UPDATE

October 23, 2026 12:45 PM GMT

Biopharma | North America

A picture is worth a thousand words

Comprehensive US drug market analysis (IQVIA Rx). The latest weekly Total Prescription YoY growth (week ending 10/16) was +3.8% vs. +3.8% last week and +2.2% over the past 12 weeks.

For the week ended **Oct 16**, US total market weekly TRx YoY change was **+3.8% vs. +0.0% year ago (Exhibit12).** Rolling 4-week TRx YoY was **+3.4%** and rolling 12-week TRx YoY was **+2.2%**. Extended unit (EUTRx) weekly YoY growth was +1.9%, below TRx YoY (Exhibit 15). **Sequential weekly TRx** growth was **-0.5%** compared to +**0.9%** week before. Exhibit19 – Exhibit21 depict YoY momentum for key products. See details within.

GILD's Yeztugo (lenacapavir) was approved for PrEP on 6/18/2025. Latest week, total TRx (oral + injectable) were ~2,000 vs. ~2,100 previous week, and last week, TRx for injectable were ~1,300 vs. ~1,380 previous week. Using a linear method, we project the weekly injectable TRx needed to achieve 3Q26 cons of $273mn, utilizing 2Q26 implied $/script (Exhibit 5) but acknowledging we have limited visibility here at this point in the launch. Bigger picture, we note Yeztugo's persistence rate is >70%, and it has already secured 95% payor coverage. Moreover, most payers do not require copays, and only a limited number have prior authorization or step-edit requirements, which is an indication that most payers are aligning with USPSTF guidelines. For context, we model 2026 Yeztugo sales of $982mn US ($1,022mn WW) vs. VA cons $997mn US ($1,043mn WW)) and GILD's US guidance of ~$1.0bn. See Yeztugo vs. Descovy vs. Apretude launch comparison chart (Exhibit 4).

JNJ's Icotyde, partnered with Protagonist (not covered), was approved for the treatment of moderate-to-severe plaque psoriasis on 3/18/26 (LINK). Prescriptions were ~1,980 for the week vs ~1,720 last week. On JNJ's 3Q26 earnings call, mgmt highlighted continued strong early launch momentum, with >20k patients initiated and >9k unique prescribers in the U.S.. ~60% of patients are systemic-treatment naïve, while 20% are switching from oral therapies and the remaining 20% from biologics, which mgmt noted are other MOA classes rather than IL-23s (vs. 65%/20%/15% prior). Commercial access has expanded meaningfully, with preferred access across all national commercial plans, and JNJ is working to expand Medicaid and Medicare coverage. Mgmt noted that the IQVIA TRx capture rate improved to ~30–40% in 3Q (vs. ~25–30% in 2Q) and should continue to increase as recently secured commercial payer coverage takes effect (see our takeaways HERE). As such, we believe early IQVIA script data may continue not fully capture underlying prescribing dynamics. We estimate that achieving 2026 U.S. consensus revenue of $ 238 mn would require Icotyde TRx to ramp broadly in line with Otezla/Rinvoq (see Exhibit 6). This implies ~29-38k TRx are required in 2026, assuming a $8,285/ month list price and 0–25% gross-to-net. We also compare Icotyde's launch trajectory to recent psoriasis biologic and oral launches, alongside our estimated

path to consensus and new starts (see Exhibit 7).

MRK's Lipfendra (enlicitide; once-daily oral PCSK9i) was approved for emia (LDL lowering; incl. HeFH) on 7/16/26 (LINK). Prescriptions in the twelveth week post-launch were ~2,830 vs. ~2,600 in the eleventh week. We use a $10.50/day WAC ($315 per 30-day script) and, assuming a ~25% gross-to-net (GTN), estimate a net price of ~$239/script, in line with Repatha's DTC price (per TrumpRx), although we currently have limited visibility into Lipfendra-specific pricing. This implies ~23.5K TRx are required to achieve the 3Q26 VA cons estimate of $6mn (see Exhibit 9). We use WW consensus sales for 3Q26 as a proxy for U.S. sales, as consensus does not currently break out Lipfendra geographically; given approval to date is limited to the U.S., we view this as a reasonable approximation. At our HC conference in September, management reiterated that MRK's strategy is to expand the PCSK9 market, which it noted is only ~5% penetrated by current therapies (see our takeaways HERE). We note that early IQVIA script data may not fully capture underlying prescribing dynamics, while initial channel inventory could provide a potential tailwind to 3Q sales. We also acknowledge limited visibility into gross-to-net and script duration at this point in the launch.

BMY's Cobenfy was approved for schizophrenia on 9/26/24. Scripts are ~3,300 for the week vs ~3,300 last week. We estimate that to achieve 2026 consensus expectations, ~175K Cobenfy TRx are required to reach consensus estimate of $257mn (assuming a ~$1,450 net price, in line with the estimated price in our BMY model). We also show the Cobenfy launch to date and our estimate of the trajectory to achieve consensus relative to recent anti-psychotic launches, with TRx combined across all indications, in Exhibit 2 below for reference as well.

VRTX's Journavx was approved for acute pain on 1/30/25. Scripts are ~37,600 for the week vs ~36,400 last week. VRTX notes that hospital scripts are not captured by IQVIA - hospital/retail mix 45%/55% in 2025, and it reiterated in Aug 2026 that the average script duration is 10-11 days (LINK). To achieve 2026 VA cons estimate of $ 233 mn, we estimate that ~ 3.3 / 2.2 mn total scripts are needed for 11-day script duration at GTN of 80%/70% respectively. Based on quarterly Journavx sales and scripts, we estimate the GTN to be around 77% for the past two quarters. Using a linear method, we project the weekly TRx needed to achieve cons estimate, by flexing the GTN from 70% to 80% for 11-day scripts (Exhibit 3). In addition, we include a line where the actual scripts are grossed up with estimated hospital scripts.

Immunology pricing analysis. We updated the charts for 2Q26 (Exhibit 79 - Exhibit 84). We have divided the historical quarterly reported sales for Stelara, Tremfya, Skyrizi, Rinvoq, Dupixent, and Cosentyx with respective quarterly IQVIA TRx to see how volume from additional indications impacts price/script.

ABBV's Skyrizi and Rinvoq. Please refer to Exhibit 93 to Exhibit 97 for key Skyrizi charts and Exhibit98 to Exhibit 102 for key Rinvoq charts. Skyrizi and **Tremfya** latest 52-week NRx trend chart (Exhibit 6).

Alzheimer's launch. See Exhibit 143 to Exhibit 146 for LLY/Kisunla and BIIB/Eisai pi sales charts.

