Powering AI: Agents, Aircons, Allshoring: All Not Priced In

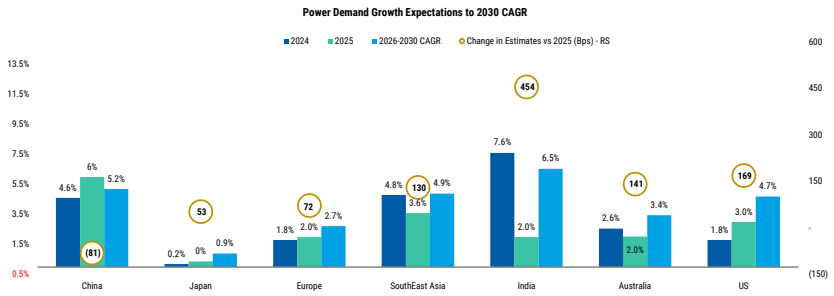

Global power tightness is set to outpace expectations as industrial and household consumption join AI to lead the next leg of surprise in the electrification supercycle. Powering everything is set to unlock US$0.5trn in value creation, boost street 2028e EPS by 14%, and create the next set of differentiated winners.

Key Takeaways

- Winners: Europe: EDP, RWE; **Asia:** Gulf Development, Keppel, Adani Power, Yangtze Power, Samsung SDI, Hokkaido Electric; **US**: Bloom, Solaris Energy.
- What to avoid: **Asia:** KEPCO, Tata Power, Global Power Synergy, Huaneng Power, Electric Power Development; **Europe:** Enagas, SNAM.

Global Power: Agents, Aircons, Allshoring: All Not Priced In

Our 2025 call on power markets' changing face is now evolving beyond AI: it's also an energy security, El Niño and industrial capex supercycle thematic.

Key Surprises

- **Surprise #1: Powering AI→ Powering Everything**
  - We raise our above street global power consumption estimates by 10% to 4.2% CAGR through 2030, with demand inflecting across the US, Europe, Japan, LatAm and Asia.
  - Quality of demand is improving: The Three A's – Agentic AI, Allshoring and Aircons – broaden growth beyond data centers, supported by energy security and the industrial capex supercycle
- **Surprise #2: Fossil Fuels Take Share and "Bring Your Own Power"**
  - Natural gas and coal are complementing batteries and renewables more than ever
  - Dependable fossil-based generation gains scarcity value as power markets tighten.
  - Behind-the-meter capacity requirements rise to ~47GW in the US and ~8GW in Asia by 2030
- **Surprise #3: Power Prices: Duck Curves Are Changing Shape**
  - Daily power needs are surging before and after daylight- driving inflation in power prices.
  - Merchant and long-term power supply contracts are seeing increases for gas, renewables and nuclear generation
  - Merchant pricing and tiered tariffs gain importance as power markets evolve.
- **Surprise #4: Pricing Power Shifting to Power Infrastructure Owners from Equipment Suppliers**
  - Power generators are seeing ASP increases after inflation in equipment producers last 18 months.

