

TMTB Morning Wrap TMTB 晨间简报

TMT BREAKOUT
7 MINUTES AGO • PAID

Good morning. **QQQs -60bps** lower as **yields +4bps** across the curve and **Oil +5%** following several Trump is considering air strikes headlines and an uptick in Hormuz commercial ship attacks.:

早上好。由于收益率曲线各期限收益率上升 4bps，且在多则特朗普正考虑发动空袭的报道传出、霍尔木兹海峡商船遇袭事件增多后，油价上涨 5%，QQQ 下跌 60bps。

“Military ordered to be ready for possible Iran strikes as Trump weighs timing” ([Axios](#)), “U.S. military prepares new Iran war options ahead of midterm elections” ([NBC News](#)), and “Trump Is Considering a Plan to Strike Iran Before the Midterms” ([The Atlantic](#)) (h/t VK)

“特朗普权衡袭击时机之际，军方已奉命为可能对伊朗发动打击做好准备” (Axios)、 “美国军方在中期选举前制定新的对伊朗作战方案” (NBC News)，以及“特朗普正考虑在中期选举前打击伊朗的计划” (The Atlantic) (感谢 VK)

In Tech, focus on **Samsung** which finished -2% overnight after results that looked light of street, but a bit better than bogeys that had moved lower over the past couple of weeks. **GOOGL +1%** after announcing Gemini enterprise agents. **TSM -1%** after solid Sept numbers. **U +2%** after an RJ upgrade a few other positive sell-side notes.

科技板块方面，关注三星。该公司隔夜收跌 2%，业绩看起来低于市场预期，但略好于过去几周下调后的预期。GOOGL 上涨 1%，此前宣布推出 Gemini 企业级智能体。TSM 下跌 1%，此前公布稳健的 9 月数据。U 上涨 2%，此前 RJ 上调评级，另有几份卖方报告也给出积极评价。

Overnight, Asia generally weaker: TPX -1.51%, NKY -1.42%, Hang Seng -1.43%, HSCEI -0.89%, SHCOMP -0.79%, Shenzhen -1.63%, Taiwan TAIEX -0.99%, Korea KOSPI -2.62%. **Softbank -4%. Samsung/Hynix -2.5%**

隔夜亚洲市场普遍走弱：TPX -1.51%，NKY -1.42%，Hang Seng -1.43%，HSCEI -0.89%，SHCOMP -0.79%，Shenzhen -1.63%，台湾 TAIEX -0.99%，韩国 KOSPI -2.62%。Softbank 下跌 4%。Samsung/Hynix 下跌 2.5%。

PLTR: GS upgrades to Buy/\$230, sees another estimate-revision cycle as AI TAM expands

PLTR：GS 上调评级至买入，目标价\$230，认为随着 AI TAM 扩张，估值上修周期有望再度开启

GS says PLTR is set for another phase of outperformance into 2027, with sovereign AI, bespoke apps and verticalization potentially driving another step-function increase in TAM. It also sees the FDE model as a durable moat, built on tight field/product feedback loops and increasingly automated via AI FDEs. With shares +16% YTD vs. NDX +24% and at a discount to growth comps on EV/FCF, GS upgrades Neutral to Buy with a \$230 PT.

GS 表示，PLTR 有望在 2027 年前进入新一轮跑赢大市阶段，主权 AI、定制化应用和垂直化可能推动 TAM 再上一个台阶。GS 还认为，FDE 模式是其持久的护城河，依托紧密的现场与产品反馈循环，并通过 AI FDE 逐步实现更高程度的自动化。年初至今，PLTR 股价上涨 16%，低于 NDX 的 24%；按 EV/FCF 计算，其估值较成长型可比公司有折价。基于此，GS 将评级从中性上调至买入，目标价为\$230。

U: Raymond James upgrades to Outperform/\$54 as

Google partnership strengthens Create/Vector flywheel

U: Raymond James 上调评级至跑赢大市，目标价\$54，认为与 Google 的合作将强化 Create/Vector 飞轮

Raymond James says Google's AI + distribution closes a key gap in Unity's creator ecosystem, bringing the engine to non-coders and potentially driving more content, runtime data and engagement into Vector. Vector has already materially outperformed, growing 23% q/q in 2Q vs. initial 12–13% expectations, with Strategic Grow +63% y/y and 3Q growth guided to 68–70%; RJ sees this supporting durable share gains and margin expansion. It upgrades U to Outperform/\$54, valuing shares at 9x 2027E revenue of \$2.55B vs. ~7.5x currently and APP at ~8.9x.

Raymond James 表示，Google 的 AI 能力与分发优势弥补了 Unity 创作者生态中的一项关键短板，使非程序员也能使用其引擎，并有望为 Vector 带来更多内容、运行时数据和用户互动。Vector 的表现已显著超预期：2Q 环比增长 23%，而初步预期为 12–13%；Strategic Grow 同比增长 63%，3Q 增长指引为 68–70%。RJ 认为，这将助力公司持续提升市场份额并扩大利润率。RJ 将 U 评级上调至跑赢大市，目标价定为\$54，估值相当于 2027E 营收\$2.55B 的 9 倍，而目前为~7.5 倍，APP 为~8.9 倍。

NBIS: Rosenblatt initiates Buy/\$304, sees ~98% revenue CAGR through 2030 as #2 neocloud scales

NBIS: Rosenblatt 首次覆盖并给予买入评级/目标价\$304；随着其作为排名第二的新兴云服务商持续扩张，预计到 2030 年营收 CAGR 达~98%

Rosenblatt sees NBIS just behind CRWV among neoclouds, with ~250MW active power today and 3.5GW contracted, ~75% expected from fully owned sites. Revenue grew 5.5x y/y in 2Q26 and is expected to grow 6.5x in 2026, supporting a ~98% FY26–30 CAGR. Rosenblatt expects additional debt/equity funding despite customer prepayments, following August's \$5.75B convert, and initiates Buy/\$304.