IQVIA total market prescription and sales trends

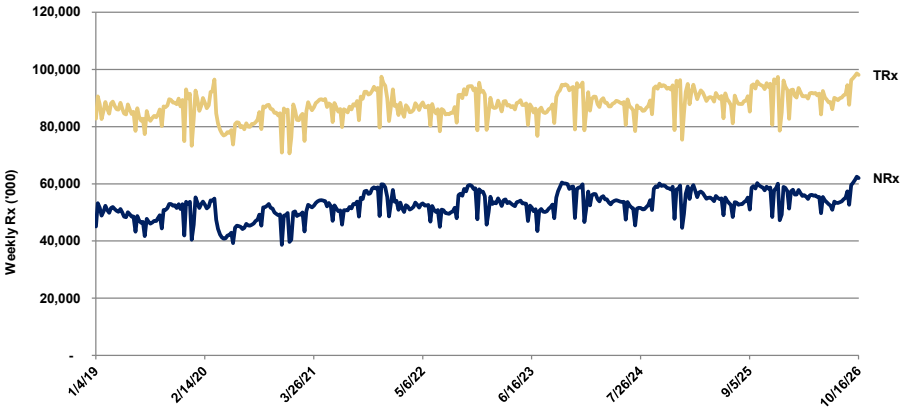

The IQVIA databases are different for prescription (Rx) and sales ($), and the IQVIA sales dollars only reflect list prices of drugs and not rebates/discounts. **TRx** represents total prescription dispensed including refills. **NRx** represents new prescriptions —that is, all scripts written except refills. However, the NRx also includes renewals—the script patients get when they run out of refills.

Exhibit12: Total Market weekly YOY TRx growth

Note: TRx= Total Prescription. See definition above.
Source: IQVIA

Exhibit 13: Total market absolute TRx and NRx

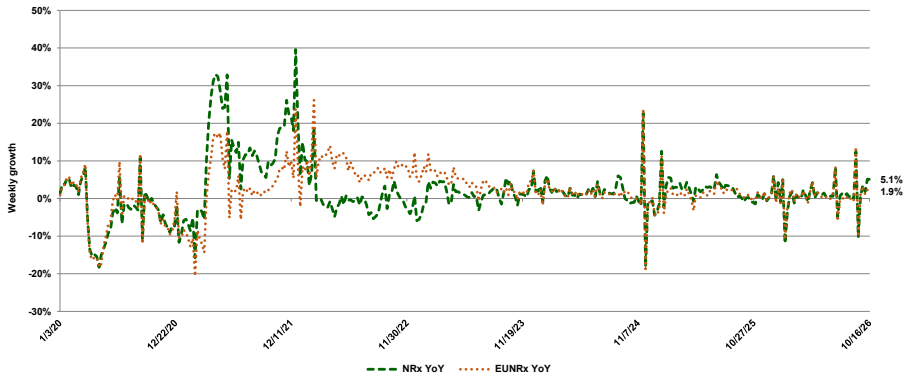

Note: NRx= New Prescription. See definition above.
Source: IQVIA

Extended unit (EU) data trends were more positive than prescription (Rx) trends, suggesting physicians were writing more 90-day prescriptions during that period (Exhibit 14 and Exhibit 15). EU figures (EUTRx / EUNRx) may represent a more accurate picture of demand because they take into account larger/longer-duration prescriptions, while NRx / TRx figures count both a 30-day and a 90-day prescription the same.

Exhibit 18: Total market Generic pharmaceutical monthly YOY volume vs. sales dollar growth

Source: IQVIA

The IQVIA databases are different for sales $ and unit volumes, and the IQVIA sales dollars only reflect list prices of drugs and do not reflect rebates/discounts. We believe that branded net price realization is about half of what is implied by subtracting sales dollar growth minus volume growth.

Source: IQVIA

Herceptin

AMGN's **Kanjinti** launched in July-19 and has gained share rapidly. Mylan/Biocon's **Ogivri** launched on December 2, 2019, PFE's **Trazimera** was launched on February 19, 2020, and Teva's **Herzuma** was launched on March 16, 2020. OGN's **Ontruzant** was launched on April 16, 2020, and data are available from Jun-20 in IQVIA. We have also added Daiichi's brand drug Enhertu (Novel brand), which was launched in Dec-19 and is approved for treating HER2-positive breast cancer.

Humalog

See Exhibit68 for weekly TRx share chart.

Exhibit 28: Biosimilar Humalog monthly sales share. We include Humalog A.G. (Insulin Lispro) in Humalog franchise.

Source: IQVIA

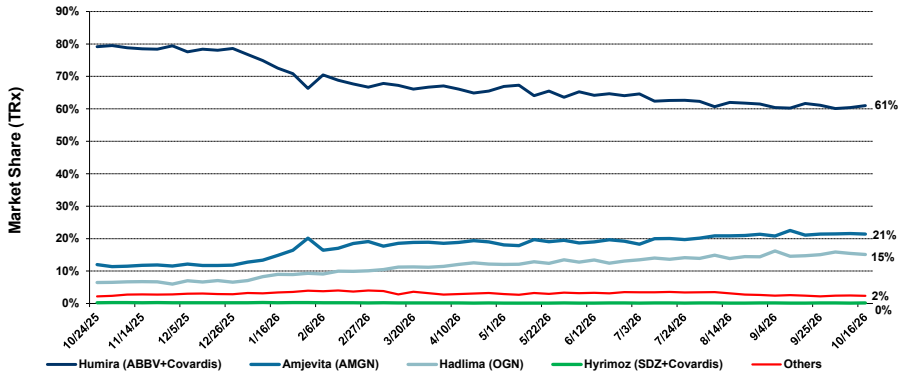

Humira

Humira first biosimilar, AMGN's Amjevita, has had slow launch based on IQVIA TRx (data are restricted). Three other biosimilars have launched, out of which two (Hadlima and Hyrimoz) have started to appear in IQVIA but have limited TRx data due to data restriction, as further discussed above.

Source: IQVIA

Lucentis

BIIB's and Samsung Bioepis's **Byooviz** was launched on June 2, 2022, and data are available from Jul-22 in IQVIA. Coherus's Cimreli was launched on October 3, 2022. IQVIA (announced on 11/4/22) prescriptions are restricted, due to a contractual condition between a supplier and the manufacturers.

