US Equity Strategy | North America

Weekly Warm-up: Enter Sandman

We think the correction that began months ago is in its final phase, with the S&P 500 catching down as breadth improves, consistent with our call. We expect near-term clearing events to provide an attractive opportunity to add risk to quality cyclicals that have de-rated as we head into 2027.

- **The Index Catch-Down Is Likely the Final Stage of This Correction.** We have argued that the mid-cycle transition would end with the index catching down toward weaker breadth, and that process is now underway even as the average stock improves. With 10-year yields declining, the equal weight S&P has outperformed the cap-weighted S&P and the lower quality Russell 2000 by 6% and 4%, respectively, since September—in line with our views. We are getting close, but would like to see either further confirmation from our sentiment indicator or the S&P 500 to reach our previously identified downside tactical target of 7100-7300 before adding risk more aggressively. Our year-end base case remains 8000 for the S&P 500.
- **Financial Conditions Are Doing the Fed's Work; Liquidity Remains A Risk.** Last week, Fed Chair Warsh acknowledged the tightening already delivered by financial conditions to some extent, but his comments suggest the bar for a more dovish Fed pivot remains high—i.e., he was unwilling to say financial conditions are outright "tight." A TGA drawdown from the Treasury into year-end could provide some relief should it play out as could less back-end issuance, making this week's Quarterly Refunding Announcement important.
- **Midterms Should Help Clear Another Important Overhang.** Historically, large cap stocks have gained approximately ~15% in the six months following midterms, with similar strength in both the cap-weighted index and average stock. A Democrat sweep is already anticipated by investors, although the magnitude of that sweep remains uncertain to market participants. Meanwhile, many of the policies most relevant to markets remain under the executive branch's control. The more notable risk comes post the election with the potential for renewed military escalation with Iran or tariffs.
- **Earnings Season Continues to Favor Quality, Particularly Free Cash Flow.** In line with our quality rotation call since July, the market is becoming more discerning as the cycle progresses, with free cash flow surprises driving larger next-day price reactions than EPS surprises. This reinforces our preference for companies with durable cash generation, strong balance sheets and improving earnings revisions. As we progress past the upcoming clearing events, the opportunity set is likely to become richer for quality *cyclicals*, in particular—Industrials remains our top pick, while more crowded areas of the index may still have some work to do on the downside as part of the final capitulation of this correction.

Enter Sandman with Correction in Final Innings

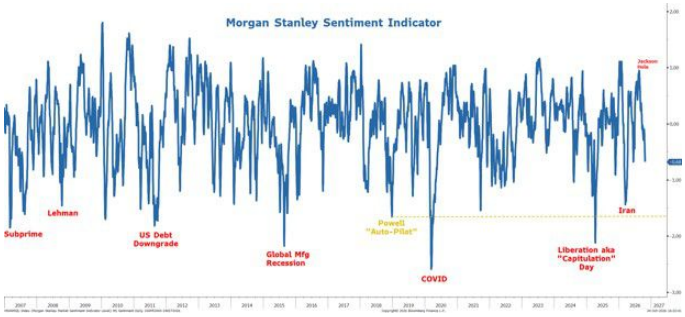

Given last week's price action, we think the correction that began in June is now in the final innings, with the S&P 500 and breadth meeting in the middle, as we expected. As is typical of mid-cycle transitions, the damage has been worst in early cycle groups, with Semiconductors, Capital Goods, Transports, Banks and Retailers falling materially from their summer peaks. Importantly, breadth has been improving more recently as the still crowded areas like parts of cyclical tech catch down—part of the capitulation process. Since the end of September, 10-year Treasury yields have declined by nearly 40bp, while the percentage of S&P 500 stocks above their 200-day moving average has risen ~20 percentage points to 62%. Over the same period, the equal-weighted S&P 500 has gained nearly 5%, outperforming the cap-weighted index by almost 6%. This supports our view heading into October that back-end yields were likely approaching a peak, and that the equal weight S&P was the more attractive expression of the broadening trade. The lower quality Russell 2000 likely needs a bigger decline in rates than what we've seen already, while the equal weight S&P can work with more of a stabilization in the long end. While we still think a final capitulatory event is possible, particularly with our Market Sentiment Indicator (MSI) not yet at levels that typically mark the end of corrections, the price action last week suggests we are getting close.

