3Q26 beat; niche memory remains strong

Maintain Buy; cut TP to CNY489, implying 84.1% upside

Results continued to beat expectations

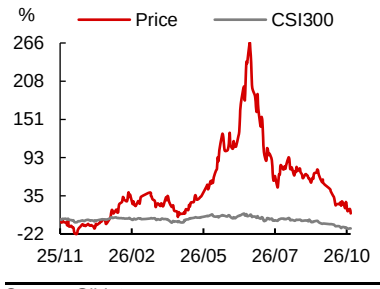

GigaDevice reported its 3Q26 results. In 9M26, revenue reached CNY20.297bn (+197.1% y-y), with a gross margin of 66.2% (+27.6pp y-y), net profit of CNY11.066bn (+921.6% y-y), and net profit excluding non-recurring items of CNY9,434mn (+805.3% y-y). In 3Q26 alone, revenue reached CNY8,732mn (+225.7% y-y/+18.4% q-q), with gross margin at 70.3% (+29.6pp y-y/+3.8pp q-q). Net profit was CNY4,209mn (+728.9% y-y/-22.0% q-q), with the q-q decline mainly reflecting fair-value changes, while net profit excluding non-recurring items reached CNY4.55bn (+814.4% y-y/+31.0% q-q). The 3Q26 revenue, gross margin and net profit all exceeded our previous expectations. According to the company's 3Q26 report, the strong performance was mainly driven by tight supply in the memory chip industry, rising memory product prices and sales volumes, and increased shipments of MCUs and other products.

Cut TP to CNY489; maintain Buy with 84.1% upside

Given stronger-than-expected revenue growth and gross margin improvement, we raise our 2026/27/28F revenue forecasts by 25%/22%/17% to CNY27.9bn/CNY40.5bn/CNY46.6bn. We also lift our 2026/27F gross margin forecasts by 3.7pp/0.1pp, while keeping our 2028F forecast unchanged. Factoring in operating leverage from a larger revenue base, we lower our 2026/27/28F operating expense ratio forecasts by 3.4pp/2.0pp/2.6pp, lifting our net profit forecasts by 40%/23%/20% to CNY14.3bn/CNY17.2bn/CNY18.3bn. With 2026 now in its final quarter, we roll forward our valuation base year from 2026F to 2027F. We apply a target P/E of 20x 2027F earnings (vs. 50x 2026F previously), representing a modest discount to the peer average of 23.5x 2027E P/E (vs. 51.7x 2026F previously), mainly reflecting our expectation that GigaDevice's 2027-28F earnings CAGR will trail the peer average. Based on our 2027F EPS of CNY24.43 (vs. CNY14.61 for 2026F previously), we lower our TP to CNY489 (from CNY730), implying 84.1% upside, and maintain our Buy rating. The stock currently trades at 10.9x 2027F P/E. **Key downside risks** include macroeconomic and industry volatility, supply-chain disruptions, product price volatility and foreign exchange risk.

Company profile

GigaDevice is one of China's leading fabless semiconductor companies. Its core product lines include memory (Flash, niche DRAM), 32-bit general-purpose MCUs, smart human-interface sensors, analog products and total solutions.

Valuation Methodology

Our target price of CNY489 is based on a 20x target P/E multiple and our 2027F EPS of CNY24.43. Our target multiple represents a discount to the peer average 2027E P/E, reflecting our expectation of slower earnings growth for the company vs. peers in 2027–2028F. The stock's benchmark index is the CSI 300 Index.

Risks that may impede the achievement of the target price

Key downside risks include macroeconomic and industry volatility, supply chain disruptions, product price volatility, and foreign exchange risk.

ESG

According to the company’s ESG report, the controlled disposal rate of solid waste and the centralized recycling rate of solid waste both reached 100% in 2025.