Rosenblatt 认为，NBIS 在新兴云服务商中仅次于 CRWV，目前拥有~250MW 的活跃电力容量和 3.5GW 的已签约容量，其中预计~75%来自全资持有的站点。其 2Q26 营收同比增长 5.5 倍，预计 2026 年增长 6.5 倍，支撑 FY26–30 期间~98%的 CAGR。Rosenblatt 预计，尽管客户预付款提供了资金支持，NBIS 仍将需要额外的债务/股权融资；此前该公司已于 8 月发行规模为\$5.75B 的可转债。Rosenblatt 首次覆盖并给予买入评级/目标价\$304。

GOOGL: Google Cloud introduces Gemini Agent, a universal enterprise AI agent that autonomously plans and executes tasks across research, content creation, coding and business workflows using organizational context and integrated tools.

GOOGL：Google Cloud 推出 Gemini Agent，这是一款通用型企业 AI 代理，可利用组织上下文和集成工具，自主规划并执行研究、内容创作、编码及业务 workflows 等任务。

Automatically selects models, connects to enterprise systems and includes cost controls, security and centralized governance. Strengthens Google's push into enterprise AI automation, potentially driving Cloud adoption, customer retention and revenue growth.

该代理可自动选择模型、连接企业系统，并提供成本控制、安全保障和集中式治理。这将进一步强化 Google 在企业 AI 自动化领域的布局，有望推动 Cloud 业务的采用率、客户留存率和营收增长。

Reminder GOOGL CCloud CEO Thomas Kurian Keynote at 1:30pm ET.

提醒：GOOGL Cloud CEO Thomas Kurian 将于美国东部时间下午 1:30 发表主题演讲。

TSM: Sept Revenue -0.6% MoM, +54.6% YoY

TSM：9 月营收环比下降 0.6%，同比增长 54.6%

Avg Sept seasonality roughly flat m/m (so roughly in inline ex currency). Q3 came in at about US\$46.7B, roughly 2% above the top of the guide and 3.3% above the midpoint.

9 月的平均季节性表现大致持平（因此剔除汇率影响后，营收大致符合预期）。Q3 营收约为 US\$46.7B，较指引上限高出约 2%，较中值高出 3.3%。

TSMC September Revenue Report (Consolidated):

(Unit:NT\$ million)								
Period	September 2026	August 2026	M-o-M Increase (Decrease) %	September 2025	Y-o-Y Increase (Decrease) %	January to September 2026	January to September 2025	Y-o-Y Increase (Decrease) %
Net Revenue	511,857	514,806	(0.6)	330,980	54.6	3,898,727	2,762,964	41.1

Samsung / Memory: Samsung’s preliminary Q3 operating profit reached KRW107.4T (\$80.2B), versus LSEG’s KRW106.1T estimate. This was above buy-side boogies which had moved down to KRW105-106T. Implies 55% OM vs street at 53.8%

Samsung / Memory: Samsung 初步公布的 Q3 营业利润达到 KRW107.4T (\$80.2B)，高于 LSEG 预估的 KRW106.1T，也高于买方预期；买方预期此前已下调至 KRW105-106T。这意味着营业利润率为 55%，而市场预期为 53.8%。

AVGO / ORCL / SPCX: AI chip financing expands with \$50B-plus OpenAI deal – [WSJ](#)

AVGO / ORCL / SPCX: WSJ——OpenAI 签下逾\$50B 交易，AI 芯片融资规模扩大

WSJ reports Broadcom is discussing more than \$50B of financing for OpenAI’s custom-chip program, starting with Jalapeño, with Apollo, Blackstone and other lenders. The deal could cover several gigawatts and close by year-end. Oracle is separately talking to Apollo and Goldman Sachs about financing chip purchases through a vehicle that would own the hardware and lease it back. WSJ also reports SpaceX’s \$40B Nvidia-chip financing talks, first reported by FT on Tuesday.

WSJ 报道称，Broadcom 正与 Apollo、Blackstone 及其他贷款机构讨论为 OpenAI 定制芯片项目提供超过\$50B 的融资，项目将从 Jalapeño 开始。该交易可能涵盖数吉瓦的算力，并于年底前完成。Oracle 则在另行与 Apollo 和 Goldman Sachs 洽谈芯片采购融资，计划通过一家持有硬件并将其回租的特殊目的载体进行融资。WSJ 还报道称，SpaceX 正就\$40B 的 Nvidia 芯片融资进行谈判；FT 已于周二率先报道此事。

The chart has four distinct phases of DAU growth (reminder no international launch yet):

DAU 增长分为四个明显阶段（提醒一下：尚未在国际市场上线）：

- **Launch week:** Slow, averaging about +28K a day, and stalled around 220–240K from 9/12 to 9/15.

上线首周：增长缓慢，日均约 +28K，并在 9/12 至 9/15 期间停滞在 220–240K 左右。

- **Inflection (9/17–9/24):** Adds jumped to about +145K a day, roughly 1.2M new DAUs in eight days.

拐点（9/17–9/24）：新增用户跃升至每天约 +145K，八天内新增 DAU 约 1.2M。

- **Dip and rebound:** After one down day on 9/25, growth returned to about +145K a day from 9/27 to 9/30.

下滑后反弹：9/25 单天下滑后，9/27 至 9/30 的增长恢复至每天约 +145K。

- **Since 10/1:** Growth has slowed to about +45K a day, or 0–4% daily, though 10/4–10/5 picked back up to +80–90K.

自 10/1 起：增长已放缓至每天约 +45K，或每日 0–4%；不过 10/4–10/5 回升至 +80–90K。

Paul Graham  @paulg · 9h

Amazon banning agents is the first opportunity I've seen since Amazon was founded for a startup to create an Amazon competitor. People will want agents to buy stuff for them. It will be one of the main use cases. And they won't want to use some Amazon-supplied agent to do it.

META: Jefferies says Muse demand is strong, but agent access bottleneck could delay commerce monetization and benefit GOOGL

META：Jefferies 表示，Muse 需求强劲，但智能体接入瓶颈可能延迟商业化变现，并使 GOOGL 受益

Jefferies finds only ~1/3 of sites work seamlessly with Muse, with ~1/3 blocking access and ~1/3 challenging/restricting it, potentially delaying META's agentic-commerce take-rate opportunity while reinforcing GOOGL's distribution/access moat. Still, 40%

of advertisers expect Muse to increase META spend over the next 12 months.