Warsh's comments at last week's FOMC meeting included some acknowledgment of the tightening in financial conditions we have been highlighting, but they still centered on the continuing efforts to combat inflation. Importantly, Warsh distinguished between financial conditions being "tighter" and actually being "tight," suggesting he remains comfortable with the adjustment underway. The most important aspect of Warsh's comments, from our perspective, was that he did not double down on his message from Jackson Hole that the market interpreted as an effort to get inflation to target *quickly*. Thus, the Fed has flexibility to pause for now, although the bar for additional liquidity support still appears relatively high. In our view, liquidity may be tighter than was acknowledged last week, so this particular clearing event may still have some work to do.

One potential source of relief, even without a change in Fed policy, is the expected reversal of Treasury's recent cash buildup. Since mid-July, the Treasury General Account (TGA) has increased approximately $244 billion, alongside a $249 billion decline in bank reserves, while Fed assets have remained essentially unchanged. Treasury anticipated this buildup, projecting a late-October TGA peak near ~$1.05 trillion followed by a decline toward ~$850 billion by year-end. A more material drawdown in the TGA would be welcome should it play out given slower Fed balance sheet growth and the economy's significant demand for capital. One key question is whether the expected drawdown also coincides with less restrictive financial conditions more broadly across rate and energy markets. If it doesn't, markets may ultimately need more liquidity from the Fed. Another question for financial markets is what form does it take this time—is it an orderly and proactive response from the Fed like last year or something more disruptive like in 2018? In short, last week's Fed meeting was not a full clearing event for liquidity and may require more pressure to resolve or simply a curtailment of the heavy supply of issuance that still lies ahead.

The midterms represent the most obvious clearing event we discussed in last week's note, with history providing an encouraging signal. Since 1982, large cap stocks have gained approximately 15% on a cap-weighted basis and 16% on an equal-weighted basis in the six months following midterms, with both measures rising roughly 22% over the subsequent year. A Democrat sweep via a narrow Senate majority is anticipated by investors and therefore unlikely to be a major market surprise, while a much more decisive Senate victory would potentially push the equity market to look further out to 2028 in terms of pushback against deregulation. With that said, many of the policies that have moved markets most over the last 2 years, including tariffs, foreign policy and agency-led deregulation, remain largely under executive branch's control, and equities typically don't think 2 years ahead very often or for very long. On the data center front, opposition to data center development is often driven more by local incumbent dynamics than party affiliation. There are also potential upside risks from a Democrat majority, including efforts to delay or reverse Medicaid and SNAP cuts that could support consumption. Further, the prospect of a different policy environment in 2028 could pull forward some investment and M&A activity. We think the more significant risk is the potential for renewed military escalation with Iran or additional tariffs after the election, particularly if higher energy prices push inflation expectations and long-end yields higher in the former risk scenario.

Source: Compustat, Morgan Stanley Research

A few risks have weighed on the cap-weighted index recently, facilitating this latest catch down in S&P 500 performance toward improving breadth. These variables include the pace of AI-related capex, credit spread widening in certain segments of the AI trade, tighter liquidity, uncertainty around the Middle East situation and the upcoming midterm elections. While the second derivative on EPS growth is expected to slow into next year, this is not the primary driver of last week's price action, in our view. Historically, equity markets continue to show strength even as the rate of change on growth slows as long as it's still above 0%—leadership, though, shifts to high quality. What tends to impact economically sensitive sectors more in this type of environment is rapid increases in the cost of capital. Cyclical areas were the first to price the most recent adjustment in cost of capital from Jackson Hole to the beginning of October. Since the beginning of October when yields topped, the equal weighted S&P (a higher quality expression of breadth) has surged back as shown above. Credit spreads also feed into that cost of capital dynamic and have been in focus recently for investors from a risk standpoint. In our view, credit markets have become more discerning about issuance, although demand remains solid for IG issuance, and hyperscaler supply is still a relatively small share of the market. We view this as consistent with the greater differentiation on quality as both the business and AI investment cycle mature, rather than evidence of a broader credit problem.

