent and allows us, we think, to kind of tap into that advertising market in a new way.*** *And Muse simplifies the journey, we think, from consideration to transaction. An agent can understand what someone is looking for, it can compare relevant options, it can answer questions, it can help them complete the purchase, reducing the friction that exists versus a person moving across multiple websites and apps to research and buy products. And we think the apps can also -- the family of apps, sorry to be clear, can continue to create moments of inspiration and discovery, and Muse gives us an opportunity to participate more deeply when a person has expressed commercial intent. So, we think the two experiences across family of apps and Muse we hope will be very complementary, and I think we hope that that will support, again, multiple revenue streams over time."*

Anoncapital Today at 2:39 AM

They've been talking to large agencies already about testing ad units within Muse. I've spoken to 3 large agencies that have confirmed this to me in the past 2-3 weeks.

👍 👍🏽 4

jh Today at 2:42 AM

interesting - why don't they just say that then? feels like mkt v skeptical about take rate monetisation (i agree), why would they not tell people they'll monetise in the way that nobody in the world is better at than meta (ads)?

Anoncapital Today at 2:43 AM

They're worried about data/privacy concerns is my guess

👍 2

Details:

3Q revenue was $64.6B, +26% y/y (last q +28%), vs. Street $63.3B, with EPS excluding the legal charge of $7.40 vs. Street $6.54. The Q4 revenue midpoint of $74.5B slightly better than bogeys. The FY26 expense guide goes to $175–179B, but that's just the $9.9B AG charge added on top. Ex the charge it's still $165–169B, a bit of a relief. Capex was narrowed by raising only the low end, so the midpoint is now $140B. That's a little short of the $140–145B buyside had, so a slight letdown for AI semi bulls and a small positive for META longs.

第三季度营收为 646 亿美元，同比增长 26%（上一季度为+28%），高于华尔街预期的 633 亿美元，剔除法律费用后的每股收益为 7.40 美元，高于华尔街预期的 6.54 美元。第四季度营收中点为 745 亿美元，略好于预期。2026 财年费用指引上调至 1750 亿至 1790 亿美元，但这只是在此基础上增加了 99 亿美元的 AG 费用。剔除该费用后，仍为 1650 亿至 1690 亿美元，算是略有宽慰。资本开支仅上调了低端，因此区间收窄，目前中点为 1400 亿美元。这略低于买方此前预期的 1400 亿至 1450 亿美元，因此对 AI 半导体多头来说略感失望，对 META 多头则是小幅利好。

On 2027, mgmt says it's still building the budget and capacity plan and will keep "investing aggressively." Remember bogeys around ~$215–220B opex / ~$250B capex. The unchanged ex-charge guide implies 4Q expenses of ~$48–52B, up from $41.7B in 3Q. That's already a ~$200B annualized run rate before any '27 growth. The Semafor share-class story that hit near the close yesterday was right: non-voting Class C stock, effective 1/19/27, created through a 1-for-1 stock dividend (effectively a 2-for-1 split), with capital raising listed first among the reasons. FCF was -$2.1B on $34.9B of capex.

2027 年，管理层表示仍在制定预算和产能计划，并将继续"积极投资"。记住 ~$215–220B 运营支出/~$250B 资本支出的大致目标。未变的剔除费用指引意味着第四季度费用为~$48–52B，高于第三季度的$41.7B。这已经是 ~$200B 的年化运行率，还未计入任何'27 年的增长。昨天临近收盘时 Semafor 的股份类别报道是对的：无投票权的 C 类股票，自 1/19/27 起生效，通过 1 比 1 的股票股息（实际上相当于 2 比 1 拆股）创设，融资在原因中列在首位。自由现金流为-$2.1B，资本支出为$34.9B。

Key Takeaways

- **Core ads.** Advertising revenue grew 25.9% y/y to $63.1B vs. Street $61.7B, with the clearest acceleration in U.S./Canada, where growth reached ~33% from ~31% last quarter. Global pricing increased 14% vs. Street 11%, more than offsetting impressions growth of 10% vs. Street 11%. Aggregate reported ad growth slowed from 27.5%, while FX-neutral ad growth held around 26%; the positive acceleration argument rests on UCAN and the stronger two-year growth stack. Mgmt cited better ad performance and improved macro conditions versus last year.

  核心广告业务。广告收入同比增长 25.9%，达到 631 亿美元，高于华尔街预期的 617 亿美元，其中美国/加拿大加速最为明显，增速从上一季度的 31%升至 33%。全球定价上涨 14%，高于华尔街预期的 11%，足以抵消曝光量增长 10%低于华尔街预期 11%的影响。报告口径的广告总增速从 27.5%放缓，而按固定汇率计算的广告增速保持在约 26%；增速加快的积极论据主要基于美国/加拿大以及更强的两年增长叠加。管理层提到广告表现改善以及宏观环境较去年有所好转。

- **AI returns.** The evidence that AI improves the existing advertising business continues to build. Advertisers adopting Business Assistant recommendations generated nearly 5% more conversions at similar cost per conversion and increased spending 9% versus comparable non-adopters. GEM expansion lifted

app-ad conversions 9.6%, while nearly 10M advertisers used a generative creative tool. Migrating content-understanding models to the Muse family produced better offline results with >80% lower processing costs per item.

人工智能再度回归。越来越多的证据表明，人工智能能够提升现有的广告业务效果。那些采用“业务助手”所提建议的广告主，在保持相同的转化成本的前提下，其转化率提升了近 5%，同时他们的广告支出也比那些未采用该工具的广告主高出 9%。GEM 技术的应用使得应用内广告的转化率提升了 9.6%，而约有 1000 万广告主使用了这种创意生成工具。将内容理解模型迁移到 Muse 系列后，其离线处理效果更好，且每条内容的处理成本降低了 80%以上。

- **Muse adoption.** More than 10M people in the U.S./Canada set up agents within roughly six weeks, with ~25% using Muse on any given day and retention improving among earlier cohorts. Shopping is the leading use case, engaging >25% of weekly actives, with average purchases above $200, including travel. The commercial intent is arguably more relevant than the setup count: users are already trusting Muse with transactions.

Muse 的采用率非常高。在美加两国，有超过 1000 万人在大约六周的时间内注册了该服务；每天都有 1001#25%的用户使用 Muse，而且早期注册的用户留存率也在不断上升。购物是该服务最主要的用途，有超过 25%的活跃用户会进行购物，他们的平均消费额超过 200 美元，其中还包括旅游相关的支出。与注册人数相比，用户愿意使用 Muse 进行交易这一事实显然更为重要。

- **Monetization.** Mgmt intends to monetize Muse earlier than its historical playbook because both the serving costs and revenue opportunity are substantial. Planned streams include transaction fees paid by businesses, subscriptions for advanced models or additional usage, business subscriptions, and optional connections to content and advertising experiences. The ambition for Muse ARPU to exceed several hundred dollars annually is a long-term expectation benchmarked against what those users already generate across the existing apps. It is not current Muse revenue. New AI businesses should begin contributing incremental revenue in 2027.

前2000名加入可用 ▸
长按二维码立享优惠

变现策略。管理层打算比以往的惯例更早地让 Muse 实现盈利，因为其运营成本与盈利潜力都相当可观。预计的盈利来源包括企业支付的交易费、高级功能或额外使用权限的订阅费用、企业级订阅服务，以及与内容及广告服务相关的收入。管理层期望 Muse 的每用户年均收入能超过数百美元，这一目标是根据现有应用中用户的收入水平来设定的长期预期值，而非 Muse 目前的实际收入。新的人工智能相关业务预计将在 2027 年开始为该公司带来额外的收入。

- **Agent network.** META disclosed at least 500M self-identified small businesses using its apps, giving it substantial distribution for business agents alongside 3.64B daily consumers. The near-term enterprise priorities are model APIs, Muse Code and business agents; the longer-term opportunity connects consumer and business agents across discovery, purchases and service. Mgmt expects commerce to move toward authenticated APIs, approved partnerships and direct agent interactions.