知识星球：前沿信息收录
VX:FCCNN88

Exhibit 31: Biosimilar Lucentis monthly sales share

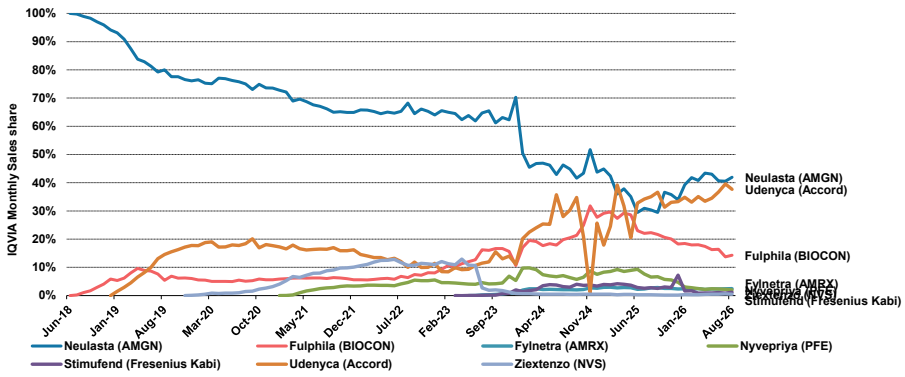

Source: IQVIA

Neulasta

Neulasta biosimilar, Biocon's Fulphila, market share (monthly sales) has flattened after January inflection, but there may be a reporting restriction in place. Biocon's Fulphila (biosimilar Neulasta) sales are available in IQVIA in July 2018. On Aug. 24 2018, IQVIA noted that a reporting restriction was implemented in the mail channel for a portion of the sales and prescription volumes for Fulphila, due to a contractual condition between a supplier and the manufacturer. IQVIA has not been able to confirm restriction given that this supplier has never dispensed this product.

Sandoz's biosimilar Ziextenzo picked up share in 2H20 but has flattened since the launch of **PFE's Nyvepria** in January 2021.

Prolia

Exhibit 36: Biosimilar Prolia 52-week TRx share

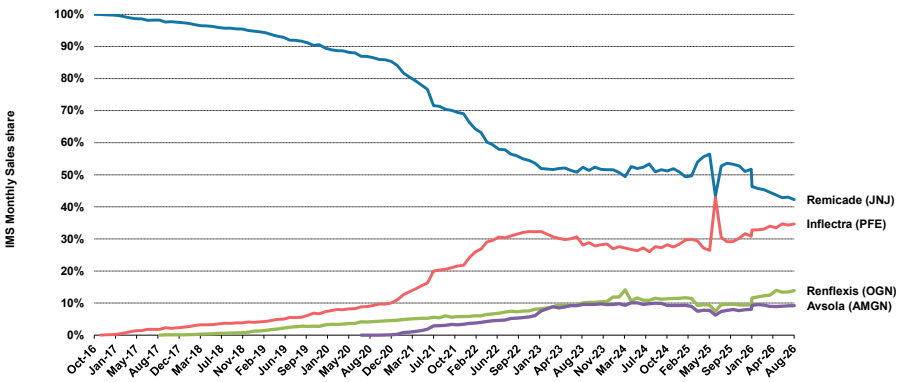

Note: Bomyntra appears in IQVIA but TRx are sporadic

Source: IQVIA

Remicade

Remicade biosimilar PFE's Inflectra adoption has decreased in recent months. OGN's Renflexis is slow to be adopted. PFE's **Inflectra** has been on the market for >3 years (launched in mid Dec-16). MRK's **Renflexis**, launched in late July-17, started to appear in IQVIA from September, 2017 only. We believe payers are choosing not to support the biosimilar because the pricing is not low enough below the net pricing of branded Remicade and because they would lose branded rebates on existing Remicade patients who remain on the brand. AMGN's **Avsola** was approved on Dec. 6, 2019 and launched in July 2020. Pfizer has decided not to launch Ixifi in the US.

Exhibit 37: Biosimilar Remicade monthly sales share. We track IQVIA sales rather than Rx because Remicade is an IV.

Rituxan

Teva's **Truxima** was launched in Nov-19 and is approved for all indications except pemphigus vulgaris (PV), which is immaterial. Pfizer's **Ruxience** launched on January 23, 2020. It currently lacks the rheumatoid arthritis (RA) and pemphigus vulgaris (PV) indications. Amgen's **Riabini** was launched in Jan-21 and was approved for RA on June 6, 2022. Per Roche, RA comprises ~20%+ of branded Rituxan sales. Commentary suggests that skinny labels are more of an issue for physicians than payers.

SGLT-2 only

Exhibit57: SGLT-2 TRx market share

Farxiga franchise includes Farxiga and Xigduo XR. Jardiance franchise includes Jardiance, Glyxambi, and Synjardy. Steglatro franchise in Steglatro and Steglujan. MRK records global revenues, which is recognized after MRK sells to 3rd party; PFE and MRK operating profit split is 40/60. PFE records revenues on product sold to MRK; product is sold at a price that will achieve PFE's share of the profit split. PFE revenues will be reflected on its own product revenue line (not in Alliance Revenues).