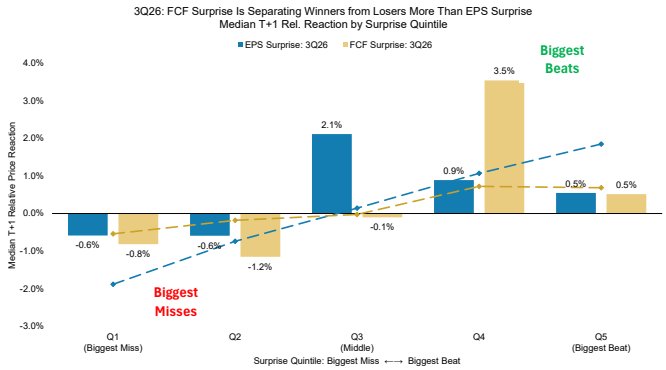

Finally, 3Q earnings season continues to reinforce the market's preference for quality even as the high quality indices (SPX and NDX) underperform the average stock. For the record, this is what we expected and noted in recent research so that makes us feel more confident we are closer to the end of this correction. Free cash flow (FCF) surprises are driving larger next-day price reactions than EPS surprises, with the largest FCF beats generating meaningful upside and misses being penalized more heavily than has typically been the case. While a similar pattern is evident for EPS, the response to FCF surprises has been more pronounced relative to history. Investors are no longer overlooking FCF shortfalls as they often did earlier in the cycle, consistent with a more typical mid- to late-cycle environment where earnings durability and cash conversion matter more. This

supports our continued preference for quality, including higher-quality cyclicals with improving earnings revisions. As the remaining policy and liquidity uncertainties clear, we think the opportunity to add risk more aggressively is approaching, with earnings growth ultimately reasserting itself as the primary driver of returns.

Exhibit 4: Quality in Focus As FCF Is Driving Price Action More than EPS

Source: FactSet, Morgan Stanley Research

Bottom line: over the last month, we've conveyed the view that index and breadth were likely to converge as yields topped— Exhibit 1. Now we are seeing the leadership of the market catch down, which is typically the last phase of a correction. This one started several months ago and is in its final innings, from our perspective. One stat that's pretty striking is that 60% of Russell 3000 stocks have already seen at least a 20% correction since June, while the P/E multiple for the S&P 500 has declined by 20% from its high a year ago. Upcoming clearing events should provide an opportunity to add risk to quality cyclicals that have de-rated significantly already.

Earnings Season Chartbook

- Median T+1 price reaction is at +0.1% on an absolute basis and +0.4% on a relative basis.
- EPS surprise at 4% which is slightly below the historical average and well below recent quarters. Sales surprise at 2.0% which is above the historical average of +1.3%.
- 3Q EPS is expected at +28% Y/Y and sales at +12% Y/Y.
- Earnings Revision Breadth is at+7%, which is lower than the previous 6-month level. ERB has not rebounded as strongly during 3Q EPS season which suggests upward revisions to 2027 have slowed this quarter. We think this slowing in estimate momentum alongside FCF surprise have been key drivers this earnings season.
- Calendar 2026/2027 earnings growth is now 32%/16%.
- Mag 7 earnings are expected to grow 25% in 3Q26 vs. 22% for the SP493, both historically strong. For 2027, this flips and has the SP493 growing 17% vs 12% for the Mag 7 but this is largely on difficult comp effects for the Mag 7 from one-off benefits (non-operating income).
- Analyst previews are positive but less so than last quarter. Net EPS previews are +21% versus +27% for NTM EPS last quarter. Results have been similar at +15% vs +30% in 2Q.

Surprise

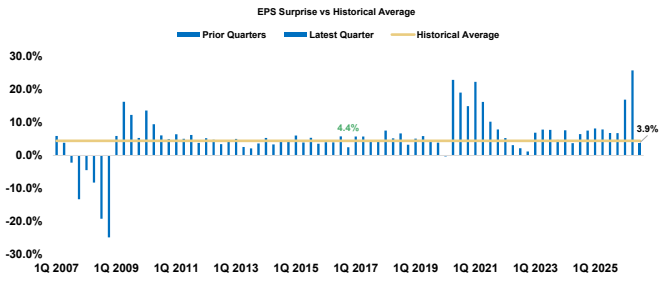

- 3Q Sales surprise at 2.0%, in-line with the historical average of 1.3%.
- 3Q EPS surprise at 3.9%, below the historical average of 4.4%.
- Last quarter (2Q26) EPS surprise was +26%, strongly ahead of the historical average of 4.4%. Non-operating profits from private AI investments skewed 1Q/2Q higher but it was still a historically strong quarter ex-these gains.

Company Guidance & Revisions

- S&P 500 earnings revisions breadth (FY2 estimates) is positive at +7%.
- Earnings Revisions Breadth (ERB) has not spiked as high as previous quarters and suggests upward revisions to 2027 have been more tepid this quarter. This week is the last major week for S&P 500 earnings so we will be monitoring ERB closely to see if this changes the trend.
- Industrials and Real Estate have the most positive ERB in the last 2 weeks while Communication Services and Discretionary have seen the weakest.