Buy/\$875.

Jefferies 发现，只有~1/3 的网站能够与 Muse 无缝协作，~1/3 的网站会阻止访问，另有~1/3 的网站会造成使用困难或加以限制，这可能延迟 META 通过代理式商务获取抽成收入的机会，同时凸显 GOOGL 在分发和访问方面的护城河。不过，40%的广告主预计，未来 12 个月内 Muse 会推动 META 支出增加。买入/\$875。

WOLF: TD Cowen says \$1.5B DoW loan largely removes financing/dilution risk

WOLF: TD Cowen 称，DoW 的\$1.5B 贷款将大幅消除融资和稀释风险

TD Cowen says WOLF's conditional \$1.5B DoW loan commitment should put post-bankruptcy financing concerns largely to rest and ease customer worries around liquidity, with PIK structure adding only ~\$100M/year of cash burn. The 30-year facility includes \$600M initially and \$900M across later tranches, supporting SiC/GaN capacity and domestic GaN development. Cowen remains Hold/\$25 as SiC demand is still challenged and GaN execution/scaling will take time.

TD Cowen 称，WOLF 获得 DoW 有条件承诺提供的\$1.5B 贷款，应能基本打消破产后融资方面的顾虑，并缓解客户对流动性的担忧；PIK 结构每年仅增加~\$100M 的现金消耗。这项为期 30 年的融资安排包括初始拨付的\$600M，以及后续分批拨付的\$900M，将支持 SiC/GaN 产能和美国本土 GaN 开发。Cowen 维持持有评级/\$25，因为 SiC 需求仍面临挑战，而 GaN 的执行和规模化还需要时间。

China AI: 24GW operating, with another 50GW planned or under construction – [FT](#)

中国 AI：24GW 已投入运营，另有 50GW 处于规划或建设阶段——FT

FT reports China has 24GW of operating data-center capacity and another 50GW under construction or announced, citing SemiAnalysis. Ulanqab has 89 facilities built or planned and about 15GW committed, supported by cheap power and 12–18-month

construction schedules. FT saw Vertiv cooling equipment at several sites. Facilities using domestic chips receive additional tax and utility incentives, while access to advanced processors remains a key constraint on the buildout.

FT 报道称，援引 SemiAnalysis 的数据，中国已投运的数据中心容量为 24GW，另有 50GW 处于建设中或已宣布建设。乌兰察布已建成或规划建设 89 座设施，承诺容量约 15GW，得益于低廉的电力成本和 12-18 个月的建设周期。FT 在多个站点看到了 Vertiv 的冷却设备。使用国产芯片的设施可获得额外的税收和公用事业激励，而先进处理器的获取仍是扩建的关键制约因素。

MRVL: Jefferies NDR reinforces broader DC opportunity beyond XPU

MRVL: Jefferies NDR 进一步印证 XPU 以外更广阔的数据中心机遇

Jefferies says scale-out drives most of MRVL's \$37.5B C30 interconnect target, while scale-up is a separate \$20-30B TAM and scale-across units rise from <1M in C25 to ~3M in C30. Custom is broadening beyond XPU into attach products, Smart NICs could reach \$10B+, inference accelerators ramp from C29+, and Ethernet switching is tracking >\$1B next year vs. ~\$600M with 100T/UALink upside. Buy/\$450.

Jefferies 表示，Scale-out 贡献了 MRVL 375 亿美元 C30 互连目标的大部分；Scale-up 则是独立的 200 亿至 300 亿美元 TAM，而 Scale-across 单位出货量将从 C25 的<1M 增至 C30 的~3M。定制业务正从 XPU 拓展至配套产品；Smart NIC 的规模可能达到 100 亿美元以上；推理加速器将从 C29+开始放量；以太网交换业务预计明年将超过 10 亿美元，高于~6 亿美元，且 100T/UALink 带来上行空间。买入/\$450。

NVDA / Firmus: \$5.5B IPO falters at proposed \$30B valuation – [Bloomberg](#)

NVDA / Firmus: 拟以 300 亿美元估值进行的 55 亿美元 IPO 受挫——Bloomberg

Bloomberg reports Nvidia-backed Firmus's planned \$5.5B IPO is uncertain after demand fell short at A\$11 a share, implying a roughly \$30B valuation versus \$10.5B in August. The company generated \$51M of FY2026 revenue and has built 46MW of its

912MW pipeline. Investors flagged further financing needs and an overhang from 58% of shares being tradable at listing; pricing remained unresolved after books closed.

彭博社报道称，英伟达支持的 Firmus 原计划以 55 亿美元估值进行 IPO，但由于每股 A\$11 的定价需求不足，上市计划前景未明；这一价格意味着公司估值约为 300 亿美元，高于 8 月的 105 亿美元。公司 FY2026 营收为 5100 万美元，其 912MW 的项目储备中已有 46MW 建成。投资者指出，公司仍需进一步融资，且上市时 58% 的股份可流通也构成潜在抛压；簿记结束后，定价仍未敲定。

NXPI: Citi downgrades to Neutral/\$260 as estimate-revision momentum slows

NXPI：花旗因预期修正动能放缓，将评级下调至中性，目标价 260 美元

Citi cuts NXPI to Neutral from Buy and PT to \$260 from \$370, arguing positive semi estimate revisions slowed in 2Q and should moderate further in 3Q. Citi is becoming more selective and expects NXPI revisions to lag peers given limited data-center exposure.

花旗将 NXPI 评级从买入下调至中性，目标价从 370 美元下调至 260 美元，理由是半导体行业的正向预期修正在第二季度放缓，预计第三季度将进一步趋缓。花旗正采取更为审慎的选股策略，并预计 NXPI 的预期修正幅度将落后于同业，因为其数据中心业务敞口有限。

HUBS: JPM downgrades to Neutral/\$240 on delayed AI monetization and uncertain growth recovery

HUBS：摩根大通因 AI 变现延迟、增长复苏前景不明，将评级下调至中性，目标价 240 美元

JPM cuts HUBS to Neutral from OW and PT to \$240 from \$268, citing an uncertain timeline for revenue growth to recover. AI monetization is taking longer than expected, which JPM sees as a medium-term growth headwind rather than a temporary issue.