Immunology

Exhibit 77: Autoimmune drugs with their MOA and approved indications

Drug name	Route	MOA	Indication
Cimzia (UCB)	SQ	Anti-TNF	RA, Psoriatic arthritis, Ankylosing spondylitis, Crohn's disease, Plaque psoriasis, Axial s (nr-axSpA)
Enbrel (Amgen)	SQ	Anti-TNF	RA, Idiopathic arthritis, Psoriatic arthritis, Ankylosing spondylitis, Plaque psoriasis
Humira (Abbvie)	SQ	Anti-TNF	RA, Idiopathic arthritis, Psoriatic arthritis, Ankylosing spondylitis, Crohn's disease (adult & Ped), UC, Plaque psoriasis, Uveitis, Hidradenitis Suppurativa
Remicade (JNJ/Merck)	IV	Anti-TNF	Crohn's disease, UC, RA, Ankylosing spondylitis, Plaque psoriasis, Psoriatic arthritis
Simponi (JNJ)	SQ	Anti-TNF	Ankylosing spondylitis, Psoriatic arthritis, RA, UC
Kineret (Sobi)	SQ	IL-1	RA, Cryopyrin-Associated Periodic Syndromes
Dupixent	SQ	IL-4	Atopic dermatitis, Asthma, CRSwNP, Prurigo Nodularis, CSU, COPD, Bullous Pemphigoid, AFRS, EoE
Actemra (Roche)	IV+SQ	IL-6	RA, Idiopathic arthritis, Cytokine Release Syndrome, Giant Cell Arteritis
Kevzara (SNY/REGN)	SQ	IL-6	RA
Ebglyss (LLY)	SQ	IL-13	Atopic dermatitis
Cosentyx (Novartis)	SQ	IL-17	Plaque psoriasis, Psoriatic arthritis, Ankylosing spondylitis, Axial s (nr-axSpA), hidradenitis suppurativa (HS)
Siliq (Bausch)	SQ	IL-17	Plaque psoriasis
Taltz (LLY)	SQ	IL-17	Plaque psoriasis, Psoriatic arthritis, Ankylosing spondylitis, Axial s (nr-axSpA)
Bimzelx (USB)	SQ	IL-17	Plaque psoriasis
Stelara (JNJ)	IV+SQ	IL-12 and IL-23	Plaque psoriasis, Psoriatic arthritis, Crohn's disease, Ulcerative colitis
Omvoh (LLY)	IV+SQ	IL-23	Ulcerative colitis
Skyrizi (Abbvie)	SQ	IL-23	Plaque psoriasis, Psoriatic arthritis, Crohn's disease, Ulcerative colitis
Tremfya (JNJ)	SQ	IL-23	Plaque psoriasis, Psoriatic arthritis, Crohn's disease, Ulcerative colitis
Icotyde (JNJ)	Oral	IL-23	Plaque psoriasis
Ilumya (Sun)	SQ	IL-23	Plaque psoriasis
Nemluvio (Galderma)	SQ	IL-31	Atopic dermatitis, Prurigo nodularis
Xeljanz/XR (PFE)	Oral	JAK	RA, Psoriatic arthritis, Ulcerative colitis
Cibinqo (PFE)	Oral	JAK	Atopic dermatitis
Rinvoq (ABBV)	Oral	JAK	RA, Psoriatic arthritis, Atopic dermatitis
Olumiant (LLY)	Oral	JAK	RA
Entyvio (Takeda)	IV	integrin receptor	UC, Crohn's disease
Velsipity (PFE)	Oral	S1P	Ulcerative Colitis
Zeposia (BMY)	Oral	S1P	Multiple Sclerosis, Ulcerative Colitis
Orencia (BMY)	IV+SQ	T cell costimulation modulator	RA, Idiopathic arthritis, Psoriatic arthritis
Sotyktu (BMY)	Oral	TYK2	Plaque psoriasis, Psoriatic Arthritis
Bryhali (Bausch)	Lotion	corticosteroid	Plaque psoriasis
Duobrii (Bausch)	Lotion	halobetasol propionate and tazarotene	Plaque psoriasis
Vtama (Roviant)	Ointment	aryl hydrocarbon receptor	Plaque Psoriasis, Atopic dermatitis
Zoryve (Arcutis)	Ointment	PDE4	Plaque Psoriasis, Atopic dermatitis, Seborrheic dermatitis
Otezla (Amgen)	Oral	PDE4	Plaque psoriasis, Psoriatic arthritis, Oral ulcers associated with Behçet's disease
Eucrisa	Ointment	PDE4	Atopic dermatitis
Opzelura	Ointment	JAK	Atopic dermatitis, Vitiligo

SQ= Injection for subcutaneous use; IV= Injection for Intravenous use; RA= Rheumatoid arthritis; UC= Ulcerative colitis; CRSwNP= Chronic Rhinosinusitis with Nasal Polyps; EoE= Eosinophilic Esophagitis; PN= Prurigo Nodularis; COPD= Chronic Obstructive Pulmonary Disease; CSU= Chronic Spontaneous Urticaria; BP= Bullous Pemphigoid; AFRS= Allergic Fungal Rhinosinusitis. We do not add Entyvio in any of the charts since it is an IV and approved only for UC and Crohn's disease.

Cosentyx launched in Feb-15, Taltz launched in Apr-16, Siliq launched in Aug-17. Taltz was approved for ankylosing spondylitis on Aug. 26, 2019.
Source: IQVIA

IL-23

Comparison is confounded by different indications and dosing schedules. Stelara is approved for plaque psoriasis, psoriatic arthritis, Crohn's disease, and Ulcerative Colitis, whereas Tremfya, Skyrizi, and Ilumya are approved for plaque psoriasis and Omvoh is approve only for Ulcerative Colitis. Also, TRxs may not be directly comparable because Stelara and Tremfya are dosed every eight weeks, while Skyrizi and Ilumya are dosed every 12 weeks. Last, IQVIA data for Tremfya are unreliable due to restrictions.

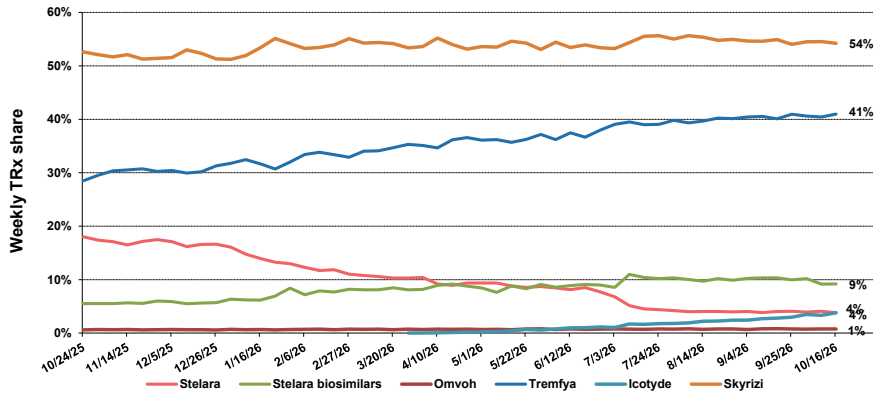

Exhibit 93: IL-23 launches: Tremfya, Skyrizi, Ilumya and Omvoh (we do not have Stelara launch data)

Both Tremfya and Skyrizi scripts are restricted and unreliable. Tremfya launched in July-17. Skyrizi launched in April-19. Ilumya launched in Oct-18. Omvoh launched in Dec-23.

Atopic dermatitis

Eucrisa (PFE) and Dupixent (SNY/REGN) TRxs may not be directly comparable. Eucrisa is an ointment, while Dupixent is an injectable with limited data capture. We understand there are no significant capture rate issues, so TRx should be a fair representation of true demand. Eucrisa is indicated for mild-moderate atopic dermatitis, while Dupixent is indicated for moderate-severe atopic dermatitis. Dupixent is also approved for moderate-severe asthma.