Power Consumption is Beating Estimates Again…

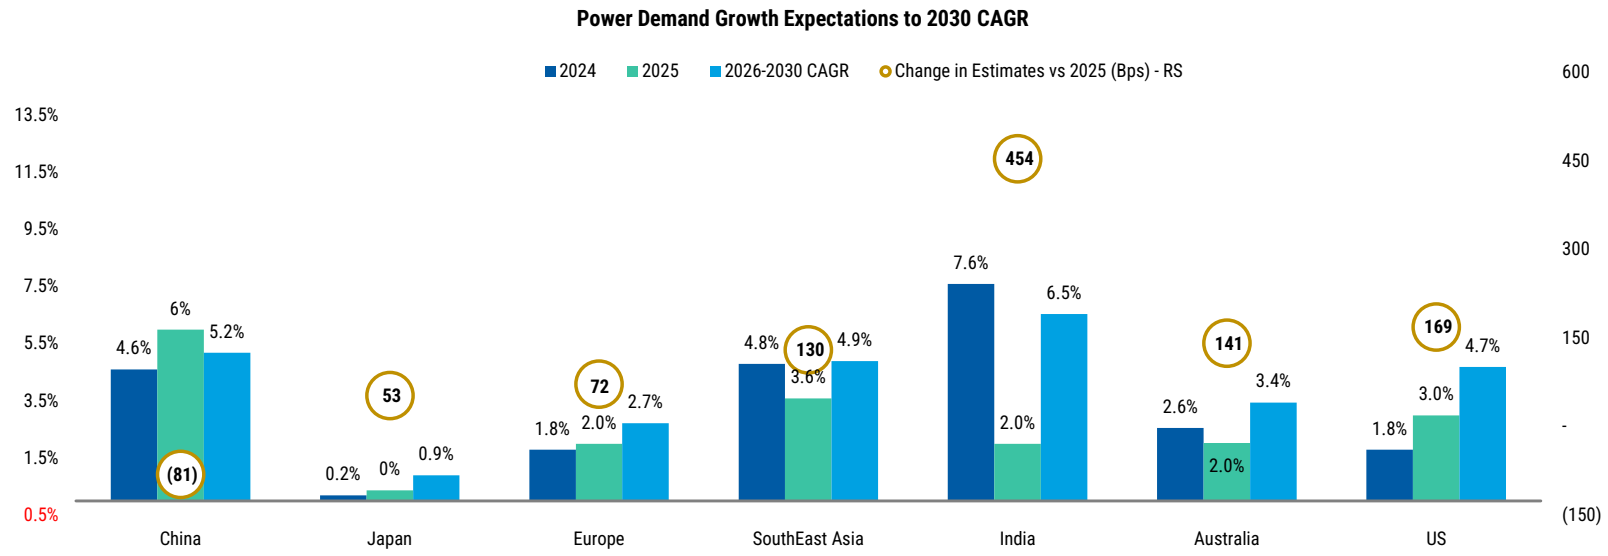

Power consumption keeps beating estimates. We raise our above-Street global power consumption estimates by a further 10% to ~36trn units by 2030, with power consumption growth outside China accelerating 3x vs. the historical period.

We Raised Power Demand Estimates in Most Regions in 2026

We raise our 2026-30 power demand growth estimates in almost every region led by India (+454bps), the US (+169bps) and Australia (+141bps); Europe and Japan to see steady growth after years of decline.

