Overall in Asia 亚洲总体概况

Asia equities trade mixed at midday as the post US midterm rotation accelerates. China, Hong Kong and India outperform, while Korea and Taiwan lag sharply as investors rotate away from AI hardware. Japan is bifurcated, with autos outperforming technology. Falling crude prices support oil importers and weigh on energy names, while renewables, selected materials and Chinese internet platforms attract flows. Mainland turnover remains elevated, reinforcing the rotation into higher-beta domestic themes.

亚洲股市午盘涨跌互现，美国中期选举后的板块轮动加速。中国、香港和印度表现优于大盘，而韩国和台湾大幅落后，因投资者从 AI 硬件板块撤资。日本市场分化，汽车板块跑赢科技板块。原油价格下跌支撑了石油进口国，并拖累能源股，而可再生能源、部分材料股和中国互联网平台吸引资金流入。内地成交额保持高位，强化了向高贝值国内主题的轮动。

Regional Updates 区域更新

Taiwan: TAIEX -2.54%. TAIEX extends losses at midday as semiconductor weakness remains the key drag following Wednesday's heavy foreign selling and margin unwinding. Taiwan's proposed tightening of export controls on chip shipments to mainland China adds a fresh headwind for the technology complex and supports the regional rotation towards domestic Chinese semiconductor substitution plays. The move follows Wednesday's volatile session, when the Taiex recovered sharply from its intraday low despite TSMC falling 1.5%, overseas investors selling a net NT$149.9 billion of Taiwan shares and NT$22.9 billion of margin positions being cut.

台湾：TAIEX -2.54%。TAIEX 在午盘延续跌势，在周三海外大量抛售和保证金平仓之后，半导体的疲软仍是主要拖累。台湾拟收紧对运往中国大陆的芯片出口管制，这为科技板块增添了新的逆风，并支撑了区域内资金向中国国内半导体替代概念股轮动。此前，周三市场走势震荡，尽管台积电下跌 1.5%，海外投资者净抛售 1499 亿新台币的台湾股票，且 229 亿新台币的保证金头寸遭到平仓，TAIEX 仍从日内低点大幅回升。

Korea: KOSPI -5.18%. Korean equities fall sharply at midday as the rotation away from AI hardware intensifies following Wednesday's highly volatile session. Samsung (005930) and SK (000660) are reportedly down more than 5% each, driving the broader market lower as investors reassess AI exposure following the Democratic sweep in the US midterms. The move contrasts with Wednesday's late recovery, when both semiconductor leaders pared intraday losses of 5–7% to close down less than 1.5%. Clean energy and solar names remain supported by expectations for stronger Democratic policy tailwinds.

韩国：KOSPI -5.18%。受周三剧烈波动后市场从 AI 硬件板块轮动加剧的影响，韩国股市午盘大幅下跌。据报道，三星（005930）和 SK（000660）跌幅均超过 5%，拖累大盘走低，因投资者在美国中期选举民主党大胜后重新评估 AI 相关敞口。这一走势与周三尾盘的反弹形成对比，当时这两家半导体龙头股将 5–7% 的日内跌幅收窄至收盘下跌不足 1.5%。清洁能源和太阳能板块继续获得支撑，因市场预期民主党政策将带来更有利的顺风。

Japan: NKY-1.49%. Japanese equities diverge at midday as weakness in chip and AI-related names continues to weigh on the Nikkei, while a sharp rally in autos lifts the broader Topix. Toyota (7203), Nissan (7201) and Honda (7267) rise as much as 8.5%, 7.9% and 7.2%, respectively, on tariff relief expectations. The rotation follows Wednesday's selloff in technology names, when Taiyo Yuden (6976) and Socionext (6526) each fell more than 5%. Trading houses remain another area of support after Mitsubishi Corp. (8058) raised its full-year net profit outlook to a record ¥1.2 trillion and announced a ¥1 trillion share buyback.

日本：NKY-1.49%。日本股市午盘走势分化，芯片和 AI 相关个股的持续走弱拖累日经指数，而汽车股的强劲反弹提振了更广泛的东证指数。受关税缓解预期提振，丰田（7203）、日产（7201）和本田（7267）分别上涨 8.5%、7.9%和 7.2%。这一轮动发生在周三科技股抛售之后，当时太阳诱电（6976）和索思思（6526）均下跌超过 5%。三菱商事（8058）将全年净利润预期上调至创纪录的 1.2 万亿日元，并宣布了 1 万亿日元的股票回购计划，此后贸易商行成为另一个支撑领域。

China: SHSZ300 +0.36%. Mainland equities outperform the region at midday, with the SHCOMP erasing an opening decline of around 1% but meeting resistance around its 20-day moving average at 3,701, while the STAR 50 and ChiNext extend Wednesday's momentum. Turnover remains elevated after exceeding Rmb2tn on Wednesday and is projected above Rmb2.5tn, potentially the highest since early August and around 50% above the 20-day average. Renewables lead on domestic policy support and stronger post-midterm expectations, with Sungrow (300274) +7.45% and CATL (300750) +5.16%. Non-ferrous names outperform as gold and metals rebound, while TMT is mixed, with AI applications and software stronger but hardware weaker. Innolight (300308) falls 6.91% as the CPO rally fades, while oil, coal and financials lag amid lower crude prices and rotation into higher-beta themes.

中国：沪深 300 +0.36%。A 股午盘表现优于地区其他市场，上证综指抹去约 1%的跌幅，但在 3,701 点的 20 日均线附近遇阻，而科创 50 和创业板指延续周三的涨势。继周三成交额突破 2 万亿元后，市场交投保持活跃，预计今日将超过 2.5 万亿元，可能创下 8 月初以来的最高水平，较 20 日均值高出约 50%。受国内政策支持及中期选举后预期增强的推动，可再生能源板块领涨，阳光电源（300274）+7.45%，宁德时代（300750）+5.16%。随着黄金和金属反弹，有色金属个股表现优于大盘，而 TMT 板块涨跌互现，AI 应用和软件走强，硬件则偏弱。 随着 CPO（共封装光学）涨势消退，Innolight (300308) 下跌 6.91%；受原油价格下跌及资金轮动至高贝塔主题影响，石油、煤炭和金融板块表现滞后。

Hong Kong: HSI +3.09%. Hong Kong equities rally sharply at midday, with HSTech up as investors rotate from AI hardware into Chinese internet platforms. Alibaba (9988), Tencent (0700), Meituan (3690) and Xiaomi (1810) lead gains, supported by renewed interest in comparatively undervalued platform names. Tencent's newly released Hy4 AI model provides an additional catalyst for the technology complex, while the macro backdrop remains supportive after Hong Kong's economy grew 5.2% year-on-year in Q3, the fastest pace in five years.

香港：恒生指数 +3.09%。香港股市午盘大幅反弹，恒生科技指数上涨，因投资者从 AI 硬件转向中国互联网平台。阿里巴巴 (9988)、腾讯 (0700)、美团 (3690) 和小米 (1810) 领涨，受市场对相对低估值的平台股重拾兴趣支撑。腾讯新发布的 Hy4 AI 模型为科技板块带来额外催化剂，而香港经济第三季度同比增长 5.2%，创五年来最快增速，宏观背景依然向好。