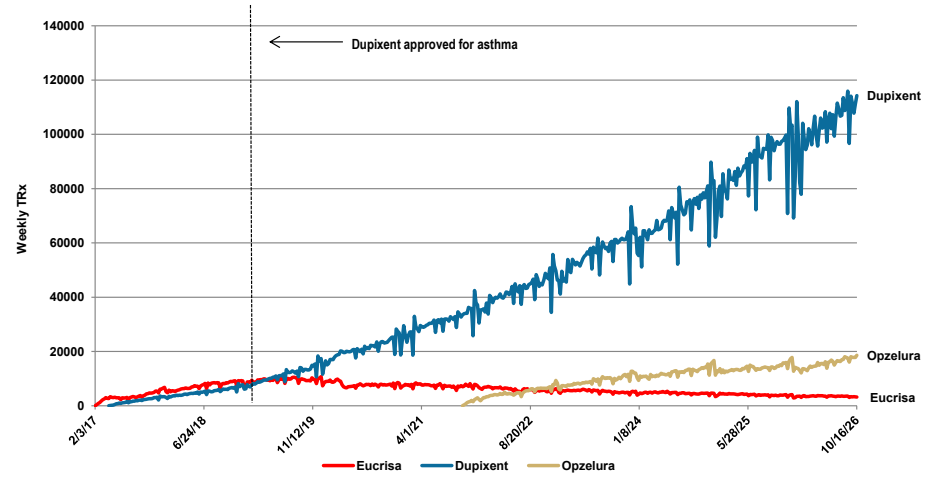

知识星球：前沿信息收录
VX:FCCNN88

Exhibit 108: Atopic dermatitis launches: Dupixent (SNY/REGN), Eucrisa (PFE) and Opzelura (INCY). However, ***TRxs may not be directly comparable*** because Eucrisa (PDE4) is an ointment that comes in 60g and 100g tubes, and is applied in a thin layer twice daily to affected areas, while Dupixent (IL-4 and IL-13) comes in a syringe (300 mg/ 2mL) and is given every other week.

Source: IQVIA

Exhibit 109: Atopic dermatitis launches: Dupixent (SNY/REGN) and Eucrisa (PFE). TRxs may not be directly comparable because Eucrisa (PDE4) is an ointment that comes in 60g and 100g tubes and is applied in a thin layer twice daily to affected areas, while Dupixent (IL-4 and IL-13) comes in a syringe (300 mg/ 2mL) and is given every other week.

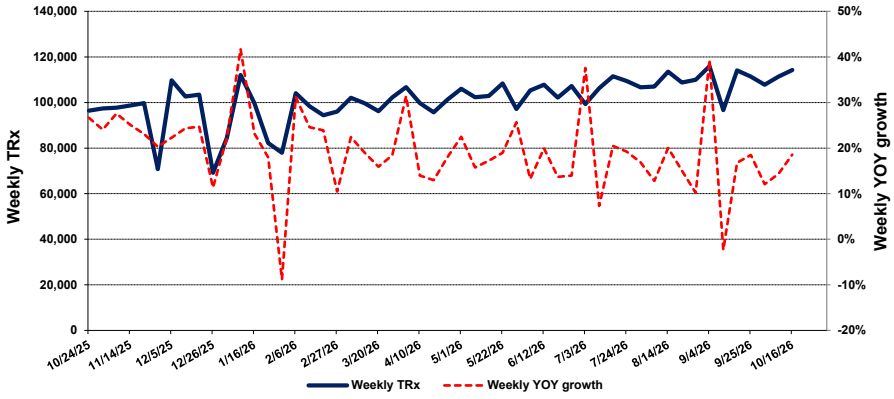

Dupixent got approved for Asthma on 10/21/2018.

Neurology

Migraine

Exhibit 121: Migraine drugs with their MOA and approved indications

Drug name	Route	MOA	Indication
Aimovig (Amgen)	SQ	CGRP	Migraine prevention
Emgality (Eli Lilly)	SQ	CGRP	Migraine prevention, cluster headache
Ajovy (Teva)	SQ	CGRP	Migraine prevention
Ubrelvy (Abbvie)	Oral	CGRP	Acute treatment of migraine with or without aura
Qulipta (Abbvie)	Oral	CGRP	Migraine prevention
Nurtec (Biohaven)	Oral	CGRP	Acute treatment and Migraine prevention
Vyepti (Lundeback)	IV	CGRP	Migraine prevention
Revyow (Eli Lilly)	Oral	serotonin (5-HT) 1F receptor agonist	Acute treatment of migraine with or without aura
Zomig (Amneal)	Oral	serotonin (5-HT) 1B/1D receptor agonist	Acute treatment of migraine with or without aura

SQ= Injection for subcutaneous use; IV= Injection for Intravenous use.
Source: Morgan Stanley Research

Aimovig (AMGN) script trends: Amgen processes all claims via its hub in batches, and sometimes there are catch-ups in the figures sent to IQVIA.

Emgality (LLY) is also approved for treatment of cluster headaches. The approval was on June 4, 2019. We are unable to identify scripts by indication so Emgality TRx includes both migraine and cluster headache.

Ajovy is also available as auto-injector. Ajovy launched autojector on April 27, 2020.

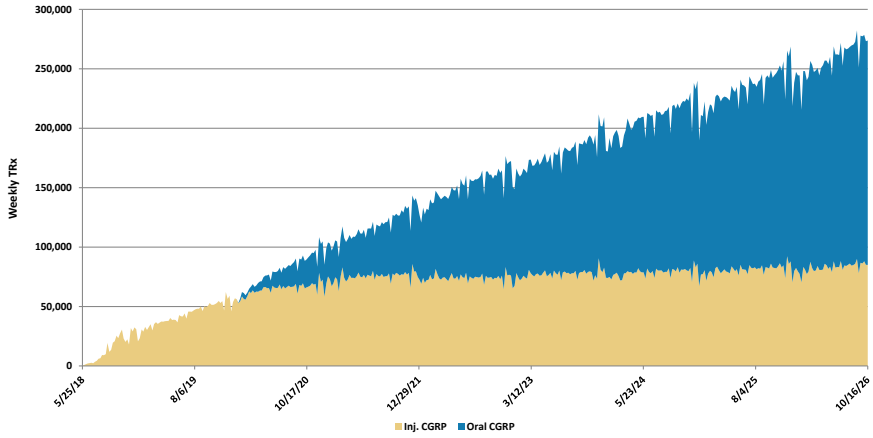

TRx may not be a good metric for comparing the three drugs over time due to differences in dosing frequency. Amgen's Aimovig is dosed either 70 mg or 140 mg (70 x 2 injections) *every month*, Teva's Ajovy is dosed either 225 mg *every month* or 675 mg (225 x 3 injections) *every three months*, and Lilly's Emgality is dosed 120 mg every month but with a 240 mg loading dose administered as two consecutive 120 mg injections for the first month.