  代理网络。META 透露，至少有 5 亿家小型企业正在使用其应用程序，这为该公司的商业代理提供了强大的推广渠道，同时还有 36.4 亿名日常消费者。短期内，该公司的主要发展重点在于 API 接口、Muse Code 以及商业代理功能；而从长远来看，则是通过各种方式将消费者与商业代理连接起来，实现产品发现、购买和服务交付等流程的整合。该公司管理层预计，未来的商业模式将会朝着基于经过认证的 API 接口、经过审批的合作伙伴关系以及直接的代理互动方向发展。

- **Other revenue.** FoA other revenue increased 59% to $1.10B vs. Street ~$1.08B, driven by WhatsApp paid messaging and subscriptions. Partnership ads exceeded a $15B annual revenue run rate, growing >97% y/y, while Meta One surpassed 15M subscriptions and trials.

  其他收入方面：由于 WhatsApp 的付费消息服务及订阅业务的发展，FoA 的其他收入增长了 59%，达到 11 亿美元，而市场预期为 10.8 亿美元。合作伙伴广告业务带来的年度收入已超过 15 亿美元，同比增长率超过 97%；此外，Meta One 的订阅用户数及试用用户数也超过了 1500 万。

- **Compute economics.** META is building capacity to serve >1B people over the next few years and targets >10x improvement in Muse compute cost-efficiency over the next year. Smaller models, distillation, inference optimization and better utilization of spare capacity underpin the roadmap. Profitability still requires revenue to reach scale, and mgmt explicitly expects total serving costs to rise as adoption expands. The efficiency target concerns the cost of delivering intelligence; it does not establish a decline in aggregate spending.

计算经济性方面，META 正在努力提升自身能力，以便在未来几年内为超过 10 亿人提供服务。同时，该公司还计划在未来一年内将 Muse 系统的计算成本效率提升 10 倍以上。实现这一目标的关键措施包括使用更小的模型、进行模型优化、改进推理流程，以及更高效地利用闲置资源。不过，要实现盈利仍需提升营收规模；管理层也预计，随着服务规模的扩大，总成本将会上升。此处所说的效率提升指的是提供智能服务时的成本降低，而非整体支出的减少。

- **Margins.** Operating income excluding the settlement was $22.9B, +11% y/y and ~13% above Street, but the 35.4% margin declined ~470bps y/y. Underlying expenses increased ~36%, outpacing revenue growth of 26%, as infrastructure, depreciation, cloud and third-party token costs absorbed the advertising gains. Headcount fell ~12% q/q, but labor efficiency has not offset the broader investment ramp.

利润率方面：扣除相关费用后的营业利润为 229 亿美元，同比增长 11%，高于市场预期 1001#13%；但利润率却下降了 1002#470 个基点。各项运营成本增长了 1003#36%，增速超过了 26%的营收增长速度，因为基础设施建设、折旧、云服务以及第三方服务带来的成本增加了，抵消了广告业务带来的收益。员工人数环比减少了 1004#12%，但劳动效率的提升仍无法弥补不断增加的投资成本。

- **Budget.** FY26 expenses rose to $175–179B vs. Street ~$177.2B, almost entirely reflecting the $9.9B settlement charge; the underlying range is effectively unchanged from $165–169B. For 2027, mgmt expressed confidence in strong overall revenue growth but gave no numerical revenue, expense or capex guidance and made no operating-income growth commitment. More detail is expected with the Q4 call.

预算方面：2026 财年的支出为 1750 亿至 1790 亿美元，而市场预期为 1772 亿美元，这一差异主要源于 99 亿美元的和解费用；实际上，支出范围仍保持在 1650 亿至 1690 亿美元之间。至于 2027 年，管理层对整体营收的增长持乐观态度，但并未给出具体的营收、支出或资本支出预测，也没有承诺营业利润的增长幅度。更多细节预计会在第四季度的财报电话会议上公布。

- **Capex.** FY26 capex is now $135–145B, with the $140B midpoint close to Street $139.8B and the $140.5B buyside survey bogey. The floor increased $5B; the ceiling stayed unchanged. Q3 capex of $34.9B was below the roughly $42–42.5B expected, helping FCF come in at negative $2.1B vs. Street negative $8.5B. However, the annual guide mathematically implies roughly $49–59B of Q4 capex,

or ~$54B at midpoint.

资本支出。2026 财年资本支出目前为 1350 亿至 1450 亿美元，中值 1400 亿美元接近华尔街预期的 1398 亿美元和买方调查基准 1405 亿美元。下限提高了 50 亿美元；上限保持不变。第三季度资本支出为 349 亿美元，低于预期的约 420 亿至 425 亿美元，推动自由现金流为负 21 亿美元，而华尔街预期为负 85 亿美元。然而，年度指引在数学上意味着第四季度资本支出约为 490 亿至 590 亿美元，或按中值计算为约 540 亿美元。

- **Reality Labs.** FY26 losses are expected at $18–19B, midpoint $18.5B vs. Street ~$18.5B, falling to ~$15B in 2027, also around Street. That creates approximately $3.5B of spending capacity, but mgmt explicitly plans to redirect investment primarily toward AI.

Reality Labs 在 2026 财年的亏损预计在 180 亿至 190 亿美元之间，其中间值为 185 亿美元；而市场预期则为 185 亿美元。到 2027 年，其亏损额预计将降至 150 亿美元，这一数值也与市场预期相当。这样一来，该公司大约有 35 亿美元的可用资金，但管理层明确表示打算将这些资金主要用于人工智能领域的投资。

- **Funding.** The new Class C non-voting stock will be distributed one-for-one to existing shareholders, effectively creating a two-for-one split, with trading expected in late January. The distribution itself does not dilute relative economic ownership; subsequent external issuance would.

资金来源。新的 C 类无投票权股票将按 1:1 的比例分配给现有股东，实际上相当于进行了 2:1 的拆股操作，预计这些股票将于 1 月底开始交易。此次股票分配并不会稀释股东的实际经济权益，但后续若再发行新股，则可能会如此。

TXN -1%: Solid numbers with higher margins and above-seasonal guide, but crowded long heading into the print so reaction muted

TXN：跌幅为 1%；业绩表现良好，利润率较高，且预期值也高于同期水平。但由于在报告发布前已有大量多头持仓，因此市场反应较为平淡。

TXN delivered a strong beat and raise, with gross margin providing the biggest upside surprise and the rev guide broadly meeting elevated buyside expects.

TXN 的业绩表现远超预期，毛利率更是带来了最大的惊喜；其营收预期也基本符合市场较高的预期。

3Q revenue of $6.06B (+11% q/q, +28% y/y) beat Street by ~2% but landed exactly on the buyside's $6.05–6.1B. GM was 64.2%, ~260bps over Street and ~170bps over the ~62.5% bogey. The 4Q guide midpoint of $6.05B is flat q/q versus a normal ~-6% seasonal decline, and above the ~$5.95B bogey. The 4Q EPS guide midpoint of $2.62 vs bogey of $2.40

第三季度营收 60.6 亿美元（环比增长 11%，同比增长 28%），超出华尔街预期约 2%，但恰好落在买方预期的 60.5 亿至 61 亿美元区间。毛利率为 64.2%，高出华尔街预期约 60 个基点，也高出 62.5%的关键门槛约 170 个基点。第四季度指引中点为 60.5 亿美元，环比持平，而正常季节性降幅约为-6%，且高于 59.5 亿美元的关键门槛。第四季度每股收益指引中点为 2.62 美元，而关键门槛为 2.40 美元。

At $6.05B, 4Q annualizes to ~$24B, so Street's $25.1B for C27 needs only a modestly better-than-seasonal 1H to look conservative. FCF was $2.96B as capex fell to $463M from $1.2B a year ago. The 300mm build is rolling off, and the FCF inflection bulls playing for showing up. Analog grew +32% y/y and Embedded +21%.