JPM 将 HUBS 评级从增持下调至中性，目标价从\$268 下调至\$240，理由是营收增长恢复的时间表仍不确定。AI 变现所需时间比预期更长，JPM 认为这将成为中期增长的阻力，而非暂时性问题。

ANET: Evercore ISI says new rack-scale architecture meaningfully expands AI networking opportunity

ANET: Evercore ISI 称，全新机架级架构显著拓展 AI 网络市场机遇

Evercore says ANET's new Etherlink architecture extends Ethernet into scale-up, supporting 144 XPU's single-hop and 1,024 cross-rack, while next-gen optics lift capacity ~4x to 6.5 Pb/s/rack and cut DC footprint ~50%. Flexible designs spanning AMD/Arm/Broadcom/Marvell/Meta/MSFT and NVLink/PCIe strengthen ANET's ability to serve multiple accelerator ecosystems across scale-up/scale-out. OP/\$250.

Evercore 表示，ANET 全新的 Etherlink 架构将以太网扩展至纵向扩展场景，支持单跳连接 144 个 XPU，跨机架连接 1,024 个 XPU；与此同时，新一代光学技术将容量提升~4 倍至 6.5 Pb/s/rack，并将数据中心占地面积减少~50%。涵盖 AMD/Arm/Broadcom/Marvell/Meta/MSFT 以及 NVLink/PCIe 的灵活设计，增强了 ANET 服务多个加速器生态系统、覆盖纵向扩展和横向扩展场景的能力。增持/\$250。

MSFT: MS says multi-model AI strengthens full-stack moat, enabling monetization across the stack

MSFT: MS 认为，多模型 AI 增强了全栈护城河，有助于在整个技术栈中实现变现

MS says a multi-model world increasingly favors MSFT's integrated Azure/Fabric/Foundry/Copilot stack: Azure runs the models, Fabric provides enterprise context, Foundry orchestrates/model-routes and Copilot distributes AI to users, with Maia/Cobalt adding further differentiation. Fabric is already >\$2B annualized revenue, >17K customers use both Fabric + Foundry (+60% y/y) and M365 Copilot has ~30M paid seats. This lets MSFT monetize the same AI workflow across infrastructure, data, orchestration and apps while remaining relatively model-agnostic, strengthening the consumption flywheel.

MS 表示，多模型世界日益有利于 MSFT 的一体化

Azure/Fabric/Foundry/Copilot 技术栈：Azure 运行模型，Fabric 提供企业级上下文，Foundry 负责编排和模型路由，Copilot 则将 AI 分发给用户，Maia/Cobalt 进一步形成差异化优势。Fabric 的年化营收已超过\$2B，超过 17K 家客户同时使用 Fabric 和 Foundry（同比增长 60%），M365 Copilot 的付费席位已达 30M。这使 MSFT 能够围绕同一 AI 工作流，从基础设施、数据、编排到应用实现变现，同时保持相对不依赖特定模型的定位，进一步强化消费飞轮。

U: DB says Google Spark partnership could open a new creator monetization vector

U: DB 称，Google 与 Spark 的合作或可开辟新的创作者变现渠道

DB says Unity's Google partnership could expand revenue across Create/Grow by letting non-coders build games through Spark, widening the funnel from ~1M professional developers toward the ~3B people who play Made with Unity games monthly. Monetization could come from paid Spark tiers, more runtime data improving Vector, greater discovery/UA demand across Unity's ad network and potential ad/IAP participation within Spark. More creation also strengthens the broader data/ad flywheel, notes DB.

DB 称，Unity 与 Google 的合作或可通过 Spark 扩大 Create/Grow 业务的营收，让非程序员也能开发游戏，从而将漏斗从 1M 名专业开发者扩展至每月游玩 Made with Unity 游戏的 3B 人群。变现方式可能包括 Spark 付费层级、更多运行时数据提升 Vector 表现、Unity 广告网络中的发现和用户获取（UA）需求增长，以及在 Spark 内参与广告和应用内购买（IAP）分成。DB 指出，创作活动增加也将增强更广泛的数据与广告飞轮。

U: Jefferies survey sees U as biggest '27 share gainer, raises PT to \$54 from \$50

U: Jefferies 调查显示 U 有望成为 2027 年市场份额增幅最大的公司，目标价从\$50 上调至\$54

Jefferies' 30-buyer survey shows U again as the biggest expected share gainer into

'27, with Q3 customer spend +9% q/q vs. ~20% Vector growth implying continued take-rate improvement. U remains just 10–15% of wallet, leaving room to gain share; Jefferies raises '27 Vector to \$1.69B (+45% y/y), revenue 5% to \$2.6B and EBITDA 11% to \$951M, lifting PT to \$54 from \$50.

Jefferies 对 30 位买家的调查显示，U 再次被认为有望在 2027 年前成为市场份额增幅最大的公司；第三季度客户支出环比增长 9%，而 Vector 增长~20%，意味着变现率有望持续提升。U 目前仅占客户钱包份额的 10–15%，仍有提升空间；Jefferies 将 2027 年 Vector 预测上调至 \$1.69B（同比增长 45%），营收预测上调 5% 至 \$2.6B，EBITDA 预测上调 11% 至 \$951M，并将目标价从 \$50 上调至 \$54。

APP: Jefferies cuts '27 EBITDA 7%/PT to \$375 as gaming share flattens, but reiterates Buy

APP: Jefferies 下调 2027 年 EBITDA 预测 7%，目标价降至 \$375；游戏市场份额趋平，但重申买入评级

Jefferies sees APP gaming share roughly flat at ~30% into '27 after years of gains, making further share expansion harder and putting more emphasis on take-rate improvement. It cuts '27 revenue 5% to \$10.1B and EBITDA 7% to \$8.4B, lowering PT to \$375 from \$550, but keeps Buy as industry spend still grows ~7% in '27 and APP remains the top ROAS network for 4 of the 9 largest studios surveyed.