One TRx for one drug may represent different numbers of months of therapy and/or doses. For example, assuming simplistically that one TRx represents one course of treatment, one Aimovig TRx represents one month of drug, one Ajovy TRx could represent one or three months' worth of drug, and one Emgality TRx could represent one month but could be one injection or three injections (including loading dose).

Oral CGRP (Ubrelvy and Nurtec) launches are trending above injectable Emgality. Both Ubrelvy and Nurtec TRx launch trends are above Emgality (Exhibit 129) and orals continue to gain share in overall market (Exhibit 122 & Exhibit 123).

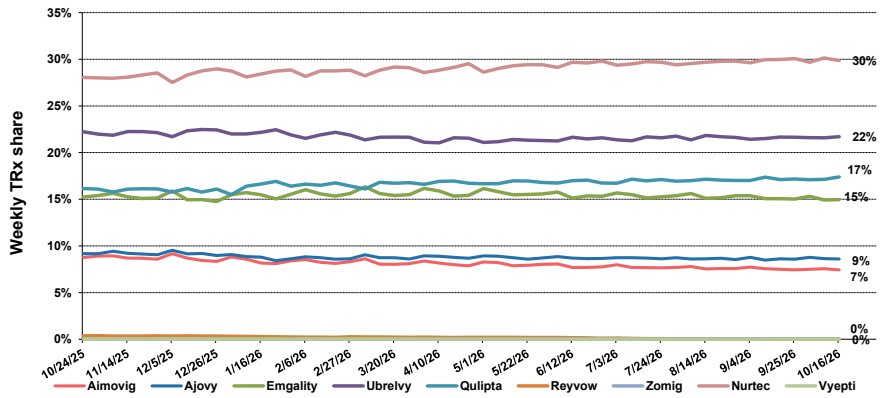

知识星球：前沿信息收录
VX:FCCNN88

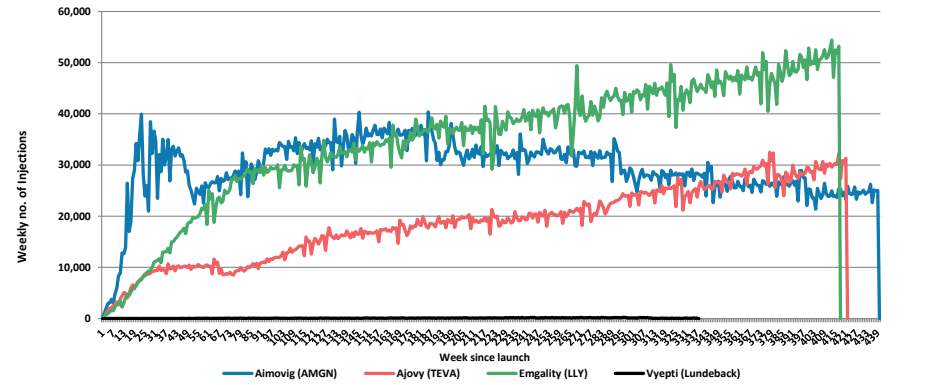

Exhibit 130: Recent oral migraine launches. Note Revyow is not a CGRP. Refer to Exhibit 77 for more details.

Source: IQVIA

Another helpful metric to compare may be number of injections. We estimate the number of injections prescribed as another means of comparison. For Aimovig and Emgality we assume no. of injections to be equal to EUTRx (mL) and for Ajovy 1 injection = EUTRx/1.5, because Aimovig and Emgality are 1 mL injections, while Ajovy is a 1.5 mL injection. Unfortunately, this would still be a confounded comparison because the reality is much more complicated than our assumption suggests—for example, for one Aimovig TRx with two doses, we cannot distinguish whether that would be for one month or two months.

Exhibit 131: CGRP weekly no. of injections since launch. Vyepti is an IV; hence EUTRx/TRx is not captured by IQVIA completely.

Definitions

TRx represents total prescriptions dispensed including refills.

NRx represents new prescriptions including renewals and excluding refills, so it does not represent new patient starts. Renewals are the scripts patients get to continue the drug when they run out of refills.

EUTRx / EUNRx (Extended Units) figures can represent a more accurate picture of demand because they include weighting of larger/longer duration Rx. Standard NRx / TRx / NRx count both a 30-day and a 90-day prescription the same. Counts include dispensed tablets, capsules, milliliters, and so forth. For solids, this is the number of tablets; for creams, grams; and liquids, mls.

NPA: "National estimates of prescriptions, or the rate at which drugs move out of the pharmacy and into the hands of a consumer via formal dispensed prescriptions".

NSP: "National sales estimates of product packages into retail drugstores, hospitals, clinics, and other nonretail type outlets".

NSP units: "Total amount of packages sold of a particular drug to the dispensing outlet/ chain/hospital."

NSP Price: "Is based on a number of sources, depending upon Class of Trade (Channel). It generally represents a best estimation of Net price without the impact of proprietary rebating by the manufacturer. Equation = Sales $ / Units".

知识星球：前沿信息收录
更多一手投研资料扫码加微信

知识星球：前沿信息收录
VX:FCCNN88

NSP Sales $: "Total amount of the sales into the dispensing outlets, chain, and health care providers from the manufacturers and distribution centers expressed in US dollars."

IQVIA sales data (NSP) is captured weekly, and grouped into 4 or 5 week 'months.' The weeks start in January, so the 5 week month falls at the end of each quarter: March, June, September, and December. Periodically, an extra week is added in November to ensure that DDD reporting months do not deviate too far from calendar months.

Brief from IQVIA on NSP Price: Note that NSP reflects significant Class Of Trade discounts and is often well below Gross Price even though it does not reflect rebates manufacturers pay to payers. "Our NSP Sales $'s represent a trade price or transaction price. It is the actual cost that was charged to acquire the pharmaceutical products as seen on the purchase invoice. NSP is a projected database. What that means is IQVIA collects the data from the sample (which for NSP represents about 88%) and using IQVIA methodology, the data is projected to 100% of the universe. The prices reflected in IQVIA National Sales Perspectives™ are the prices outlets (i.e. pharmacies, hospitals, clinics) pay for the products, whether purchased directly from a manufacturer or indirectly via a wholesaler or chain warehouse. Invoice line item discounts are included. Prompt-payment discounts and bottom-line invoice discounts are not included. Rebates, typically paid by the manufacturer directly to a customer, insurer, or PBM (Pharmacy Benefits Manager), are not reflected."