第四季度的营收为 60.5 亿美元，按全年计算则相当于 1001#240 亿美元。因此，市场预计 C27 业务的营收为 251 亿美元，只要上半年的表现略好于同期水平，这一预期就属于保守估计。由于资本支出从去年的 12 亿美元降至 4.63 亿美元，公司的自由现金流为 29.6 亿美元。3 亿美金的产能建设已经完成，这有望提升公司的自由现金流。模拟产品领域的营收同比增长 32%，而嵌入式产品领域的营收则增长了 21%。

Details:

3Q Revenue: $6.06B vs. Street $5.93B and bogey ~$6.05–6.1B

第三季度营收：60.6 亿美元，而市场预期为 59.3 亿美元；实际数值略高，处于 60.5 亿至 61 亿美元之间。

3Q GM: 64.2% vs. Street 61.6% and bogey ~62.5%

第三季度毛利率：64.2%，而市场预期为 61.6%；在 1001 号洞的表现则为 62.5%，属于较差水平。

3Q EPS: $2.62 vs. Street $2.43 and bogey ~$2.50

第三季度每股收益：2.62 美元，而市场预期为 2.43 美元；同时，该公司的业绩也未达到预期，为 1001 美元，而预期值则为 2.50 美元。

3Q FCF: $2.96B vs. Street $2.26B

第三季度自由现金流：29.6 亿美元，而市场预期为 22.6 亿美元。

4Q Revenue Guide: $5.80–6.30B ($6.05B midpoint, flat q/q) vs. Street $5.76B and bogey ~$5.95B

第四财季营收预期：58 亿至 63 亿美元（中值为 60.5 亿美元，环比持平）；而市场预期为 57.6 亿美元，最差预测值为 59.5 亿美元。

4Q EPS Guide: $2.45–2.79 ($2.62 midpoint) vs. Street $2.31 and bogey ~$2.40

第四财季每股收益预期：2.45 美元至 2.79 美元（中间值为 2.62 美元），而市场预期为 2.31 美元；最糟糕的情况则是为 2.40 美元。

Key Takeaways

- **Demand.** The recovery broadened across end markets and regions, with modestly extending lead times and backlog consistent with the stronger demand environment. Mgmt believes TXN remains competitively positioned on delivery times. Personal electronics was approximately flat y/y and up upper single digits q/q, while communications equipment grew both sequentially and y/y.

  需求方面，各终端市场及地区的复苏态势日益明显；由于需求强劲，产品交货周期有所延长，订单积压量也有所增加。管理层认为，TXN 在交货速度方面仍具有竞争优势。个人电子产品的销售额同比基本持平，环比则实现了两位数增长；而通信设备的销售额则无论是环比还是同比都呈上升趋势。

- **Industrial.** Revenue increased more than 40% y/y and approximately 10% q/q, only just exceeding the previous 3Q22 peak. Mgmt's argument against calling the cycle exhausted is that four years of semiconductor-content growth have expanded the opportunity per system, while some industrial subsectors remain below their previous peaks. Aerospace and defense, energy infrastructure, test and measurement, and robotics are the strongest structural opportunities.

工业领域：营收同比增长超过 40%，环比增长约 10%，仅略高于 2022 年第三季度的峰值。管理层认为，目前还不能说该行业的周期已经结束，因为四年来半导体相关技术的进步提升了每个系统所带来的价值，而某些工业领域的表现仍低于此前的峰值。航空航天与国防、能源基础设施、测试与测量以及机器人技术，则是最具发展潜力的领域。

- **AI.** Data-center revenue grew approximately 95% y/y and 20% q/q, reaching roughly 13% of company revenue. Its limited seasonality is helping offset the usual year-end decline elsewhere. AI exposure also extends into industrial energy infrastructure and test equipment, so the direct data-center category understates the breadth of the opportunity, although mgmt did not quantify total direct-plus-indirect exposure.

在人工智能领域，数据中心的营收同比增长约 95%，环比增长 20%，约占公司总营收的 13%。由于数据中心的业务具有较低的季节性特征，因此能够抵消其他业务在年末时出现的下滑趋势。此外，人工智能技术还应用于工业能源基础设施和测试设备领域，因此仅考虑数据中心业务的话，会低估整体市场机会的规模；不过管理层并未给出直接相关业务与间接相关业务所带来的总收益数值。

- **Automotive.** Revenue increased mid-teens y/y and approximately 10% q/q, led by China and the U.S. Customers are increasing production from lean inventories; mgmt explicitly said it does not see inventory building up. Hybrid, electric and powertrain systems grew approximately twice as fast as the overall automotive business. Higher-content Chinese export vehicles are another favorable mix factor.

汽车业务方面，得益于中国和美国市场的推动，其营收同比增长约 15%，环比增长约 10%。客户们正在减少库存，从而增加生产规模；管理层明确表示不会让库存进一步上升。混合动力、电动车辆以及动力总成系统的增长速度则是整个汽车行业平均速度的两倍左右。此外，中国出口的、配置更高的汽车也是该业务的一大优势。

- **Pricing.** Pricing was flat y/y in 1H26 and turned modestly positive in 2H26, primarily in analog where customers requested more urgent supply. Mgmt characterized the contribution as small for 2026. Annual negotiations for 2027 are underway, with customers' supply requirements influencing pricing discussions; January is the next substantive update. .

价格方面，2026 年上半年价格与去年同期持平，而到了下半年则出现了轻微的上涨趋势，这一变化主要发生在模拟产品领域，因为客户们更迫切地需要这些产品。管理层认为，2026 年这种价格上涨的影响并不大。关于 2027 年的价格谈判正在进行中，客户的供应需求将会影响价格协商的结果；下一次有重大进展的更新时间将在 1 月。

- **Margins.** The margin surprise demonstrated substantial operating leverage before a large pricing reset. Sequential incremental gross margin was approximately 90%, helped by revenue, loadings, mix and pricing. Mgmt retained its longer-term 75–85% incremental gross-profit framework excluding depreciation, best assessed over a longer period rather than quarter to quarter.

利润率方面。在大幅调整价格之前，该公司的利润率表现出了较强的运营杠杆效应。得益于营收、产品结构、定价策略等因素的综合作用，其连续几期的毛利率均保持在 90%左右。管理层认为，如果不考虑折旧因素的话，该公司的长期毛利率应在 75%至 85%之间；这一数值更适合通过较长的时间周期来评估，而非逐季度来看。

- **Embedded.** Mgmt sees embedded's cyclical recovery as roughly one year behind analog's. Embedded gross margin has improved approximately 10 percentage points y/y, with recent gains of a couple of points per quarter.

嵌入式业务方面，管理层认为其周期性复苏节奏会比模拟芯片业务晚大约一年。嵌入式业务的毛利率同比提升了约 10 个百分点，最近每季度还能再提升几个百分点。

- **Capacity.** Existing cleanrooms and inventory are providing an advantage as industry supply tightens. TXN is ramping its new Malaysia assembly-and-test site because external partners are not supplying all the capacity it wants. Equipment deliveries and qualifications still govern the pace of expansion, particularly in the back end. Mgmt distinguishes these execution issues from the much longer constraint of having to build new cleanrooms.

产能方面，现有的洁净室设施及现有库存为公司在行业供应紧张的情况下带来了优势。由于外部合作伙伴无法提供其所需的所有产能，TXN 正在加快在马来西亚建设新的组装与测试基地的进度。设备供应情况以及相关设备的合格性，依然是制约公司扩张速度的因素，尤其是在后期阶段。管理层将这类执行层面的问题，与建造新洁净室这一更为长期且复杂的挑战区分开来。

- **CapEx.** CY26 spending remains $2–3B, with an ambition to spend toward the high end if equipment arrives as planned. February's capital allocation update will

address spending for different growth scenarios.