Jefferies 预计，APP 的游戏市场份额在经历多年增长后，到 2027 年将大致持平于~30%，进一步扩大份额将更加困难，因此变现率提升将更为重要。Jefferies 将 2027 年营收预测下调 5% 至 \$10.1B，EBITDA 预测下调 7% 至 \$8.4B，并将目标价从 \$550 下调至 \$375，但维持买入评级，因为行业支出在 2027 年仍将增长~7%，且在受访的 9 家最大工作室中，APP 仍是其中 4 家的 ROAS 表现最佳的广告网络。

TTWO: Hearing M-sci saying pre-orders strong and continue to point to ~50M sell-through through Dec...[The Verge](#) reporting Xbox has secured GTA 6 streaming rights

TTWO: 听到 M-sci 称预购强劲, 并继续预计截至 12 月的实际销量达到~50M.....The Verge 报道称, Xbox 已获得 GTA 6 的流媒体播放权

WDAY: Jefferies cuts PT to \$210, says growth/margins still lag peers as AI monetization remains early

WDAY: Jefferies 将目标价下调至\$210, 称增长/利润率仍落后于同业, AI 变现仍处于早期阶段

Jefferies keeps Hold as WDAY's rev/backlog growth decelerates, with CY27 Rule of 43, low-30s OPM and ~14% backlog growth lagging large-cap peers despite a ~20% valuation discount. AI ARR is only ~\$600M/~6% of revenue, while core HCM/FINS growth has slowed and WDAY has gained <2pts of share vs. SAP/ORCL over 4 years. Jefferies likes the AI setup and sticky 80M-user platform but wants subscription growth to reaccelerate beyond ~11%; cuts PT to \$210 from \$220.

Jefferies 维持对 WDAY 的持有评级: WDAY 的营收/积压订单增长正在放缓, CY27 Rule of 43、30%出头的 OPM 以及~14%的积压订单增长均落后于大型股同业, 尽管估值折价~20%。AI ARR 仅为~\$600M/约占营收的 6%; 与此同时, 核心 HCM/FINS 增长已放缓, 过去 4 年 WDAY 相较 SAP/ORCL 的市场份额仅提升不到 2 个百分点。Jefferies 看好其 AI 发展前景和拥有 8,000 万用户、客户黏性强的平台, 但希望订阅业务增长重新加速至超过~11%; 将目标价从 \$220 下调至\$210。

NOW: DB sees solid 3Q + resilient federal demand, with AI upside building into 2027

NOW: DB 认为 3Q 表现稳健、联邦政府需求具有韧性, AI 带来的上行空间将在 2027 年逐步扩大

DB expects a solid 3Q with stable federal trends, modest FY26 subscription guidance upside and ~19.5% y/y cc 4Q cRPO growth, supporting stable organic growth into FY27. A leading federal partner says business is roughly flat despite budget pressure, with core products highly defensible and shelfware now <5% vs. 10–20% ~18 months ago. AI adoption remains early, but outcome-based deployments and expansion from limited initial use cases support more meaningful contribution in 2027; Buy/\$155.

DB 预计 3Q 业绩稳健，联邦业务趋势稳定，FY26 订阅收入指引略有上行空间，且 4Q cRPO 同比增长~19.5%，支持有机增长在 FY27 保持稳定。一位领先的联邦业务合作伙伴表示，尽管预算承压，业务总体持平；核心产品防御力很强，闲置软件占比目前不足 5%，而~18 个月前为 10–20%。AI 应用仍处于早期阶段，但基于成果的部署以及从有限初始应用场景向外扩展，将推动 AI 在 2027 年作出更显著的贡献；买入/\$155。

Cyber: Barclays VAR call positive on NET/OKTA/CRWD/PANW; mixed elsewhere

网络安全：Barclays 的 VAR 调研看好 NET/OKTA/CRWD/PANW；其他公司表现不一

Barclays' security VAR call was most positive on NET, OKTA, CRWD and PANW: NET saw healthy 3Q growth as AI-driven traffic pushed customers into higher tiers; OKTA saw healthy Aug/Sept growth with identity the VAR's #1 CIO/CISO priority; CRWD posted strong y/y growth and is taking share beyond endpoint; and PANW saw healthy growth with Prisma AIRS traction and neocloud AI-infrastructure demand. FTNT also outperformed, while ZS was more mixed and CHKP/VRNS/RBRK/TENB were softer.

Barclays 的安全软件 VAR 调研最看好 NET、OKTA、CRWD 和 PANW：AI 驱动流量推动客户转向更高等级服务，NET 的 3Q 增长势头良好；身份管理是 VAR 受访者心目中 CIO/CISO 的首要任务，OKTA 在 8 月/9 月增长稳健；CRWD 同比增长强劲，且正在终端安全以外的领域扩大市场份额；受益于 Prisma AIRS 的良好市场表现以及新云厂商对 AI 基础设施的需求，PANW 增长稳健。FTNT 也表现出色，ZS 的表现则较为参差，CHKP/VRNS/RBRK/TENB 相对疲软。

P: Needham raises PT to \$185 from \$150 after CFO meeting, conviction increases on growth durability

P: Needham 在与 CFO 会面后将目标价从\$150 上调至 \$185，对增长持续性的信心增强

Needham comes away more constructive on P's growth breadth, with Hyperscale still the main near-term driver and Data Primacy expanding the opportunity beyond traditional infrastructure budgets into CIO/CDO/CISO/AI spend. Evergreen//One should

support recurring revenue, retention and cross-sell into Modern Data Software, reinforcing P's evolution into a broader multi-engine infrastructure platform. Buy/\$185.