Asia Makes Up ~64% of Global Incremental Power Demand to 2030

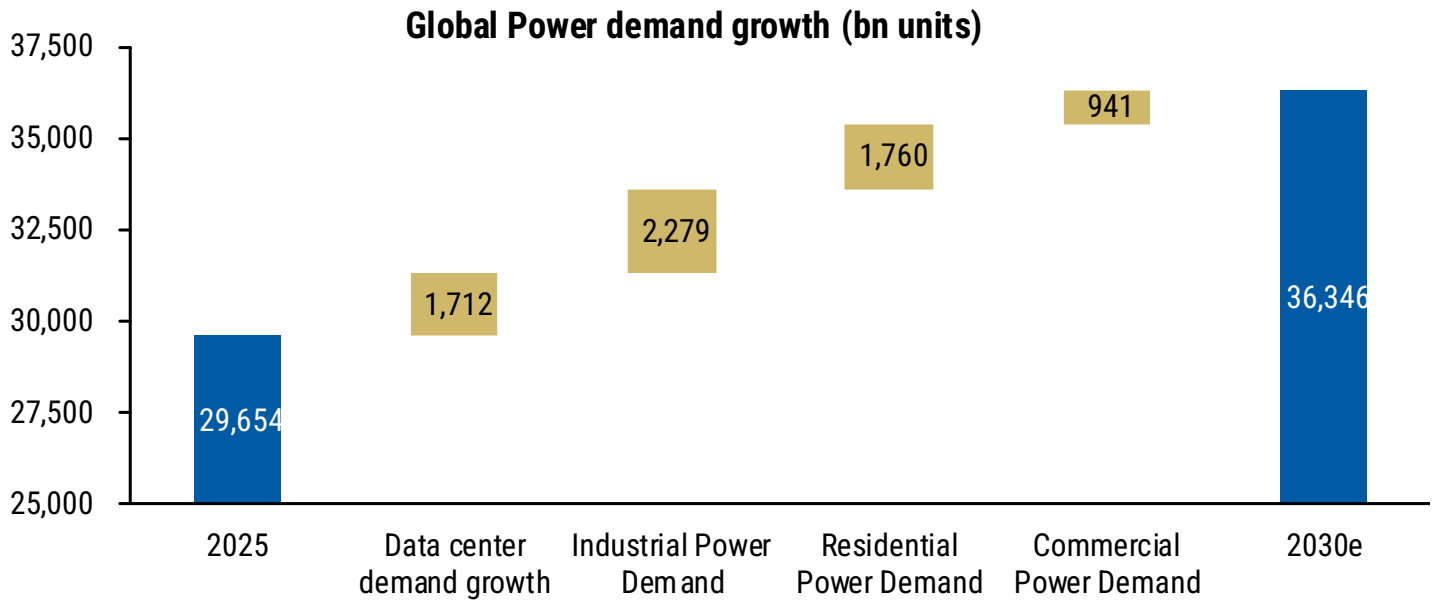

We expect Asia to consume nearly two-thirds of the new power units needed. We estimate Asia's power supplies need to grow at a ~5% CAGR through 2030, ~140bps faster than the current average.