资本支出方面，2026 年的支出仍将保持在 20 亿至 30 亿美元之间；如果设备能按计划到货，公司有望将支出提高到更高水平。2 月的资本分配计划将会明确不同发展情景下的支出方案。

- **Cash flow.** Company-defined trailing FCF reached $8.4B versus $2.4B a year earlier, but includes $1.6B of CHIPS Act incentives comprising investment tax credits and direct funding. The recovery in cash generation is substantial; its sustainable level depends on future capital intensity and the incentive contribution.

现金流方面，该公司自行计算的累计自由现金流为 84 亿美元，而去年同期仅为 24 亿美元；不过这一数字中包含了 16 亿美元的《芯片法案》所提供的激励资金，这些资金包括投资税收抵免和直接拨款。公司现金生成能力的恢复十分显著，但其能否保持在这一水平，还取决于未来的资本投入规模以及各类激励措施的作用。

- **Robotics.** Mgmt cited approximately $500–$1,000 of TXN content per humanoid and expects stronger ramps in 2027. This is useful evidence of potential content expansion in industrial, which mgmt describes as its most attractive market for diversity, longevity and margins.

在机器人技术领域，管理层估计每个类人机器人相关的内容成本在 500 美元到 1,000 美元之间，并预计 2027 年这一数字还会进一步上升。这充分体现了工业领域在内容开发方面的巨大潜力；管理层认为，从多样性、产品寿命以及利润空间等方面来看，工业领域是其最具吸引力的市场。

Bull vs Bear Debate 多头与空头辩论

The broader bull thesis is that TXN is entering a period in which a cyclical recovery, rising semiconductor content and the benefits of its manufacturing investments reinforce one another. Industrial is only just back above its previous revenue peak despite four years of content expansion, automotive customers remain lean on inventory, and embedded is recovering later than analog. That combination provides several sources of growth beyond an immediate inventory catch-up. TXN's broad portfolio, long-lived design positions and internal manufacturing capacity can also make it a preferred supplier when customers prioritize reliable deliveries. Its 300mm manufacturing advantage is tangible: TXN estimates approximately 40% lower cost for an unpackaged chip versus production on 200mm wafers, supporting the longer-term margin opportunity as more production moves internally.

更广泛的看涨逻辑是，TXN 正进入一个周期，其中周期性复苏、半导体含量上升以及其制造投资带来的收益相互强化。尽管经历了四年的含量扩张，工业部门才刚刚回到此前营收峰值之上，汽车客户库存仍然偏低，而嵌入式业务的复苏晚于模拟业务。这种组合提供了除即时库存回补之外的多个增长来源。TXN 广泛的产品组合、长生命周期的设计定位以及内部制造能力，也使其在客户优先考虑可靠交付时成为首选供应商。其 300 毫米制造优势是实实在在的：TXN 估计，与 200 毫米晶圆生产相比，未封装芯片的成本约低 40%，随着更多生产转向内部，这支撑了更长期的利润率机会。

AI adds a faster-growing content opportunity. TXN's exposure spans power conversion, telemetry, sensing, cooling and other foundational components across compute and networking systems. Higher power density and more complex infrastructure can expand content per system, while application-specific products provide another route to participation. Industrial energy infrastructure and test equipment benefit from the same investment cycle. The quarter strengthened the bull case on operating leverage, demand breadth and the usefulness of TXN's manufacturing capacity. The margin improvement was particularly encouraging because the pricing contribution remained modest, leaving a potential additional earnings driver for 2027. Automotive demand and the later embedded recovery also broadened the sources of growth.

AI 带来了一个增长更快的内容机遇。TXN 的敞口涵盖电源转换、遥测、传感、散热以及计算和网络系统中的其他基础组件。更高的功率密度和更复杂的基础设施可以扩大单系统内容，而针对特定应用的产品则提供了另一条参与路径。工业能源基础设施和测试设备也受益于同一投资周期。本季度强化了关于经营杠杆、需求广度和 TXN 制造产能有用性的看涨理由。利润率改善尤其令人鼓舞，因为定价贡献仍然温和，为 2027 年留下了潜在的额外盈利驱动因素。汽车需求和较晚的嵌入式复苏也拓宽了增长来源。

The bear thesis is that TXN can deliver rising earnings while its multiple compresses as the cycle matures. Industrial has returned to its previous peak, automotive demand is accelerating and supply is tightening, all of which raise the question of how much recovery remains. Mgmt's content-growth argument is credible, but the call did not provide a quantified bridge separating end-unit demand, content gains, pricing and share gains. Broader industry checks also point to double ordering and longer lead times, although TXN itself did not disclose double ordering. Bears therefore see a risk that investors capitalize temporarily strong demand and margins as a permanently higher growth rate.

看空论点是，TXN 可以在周期成熟、估值倍数压缩的同时实现盈利增长。工业已回到此前峰值，汽车需求正在加速而供应趋紧，这些都令人质疑还有多少复苏空间。管理层关于含量增长的说法可信，但电话会议并未提供量化桥梁，将终端单位需求、含量提升、定价和份额增长区分开来。更广泛的行业核查也指向重复下单和交期延长，尽管 TXN 自身并未披露重复下单。因此，空头认为存在一种风险：投资者将暂时强劲的需求和利润率当作永久更高的增长率来资本化。

The AI thesis has limits as well. Direct data centers remain a minority of revenue, while some of the industrial strength depends on the same infrastructure investment cycle, reducing the diversification those categories might initially suggest. Existing data-center products are described as earning roughly corporate-average margins; more application-specific sockets could face greater price competition and potentially dilute mix. China-based competition and localization remain longer-term pricing and share risks, particularly after supply tightness eases. This quarter does not demonstrate a new competitive loss, but it also does not establish that future pricing increases or share gains will be durable.

人工智能相关业务也存在局限性。数据中心业务在总营收中所占比例仍然较低，而且其发展依赖于相同的基础设施投资周期，这降低了这些业务原本应有的多元化优势。现有的数据中心产品所能获得的利润率大致与行业平均水平相当；而那些针对特定应用设计的解决方案则可能面临更激烈的价格竞争，从而影响其盈利状况。来自中国的竞争以及本土化趋势，仍会带来长期的价格和市场份额方面的风险，尤其是在供应状况改善之后。本季度并未出现新的竞争劣势，但这也无法保证未来不会出现价格上升或市场份额下降的情况。

SPOT +6%: 4Q GM Fears Ease, Subscriber Adds Beat and Profit Guide Tops Street Despite Soft Revenue

SPOT 上涨 6%：第四季度业绩担忧有所缓解，新增订阅用户数量超出预期，且盈利预测也高于市场预期，尽管营收表现疲软。

Looks solid given positioning/sentiment and fears of Q4 Margin step down heading into the print. Cleared the key 4Q GM and opex bogeys, strong subscriber growth and improving operating leverage setting up a catalyst-rich 2027 with AI tiers and monetization upside. Pushback is print was far from a blowout, with another rev miss, nums not going up a ton and GM only slightly beating expects after pre-print cuts.

Should be good enough.

从市场定位、情绪状况以及人们对第四季度利润率可能下降的担忧来看，情况似乎相当不错。公司已经克服了第四季度毛利率和运营成本方面的难题，同时用户数量也在持续增长，运营效率也在提升。这些因素将为 2027 年带来诸多机遇，尤其是在人工智能相关业务及盈利模式方面。不过，也有观点认为，这份财报的表现并不算出色：营收再次未达预期，各项数据也没有显著上升，而在调整预期之后，毛利率也只是略微超过预期而已。不过，这样的表现应该也已经足够好了。

Call ongoing... **正在通话中...**

Details:

Premium revenue grew 17% y/y (+15% organic), supported by 9% ARPU growth (+7.5% organic), while ad revenue grew 10% (+9% organic). Gross margin benefited from revenue outpacing royalty costs and improved podcast economics, while elevated marketing and AI spending weighed on opex.

