US EQUITIES COLOR: ON THE WEEK

美国股票市场周度表现

10 October 2026 | 4:04 AM China Standard Time

Share PDF

On the week, Asset Mgrs finished moderate net sellers while HFs balanced. Thematically, macro chop (Oil / Rate volatility remains high) + anticipation into earnings contributed to a lack of client activity for the majority of the week. Activity picked up on Thursday, where our desk noted a heavy wave of selling in Semis / AI / around Open AI Rev headlines that continued through Friday despite the clarification update. This morning's snapback yet another example high velocity sentiment swings that have become a feature of the AI investing landscape (and a dynamic that has contributed to choppy price action & investor performance in recent months). In addition, we saw long supply in Telcos on the SPCX announcement and profit-taking in Managed Care post the Medicare STARs results last night.

本周，资产管理机构最终小幅净卖出，对冲基金则基本持平。从主题上看，宏观市场波动（油价 / 利率波动仍处高位）以及对财报季的期待，使客户在本周大部分时间里交投清淡。周四市场活动有所升温，我们的交易台注意到，半导体 / 人工智能板块以及围绕 **OpenAI** 营收相关消息出现一波集中抛售；尽管之后发布了澄清更新，抛售仍持续至周五。今天早盘的快速反弹，再次体现了情绪高速波动的特点；这种现象已成为人工智能投资领域的一大特征，也令近几个月价格走势震荡、投资者表现承压。此外，**SPCX** 公告发布后，我们观察到电信股出现多头仓位供给；昨晚 **Medicare STARs** 结果公布后，管理式医疗板块则出现获利了结。

Prime: US equities were slightly net sold on the week, driven by short sales modestly outpacing long buys in Single Stocks. HFs rotated into Industrials and out of Info Tech (most notably on Thursday) this week, a notable reversal from the trends seen since the start of September. At the same time, Health Care stocks saw de-grossing activity for a 4th consecutive week amid continued intra-sector volatility and price gyrations. **US L/S Gross leverage** rose +3.8 pts to 213% (53rd percentile one-year), while **US L/S Net leverage** increased modestly for the first time in four weeks by +0.5 pts to 46.9% (2nd percentile one-year).

主经纪商：本周美国股票小幅净卖出，原因是单只股票的卖空规模略高于多头买入。对冲基金本周转向工业股，并减持信息技术股（周四最为明显），这与自 **9** 月初以来的趋势形成显著反转。与此同时，在板块内波动持续、股价大幅震荡的背景下，医疗保健股连续第四周出现去杠杆活动。美国多空总杠杆上升 **3.8** 个百分点至 **213%**（一年期分布第 **53** 百分位）；美国多空净杠杆四周来首次小幅上升 **0.5** 个百分点至 **46.9%**（一年期分布第 **2** 百分位）。

S&P implied move through next Friday (10/16) is 1.06%. Macro focus for the week will be on CPI (last major inflation print before Fed's Oct meeting). Official start to Q3 earnings season with 7% of S&P market cap reporting, kicking off with the big banks on Tuesday. Watching for any headlines out of the International AI Summit (Wed) and SEMICON (Tues-Thurs).

标普 **500** 指数截至下周五（**10/16**）的隐含波动幅度为 **1.06%**。本周宏观焦点将是 **CPI** 数据（也是美联储 **10** 月会议前最后一项重要通胀数据）。第三季度财报季将正式拉开帷幕，标普 **500** 指数中占市值 **7%**的成分股将公布业绩，周二首先由大型银行打头阵。我们还将关注国际人工智能峰会（周三）和 **SEMICON**（周二至周四）是否传出任何消息。

For earnings, the headline bar is high – consensus is +27% y/y, the highest estimate since '21 - while the median stock is far more reasonable at 9% y/y (vs. 14% in Q2). Last quarter, the frequency of beats remained historically high, but beats were rewarded at one of the smallest outperformances vs S&P on record (35bps vs 95bps historically). Mag7 in focus after having its most volatile quarter on record in Q2 - positioning here has quickly shifted from YTD lows in June (14%) to now the highest on record (22% of US exposure) on our Prime book. (Sharkey's Playbook)

财报方面，市场预期门槛较高——一致预期同比增长 **27%**，为 **2021** 年以来最高；而个股业绩预期中位数则合理得多，为同比增长 **9%**（第二季度为 **14%**）。上季度，业绩超预期的比例仍处于历史高位，但超预期股票相对标普 **500** 指数的超额表现却是有记录以来较低的水平之一（**35** 个基点，历史平均为 **95** 个基点）。第二季度"七巨头"的波动性创历史新高，因此其表现备受关注。我们的 **Prime** 业务账簿显示，相关持仓已迅速从 **6** 月的年内低点（**14%**）升至目前的历史最高水平（占美国市场敞口的 **22%**）。（**Sharkey** 投资策略手册）