Such information and opinions do not take into account the particular investment objectives, financial situation, or specific needs of any recipient of this report, and under no circumstances shall the information contained herein or the opinions expressed herein constitute a personal recommendation or actionable investment advice for any individual. Investors shall make their own independent evaluation of the information and opinions contained herein, and make decisions independently and prudently at their own risk. Before making any decision based on the information and opinions contained herein, investors shall consider their individual investment objectives, financial situations and specific needs at the time, consult with professional consultants regarding such decision, and bear all the risks. Nomura Orient International Securities and/or its affiliates (including their respective employees) shall not be held liable for any errors or omissions in the information and opinions herein (regardless of the reasons for such errors or omissions), or for any consequences arising from the use of or reference upon this report.

The opinions, assessments and forecasts contained herein are only the opinions and judgments at the time of this report’s production and publication (or the specific date stated in the report). Such opinions, assessments and forecasts are subject to change and may be amended without any notification. At different periods, Nomura Orient International Securities may release reports which are inconsistent with the opinions, assessments and forecasts contained herein.

The analyst(s) named in this report may, within this report or in communications with clients, sales personnel, trading personnel and other business personnel of Nomura Orient International Securities, discuss trading strategies regarding events that may have a short-term impact on the market price of the subject securities or other financial products covered in this report. Such analysis of short-term impact may be contrary to or inconsistent with the analyst’s published views on the price target, rating, valuation, or forecast of the subject securities or other financial products. Regardless of any such contradiction or inconsistency, this does not affect the analyst’s fundamental rating or assessment of the subject securities or other financial products under their coverage.

Nomura Orient International Securities and/or its affiliates may issue other reports inconsistent with or reaching different conclusions from the information contained in this report. The views, insights, and analytical methods expressed in this report reflect those of the named analyst(s), and do not necessarily represent the views of Nomura Orient International Securities and/or its affiliates. Sales personnel, trading personnel and other business personnel of Nomura Orient International Securities and/or its affiliates may provide market commentary and/or trading ideas, orally or in writing, that differ from the opinions and recommendations in this report, based on different assumptions, standards or analytical methods. Nomura Orient International Securities is under no obligation to update such recommendations and opinions for all recipients of this report. The asset management, proprietary trading and other investment-related departments of Nomura Orient International Securities and/or its affiliates may make investment decisions independently that are inconsistent with the recommendations or opinions expressed in this report.

Unless stated otherwise, any performance data referenced in this report represents past performance. Past performance is not an indicator of future performance. No representation or warranty is made by Nomura Orient International Securities that any returns indicated will be achieved. Forecasts included in the analysis may be based on certain assumptions. Changes to these assumptions may have a material impact on any such returns detailed.

This report is provided solely on the basis that the recipient is deemed capable of independently evaluating investment risks and exercising independent judgment in making investment decisions. Independent investment judgment means that investment decisions are made independently by the investors themselves based on their own assessment of potential investment objectives, needs, opportunities, risks, market factors and other investment considerations.

*The Nomura Group as defined in the Disclaimer section at the end of this report.
** As defined by the EU Market Abuse Regulation

Definition of Nomura Group's equity research rating system and sectors

The rating system is a relative system, indicating expected performance against a specific benchmark identified for each individual stock, subject to limited management discretion. An analyst's target price is an assessment of the current intrinsic fair value of the stock based on an appropriate valuation methodology determined by the analyst. Valuation methodologies include, but are not limited to, discounted cash flow analysis, expected return on equity and multiple analysis. Analysts may also indicate expected absolute upside/downside relative to the stated target price, defined as (target price - current price)/current price.