Exhibit 56:

Net Margins by Sector

Source: FactSet, Morgan Stanley Research

知识星球：前沿信息收录
VX:FCCNN88

3Q Systematic Earnings (Full MS Coverage)

Summary:

- **Previews**: KPI previews are +19% vs +32% net positive last quarter and NTM EPS previews are +21% vs +27% last quarter on projected NTM impacts. Previews are currently net positive across all sectors with the exception of Materials.
- **Results**: Results at +15% across MS Coverage vs +27% last quarter. Eight of the eleven sectors have positive NTM EPS revisions with the remaining three in neutral territory. Real Estate (+56%) and Tech (+38%) stand out as the top sectors while Industrials, Materials, and Communication Services sit at neutral.

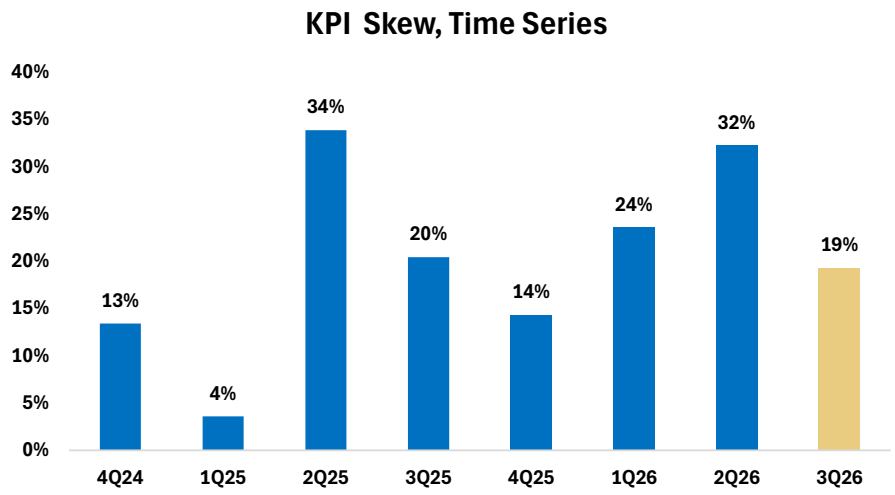

3Q Preview Tracking

Our Morgan Stanley Analysts submit a systematic earnings preview where they forecast two items: 1) **KPI** and 2) **NTM EPS** impact. Below we summarize the sector and industry summaries of these previews. The population is the Morgan Stanley US coverage, which is broader than the S&P 500 and roughly similar to the Russell 1000.

Methodology: Each analyst identifies the key performance indicator (KPI) for each individual stock and it may differ from NTM EPS. For example, the KPI for a Financial Services or Semiconductor company may be net assets or GPU demand and this may differ from NTM EPS (although, it is often similar). Each analyst chooses one of five forecasts for both KPI and EPS: very negative, negative, in-line, positive, or very positive. We roll up these previews into a net score by taking (positive-negative)/total reactions.

3Q Results Tracking

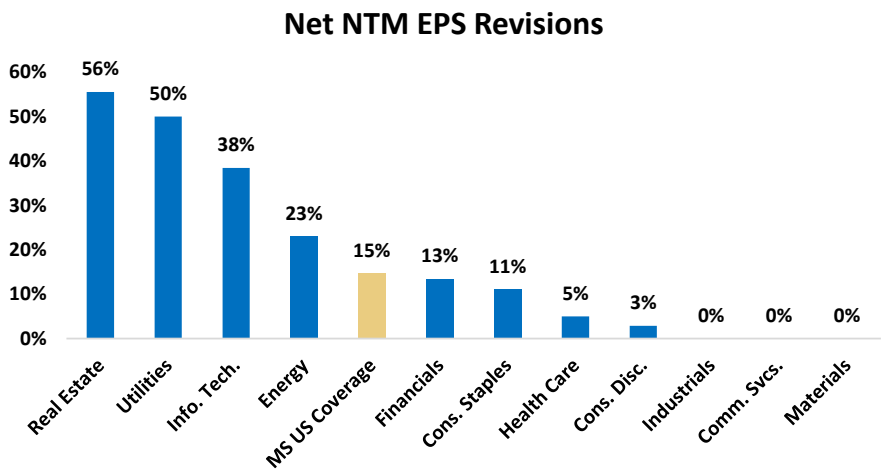

Our MS Analysts submit systematic earnings reactions following earnings releases. Below we summarize these systematic reports. The population is the Morgan Stanley US coverage, which is broader than the S&P 500 and roughly similar to the Russell 1000.