由于每用户平均收入增长了 9%（其中有机增长率为 7.5%），高端业务带来的收入同比增长了 17%（有机增长率为 15%）；而广告业务则实现了 10%的增长（有机增长率为 9%）。由于收入增长速度超过了版权费用，再加上播客业务的盈利状况有所改善，因此公司的毛利率有所提升。不过，较高的营销和人工智能相关支出则增加了运营成本。

4Q guidance is better than feared, with GM holding at 33.8% despite fears of a step-down from product investment, and operating income above Street, suggesting opex normalization. Premium subscriber guidance also beat, while revs softer.

第四季度的业绩预期优于市场担忧：尽管有人担心产品投资会减少，但通用汽车的市占率仍保持在 33.8%；营业利润也高于市场预期，这表明其运营成本已趋于正常水平。高级订阅用户的增长预期同样超出预期，不过整体营收则有所下降。

3Q26 Results vs. Street **2026 年第三季度业绩与市场预期对比**

- Revenue: €4.97B, +16% y/y (+14% FXN) vs. Street €4.98B

  营收：49.7 亿欧元，同比增长 16%（按固定汇率计算则为 14%）；市场预期为 49.8 亿欧元。

- Premium Revenue: €4.49B, +17% y/y (+15% organic) vs. Street €4.49B

溢价收入：44.9 亿欧元，同比增长 17%（其中有机增长率为 15%）；市场预期也为 44.9 亿欧元。

- Ad Revenue: €482M, +10% y/y (+9% organic) vs. Street €489M

广告收入：4.82 亿欧元，同比增长 10%（其中自然增长率为 9%）；而市场预期为 4.89 亿欧元。

- Premium Subs: 306M, +6M q/q vs. Street 305M

高级订阅用户数：3.06 亿，环比增加 600 万；而市场预期为 3.05 亿。

- MAUs: 788M, +11M q/q, +11% y/y vs. Street 788M

月活跃用户数：7.88 亿，环比增加 1100 万，同比增长 11%；市场预期也为 7.88 亿。

- Gross Margin: 33.0% vs. Street 32.9%

毛利率：33.0%，而市场预期为 32.9%

- Operating Income: €672M vs. Street €673M

营业利润：6.72 亿欧元，而市场预期为 6.73 亿欧元。

- EPS: €2.62 vs. Street €2.77

每股收益：2.62 欧元，而市场预期为 2.77 欧元。

4Q26 Guidance vs. Street 2026 年第四季度业绩指引与市场预期对比

- Revenue: €5.20B vs. Street €5.24B (includes ~230bps FX tailwind)

营收：52.0 亿欧元，而市场预期为 52.4 亿欧元（其中已计入 1001#230 个基点的汇率利好因素）。

- Premium Subs: 316M, +10M q/q vs. Street 315M

高级订阅用户数：3.16 亿，环比增加 1000 万；而市场预期为 3.15 亿。

- MAUs: 818M, +30M q/q vs. Street 819M

月活跃用户数：8.18 亿，环比增加 3000 万；而市场预期为 8.19 亿。

- Gross Margin: 33.8% vs. Street 33.8%

毛利率：33.8%，与市场预期一致。

- Operating Income: €820M vs. Street €811M

营业利润：8.2 亿欧元，而市场预期为 8.11 亿欧元。

NOK -6%: 3Q EBIT Beats by 33%; Bullish 2027 Optical/IP Outlook (+25–30% vs. Street +20%) Offsets Soft 4Q Guide and FCF

挪威克朗下跌 6%：第三季度息税前利润同比增长 33%；2027 年的光学/网络业务前景乐观，预期增长率为 25%-30%，高于市场预期的 20%；不过第四季度的业绩预期及自由现金流则有所下降。

NOK delivered a solid 3Q beat, driven by Mobile Infrastructure operating leverage, with revenue +9% y/y and EBIT 33% ahead of Street. Network Infrastructure grew 15% y/y, led by IP (+43%) and Optical (+18%), while Fixed Networks declined 22%. AI & Cloud revenue surged 123% y/y, with €1.5B in new orders vs. €2.8B last q, and management highlighting a strong pipeline.

得益于移动基础设施业务带来的优势，NOK 在第三季度的表现十分出色：营收同比增长 9%，息税前利润则高出市场预期 33%。网络基础设施业务营收同比增长 15%，其中 IP 业务增长了 43%，光通信业务增长了 18%，而固定网络业务则下降了 22%。人工智能与云服务领域的营收同比增长 123%，新订单额达到了 15 亿欧元，而上一季度这一数字为 28 亿欧元；公司管理层也指出，该领域的业务发展势头十分强劲。

Biggest positive is 2027 Optical/IP revenue growth guidance of 25–30% vs. Street ~20%, implying ~€8.8B revenue, 7% ahead of consensus. 2026 growth also tracking above the prior 18–20% target. Offsetting this, 4Q revenue guidance is slightly below Street, FY26 EBIT guidance was reiterated, and FCF conversion was cut to 35–55% from 55–75% as NOK invests an additional €400M in working capital to secure supply and support 2027 growth. Restructuring costs also increased.

最大的利好是 2027 年光学/IP 收入增长指引为 25–30%，而市场预期为 20%，意味着收入约为 88 亿欧元，比市场一致预期高出 7%。2026 年的增长也高于此前 18–20%的目标。抵消这一利好的是，第四季度收入指引略低于市场预期，2026 财年 EBIT 指引被重申，而自由现金流转化率从 55–75%下调至 35–55%，因为诺基亚额外投入 4 亿欧元营运资金以确保供应并支持 2027 年增长。重组成本也有所增加。

3Q26 Results vs. Street 2026 年第三季度业绩与市场预期对比

- Revenue: €5.15B, +9% y/y vs. Street €5.06B (+2%)

  营收：51.5 亿欧元，同比增长 9%；而市场预期为 50.6 亿欧元，同比增长 2%。

- Gross Profit: €2.30B vs. Street €2.23B (+3%)

  毛利润：23 亿欧元，而市场预期为 22.3 亿欧元，同比增长 3%

- Gross Margin: 44.6% vs. Street 44.2%

  毛利率：44.6%，而市场预期为 44.2%

- EBIT: €605M vs. Street €454M (+33%)

  息税前利润：6.05 亿欧元，而市场预期为 4.54 亿欧元（增长 33%）

- Operating Margin: 11.7% vs. Street 9.0%

  营业利润率：11.7%，而市场预期为 9.0%

- EPS: €0.09 vs. Street €0.07

  每股收益：0.09 欧元，而市场预期为 0.07 欧元。

- FCF: -€99M vs. Street +€646M

  自由现金流：-9900 万欧元，而市场预期为+6.46 亿欧元。

- Network Infrastructure Revenue: €2.16B vs. Street ~€2.17B (-0.7%)

  网络基础设施业务营收：21.6 亿欧元，而市场预期为 21.7 亿欧元，环比下降 0.7%

- Mobile Infrastructure Revenue: €2.90B vs. Street ~€2.78B (+4.5%)

移动基础设施业务营收：29.0 亿欧元，而市场预期为 27.8 亿欧元，同比增长 4.5%

- Mobile Infrastructure EBIT: €420M vs. Street ~€280M (+50%)

移动基础设施业务息税前利润：4.2 亿欧元，而市场预期为 2.8 亿欧元（同比增长 50%）

Guidance vs. Street 指引与市场行情

- 4Q26 Revenue: €6.2–6.4B (+20–24% q/q), midpoint €6.29B vs. Street €6.34B

2026 年第四季度营收：62 亿至 64 亿欧元（环比增长 20%至 24%），预估中值为 62.9 亿欧元，而市场预期为 63.4 亿欧元。

- FY26 EBIT: €2.1–2.6B, midpoint €2.35B vs. Street €2.4B; management expects somewhat above midpoint

2026 财年息税前利润：21 亿至 26 亿欧元，中间值为 23.5 亿欧元，而市场预期为 24 亿欧元；管理层预计该数值会略高于中间值。

- FY26 FCF Conversion: 35–55% vs. 55–75% prior

2026 财年自由现金流转化率：35–55%，而此前为 55–75%

- FY26 Capex: €750–850M vs. €800–900M prior

2026 财年资本支出：7.5 亿至 8.5 亿欧元，而此前为 8 亿至 9 亿欧元。

- FY27 Optical/IP Revenue Growth: +25–30% vs. Street ~20%, implying ~€8.8B vs. Street €8.2B

2027 财年，光学/IP 业务营收增长率预计为 25–30%，而市场预期为 1001#20%；据此计算，该业务营收应为 1002#€88 亿，而市场预期为 €82 亿。

NET / Cybersecurity: PHP2Shell flaws trigger global patching rush – WSJ / Reuters

网络/网络安全：PHP2Shell 漏洞引发全球紧急补丁更新潮——《华尔街日报》/路透社

WSJ reports AI-assisted researchers uncovered PHP2Shell, a critical vulnerability in PHP, which powers up to 70% of websites. Patches were rushed out Wednesday after news leaked early. Reuters reports Cloudflare detected millions of exploit attempts following disclosure, while banks, transport operators and governments temporarily suspended services to patch systems.