STOCKS

A rating of **'Buy'**, indicates that the analyst expects the stock to outperform the Benchmark over the next 12 months. A rating of **'Neutral'**, indicates that the analyst expects the stock to perform in line with the Benchmark over the next 12 months. A rating of **'Reduce'**, indicates that the analyst expects the stock to underperform the Benchmark over the next 12 months. A rating of **'Suspended'**, indicates that the rating, target price and estimates have been suspended temporarily to comply with applicable regulations and/or firm policies. Securities and/or companies that are labelled as **'Not rated'** or shown as **'No rating'** are not in regular research coverage. Investors should not expect continuing or additional information from Nomura relating to such securities and/or companies. Benchmarks are as follows: **United States/Europe/Asia ex-Japan:** please see valuation methodologies for explanations of relevant benchmarks for stocks, which can be accessed at: http://go.nomuranow.com/research/m/Disclosures; **Global Emerging Markets (ex-Asia):** MSCI Emerging Markets ex-Asia, unless otherwise stated in the valuation methodology; **Japan:** Russell/Nomura Large Cap.

SECTORS

A **'Bullish'** stance, indicates that the analyst expects the sector to outperform the Benchmark during the next 12 months. A **'Neutral'** stance, indicates that the analyst expects the sector to perform in line with the Benchmark during the next 12 months. A **'Bearish'** stance, indicates that the analyst expects the sector to underperform the Benchmark during the next 12 months. Sectors that are labelled as **'Not rated'** or shown as **'N/A'** are not assigned ratings. Benchmarks are as follows: **United States:** S&P 500; **Europe:** Dow Jones STOXX 600; **Global Emerging Markets (ex-Asia):** MSCI Emerging Markets ex-Asia. **Japan/Asia ex-Japan:** Sector ratings are not assigned.

Target Price

A Target Price, if discussed, indicates the analyst's forecast for the share price with a 12-month time horizon, reflecting in part the analyst's estimates for the company's earnings. The achievement of any target price may be impeded by general market and macroeconomic trends, and by other risks related to the company or the market, and may not occur if the company's earnings differ from estimates.

Investors should consider this document as only a single factor in making their investment decision and, as such, the report should not be viewed as identifying or suggesting all risks, direct or indirect, that may be associated with any investment decision. Nomura Group produces a number of different types of research product including, among others, fundamental analysis and quantitative analysis; recommendations contained in one type of research product may differ from recommendations contained in other types of research product, whether as a result of differing time horizons, methodologies or otherwise. The Nomura Group publishes research product in a number of different ways including the posting of product on the Nomura Group portals and/or distribution directly to clients. Different groups of clients may receive different products and services from the research department depending on their individual requirements.

Figures presented herein may refer to past performance or simulations based on past performance which are not reliable indicators of future or likely performance. Where the information contains an expectation, projection or indication of future performance and business prospects, such forecasts may not be a reliable indicator of future or likely performance. Moreover, simulations are based on models and simplifying assumptions which may oversimplify and not reflect the future distribution of returns. Any figure, strategy or index created and published for illustrative purposes within this document is not intended for “use” as a “benchmark” as defined by the European Benchmark Regulation.

Certain securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of, or income derived from, the investment.

With respect to Fixed Income Research: Recommendations fall into two categories: tactical, which typically last up to three months; or strategic, which typically last from 6-12 months. However, trade recommendations may be reviewed at any time as circumstances change. ‘Stop loss’ levels for trades are also provided; which, if hit, closes the trade recommendation automatically. Prices and yields shown in recommendations are taken at the time of submission for publication and are based on either indicative Bloomberg, LSEG or Nomura prices and yields at that time. The prices and yields shown are not necessarily those at which the trade recommendation can be implemented.

Nomura’s research services may utilize artificial intelligence tools, including third-party platforms, to assist with data analysis and other research-related activities. Any AI-generated output is subject to review and oversight by the research analyst(s) primarily responsible for the substance of this report and a qualified supervisor For the avoidance of doubt, the use of AI tools does not constitute investment advice and does not alter the execution-only basis upon which Research Services are provided.

The securities described herein may not have been registered under the US Securities Act of 1933 (the ‘1933 Act’), and, in such case, may not be offered or sold in the US or to US persons unless they have been registered under the 1933 Act, or except in compliance with an exemption from the registration requirements of the 1933 Act.