Needham 对 P 的增长广度看法更趋积极，Hyperscale 仍是近期主要驱动力，而 Data Primacy 正将机遇从传统基础设施预算扩展至 CIO/CDO/CISO/AI 支出。Evergreen//One 应有助于提升经常性收入、客户留存率，并推动向 Modern Data Software 交叉销售，进一步强化 P 向更广泛的多引擎基础设施平台转型。买入/目标价\$185。

ESTC: Citi meeting raises conviction on 20%+ sales-led growth, with AI/Metrics upside unmodeled

ESTC：Citi 会谈增强了对销售驱动型增长超过 20%的信心，AI/Metrics 上行空间尚未纳入模型

Citi says FY25/26 execution issues were driven by territory changes and insufficient sales capacity rather than demand, with bookings improvement already showing in cRPO/revenue. New Metrics could reaccelerate Observability, while self-managed AI, Security AI/Attack Discovery and agentic SOC are not reflected in current guidance or FY29 Rule of 45 framework. Buy/\$128.

Citi 表示，FY25/26 的执行问题源于区域调整和销售能力不足，而非需求疲软；cRPO/收入已显现预订改善迹象。全新的 Metrics 可能推动 Observability 重新加速增长，而自管理 AI、Security AI/Attack Discovery 和 agentic SOC 均未反映在当前指引或 FY29 Rule of 45 框架中。买入/目标价\$128。

Internet: Evercore reshuffles top longs to AMZN/META/SPOT; TAP Outperform RDDT, Underperform BKNG

互联网：Evercore 调整 AMZN/META/SPOT 为核心多头标的；TAP 将 RDDT 评级上调至跑赢大盘，将 BKNG 评级下调至逊于大盘

Evercore moves AMZN to #1 Large Cap Long on AWS accelerating to +37% y/y, ~39% margins and ~\$500B backlog, with PT \$355/>40% upside; META falls to #2 but remains favored as Muse/Business Agents expand AI monetization, PT \$860; and SPOT replaces DASH at #3 as AI disintermediation fears look overdone and

audiobooks/add-ons plus an expected AI tier support ARPU, PT \$700/~43% upside. Tactically, Evercore is Outperform RDDT after a -34% YTD pullback with improving ad checks/DAUs and licensing upside, while Underperform BKNG on greater Q4 risk from weak long-haul travel and ~7% Middle East bookings exposure.

Evercore 将 AMZN 列为第一大市值股看多标的，因 AWS 增速加快至同比 +37%，利润率为~39%，积压订单达~\$500B；目标价为\$355，潜在涨幅超过 40%。META 降至第二位，但仍是其青睐标的，因 Muse/Business Agents 拓展 AI 变现空间，目标价为\$860。SPOT 取代 DASH 升至第三位，因市场对 AI 去中介化的担忧似乎过度，而有声书、附加服务及预计推出的 AI 套餐有望支撑 ARPU，目标价为\$700，潜在涨幅约 43%。战术层面，Evercore 给予 RDDT“跑赢大盘”评级，因其年初至今回调 34%后，广告业务跟踪指标/DAU 改善，且授权业务存在上行空间；同时给予 BKNG“跑输大盘”评级，因长途旅行疲软及中东地区~7%的预订占比带来更大的第四季度风险。

SPOT: Citi sees global audiobook rollout as meaningful 2027 gross-margin tailwind

SPOT：花旗认为，全球推出有声书将显著提振 2027 年毛利率

Citi says SPOT is expanding Premium audiobooks to 10+ new markets covering ~20–25% of subs, alongside global Audiobooks+ and direct sales. Based on prior launches, Citi expects ~10% price hikes around mid-2027 with ~90% flow-through to gross profit, driving ARPU and margin expansion. Rollout costs could modestly pressure 4Q26 GM before becoming a meaningful FY27 tailwind.

花旗表示，SPOT 正将 Premium 有声书服务拓展至 10 多个新市场，覆盖~20–25%的订阅用户，同时推出全球版 Audiobooks+并开展直销。根据以往的推出经验，花旗预计 SPOT 将在 2027 年年中前后提价~10%，其中~90%的增量将传导至毛利润，从而推动 ARPU 和利润率提升。推出相关成本可能会在 4Q26 对毛利率造成轻微压力，但随后将成为 FY27 的重要利好。

BABA: MS raises F27/28 EBITA 7–10%, sees cloud accelerating +55% y/y with margin inflection

BABA：MS 上调 F27/28 EBITA 预期 7–10%，预计云业务同比增速加快至+55%，利润率迎来拐点

MS reiterates OW/Top Pick/\$180 as external cloud accelerates to ~55% y/y, with EBIT margin expanding to 13.5% and MaaS ARR reaching RMB20B in late Aug vs. RMB16B mid-month; cloud EBIT should exceed RMB10B/~15% margin in Dec Q, fully offsetting AI Labs losses. E-commerce is holding with CMR -5% y/y but +1% LFL and EBIT +LSD, while F27/28 capex stays RMB250B/RMB260B with no further equity funding planned for F27.

MS 重申增持/首选/\$180：外部云业务加速至~同比增长 55%，EBIT 利润率扩大至 13.5%，MaaS ARR 在 8 月下旬达到 RMB20B，高于月中 RMB16B；云业务 12 月季度 EBIT 应超过 RMB10B/利润率约 15%，足以完全抵消 AI Labs 的亏损。电商业务保持稳定，CMR 同比下降 5%，但同店增长（LFL）为 1%，EBIT 实现低个位数增长（LSD）；F27/28 资本开支维持在 RMB250B/RMB260B，F27 暂无进一步股权融资计划。

GPN/FISV: Oppenheimer upgrades GPN, downgrades FISV; TOST/XYZ estimates above Street

GPN/FISV：Oppenheimer 上调 GPN 评级、下调 FISV 评级；TOST/XYZ 预期高于华尔街一致预期

Oppenheimer upgrades GPN to Outperform/\$115 as <6x NTM P/E discounts 2026 risk, with lower one-time costs/opex leverage driving 2027 EPS ~4% above Street. FISV falls to Perform on continued execution risk and dependence on delayed implementations for a 4Q ramp, while TOST/XYZ are ~1%/~1.5% above Street on gross profit and both ~4% above on EBITDA. FOUR likely trims guidance on Middle East exposure, while WU Street estimates look too high.