《华尔街日报》报道称，借助人工智能技术的研究人员发现了 PHP 中的严重漏洞 PHP2Shell，而目前有高达 70%的网站都在使用 PHP 技术。在相关消息泄露后，修复程序已于周三迅速推出。路透社则报道称，漏洞曝光后 Cloudflare 检测到了数百万次攻击尝试；与此同时，各银行、交通运营商以及政府机构也暂时停止了服务，以便对系统进行修复。

NFLX: Wolfe downgrades to Peer Perform as engagement fails to respond to higher content spend

NFLX：由于增加内容投入后用户参与度并未提升，沃尔夫将其评级下调至“与同行水平相当”。

Wolfe cuts NFLX from OP to Peer Perform, arguing the core engagement debate is moving against the bull case: despite ~$3B of incremental content spend over two years, Netflix has lost momentum while YouTube gains TV share and peers continue raising streaming investment. Wolfe still sees double-digit revenue growth possible in 2027 via pricing, international and ads, but worries sustained engagement weakness means lower incremental margins and eventual multiple compression; in a downside case of MSD revenue growth by 2030, it sees value closer to ~$50/share. Wolfe also sees strategic logic in a potential NBCUniversal deal, but worries valuation could be dilutive.

Wolfe 将 NFLX 评级从跑赢大盘下调至与同行持平，认为核心参与度之争正朝着不利于多头的方向转变：尽管两年内增量内容支出约 30 亿美元，Netflix 却已失去势头，而 YouTube 在电视端份额上升，同行也在继续加大流媒体投入。Wolfe 仍认为，到 2027 年，凭借定价、国际业务和广告，Netflix 有望实现两位数收入增长，但担心参与度持续疲软意味着增量利润率下降，并最终导致估值倍数压缩；在 2030 年收入实现中个位数增长的下行情景下，其认为价值更接近每股 50 美元。Wolfe 还认为，潜在 NBCUniversal 交易具有战略逻辑，但担心估值可能被稀释。

XYZ: BMO upgrades to OP as Square finally shows sustained volume + gross-profit acceleration

XYZ：由于 Square 的业务量持续增长，且毛利润增速加快，BMO 将其评级从“OP”上调至更高等级。

BMO upgrades Block to Outperform from Market Perform and raises PT to $100 from $85, arguing Square is delivering the long-awaited payments inflection after its cleanest quarter in nearly two years. GPV and gross profit are accelerating together, with stable QTD restaurant/retail trends, broader distribution and improved product velocity supporting momentum into 3Q and 2027. BMO sees better growth visibility, margins and product execution enabling multiple expansion.

BMO 将 Block 的评级从“市场表现”上调至“表现优异”，同时也将其目标价从 85 美元提升至 100 美元。该机构认为，Square 在经历了近两年来最出色的一个季度后，终于实现了人们期待已久的支付领域突破。其营收和毛利润都在快速增长，此外，餐厅及零售业务的状况稳定，产品分销范围也在扩大，这些因素都将有助于保持增长势头，直至 2027 年。BMO 预计，该公司未来的增长前景更加明朗，利润率也会更高，还有可能实现进一步扩张。

NBIS: Nebius secures $3.5B financing facility with Citi

NBIS：Nebius 从花旗银行获得了 35 亿美元的融资支持。

Nebius Group (NBIS) announced that it has entered into a $3.5B senior secured facility provided by Citi (C). The facility provides access to capital at “attractive” rates to support Nebius’s global capacity build-out, and advances the company’s diversified and sequenced funding strategy. It complements a funding base that includes customer prepayments and operating cash flows with other financing mechanisms. Ophir Nave, Chief Operating Officer of Nebius, said:

Nebius 集团（NBIS）宣布，已获得花旗银行提供的 35 亿美元高级担保贷款。这笔贷款能以“极具吸引力”的利率为该公司提供资金支持，有助于其拓展全球业务规模，同时也有助于实现多元化的融资策略。该贷款与客户预付款、经营现金流以及其他融资方式共同构成了公司的资金来源。Nebius 的首席运营官奥菲尔·纳维表示：

“We continue to execute our funding strategy as planned, and are pleased to have secured this financing from a leading global financial institution. This is a result of our disciplined approach to managing our balance sheet to fund our portfolio of projects, and once again demonstrates our ability to choose when and how we raise capital to support our growth.”

“我们继续按计划执行融资策略，很高兴能从一家全球知名的金融机构获得这笔资金支持。这得益于我们严谨的资产负债表管理方式，使得我们有能力为各项项目提供资金；这也再次证明了我们具备在适当的时间、以合适的方式筹集资金以推动业务发展的能力。”

TSLA / SpaceX: Musk seeks merger announcement in first half of 2027 – Bloomberg

特斯拉/SpaceX：马斯克希望在 2027 年上半年宣布合并消息——彭博社

Bloomberg reports Musk is pushing to announce a Tesla–SpaceX combination in the first half of 2027, aiming to close it before Trump leaves office. The companies have formed special committees, with Musk recusing himself from negotiations. Terms have not been agreed; the two businesses currently have a combined market value of roughly $3.7T.

据彭博社报道，马斯克正试图在 2027 年上半年宣布特斯拉与 SpaceX 的合并计划，希望能在特朗普卸任之前完成这一合并。两家公司已成立专门委员会来处理相关事宜，而马斯克则决定不参与这些谈判。目前尚未就合并条款达成一致；这两家公司的总市值约为 3.7 万亿美元。

TTWO: Hearing Yip says pre orders tracking to mid 20s opening weekend and low to mid 40s through Dec as TV advertising for GTA VI began 10/20

TTWO：据 Yip 透露，《GTA VI》的预购量在开幕周末时约为 20 多万份，而随着 10 月 20 日该游戏开始进行电视广告宣传，到 12 月时这一数字将上升至 40 万份左右。

NOW: Hearing Clev positive saying Q3 appeared to finish ahead of expects and Q4 set up appears positive

目前：有消息称克利夫表示，第三季度的业绩似乎优于预期，而第四季度的发展前景也相当乐观。

GOOGL: Hearing M-sci mixed saying advertising slowed exiting Sept and into October

GOOGL：据 M-sci 的反馈，9 月及 10 月初的广告业务增长势头有所放缓。

GTLB: Hearing M-sci positive saying SaaS customer adds trending better in Q3

GTLB：获悉 M-sci 检测结果呈阳性，称第三季度 SaaS 客户的增长势头更为强劲。

CLS: JPM sees 2027 revenue +80% y/y vs. Street +73%, but FCF/funding is the key swing factor

CLS：JPM 预计 2027 年的营收同比增长率将为 80%，而市场平均预期为 73%；不过自由现金流及资金状况才是决定性因素。

JPM expects Investor Day to reinforce a materially above-Street growth path, with 2027 revenue of ~$38.9B, +80% y/y vs. Street ~$35.7B/+73%, driven by compute/ASIC programs plus scale-out and emerging scale-up networking; 2027 EPS of $21.30 also sits above Street $19.88. The trade-off is mix: GM falls to ~11.2% as lower-margin compute grows, though opex leverage should still expand OM to ~8.8%. Working capital + ~$1.8B CapEx drive JPM to ~-$3B FCF in 2027, making FCF recovery and any 2028 capital raise the key debate. At ~10x CY28 EPS, JPM sees substantial re-rating potential if 2027 proves the investment trough. OW/$485.