Surprise #1: Powering AI → → Powering Everything

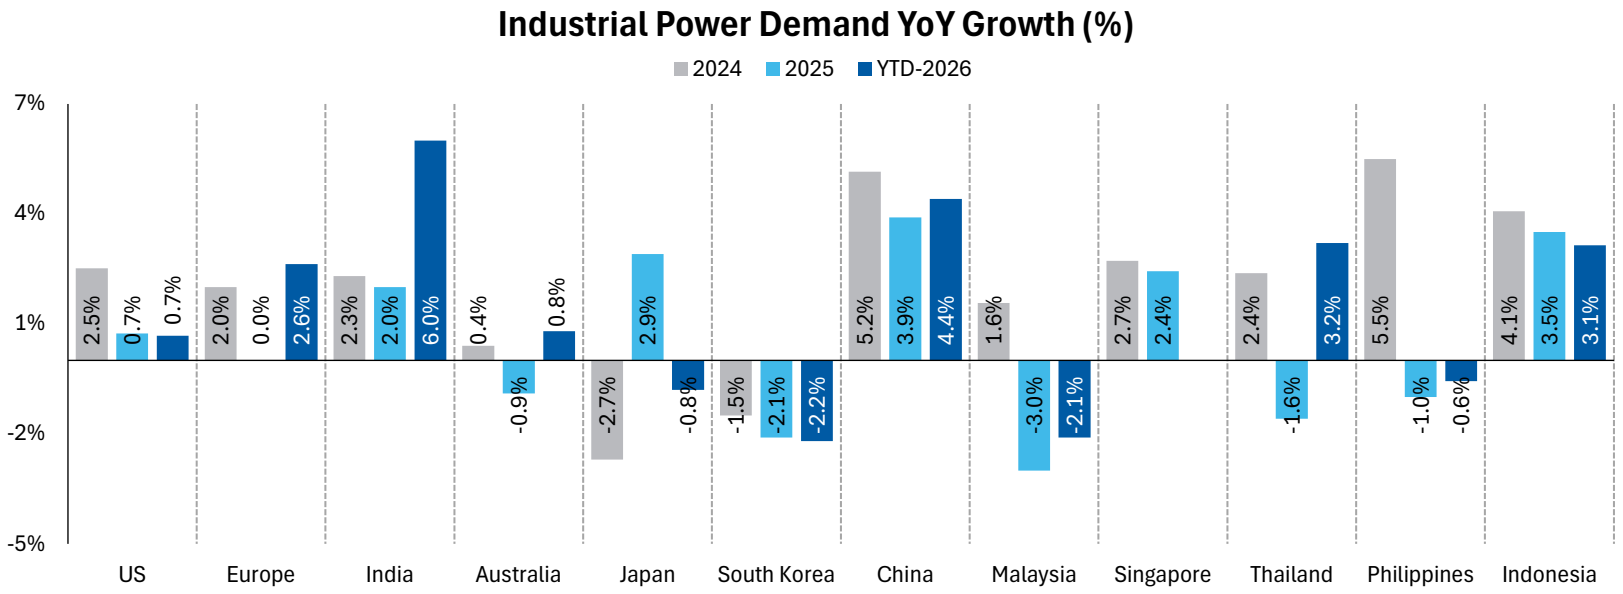

Growth in power demand is much broader than AI. The Three A's – Agents, Aircons and Allshoring – drive the next leg, and about half of this power requirement is not yet priced into equities.

Surprise #1: Powering AI → → Powering Everything
Industrial Power Demand Is Reaccelerating Across Most of Asia