Oppenheimer 将 GPN 上调至跑赢大市/\$115，认为低于 6 倍的未来 12 个月市盈率（NTM P/E）已反映 2026 年的风险；一次性成本降低及运营费用杠杆将推动 2027 年 EPS 比华尔街一致预期~高出 4%。FISV 因执行风险持续存在，且 4Q 增长依赖延迟项目落地，下调至与大市同步；TOST/XYZ 的预期分别比华尔街一致预期高~1%/~1.5%，依据是毛利润，二者的 EBITDA 预期均~高出 4%。FOUR 可能因中东业务敞口而下调指引，而华尔街对 WU 的预期似乎过高。

GRMN: JPM tracker shows softer-than-seasonal September downloads, creating mild 3Q setup risk

GRMN: JPM 追踪数据显示, 9 月下载量较季节性水平疲软, 令 3Q 业绩面临轻微风险。

JPM says Garmin Connect downloads fell -7.8% m/m in September vs. -5.8% seasonal and MAUs -2.8% vs. -0.1% seasonal, though YTD downloads remain +20.6% y/y.

JPM's 3Q Fitness/Outdoor revenue forecast of \$1.289B remains above Street's \$1.259B, making the softness a mild setup risk rather than a fundamental break.

JPM 称, Garmin Connect 9 月下载量环比下降 7.8%, 而季节性降幅为 5.8%; 月活跃用户 (MAU) 下降 2.8%, 而季节性降幅为 0.1%, 不过年初至今下载量仍同比增长 20.6%。JPM 对第三季度健身/户外业务收入的预测为 12.89 亿美元, 仍高于华尔街一致预期的 12.59 亿美元, 因此这一疲软表现只是轻微的业绩预期风险, 并不意味着基本面出现转折。

NEWS

OpenAI / Anthropic: Price cuts bring OpenAI level in OpenRouter spending sample – [WSJ](#)

OpenAI / Anthropic: 降价使 OpenAI 在 OpenRouter 支出样本中的份额追平 Anthropic——《华尔街日报》

WSJ reports OpenAI and Anthropic split spending roughly evenly in September among 120,000 companies tracked by OpenRouter, versus Anthropic's 75% share at the start of the year. The sample is weighted toward AI-native businesses. OpenAI cut GPT-5.6 Luna pricing 80% and Terra 20% after launch, while Retool says using OpenAI now costs it about 20% less than Anthropic.

《华尔街日报》报道, 在 OpenRouter 追踪的 12 万家公司中, 9 月 OpenAI 和 Anthropic 的支出大致持平; 年初时, Anthropic 的份额为 75%。该样本中的企业以原生 AI 公司为主。OpenAI 在发布后将 GPT-5.6 Luna 的价格下调 80%, 将 Terra 的价格下调 20%; Retool 表示, 如今使用 OpenAI 的成本比使用 Anthropic 低约 20%。

Anthropic: Haiku 5.5 launches at 75% lower cost – [Reuters](#)

Anthropic: Haiku 5.5 发布，成本降低 75%——路透社

Reuters reports Anthropic launched Claude Haiku 5.5, its third Claude 5.5 model in a month, with a stated cost 75% below Haiku 4.5. Pricing starts at \$0.10 per million input tokens and \$0.50 per million output tokens for prompts below 100,000 tokens. The model targets support, voice assistants and other high-volume tasks, and adds safeguards for selected high-risk cybersecurity requests.

据路透社报道，Anthropic 推出了 Claude Haiku 5.5，这是该公司一个月内发布的第三款 Claude 5.5 模型，官方称其成本比 Haiku 4.5 低 75%。对于低于 100,000 个 token 的提示词，定价为每百万个输入 token \$0.10，每百万个输出 token \$0.50。该模型面向客服支持、语音助手及其他高吞吐量任务，并针对部分高风险网络安全请求增加了防护措施。

Claude

Data Centers: San Francisco adopts immediate 45-day development moratorium – Bloomberg

数据中心：旧金山立即实施为期 45 天的开发暂停令——Bloomberg

Bloomberg reports San Francisco unanimously approved an immediate 45-day ban on new data centers while considering longer-term restrictions. The moratorium can be extended for roughly two years. Officials cited electricity, water and environmental concerns, with the ordinance’s sponsors specifically targeting a proposed development in Bayview-Hunters Point.

Bloomberg 报道，旧金山一致通过立即暂停新建数据中心 45 天，同时研究更长期的限制措施。这项暂停令可延长约两年。官员提到了电力、用水和环境方面的担忧，法令发起方则明确将目标指向 Bayview-Hunters Point 的一项拟议开发项目。

CRWD / Cybersecurity: CrowdStrike links Korean bank breaches to AI-assisted attacker – [Reuters](#)

CRWD / 网络安全：CrowdStrike 将韩国银行遭入侵事件与借助 AI 的攻击者联系起来——Reuters

Reuters reports CrowdStrike suspects a China-based attacker used the ARTEX penetration-testing agent and Anthropic’s Claude Code in breaches targeting South Korean banks. At least nine banks have disclosed or been reported as targets since late September; Shinhan exposed data on about 25,000 customers. CrowdStrike says the case shows how one attacker can use AI agents to target many organizations quickly.

据路透社报道，CrowdStrike 怀疑，一名来自中国的攻击者利用 ARTEX 渗透测试代理和 Anthropic 的 Claude Code，入侵了韩国多家银行。自 9 月下旬以来，至少有 9 家银行披露或被报道成为攻击目标；新韩银行约 25,000 名客户的数据遭到泄露。CrowdStrike 表示，此案表明，一名攻击者如何借助 AI 代理迅速将攻击目标扩大至多家机构。

MU / Samsung / SK Hynix: Counterpoint pushes back on reports of lower HBM content – [EBN](#)

MU / Samsung / SK Hynix：Counterpoint 驳斥 HBM 含量降低的报道 – EBN

EBN reports Counterpoint’s checks indicate most Nvidia Rubin products are converging on 12-layer HBM, countering speculation that the platform would move to

eight layers. The research firm also found no evidence of the four-layer HBM configurations rumored for custom AI chips. Counterpoint says HBM requires more than three times the production capacity of conventional DRAM, keeping pressure on broader memory supply.