Morgan Stanley is acting as financial advisor to Organon & Co. ("Organon") in relation to a definitive agreement to be acquired by Sun Pharmaceutical Industries Limited, as announced on April 26, 2026. The transaction is subject to customary closing conditions, including receipt of required regulatory approvals and approval by Organon stockholders. This report and the information provided herein is not intended to (i) provide voting advice, (ii) serve as an endorsement of the proposed transaction, or (iii) result in the procurement, withholding or revocation of a proxy or any other action by a security holder. Organon has agreed to pay fees to Morgan Stanley for its financial services. Please refer to the notes at the end of this report.

Valuation Methodology and Risks

Bristol Myers Squibb Co (BMY.N)

Our 12-month price target of $41 is based on a ~7x P/E multiple applied to our 3Q27-2Q28 EPS estimate of $5.85. This multiple is below BMY's 10-year average (10x) and the industry (15x) but supported by our outlook for growth in 2026+.

Risks to Upside

- Sales from recently launched products are higher than projected
- Pipeline assets deliver positive data
- Competitor drugs are unsuccessful clinically/commercially
- M&A/business development fill the revenue gap

Risks to Downside

- Sales from recently launched products are lower than projected
- Pipeline assets experience setbacks
- Competitor drugs are successful clinically and/or commercially

Gilead Sciences Inc. (GILD.O)

We derive our PT from a Discounted Cash Flow Analysis that uses a WACC of 10% and a 3% Terminal Growth Rate.

Risks to Upside

- Better than expected Yeztugo launch in HIV PrEP
- Pipeline outperforms
- Accretive M&A

Risks to Downside

- Unexpected competition in HIV
- Failure to execute on next-gen HIV treatment pipeline
- Failure of CAR-T to achieve significant market penetration and/or failure to meaningfully expand CAR-T label

Johnson & Johnson (JNJ.N)

Our price target of $292 uses a ~20x P/E multiple applied to our 4Q27-3Q28 EPS of $14.36. We used a peer group comp analysis to arrive at our 2026 segment P/E's for Pharma/Medtech of 21x/18x (or ~20x on a blended basis for our base case).

Risks to Upside

- Growth in Pharma and Medtech segments is higher-than-anticipated
- JNJ delivers on new product cycles and pipeline, replaces Stelara patent loss

Risks to Downside

- JNJ faces ongoing litigation risks related to talc allegations
- Growth in Pharma and Medtech segments could be slower-than-anticipated

知识星球：前沿信息收录
更多一手投研资料扫码加微信
知识星球：前沿信息收录
VX:FCCNN88

Merck & Co., Inc. (MRK.N)

Our 12-month price target is based on a 17x P/E multiple applied to our 4Q27-3Q28 EPS estimate of $10.43. This multiple is above MRK's 10-year average (~14x) and the industry (15x) based on the company's robust emerging pipeline.

Risks to Upside

- MRK develops Keytruda co-formulations and extends the tail of the franchise
- MRK's pipeline is successful and contributes revenue towards the end of the decade
- ROI positive M&A

Risks to Downside

- MRK's Keytruda life cycle management strategy is unsuccessful
- MRK's pipeline is unsuccessful and will not contribute revenue in the outer-years
- Lack of M&A or ROI negative M&A

Vertex Pharmaceuticals (VRTX.O)

Our Price Target Is Derived From A Discounted Cash Flow Analysis Using A WACC Of 10% And A Terminal Growth Rate Of 2% Post 2040.

Risks to Upside

- Casgevy takes a significant market share
- Journavx takes a significant share
- Inaxaplin has a positive Ph3 interim readout
- Journavx has a positive Ph3 readout in DPN
- Atumelnant shows a competitive profile in CAH (Ph3)

Risks to Downside

- Casgevy/Journavx/Palsonify fails to take meaningful market share
- Journavx fails in Ph3 DPN
- Inaxaplin fails in Ph3
- Pove fails to take meaningful share in IgAN
- Atumelnant fails in Ph3 CAH

Inc, Biohaven Ltd, Biomarin Pharmaceutical Inc, BioNTech SE, BridgeBio Oncology Therapeutics, BridgeBio Pharma Inc, Bristol Myers Squibb Co, Cabaletta Bio Inc, CG Oncology, Compass Pathways PLC, Contineum Therapeutics, CRISPR Therapeutics AG, Cullinan Therapeutics, Cytokinetics Inc, Denali Therapeutics Inc, Disc Medicine Inc, Dyne Therapeutics Inc, Eikon Therapeutics Inc, Eli Lilly & Co., Enliven Therapeutics Inc, Erasca, Inc., Evommune Inc, Exelixis Inc., Fractyl Health Inc, Generate Biomedicines Inc, Genmab A/S, Gilead Sciences Inc., Halozyme Therapeutics, Inc, Immix Biopharma, Immunocore Holdings Ltd, Incyte Corp, Insmed Inc, Intellia Therapeutics Inc, Ionis Pharmaceuticals Inc, Johnson & Johnson, Kalaris Therapeutics, Kymera Therapeutics Inc, Kyverna Therapeutics, Lakefront Biotherapeutics, Legend Biotech Corp, MapLight Therapeutics, Merck & Co., Inc., Mirum Pharmaceuticals, Moderna Inc, Monopar Therapeutics, Neurocrine Biosciences Inc, Nurix Therapeutics Inc., Organon & Co., Pfizer Inc, Pharvaris N.V., Prime Medicine Inc, PTC Therapeutics, Q32 Bio Inc, Recursion Pharmaceuticals Inc, Regeneron Pharmaceuticals Inc., Regenxbio Inc, Rhythm Pharmaceuticals Inc, Rocket Pharmaceuticals Inc, Royalty Pharma Plc, Sana Biotechnology, Inc, Sarepta Therapeutics Inc, Silence Therapeutics Plc, Structure Therapeutics Inc, Tenaya Therapeutics Inc, Trevi Therapeutics Inc, Ultragenyx Pharmaceutical Inc, Vertex Pharmaceuticals, Viking Therapeutics Inc, Vir Biotechnology Inc, Zenas Biopharma Inc, Zentalis Pharmaceuticals Inc.

Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: Abbvie Inc., Alnylam Pharmaceuticals Inc, Amgen Inc., BeOne Medicines, Biogen Inc, BioNTech SE, Bristol Myers Squibb Co, Eli Lilly & Co., Genmab A/S, Gilead Sciences Inc., Halozyme Therapeutics, Inc, Incyte Corp, Insmed Inc, Johnson & Johnson, Lakefront Biotherapeutics, Merck & Co., Inc., Moderna Inc, Organon & Co., Pfizer Inc, Royalty Pharma Plc, Vertex Pharmaceuticals.

An employee, director or consultant of Morgan Stanley is a director of Merck & Co., Inc.. This person is not a research analyst or a member of a research analyst's household.

Morgan Stanley & Co. LLC makes a market in the securities of 4D Molecular Therapeutics Inc, ABSCI CORP, Acadia Pharmaceuticals Inc, Alector Inc, Alumis Inc., Amgen Inc., Arcus Biosciences Inc., Arcutis Biotherapeutics, Inc., Arrowhead Pharmaceuticals Inc, Arvinas Inc, Atea Pharmaceuticals Inc, Belite Bio Inc, BeOne Medicines, Bicara Therapeutics, BioAge Labs Inc, Biogen Inc, Biohaven Ltd, BridgeBio Oncology Therapeutics, Celldex Therapeutics Inc, CG Oncology, Cullinan Therapeutics, Denali Therapeutics Inc, Disc Medicine Inc, Dyne Therapeutics Inc, Enliven Therapeutics Inc, Immix Biopharma, Immunocore Holdings Ltd, Incyte Corp, Ionis Pharmaceuticals Inc, Kymera Therapeutics Inc, Kyverna Therapeutics, Mirum Pharmaceuticals, Nurix Therapeutics Inc., Regeneron Pharmaceuticals Inc., Regenxbio Inc, Rhythm Pharmaceuticals Inc, Rocket Pharmaceuticals Inc, Sana Biotechnology, Inc, Sarepta Therapeutics Inc, Structure Therapeutics Inc, Trevi Therapeutics Inc, Ultragenyx Pharmaceutical Inc, United Therapeutics Corp, Vertex Pharmaceuticals, Vir Biotechnology Inc, Zenas Biopharma Inc.

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of September 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
Stock Rating Category	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1599	43%	455	48%	28%	783	44%
Equal-weight/Hold	1563	42%	394	42%	25%	763	43%
Not-Rated/Hold	2	0%	1	0%	50%	1	0%
Underweight/Sell	570	15%	96	10%	17%	227	13%
Total	3,734		946			1774	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over

知识星球：前沿信息收录
VX:FCCNN88

the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

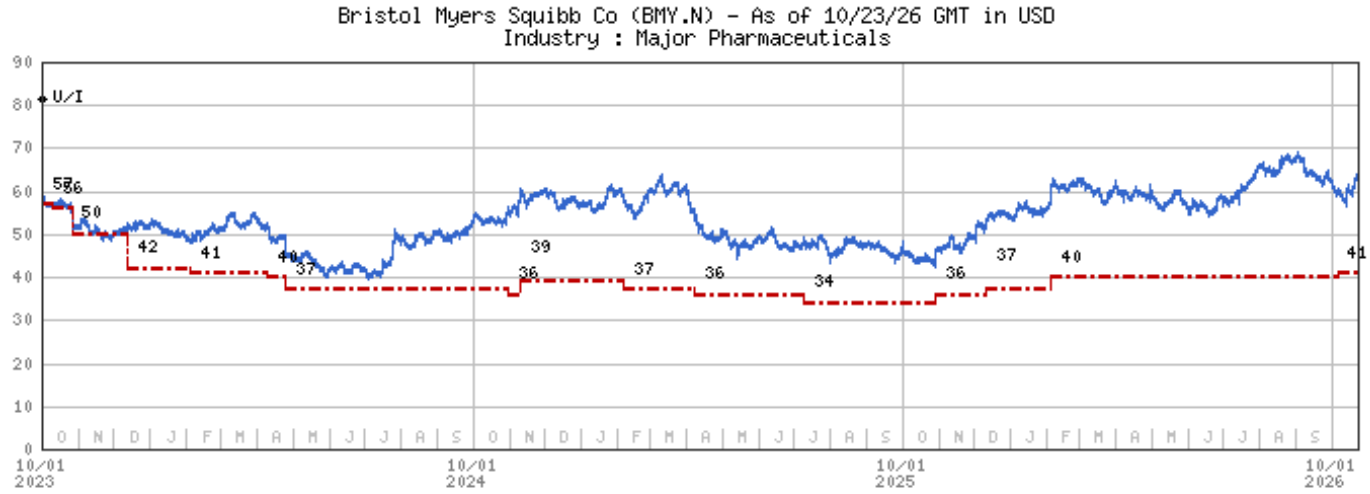

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.

Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/ res.

For Morgan Stanley specific disclosures, you may refer to https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

A member of Research who had or could have had access to the research prior to completion owns securities (or related derivatives) in the Abbvie Inc., Amgen Inc., Eli Lilly & Co., Gilead Sciences Inc., Johnson & Johnson, Merck & Co., Inc., Pfizer Inc. This person is not a research analyst or a member of research analyst's household.

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at http://www.morganstanley.com/matrix.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at http://www.morganstanley.com/matrix.

Any access and/or use of Morgan Stanley Research is subject to Morgan Stanley's Terms of Use (http://www.morganstanley.com/terms.html). By accessing and/or using Morgan Stanley Research, you are indicating that you have read and agree to be bound by our Terms of Use (http://www.morganstanley.com/terms.html). In addition you consent to Morgan Stanley processing your personal data and using cookies in accordance with our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html), including for the purposes of setting your preferences and to collect readership data so that we can deliver better and more personalized service and products to you. To find out more information about how Morgan Stanley personal data, how we use cookies and how to reject cookies see our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html). Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Any non-customer reader within the scope of Article 7-1 of the Taiwan Stock Exchange Recommendation Regulations accessing and/or receiving Morgan Stanley Research is not permitted to provide Morgan Stanley Research to any third party (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities regarding Morgan Stanley Research which may create or give the appearance of creating a conflict of interest. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation or a solicitation to trade in such securities/instruments. MSTL may not execute transactions for clients in these securities/instruments.

Morgan Stanley is not incorporated under PRC law and the research in relation to this report is conducted outside the PRC. Morgan Stanley Research does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC. PRC investors shall have the relevant qualifications to invest in such securities and shall be responsible for obtaining all relevant approvals, licenses, verifications and/or registrations from the relevant governmental authorities themselves. Neither this report nor any part of it is intended as, or shall constitute, provision of any consultancy or advisory service of securities investment as defined under PRC law. Such information is provided for your reference only.