Methodology: Each Analyst chooses one of five reactions on NTM EPS following the company earnings: very negative, negative, in-line, positive, or very positive. We roll up these reactions into a net score by taking (positive-negative)/total reactions.

Global Research Conflict Management Policy

Morgan Stanley Research has been published in accordance with our conflict management policy, which is available at www.morganstanley.com/institutional/research/ . A Portuguese version of the policy can be found at www.morganstanley.com.br

Important Regulatory Disclosures on Subject Companies

The analyst or strategist (or a household member) identified below owns the following securities (or related derivatives): Nicholas Lentini, CFA - Delta Air Lines, Inc.(common or preferred stock).

As of September 30, 2026, Morgan Stanley beneficially owned 1% or more of a class of common equity securities of the following companies covered in Morgan Stanley Research: Abbvie Inc., American Tower Corp., Atlassian Corporation PLC, CenterPoint Energy Inc, Delta Air Lines, Inc., EQT Corp., Knight-Swift Transportation Holdings Inc, Northrop Grumman Corp., Target Corp, Walmart Inc.

Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144A offering) of securities of Abbvie Inc., American Tower Corp., CenterPoint Energy Inc, Delta Air Lines, Inc., Walmart Inc.

Within the last 12 months, Morgan Stanley has received compensation for investment banking services from Abbvie Inc., American Tower Corp., CenterPoint Energy Inc, Delta Air Lines, Inc., Target Corp, Walmart Inc.

In the next 3 months, Morgan Stanley expects to receive or intends to seek compensation for investment banking services from Abbvie Inc., American Tower Corp., Atlassian Corporation PLC, CenterPoint Energy Inc, Delta Air Lines, Inc., EQT Corp., Northrop Grumman Corp., Target Corp, Walmart Inc.

Within the last 12 months, Morgan Stanley has received compensation for products and services other than investment banking services from Abbvie Inc., American Tower Corp., Atlassian Corporation PLC, CenterPoint Energy Inc, Delta Air Lines, Inc., EQT Corp., Target Corp, Walmart Inc.

Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following company: Abbvie Inc., American Tower Corp., Atlassian Corporation PLC, CenterPoint Energy Inc, Delta Air Lines, Inc., EQT Corp., Northrop Grumman Corp., Target Corp, Walmart Inc.

Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: Abbvie Inc., American Tower Corp., Atlassian Corporation PLC, CenterPoint Energy Inc, Delta Air Lines, Inc., EQT Corp., Northrop Grumman Corp., Target Corp, Walmart Inc.

An employee, director or consultant of Morgan Stanley is a director of Walmart Inc. This person is not a research analyst or a member of a research analyst's household.

Morgan Stanley & Co. LLC makes a market in the securities of Northrop Grumman Corp..

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of October 31, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

ure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated weight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy,

知识星球：前沿信息收录
更多一手投研资料扫码加微信
知识星球：前沿信息收录
VX:FCCNN88

hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
Stock Rating Category	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1575	43%	460	49%	29%	742	44%
Equal-weight/Hold	1537	42%	393	42%	26%	720	43%
Not-Rated/Hold	2	0%	1	0%	50%	1	0%
Underweight/Sell	570	15%	92	10%	16%	218	13%
Total	3,684		946			1681	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.

Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/ res.

For Morgan Stanley specific disclosures, you may refer to https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

A member of Research who had or could have had access to the research prior to completion owns securities (or related derivatives) in the Abbvie Inc., Atlassian Corporation PLC. This person is not a research analyst or a member of research analyst's household.

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at http://www.morganstanley.com/matrix.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at http://www.morganstanley.com/matrix.

Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Any non-customer reader within the scope of Article 7-1 of the Taiwan Stock Exchange Recommendation Regulations accessing and/or receiving Morgan Stanley Research is not permitted to provide Morgan Stanley Research to any third party (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities regarding Morgan Stanley Research which may create or give the appearance of creating a conflict of interest. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation or a solicitation to trade in such securities/instruments. MSTL may not execute transactions for clients in these securities/instruments.

Morgan Stanley is not incorporated under PRC law and the research in relation to this report is conducted outside the PRC. Morgan Stanley Research does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC. PRC investors shall have the relevant qualifications to invest in such securities and shall be responsible for obtaining all relevant approvals, licenses, verifications and/or registrations from the relevant governmental authorities themselves. Neither this report nor any part of it is intended as, or shall constitute, provision of any consultancy or advisory service of securities investment as defined under PRC law. Such information is provided for your reference only.