摩根大通预计投资者日将强化一条显著高于华尔街预期的增长路径，2027 年营收为 1001 美元 38.9B，同比+80%，而华尔街预期为 1002 美元 35.7B/+73%，受计算/ASIC 项目以及横向扩展和新兴纵向扩展网络推动；2027 年 EPS 为 21.30 美元，也高于华尔街预期的 19.88 美元。取舍在于结构：随着低毛利计算业务增长，GM 降至 1003 美元 11.2%，不过运营费用杠杆仍应推动 OM 扩张至 1004 美元 8.8%。营运资金+1005 美元 1.8B 资本开支使摩根大通预计 2027 年 FCF 为 1006 美元-3B，这使得 FCF 复苏以及任何 2028 年融资成为关键争论点。按 1007 美元 10 倍 CY28 EPS 计算，如果 2027 年证明是投资低谷，摩根大通认为存在显著重估潜力。增持/485 美元。

MSFT: JPM sees Azure + M365 upside driving estimate revisions; CapEx trajectory is the key debate

MSFT：JPM 认为 Azure 与 M365 的强劲表现将推动估值上调；资本支出走势是各方争论的焦点。

JPM expects F1Q Azure growth above the updated 44–45% cc guide and M365 Commercial Cloud to accelerate to ~17% cc from 15% last q, supported by E5/E7 mix and continued Copilot seat adds. JPM models F1Q revenue $90.5B (+17% y/y), including Azure $32.2B (+44%) and M365 Commercial Cloud $25.6B (+17%), with the more important catalyst being sustained Azure/M365 acceleration into F2Q. FY27 CapEx guidance is the main watch as capacity additions remain critical to growth. OW/$625.

摩根大通预计第一财季 Azure 增长将高于更新后的 44–45%固定汇率指引，M365 商业云将从上季度的 15%加速至~17%固定汇率，受 E5/E7 组合和 Copilot 席位持续增加支撑。摩根大通模型预计第一财季营收 905 亿美元（同比+17%），其中 Azure 322 亿美元（+44%），M365 商业云 256 亿美元（+17%），更重要的催化剂是 Azure/M365 在第二财季持续加速。2027 财年资本支出指引是主要关注点，因为产能增加对增长仍至关重要。增持/625 美元。

PLTR: Citi raises PT to $250 as US Commercial + Government checks point to another major beat/raise

PLTR：花旗银行将目标价上调至 250 美元，因美国商业及政府领域的表现表明该公司有望再次取得优异业绩并上调股价。

Citi sees another quarter of strong upside across U.S. Government and Commercial despite tougher comps, with partner checks particularly strong in Federal and continued momentum across Sovereign AI, AI-native customers and international deployments. Citi expects U.S. Commercial growth >140% and FY27 revenue +60% y/y, ~10pts above Street, driven by Commercial +77%; another meaningful FY26 guide raise is expected. Buy/High Risk, PT $250.

花旗预计，尽管同比基数更高，美国政府与商业业务仍将连续第二个季度实现强劲上行，其中联邦业务的合作伙伴调研尤为强劲，主权 AI、AI 原生客户及国际部署也延续动能。花旗预计美国商业业务增长将超过 140%，2027 财年营收同比增长 60%，较市场预期高出约 10 个百分点，主要受商业业务增长 77%推动；预计 2026 财年指引将再次大幅上调。评级为买入/高风险，目标价 250 美元。更多一手研报请加微信：FCCNN88

CRWD: Mizuho raises PT to $275 as Falcon Guardian shows potentially material AI-security monetization upside

CRWD：瑞穗证券将 Falcon Guardian 的目标价上调至 275 美元，认为该公司在人工智能安全领域具有巨大的盈利潜力。

Mizuho's partner checks suggest Falcon Guardian could be a major incremental growth driver, with AIDR ARR up >79x from June–August and early Guardian pricing at >2x AIDR, implying meaningful monetization upside. Partners describe F4Q AI-security pipelines as very strong, with Guardian, Agentic Identity and SafeMind broadening CRWD's AI security stack. Mizuho also sees CRWD's FY28 framework for 20%+ y/y net new ARR growth as beatable vs. Street ~10%. OP, PT $275 from $250.

瑞穗的合作伙伴调查显示，Falcon Guardian 可能成为重要的增量增长驱动力，AIDR ARR 在 6 月至 8 月期间增长超过 79 倍，而 Guardian 早期定价是 AIDR 的 2 倍以上，意味着可观的变现上行空间。合作伙伴称第四财季 AI 安全管线非常强劲，Guardian、Agentic Identity 和 SafeMind 拓宽了 CRWD 的 AI 安全产品栈。瑞穗还认为，CRWD 对 2028 财年净新增 ARR 同比增长 20%以上的框架相比华尔街预期的 10%是可以超越的。跑赢大盘，目标价从 250 美元上调至 275 美元。

TEAM: Oppenheimer raises PT to $275, sees Cloud

reacceleration + TWC/MCP driving FY27 upside

团队观点：奥本海默将目标价上调至 275 美元，认为云计算业务将再度加速发展，同时 TWC 和 MCP 业务也将推动 2027 财年的业绩增长。

Oppenheimer expects F1Q27 revenue ~$1.78B, +24.5% y/y and ~3–5% above Street, with Cloud growth reaccelerating to ~34% from 30.8% last q on steady seats, DC migrations and pricing. The bigger upside is broader platform monetization: Teamwork Collection adoption is early (~1K of ~150K Cloud customers), while Teamwork Graph, MCP Server/CLI and JSM cross-sell should drive Collections upsell and higher Rovo usage; core subscription ARR is still ~23%. Oppenheimer sees multiple drivers supporting FY27 guidance upside and raises PT to $275 from $200; OP.

Oppenheimer 预计 2027 财年第一季度营收为 17.8 亿美元，同比增长 24.5%，较华尔街预期高 3%–5%，其中云业务增速从上一季度的 30.8%重新加速至 34%，得益于席位稳定、数据中心迁移和定价。更大的上行空间在于更广泛的平台变现：Teamwork Collection 的采用尚处早期（约 1000 家，而云客户有 15 万家），而 Teamwork Graph、MCP Server/CLI 和 JSM 交叉销售应会推动 Collections 追加销售和更高的 Rovo 使用率；核心订阅 ARR 仍为 23%。Oppenheimer 认为有多个驱动因素支撑 2027 财年指引的上行空间，并将目标价从 200 美元上调至 275 美元；OP。

NVDA / Nscale: Huang cites strong demand; urges faster deployment – CNBC / Bloomberg

NVDA / Nscale：黄表示需求强劲，呼吁加快部署速度——CNBC / 彭博社

CNBC reports Jensen Huang described neocloud demand as “off the charts.” Bloomberg reports he urged Nscale to accelerate delayed data-center projects facing equipment failures and power constraints. Huang said neoclouds have strong customers and demand but need working capital. Nscale also faces investor resistance to its roughly $30B IPO valuation target.