据 EBN 报道，Counterpoint 的调查显示，大多数 Nvidia Rubin 产品正趋于采用 12 层 HBM，这与该平台将转向 8 层 HBM 的猜测相反。该研究机构还未发现传闻中定制 AI 芯片采用 4 层 HBM 配置的证据。Counterpoint 表示，HBM 所需的产能是传统 DRAM 的三倍以上，这使整体存储器供应持续承压。

BESI / HBM: Hybrid-bonding delays weigh on shares as memory shortages persist – [Bloomberg](#)

BESI / HBM：混合键合延迟拖累股价，存储器短缺持续 – Bloomberg

Bloomberg reports Besi shares fell 14% this week after UBS cut its rating to sell and BofA moved to neutral. Investors worry memory shortages and the cost of hybrid bonding will delay adoption. SemiAnalysis says Nvidia's Rubin Ultra will use fewer memory layers, reducing the immediate need for Besi's tools; Bernstein still expects adoption longer term as memory supply catches up.

彭博社报道，Besi 股价本周下跌 14%，此前 UBS 将其评级下调至卖出，BofA 则将评级调整为中性。投资者担心，内存短缺和混合键合的成本会推迟相关技术的普及。SemiAnalysis 称，Nvidia 的 Rubin Ultra 将采用更少的内存层，从而降低对 Besi 工具的短期需求；Bernstein 仍预计，随着内存供应追上需求，长期来看该技术将得到普及。

NVDA / MSFT: RTX Spark Windows PCs open for orders; shipments start October 16 – [DigiTimes](#)

NVDA / MSFT：RTX Spark Windows PC 开放预订；10 月 16 日开始发货 – DigiTimes

DigiTimes reports Nvidia-powered Windows laptops are available for preorder across Microsoft, Dell, HP, Lenovo, ASUS and MSI, with shipments beginning October 16. Microsoft's Surface Laptop Ultra starts at \$2,599, while its \$5,999 RTX Spark Dev Box ships in November. The platform combines Nvidia's Grace CPU and Blackwell GPU

with up to 128GB of unified memory; MediaTek helped design the CPU

DigiTimes 报道，搭载 Nvidia 芯片的 Windows 笔记本电脑已在 Microsoft、Dell、HP、Lenovo、ASUS 和 MSI 开放预订，10 月 16 日开始发货。Microsoft 的 Surface Laptop Ultra 起售价为\$2,599，而售价\$5,999 的 RTX Spark Dev Box 将于 11 月发货。该平台将 Nvidia 的 Grace CPU 与 Blackwell GPU 相结合，统一内存最高可达 128GB；MediaTek 参与了 CPU 的设计。

TSM / ASX / AMKR: Analysts see CoWoS capacity rising 57% in 2027 – [China Times](#)

TSM / ASX / AMKR：分析师预计 CoWoS 产能将在 2027 年增长 57% – China Times

China Times reports analysts expect TSMC's monthly CoWoS capacity to increase from 140,000 wafers at end-2026 to 220,000 at end-2027. They estimate related outsourced packaging capacity at ASE, SPIL and Amkor will rise from 40,000 to 65,000 wafers. The report also cites forecasts for TSMC capex of \$80B in 2027 and \$100B in 2028; these are analyst estimates.

《中国时报》报道称，分析师预计，TSMC 的月度 CoWoS 产能将从 2026 年底的 140,000 片晶圆增至 2027 年底的 220,000 片。分析师估计，ASE、SPIL 和 Amkor 的相关外包封装产能将从 40,000 片增至 65,000 片。报道还援引了对 TSMC 资本支出的预测：2027 年为\$80B，2028 年为\$100B；这些均为分析师估算。

SK Hynix / Solidigm: Banks selected for potential \$10B US IPO in 2027 – [Bloomberg](#)

SK Hynix / Solidigm：据彭博社报道，已为 2027 年潜在规模达\$10B 的美国 IPO 选定银行

Bloomberg reports Solidigm has selected Goldman Sachs and Morgan Stanley to lead a US IPO next year that could raise roughly \$10B. SK Hynix's SSD subsidiary is also pursuing a pre-IPO funding round and has discussed a valuation of as much as \$100B. The planned listing comes as AI infrastructure spending boosts demand for enterprise storage.

彭博社报道称，Solidigm 已选定 Goldman Sachs 和 Morgan Stanley，负责牵头其明年在美国进行的 IPO，募资额可能约为\$10B。SK Hynix 旗下这家 SSD 子公司也在筹划 IPO 前融资，并讨论过最高达\$100B 的估值。随着 AI 基础设施支出带动企业存储需求增长，该公司正计划上市。

TCEHY: Considers up to \$5B offshore bond offering – [Bloomberg](#)

TCEHY：据彭博社报道，考虑发行最高达\$5B 的离岸债券

Bloomberg reports Tencent is considering raising as much as \$5B through dollar and offshore-yuan bonds, potentially as soon as October, after a \$4.7B sale in June. The financing discussions come as the company accelerates AI investment: capex in the June quarter rose 176% to RMB52.8B (\$7.9B).

据彭博社报道，腾讯正考虑通过发行美元债券和离岸人民币债券筹资至多 50 亿美元，最早可能于 10 月进行。此前，该公司 6 月发行了 47 亿美元债券。此次融资讨论正值公司加大 AI 投资之际：第二季度资本开支同比增长 176%，达到 528 亿元人民币（79 亿美元）。

META: Florida seeks teen ad ban and two-hour daily usage cap – [Reuters](#)

META：佛罗里达州寻求禁止向青少年投放广告并将每日使用时长上限设为两小时——路透社

Reuters reports Florida asked a court to impose immediate restrictions on Facebook and Instagram, including removing accounts held by children under 14, limiting teens to two hours of daily use across Meta apps, and disabling advertising, autoplay and infinite scroll for minors. Florida declined to join the separate settlement with 48 states and Washington, DC, which could cost Meta up to \$18B.