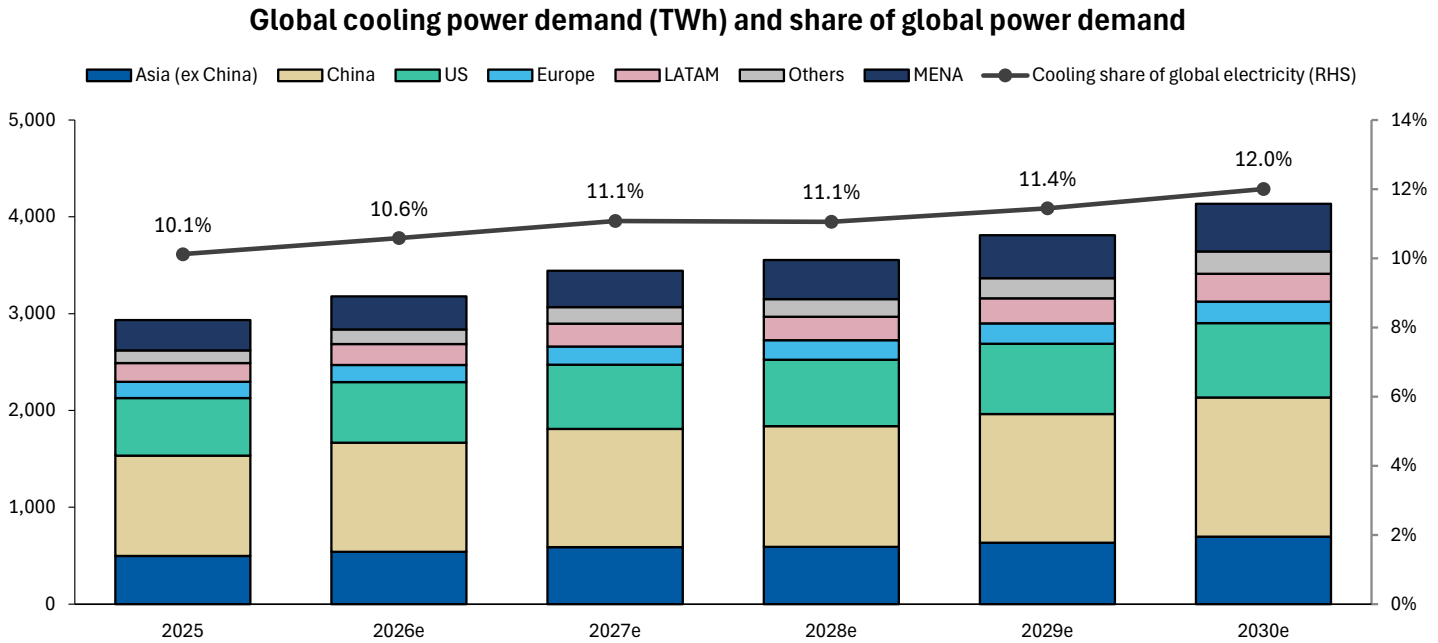

Allshoring is the largest driver. We forecast Asia's industrial power consumption to grow at a ~4% CAGR, accounting for 43% of incremental demand and growing ~2.7x the rate of data center consumption.

Surprise #1: Powering AI → → Powering Everything
Cooling Will Add Almost as Much Power Demand as Data Centers by 2030

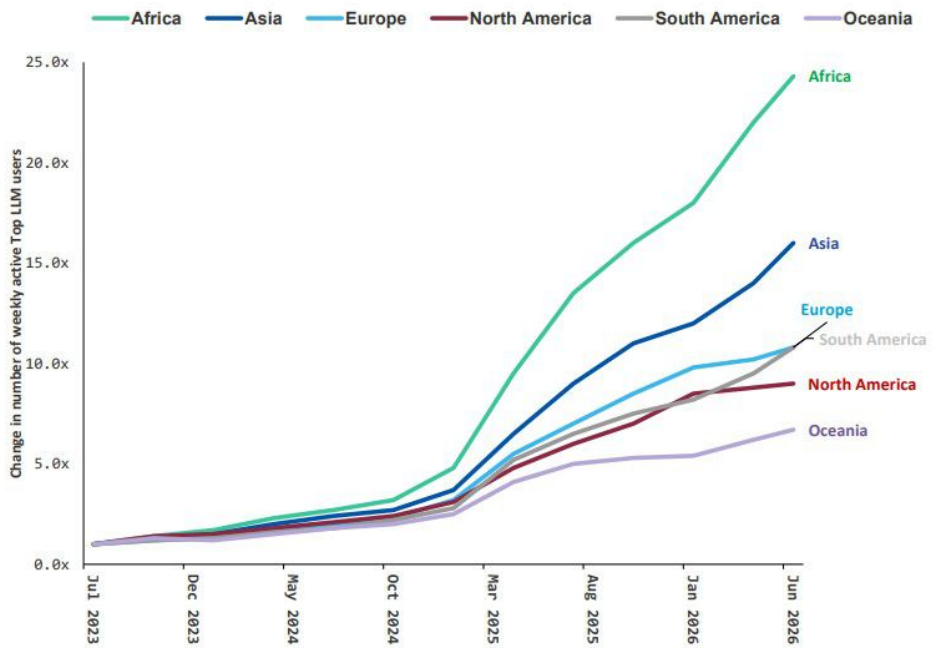

Aircons are the source of demand. Space cooling adds ~40bps to Asia's power demand growth through 2030 and could be almost as large as incremental data center power demand.

Surprise #2: Asia Can Absorb ~15GW of the US Data Center Power Shortfall

Power is fungible across borders for the first time. We estimate ~15GW of the US shortfall could spill over to Asia, led by ASEAN (~8GW) and India, where spare capacity is ramping up.

Morgan Stanley & Co. LLC makes a market in the securities of Korea Electric Power, Solaris Energy Infrastructure.
The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.
Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.
Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of October 31, 2026)
The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.
For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
Stock Rating Category	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1575	43%	460	49%	29%	742	44%
Equal-weight/Hold	1537	42%	393	42%	26%	720	43%
Not-Rated/Hold	2	0%	1	0%	50%	1	0%
Underweight/Sell	570	15%	92	10%	16%	218	13%
Total	3,684		946			1681	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O or Over) - The stock's total return is expected to exceed the total return of the relevant country MSCI Index or the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis over the next 12-18 months.