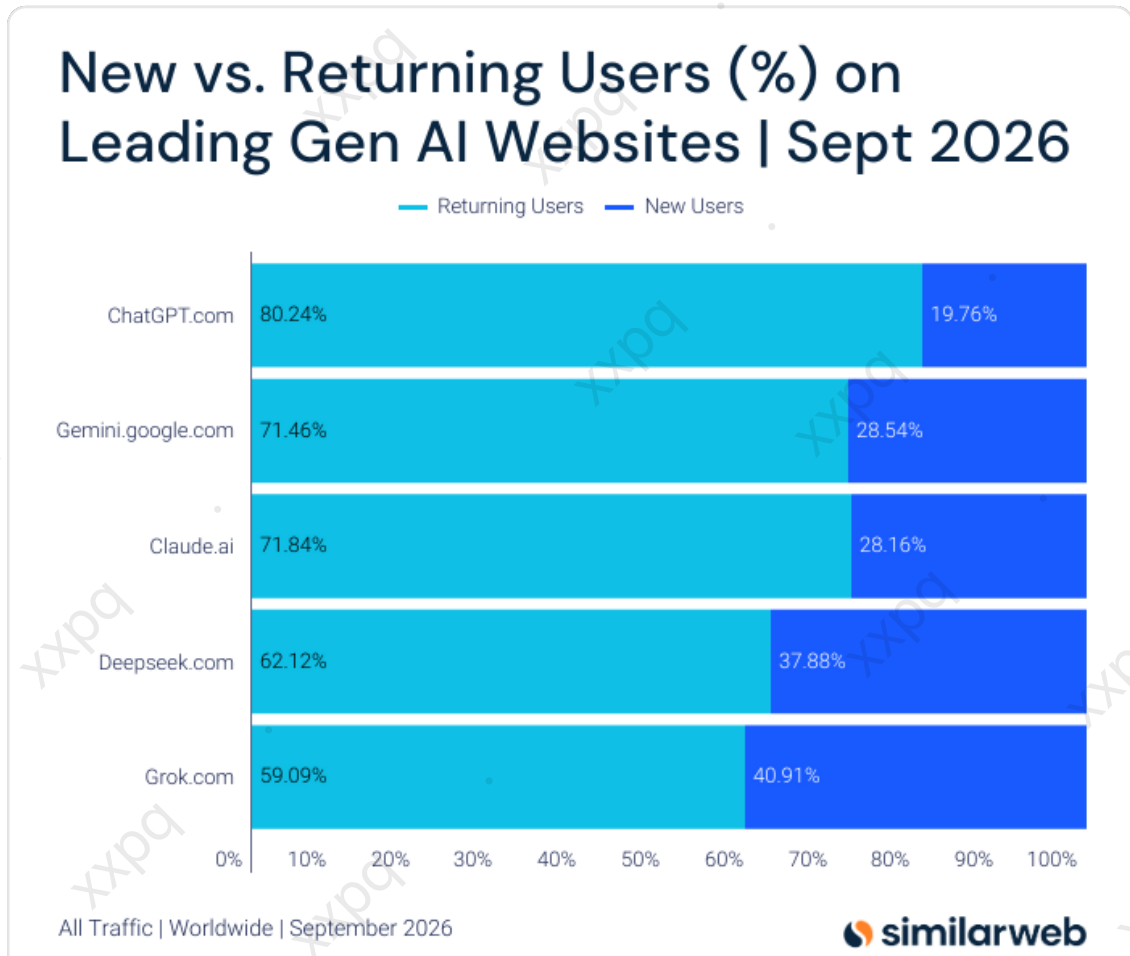

CNBC 报道称，黄仁勋将对“新云”服务的需求描述为“高得惊人”。彭博社则称，他敦促 Nscale 加快那些因设备故障和电力供应问题而停滞的项目的推进速度。黄仁勋表示，“新云”服务拥有强大的客户基础和巨大的需求，但需要相应的营运资金。此外，Nscale 在试图以约 300 亿美元的估值进行首次公开募股时，也面临着投资者的反对。

AAPL: Duo shipment target rises 44% to 14M – DigiTimes

AAPL：Duo 产品出货量目标上升 44%，达到 1400 万台——DigiTimes 报道

DigiTimes reports Apple raised its 12-month iPhone Duo shipment target to 14M units from 9.7M and notified Foxconn and component suppliers to increase orders. Preorder delivery times extend into 2027. Supply-chain assessments of the iPhone 18 Pro remain mixed, with strong foldable demand contrasting with concerns about the Pro models' higher prices.

据《DigiTimes》报道，苹果将 iPhone Duo 的 12 个月销售目标从 970 万台上调至 1400 万台，并已通知富士康及零部件供应商增加订单量。该产品的预购交货时间将延续到 2027 年。对于 iPhone 18 Pro 的供应链状况，评价不一：一方面市场对可折叠手机的需求很高，另一方面人们又担心其较高的价格。

NVDA / TSLA: Reported $2.8B investment to secure Samsung substrates – Reuters

NVDA / TSLA：据路透社报道，两家公司已投资 28 亿美元用于获取三星的半导体基板供应权。

Reuters reports, citing Maeil Business Newspaper, that Nvidia and Tesla are providing KRW3.7T, approximately $2.8B, for Samsung Electro-Mechanics' chip-substrate capacity. Nvidia accounts for KRW2.6T and Tesla KRW1.1T. The funding supports FC-BGA substrate facilities in Sejong and accompanies long-term supply arrangements.

据《每日经济新闻》的报道，路透社称，Nvidia 和特斯拉将共同为三星电子机械公司的芯片基板生产能力提升项目提供 3.7 万亿韩元，约合 28 亿美元。其中，Nvidia 出资 2.6 万亿韩元，特斯拉出资 1.1 万亿韩元。这些资金将用于在世宗市建设 FC-BGA 基板生产设施，同时也有助于建立长期的供应关系。

BESI / ASML: Orders beat; CEO rejects ASML rivalry – Reuters

BESI/ASML：订单量超出预期；首席执行官否认与 ASML 存在竞争关系——路透社

Reuters reports Besi's Q3 orders rose 96% to €342.6M versus €298M expected. Q4

revenue guidance is €283.4M, plus or minus 5%, versus €291.5M consensus, with some deliveries scheduled for customers' first-half 2027 production plans. Hybrid-bonding orders this year have exceeded twice the 2025 total. CEO Richard Blickman said he does not view ASML as a hybrid-bonding competitor. Besi also announced a €100M buyback.

路透社报道，Besi 第三季度订单增长 96%，达到 3.426 亿欧元，高于预期的 2.98 亿欧元。第四季度营收指引为 2.834 亿欧元，上下浮动 5%，而市场普遍预期为 2.915 亿欧元，部分交付计划定于客户 2027 年上半年的生产计划。今年的混合键合订单已超过 2025 年总量的两倍。首席执行官 Richard Blickman 表示，他不认为 ASML 是混合键合领域的竞争对手。Besi 还宣布了 1 亿欧元的回购计划。

NOK: AI demand drives earnings beat – Reuters

NOK：人工智能需求推动业绩超预期——路透社

Reuters reports Nokia's Q3 comparable operating profit reached €605M versus €453M expected, on revenue of €5.15B versus €5.05B. Sales to AI and cloud customers rose 123%; orders from those customers increased 118% to €1.5B. Management expects its combined Optical and IP Networks businesses to grow 25–30% in 2027 and maintained full-year guidance.

据路透社报道，诺基亚第三季度的营业利润为 6.05 亿欧元，高于预期的 4.53 亿欧元；营收则为 51.5 亿欧元，也高于预期的 50.5 亿欧元。面向人工智能和云服务领域的客户销售额增长了 123%，来自这些客户的订单额则增长了 118%，达到了 15 亿欧元。管理层预计，到 2027 年，其光网络与 IP 网络业务将会实现 25%至 30%的增长，并维持原有的全年业绩预期。

DeepSeek / TCEHY: Finalizing $15B funding round – Reuters

DeepSeek / TCEHY：150 亿美元融资轮即将敲定——路透社

Reuters reports DeepSeek is finalizing roughly $15B of funding at an approximately $75B pre-money valuation, doubling its original fundraising target. Existing shareholders Tencent and CATL are among the biggest investors in the round, which
